ANNUAL REPORT
OF THE
LIBRARIAN

1907

(Reprinted from the President's annual report to the Board of Curators,
1907-08, with an appendix.)

LIBRARY COMMITTEE.

C. A. Ellwood (College of Arts and Science),
C. M. Jackson (Department of Medicine),
R. H. Jesse (President of the University), Ex-Officio,
John D. Lawson (Department of Law),
W. G. Manly (College of Arts and Science), Secretary,
J. L. Meriam (Teachers College),
F. B. Mumford (College of Agriculture and Mechanic Arts),
H. O. Severance, Ex-Officio, Chairman,
H. B. Shaw (Department of Engineering),
O. M. Stewart (College of Arts and Science).

LIBRARY STAFF.

Henry Ormal Severance, A. M., Librarian.
Walter King Stone, A. B., First Assistant Librarian.
Grace Lefler, B. L. S., In charge of Catalogue.
Grace D. Phillips, B. L. S., In charge of Periodicals.
Bertha J. Bond, A. B., B. L. S., Cataloguer.
Clarence W. Sumner, In charge of night service.
Elizabeth Sinclair, B. L., Charging clerk.
Blanche Hedrick, Accession clerk.
Maude Higginbottom, Stenographer.

LIBRARIANS OF THE UNIVERSITY.

Robert S. Thomas, A. M., 1850-1853.
Bolivar S. Head, A. M., 1853-1860.
Edward T. Fristoe, A. M., 1860-1862.
Joseph Granville Norwood, A. M., M. D., 1862-1877.
Scott Hayes, M. S., M. Ag., 1877-1879.
Edwin J. Jolley, M. S., 1879-1880.
J. H. Drummond, A. B., A. M., 1881-1887.
John Watson Monser, 1887-1896.
Walter King Stone, A. B., 1896-1900.
James Thayer Gerould, A. B., 1900-1906.
Henry Ormal Severance, A. M., 1907—.

XV. THE UNIVERSITY LIBRARY.

To the President of the University of Missouri:

SIR: I have the honor to submit, herewith, my second annual report as librarian of the University of Missouri. The report really covers the work of the library under the first year of my administration, as I had been librarian only four months when the first report was made. The statistics are for the calendar year 1907, and include the libraries at Columbia.

Stack Room.

A year ago the condition of the book stacks of the library was anything but desirable. All the available space for books seemed to be utilized, all the shelves were either full or soon filled after my arrival. Furthermore the books were so scattered that it was impossible to render the public efficient service. The volume wanted might be in the stacks, in the librarian's office, in the south hall, in the north hall, in the periodical room, in the so-called "dark room" on the first floor, in the document room on the second floor, in the store room on the third floor, or in any one of the dozen branch libraries. Under these conditions it was impossible to serve a reader with expedition or with any degree of satisfaction. Furthermore the congestion in these various rooms was so great that it was impossible to get a desired book in a reasonable length of time. Books and pamphlets were literally stacked up in the various rooms from the librarian's office to the dark room on the third floor. My first request of the Executive Board, therefore, was that the basement room, the old gymnasium under the Reading room, should be fitted up for a stack room and that the books then scattered over the various rooms of Academic Hall should be brought together in one place. The request for the privilege of moving the stacks was granted at the July meeting but not the privilege of occupying the commodious room in the basement.

During the month of August the stacks were moved into the rooms south of the main corridor, formerly occupied by the offices. The catalog room, the librarian's office, the so-called "dark room" and the south hall were cleared and the rooms filled with book stacks. We were able to place in the stacks and in the adjoining rooms and in the Reading room practically all of our books that are in constant demand. Within two years other accommodations will have to be provided. The offices were transferred to the north corridor and the room formerly occupied by the periodicals.

In August the Executive Board authorized the relighting of the room into which the stacks were placed and some new fixtures for the south end of the Reading room where the stacks were formerly located. Hitherto the alcoves in the stacks were so poorly lighted that it became necessary either to take up the books from the lower shelves and carry them to the passage way and hold them up to the light to read the titles or to strike matches in the alcoves, which was a very dangerous proceeding. The new arrangement of lighting, however, is quite satisfactory. There are two drop lights with concave reflectors in each alcove. The south end of the Reading room is lighted by six clusters of four lights each with prism glass shades and reflectors. Each cluster is suspended from the ceiling by a chain about four feet in length.

The Board also authorized the construction of 106 linear feet of book shelves seven and one half feet high along the wall spaces of the Reading room and 68 linear feet of pigeon hole cases 6 feet high to be placed against the walls in the south end of the Reading room. The pigeon holes will accommodate 640 periodicals and the book shelves will carry between 5000 and 6000 volumes. The shelving was put in place early in September; the pigeon hole cases several months later. The cases and the shelving together cover practically the entire wall space of the Reading room.

Reference Collection.

The first problem that I undertook to solve on taking up my duties was to prevent the congestion of the students in the stacks back of the Delivery desk at the time of the movement of classes. Every student was allowed to go to any part of the stack room for any purpose at any time. The books that were reserved for class use were placed on the shelves just back of the Delivery desk. The congestion was caused by the students rushing into the library at the end of the recitation and trying to be first to get a book to which the professor had just referred the class. The solution of the problem was to move this class of books into the Reading room where students could reach them without the formality of writing out charging slips. The new cases built around the Reading room in August enabled us to make this change early in September. A majority of these books in constant demand were placed on the open shelves in the Reading room. Along with these were placed certain standard works together with strictly reference books and a majority of the sets of general periodicals indexed in Poole. These form the nucleus of the collection.

The reference library now contains about 5000 volumes, including the collection of indexes and the text-book library which are shelved near the catalog case by the east entrance to the room. A separate shelf list of this collection was made, duplicating the one in the cataloging room. It is placed on the end of the Delivery desk where it has been found very useful in locating books. Notwithstanding the fact that some of the books disappear temporarily from the shelves at examination time, there is no doubt of the success of the innovation. Where there is only one copy of a book to which a large class has been referred, the book is placed behind the delivery desk and issued by slip only. This change has been welcomed by the student body and by the faculty also. One indication of the appreciation of this new arrangement is the larger use that is being made of the library.

Reading Room.

The periodical room which was formerly kept open only seven and one-half hours per day has been turned into a work room for the catalogers. The current periodicals have been shelved in the south end of the Reading room in cases made especially for them. The assistant in charge of the periodicals has moved her desk to the south end of the Reading room in close proximity to the periodicals and is able to give considerable time to reference work. The periodicals are thrown by classes, the names of which are posted above the pigeon holes containing the magazines. Label holders have been secured for each pigeon hole and the labels containing the names of the periodicals are being printed for them. Large brass labels above the book shelves in the Reference collection indicate the location of the several classes of books. Name plates have been added to the several portraits hanging on the walls in the Reading room.

The large delivery desk separating the stacks from the Reading room has been reduced in length and squared around in front of the door leading into the new stack room. Gates have been placed at each end and only students who ask for the privilege are allowed to enter the stack room. The requests for stack room privileges are few, a fact showing that the books which a student really needs are on the reference shelves or can be had by applying at the desk. To be deprived of free and promiscuous use of the stacks has been no hardship to him. The stacks are kept in better shape than before, the books are more often and more easily found.

A new dictionary case made by the University carpenter has been placed in the center of the room and contains practically all the dictionaries in the library. The top of the case slopes each way from the middle, making a convenient rest on which to lay the books while consulting them.

An exhibition case stands in front of the Delivery desk. On this case are placed all new books just before they go to

the stacks. This gives the faculty and students an opportunity to see all the new additions before they are placed on the shelves in the stack room. Expressions of appreciation of this innovation have come to me from both students and faculty. The increase in attendance has necessitated additional chairs and tables. Three dozen chairs and two large Flemish oak tables have been added to the Reading room.

Upon my recommendation the Executive Board authorized the enclosing of the lower end of the west corridor to provide additional room for the library. The catalog cases will be located in this new room and some of the index books will be shelved here. It is hoped that the students will make use of this room for consultation purposes, thereby relieving the Reading room of considerable commotion.

The gentlemen's wardrobe which occupied the east wall of the Reading room, now occupies a place in this new room. This, however, is not adequate, neither is this arrangement desirable. The entire space allotted to the library is sorely needed for library purposes. Cloakroom accommodations should be provided elsewhere.

Inspection Books.

During the summer, arrangements were made with G. E. Stechert & Company, and with the Macmillan Company, whereby they send to the library at irregular intervals, all their publications for the inspection of the members of the Faculty. These books may be purchased by individuals or by the library. Those remaining unsold are returned to the publishers every three months.

This innovation has proved to be a boon to the Faculty. It gives them an opportunity to examine books in their lines of work before buying them or recommending them for purchase to the library.

.

Library of Congress Catalog.

In my last report a brief statement was made relative to the card catalog of the Library of Congress. The Manila proof sheets were received early in June and were cut into cards by the Stephens Publishing Company. There were upwards of 150,000 of them. They were thrown into a rough alphabet by several young lady students, for which the Executive Board appropriated \$175.00 from the student fund. The final alphabetizing has not yet been completed.

Before the Library of Congress began printing these proof sheets about 50,000 cards were issued. In order to have our catalog contain all titles of books in the Library of Congress, steps were taken to secure these additional cards. Mr. Putnam, the Librarian of Congress, has acceded to my request and has authorized the sending of the cards spoken of above to this library gratis. When these cards have been received and alphabetized with those we now have our catalog of the Library of Congress will be complete. This catalog is an alphabetical list of all the books in this great collection containing one and one-half million volumes.

The catalog will facilitate the ordering and lessen the expense of the L. C. printed cards for our public catalog. These cards represent the best form and method in card making. Books may be borrowed from this library. This catalog, therefore, enables him to ascertain, without writing to Washington, whether the book wanted is there.

Budget.

The division of funds for the biennial period 1907-08, as recommended by the librarian and passed by the Executive Board, was made on the same basis as that of the previous biennial period. This distribution is not wholly satisfactory. It is hoped that a larger appropriation may be secured from the General Assembly in 1909 so that every department may be enabled to secure all the books needed for its work. The

following letter to the Executive Board shows the distribution of funds as estimated for 1907-08. Later in the year the Executive Board apportioned \$50 for books for the Debating team, \$50 for the Department of Physical training and \$75 for Journalism besides several appropriations for special purposes:

Columbia, Mo., April 5, 1907.

*To the Executive Board,
University of Missouri,
Columbia, Mo.*

Gentlemen:

I beg to submit the following report on the division of the Library funds for the two years, 1907 and 1908.

Income.

The estimated income of the libraries for the biennial period is as follows:

From the Collateral Inheritance Tax	\$ 18,000.00
From fees based on the income for 1905-6.....	
From Academic department	6,055.00
From A. & M. College	1,643.00
College of Medicine	1,490.00
College of Engineering	2,850.00
College of Law	4,540.00
College of Law, special appropriation	5,000.00
Teachers College	725.00
	<hr/>
	\$40,303.00

The cost of maintenance of the library, the equipment and the appropriation for Mr. Switzler's History of the University of Missouri should be shared by all departments alike. The binding of periodicals and the repair of books, subscriptions to periodicals, and the purchase of reference books should be borne by all the departments.

I would therefore recommend that the income from the Collateral inheritance tax be applied to provide for the main-

tenance and other objects as stated above and the amount of the fund not used for this purpose be left for expenditure at the discretion of the Board, for salaries, clerical help, the purchase of sets of scientific periodicals and transactions of learned societies, etc.

The amount to be provided for is as follows:

Salaries	\$ 7,500.00
Equipment and Supplies	800.00
Switzler's History	800.00
Bindings	3,000.00
Subscriptions to Periodicals	4,000.00
Reference Books	500.00
	<hr/>
	\$16,600.00

According to the estimate of Mr. Gerould 17 per cent of the work of the Medical course, 30 per cent of the work of the Agricultural course, 33 per cent of the work of the Engineering course, and 50 per cent of the work in the Teachers College are given by men whose departments are reckoned as academic. Consequently, in the allotment of funds a certain per cent of the fees of each of these departments should be placed at the disposal of the Academic Department, or of the men who are in two departments. I would, therefore, suggest that 10 per cent of the Medical, 20 per cent of the Agricultural, 20 per cent of the Engineering, and 20 per cent of the Teachers College funds be added to the Academic funds. Making the computations accordingly the results are as follows:

Academic department	\$ 7,247.60
A. & M. College	1,315.40
College of Medicine	1,341.00
College of Engineering	2,280.00
Teachers College	580.00
College of Law	9,540.00

If the fees in any of the departments exceed the amount estimated, they can be reapportioned on the same basis.

I would recommend that the amount to be received from fees, based on the income for 1905-06 be apportioned in a lump sum to each department, except the Academic to be apportioned by the Dean and Faculty of each department.

I would recommend the following division for the Academic funds: \$500 to History; \$400 to English; \$300 to each of the following: Archaeology, Astronomy, Botany, Chemistry, Economics, General list, Geology, German, Greek, Latin, Mathematics, Philosophy, Physics, Political Science, Romance Languages, Sociology, Zoology; \$200 each to Current Literature, Psychology, Religious books; \$100 each to Bibliography, Elocution, Free-hand Drawing, President's list.

Very truly yours,

Librarian.

The following table shows the expenditures of the library for 1907, exclusive of the Law library, which has a separate account:

RECEIPTS.

Cash on hand January 1, 1907	\$ 4,938.47
Fees	7,404.55
Inheritance Tax	9,000.00
Total	<u>\$21,343.02</u>

EXPENDITURES.

Salaries and help	\$ 4,978.05
Switzler's History	400.00
Equipment and supplies	364.55
Linding and repairs	1,195.38
Periodicals	2,441.06
Books	7,909.64
Total	<u>\$17,388.64</u>
Cash on hand January 1, 1908	3,954.38

\$21,343.02

ACCESSIONS.

Total number of volumes in all the libraries at Columbia, December 31, 1907	81,563
Pamphlets not accessioned (estimated)	20,000
<hr/>	
Total	101,563

During the year there were added to the various libraries of the University, at Columbia, 9013 volumes, distributed as follows:

General library	5,696
Agricultural library	263
Engineering library	392
Law library	1,699
Medical library	632
Lathrop library	331
<hr/>	
Total additions	9,013

The total number of periodicals currently received is 1054, of which 523 are gifts and 531 were received through subscription.

The number of accessions for 1907 exceeds the number for any one year in the history of the library except the year 1903-4, when the Senator Vest collection of documents was accessioned. The number this year is a normal growth. There were no large gifts presented, although a considerable number of volumes had accumulated, waiting to be recorded.

Of the accessions to the General library 1595 were received as gifts or in exchange. Of the accessions to the Agricultural library 199 volumes were gifts. There were also gifts of 41 volumes to Engineering library and 33 volumes to the Law library. The Medical library received by gift and exchange 264 volumes.

The number of volumes added as the result of binding periodicals during the year was 1028.

The important purchases during the year includes several sets of reference works, and several sets of periodicals, and the transactions and proceedings of scientific and literary societies as follows:

Hastings, Dictionary of the Bible, 5 vols.	\$ 25.00
Historians history of the world, 25 vols.	50.00
Jewish Encyclopedia, 12 vols.	75.00
McCarthy, Irish Literature, 10 vols.	15.00
Moulton, Library of literary criticism, 8 vols.	25.00
Deutsche litteratur denkmaler des 18 u. 19 Jahrhundert, 135 vols. bound in 15 vols.	40.75
Goethe—Jahrbuch, 26 vols.	42.50
Heyse, Paul, Gesammelte werke, 31 vols.	29.75
Jahresbericht der Germanischen philologie, 25 vols.	56.22
Jahresberichte fur neuere-deutsche litteraturgeschichte, 10 vols.	68.00
British Assc. for the advancement of science, Reports, 73 vols.	70.00
Nature (to complete set) 42 vols	40.00
Notes and queries, 121 vols.	196.70
Physical society of London, Proceedings, 17 vols.	52.50
Royal society of London, Philosophical transactions, 1860- 1886, Section A 1887-1900	214.00
Deutsche Shakespeare gesellschaft, Jahrbuch, 42 vols.	87.00
Munich K. b. Akademie der wissenschaft. Sitzungsberichte der philosoph.-philologisch. Historisch. Klasse 1860-1901, 43 vols.	50.00

The total number of volumes received as gifts or as exchanges during the year were 2132 volumes and 2151 pamphlets. These represent a large number of donors, but those who have given any considerable number are few. One of the most valuable gifts of the year was made by the French government through the Minister of Public Instruction. The nature of the gift is indicated by the following letter:

July 12, 1907.

The Executive Board,
University of Missouri.

Gentlemen:

I beg to advise you of the gift of the following works which have been presented to our library, through the solicitation of President Jesse, by the Minister of Public Instruction and Beaux-Arts, France:

First, Collections de documents inédit  sur l'histoire de France.

Second, Inventaire g n ral des richesses d'art de la France.

Third, Catalogue g n ral des livres imprim s de la Biblioth que Nationale.

The first set is a very valuable one for historical research. It is still in the course of publication, although sixty-two volumes have already been printed. The second work is important to lovers of art. Twenty volumes have already appeared. This work is also continuous, a volume or more being published each year. The last work is one of the great bibliographical undertakings of the twentieth century. Twenty-eight volumes have already been published and two or more volumes per year may be expected for the next fifteen or twenty years.

Respectfully,

Librarian.

Dr. Graves, on leaving the University, presented a collection of 166 volumes, mostly text-books in the Greek and Latin languages. The Honorable D. H. Shackelford sent the library several hundred volumes of government documents.

The following is a list of donors who have given twelve volumes and pamphlets or more to the library during 1907.

	Vol.	Pam.
Alexander, Carter	1	11
Brockhaus, F. A.		19
Canada geological survey		53
Heath, D. C. & Company	13	9
Iowa, Secretary of State	1	20
Iowa State Library Commission	1	12
Jesse, R. H.	2	42

Library of Congress	9	3
Manly, W. G.	1	16
Massachusetts, School for the Feeble-minded		22
Michigan Agricultural College	25	102
Michigan Dairy and Food Commission	2	108
Michigan, Supt. Public Instruction	20	1
Michigan State Treasurer	2	30
Myer, Max W.	4	11
New York City. Charity Organization Society		66
New York. State Board of Charities	47	
North Carolina. Geological Survey		25
Ohio. Board of State Charities		26
Ohio. State Reformatory		15
Stone, Senator Wm. J.	21	
Westinghouse Manufacturing Company		32
United States. Superintendent of Documents	44	11

Our duplicate room remains untouched as regards a list of the books, pamphlets and periodicals contained therein. It has therefore been impossible to arrange an extended exchange of duplicate books. The exchange of publications, however, has been gratifying. Included among these are the following institutions with the number of volumes and pamphlets donated by each:

	Vol.	Pam.
Breslau, Konigl. u. Universitäts-Bibliothek		25
Chicago. University		37
Colorado College		17
Colorado. State Library	1	19
Connecticut. State Library	12	9
Giessen, Universitäts Bibliothek		51
Göttingen, Universitäts-Bibliothek	1	154
Jena, Universitäts-Bibliothek		196
Johns Hopkins University		26
Marburg, Königliche Universitäts-Bibliothek		105
Michigan. University. Library		31
Montana Historical Library	7	16

New York State Library	16	16
Pennsylvania. University. Library	3	13
Rio de Janeiro, Bibliothèque Nationale		10
Rostock, Universitäts Bibliothek		88
Strassburg Universitäts & landes-Bibliothek		18
Toronto. University	1	15
Wurtzburg, Universitäts Bibliothek		110

The John H. Lathrop Memorial Library.

This collection of books was made possible through the generous gift of \$1,000 of the Honorable Gardiner Lathrop, President of the Board of Curators. Two installments of \$250 each have already been received, the first on May 14, 1906, the second on April 12, 1907. There have been expended on this fund to date \$483.52 and the total number of volumes purchased is 674. The collection is shelved in the office of Dr. E. A. Allen and consists of works in English and American literature.

The Catalog.

The total number of cards added to the catalog during the year is 14,007 of which 5,870 were Library of Congress printed cards, and 8,137 were typewritten. These represented 2,501 titles and 3,533 volumes. There were 5,882 volumes added to the cards already in the catalog, making a total number of 9,415 volumes cataloged during the year.

With few exceptions the pamphlets which have accumulated during the year have not been cataloged. It has been impossible to do anything with them as the entire time of the force had to be given to the preparation of the bound volumes for the shelves. The number of volumes cataloged is more than double the number cataloged the year preceding.

Circulation.

It is gratifying to note the increased use that is being made of the library. There is a larger number of readers than ever before and the number of books used exceeds that of any previous year.

Under the new regulations which went into effect in September, the library has been open twelve and one-half hours per day—7:55 A. M. to 5:30 P. M., and from 7 to 10 P. M. Sunday 2 to 5 P. M. During the year the Reading room has been closed only five days—New Year's day, Fourth of July, Thanksgiving day, Christmas day and one day for cleaning.

Unfortunately, for statistical purposes, no record has been kept of the number of volumes used by readers. The reader's slip is handed back to him on the return of the book borrowed. This arrangement was varied for three consecutive days and the result showed an average of 626 volumes per day borrowed at the desk. Since the establishment of the Reference collection, the number of volumes drawn at the desk represents not more than half of the circulation as a considerable number of the books in constant use are shelved in the Reading room where they can be used without the formality of a charging slip. The circulation, therefore, in the General library amounts to about 1,000 volumes per day.

Furthermore the number of readers constantly using the library is some indication of the service the library is rendering. The average daily attendance for September, October, November and December, taking the count at 10 A. M. and 8 P. M. is 87. The highest number in the Reading room during the day at the 10 o'clock count was 170 and at 8 P. M. 112. This is an increase of 50 per cent in attendance over last year. The Sunday attendance has more than doubled.

An effort was made in May to have all the books drawn out on personal accounts returned to the library. It was found that a large number of volumes had been drawn out five or six years ago by members of the teaching force and had never

been returned to the library. Many of the volumes returned had been "lost books" as no charge was on record against the borrower. In several cases the books charged could not be accounted for by the borrower. The records, however, were finally cleared up. With the new rule that all books must be returned before Commencement day each year, little difficulty along this line is anticipated.

It is interesting to note to what extent the borrowing had gone. One professor had in his possession 220 volumes, another 175 volumes, a third 116 volumes and others a smaller number varying from one to 100 volumes.

The library has been able to supplement its collection through the kindness of other libraries. Thanks are due to the following libraries for the loan of the number of volumes set opposite their names:

University of Chicago	16
Columbia University	7
Harvard University	12
University of Kansas	2
University of Michigan	17
Missouri Botanical Garden	4
United States Surgeon General's Office	83
United States Department of Agriculture	2
Yale University	6
<hr/>	
Total	149

This library has been of service in loaning books to non-resident students doing graduate work, to private citizens and to institutions as follows:

	Vols.
Helen F. Bridges	2
University of Minnesota	1
Mr. B. M. Anderson, Jr.	2
Mr. Ernest F. Bush	2
Mr. J. G. W. Fischer	1

Missouri School of Mines	5
Miss Nell Jasper	2
Miss Emma McWilliams	2
Professor J. W. Million	1
Warrensburg State Normal	1
Mr. A. S. Chessin	1
Mr. Rush C. Lake	1
<hr/>	
Total	21

Binding Report.

The number of volumes bound last year in the several styles of binding is indicated by the following:

No. of volumes bound in cloth	362
No. of volumes bound in duck & buckram	602
No. of volumes bound in Morocco, roan, Russia, cow- hide, etc.	1175
Resews, old cases, etc.	42
<hr/>	
Total number of volumes bound	2181

Of this number 1,028 were the result of binding periodicals. The total cost of binding for the year was \$1,195.38.

Departmental Libraries.

There has been several changes in the administration of the departmental libraries. All the catalog cards for books in these libraries are being marked with the name of the departmental library where the book is shelved. Hitherto all books except those in the Law library were cataloged for the General library and then charged out to the department. This created no end of confusion, as the book clerk would look on the shelves first, then search the charging tray to locate the book. All this trouble will be obviated as soon as the catalogers can get the cards changed.

The users of these branch libraries have been at a disadvantage as there has never been a separate catalog or index or printed list of the books in any department. When a collection, isolated from the General library, reaches 2,000 volumes, there should be a card index or a dictionary catalog for use in the room where the collection is located. It would also be an advantage to have related subjects cataloged in the same file. To illustrate, many of the books shelved in the Zoological laboratory are wanted for reference in the medical library. If the investigator in human anatomy has an index at hand showing him where books on related subjects are shelved, it would save much time and place the material in his reach.

The work has been begun. A card index arranged by subjects has been placed in the Engineering library. The work will be pushed forward as fast as we can get help to do it.

In October the librarian, with the consent and co-operation of the Department of Chemistry, opened the Chemical library for the use of faculty and students. There is no one in attendance while the room is open. This collection is shelved in the tower of the Chemical building, reached by three flights of stairs. Hitherto, the books were under lock and key. If a student wished to consult a chemical dictionary, or read a description of an experiment that he was performing, he would need to search the building for a professor or the janitor, borrow his key, ascend to the tower room, consult the dictionary or read his article, descend and return the key. The inevitable result was that the books were little used. They were practically inaccessible. Throwing the room open to students does not obviate the whole difficulty. The library is too far from the laboratory. A room on the first or the second floor should be fitted up for the library with ampler accommodations.

One other library, the Geological collection, is without attendants, but it is open practically all day. There was no loss of books from this collection last year.

The Zoological collection of books has been moved out of Dr. Lefevre's office into a room fitted up especially for the purpose. It now assumes a different aspect. It is a library for the department and not merely for the professor in charge of the department. This library is open most of the day and a large number of evenings. Whenever any member of the teaching force is present the library is accessible.

Several departmental libraries are in charge of the stenographers for the respective departments. On the whole the arrangement is more satisfactory than those in charge of students. Such libraries are the Agricultural, the Experiment Station, the Horticultural and the Dairy libraries. These libraries are open during the day while the stenographers are on duty.

The departmental libraries were all checked up in June with the charges against them. In all the branch libraries there were 313 volumes that could not be accounted for, which were in those libraries the year previous. The first inference might be that those collections unguarded and those under supervision of students would show the greater loss. This is only true in part. The Engineering library and the Medical library, under student supervision, lost 76 volumes and 46 volumes respectively, while the Agricultural library and the Horticultural library, under much stricter supervision, lost 81 volumes and 16 volumes respectively. It might be said, in justice to the Agricultural library, that the collection was not checked a year ago and that only a part of the books were under any supervision before that time.

There were sixty volumes of Chemical books unaccounted for and this library was under lock and key. The books in the Geological laboratory and in the Romance Seminary, with no assistant in charge, and with very little supervision, lost only 4 volumes and 12 volumes respectively. It is very evident from the foregoing that the fault is partly in the system and

that members of the faculty as well as members of the student body, borrow books without leaving a record and that they forget to return them.

The Agricultural Libraries.

The books belonging to the College of Agriculture are very much scattered. The main library is in the Agricultural building and contains about 2,000 volumes. This library is cared for by the stenographer to the department of Animal Husbandry. The library is open seven and one-half hours per day—8 to 12:30 and 2 to 5.

The number of periodicals currently received in this library is 124.

This library has been increased by 263 volumes during the year of which 199 were gifts. A large number of herd books have been added, many of which were gifts. Among such gifts might be mentioned that of the American Poland-China Record, 51 volumes, presented by the American Poland-China Record Association.

The other collections belonging to the College of Agriculture are shelved, some in the Horticultural building, some in the Live Stock building, and others in the Dairy building.

The fund apportioned in a lump sum to the College of Agriculture for library purposes for the biennial period was \$1,315.40. One-half of this amount, together with an unexpended balance was distributed among the several departments for the year 1907-08, as follows:

Agricultural Chemistry	\$ 180.00-
Agronomy	50.00
Animal Husbandry	175.00
Botany	150.00
Dairy	60.00
Dean's list	45.00
Home Economics	50.00
Horticulture	75.00
Veterinary	50.00

Engineering Library.

Open from 9—12, 2—4:30, 7—10; 8½ hours daily.

Number of volumes added during the year.

By purchase	351
By gift	41
<hr/>	
Total	392

Total number of volumes in the library, Dec. 31, 1907....2028

Number of periodicals currently received is 40

The engineering library has been open an hour and a half per day longer than it was during the preceding year. This seemed necessary to meet the demands of the readers. The library has been under the immediate charge of four students: A. H. Reese, A. V. Elston, Goodman Bell, and R. I. Johnson. The responsibility has been divided among the four. While this has worked quite satisfactorily it is not the ideal arrangement.

The purchases for the year are not large owing to the lateness in the year when the orders reached the librarian. They will help to swell the total for 1908.

The funds apportioned in a lump sum to the College of Engineering for library purposes for the biennial period 1907-08 was \$2,280.00. On recommendation of the Engineering Faculty this amount was distributed among the departments as follows:

Civil Engineering	\$ 660.00
Electrical Engineering	660.00
Mechanical Engineering	660.00
Shop Work	100.00
Drawing	100.00
Mechanics	100.00

Hitherto this library has been strictly a reference collection, as far as the student is concerned, but with the beginning

one-half of her salary to be paid by the Law library. She has taken charge of this library from 8 A. M. to 12:30 P. M. since the department opened in September. The results of this arrangement have been very satisfactory. The books are prepared for the shelves more expeditiously and the students have a trained librarian to assist them in their reference work. The accessions for 1907 are more than twice as many as they were in 1906, and the indications are that the increase is normal and will continue at the same rate in future years.

This collection is the largest on the Campus outside of the General Library. The income for this library is one-fourth of the income for all the libraries on the Campus. The income is practically \$5,000 per year. The full time of one assistant should be given to this work.

The library has been open nine and one-half hours daily except Sunday, during the college year. It has been under the immediate charge of Miss Bertha Bond who divides her time between the General Library and the Law library, and four students of law, J. E. Price, W. B. Bostian, W. W. Wright and Herbert Peck.

The transfer of the cataloging to the Law library has necessitated some new equipment in the way of a desk and chair for the librarian in charge, a new perforating stamp, new book plates and the like.

One of the purchases of last year is worthy of special mention. The New York Life Insurance Company offered their law library at Montreal for sale. Among other works this library contained a complete file of the Irish and Scotch reports—the reports of all the courts. The Boston Book Company purchased the entire library at a low figure and sold to the Law library of the University of Missouri, these two sets, containing 741 volumes, at the very reasonable price of \$2,000.00.

The Staff.

In my last report your attention was called to the fact that the library staff was inadequate for the demands being made upon the library. During the year two assistants on full time have been added to the staff. The work which had accumulated before 1907 together with the new lines of work opened up during the year have demanded more time than the staff has been able to give to it.

At a meeting of the Executive Board on June 29th Miss Bertha J. Bond, of the University of Illinois, was appointed to the position of Cataloger in the General Library. Her time is divided between the General Library and the Law library and the salary is shared by both. The Law library has become so large and the additions so numerous that it became necessary to give at least half of the time of one assistant to the cataloging of the law accessions. Besides this work, she has full charge of the Law library from 8—12:30 daily.

On April 10th the Executive Board authorized the employment of a man assistant who should, among other duties, have charge of the night service and take the place of the night librarian after September 1st. It was impossible to secure a competent assistant at the salary offered. When the University opened in September the night service was very much crippled owing to the lack of sufficient capable help. The experiment of student help alone for the evening service was tried but was not satisfactory. The inexperience of the young men and the lack of acquaintance with the work rendered the service inefficient. Then, too, the work became so heavy that one person could not take care of it. Two students instead of one were then employed for the night service but still the demands for an assistant with a wider knowledge of books and able to assist students in their reference work were persistent. To meet this demand two of the young ladies of the staff were detailed for night work at the desk two nights a week each, to assist the student book clerk.

In the meantime the State Historical Society asked co-operation in cataloging the books in their library. It was finally decided to secure a young man who would be competent to take charge of the night service and to assist in cataloging the State Historical Society's library. Mr. Clarence W. Sumner of Earlham College was appointed an assistant for this purpose. He entered upon his duties January 2, 1908.

In addition to the work of the staff it has been necessary to secure certain clerical help and to employ three students a few hours per week. These students are:

Miss Alma Turner, who assists in the catalog department; E. L. Burge and B. E. Cowherd, assistants at the Delivery desk.

New Library Building.

The University has outgrown Academic Hall. Lecture rooms, class rooms and offices are badly needed. Rooms on the fourth floor and rooms in the basement have been fitted up for temporary use. There is no more available space. The quarters occupied by the General library and by the State Historical Society are badly needed for offices and lecture rooms. With the large increase in the number of students enrolled in the University some provision must be made for their accommodation.

The Library has outgrown the quarters assigned to it. Our Reading room, although it is one-third larger than it was last year, is already taxed to its full capacity. The stack room will barely hold the additions for another year. The room is now comfortably filled. The crowded condition of the Document room and the Duplicate room remains the same. All the college documents are shelved in the Duplicate room. There will be no alternative but to cord the books up on the floors and halls unless some additional room should be secured. The floor space allotted to the library for Reading room and stacks is no more than the space given to the Art

Museum or to the girls gymnasium and parlors. The University library could utilize twice the space it already has and have no floor room to spare. The library needs a larger reading room which can be secured only by securing a new building. The books which the library already possesses would fill a stack room with a floor space of 40x80 feet. With a good large stack room our books could be made available and more useful. A new building would provide seminary rooms so that the small collections so badly scattered could be brought together. A seminary room for advanced students of the languages and another for those in historical, economical, political and social sciences are badly needed.

The present day methods of teaching are much different than those in vogue five or ten years ago. The laboratory method now prevails. No student would expect to do creditable work in zoology or chemistry without apparatus. Even so the student of literature and history cannot expect to do creditable work in any of those branches without the necessary books at hand. They are his tools. Now that the University of Missouri has been admitted to the Association of American universities, some provision must be made for a strong graduate school as this provision is one of the conditions of entrance into the association. It is practically impossible to do graduate work without an adequate room well supplied with books on special lines. A new building would supply the University with suitable seminary rooms in close proximity to the stacks.

Again, we need a new fire proof book vault to insure our valuable collection against loss by fire. Our books are worth upwards of \$150,000 and to allow them to be exposed is not wise. Every year we are adding a number of valuable sets. These are becoming scarcer every year. Many sets of periodicals which are much needed for our work are already out of print.

Respectfully submitted,

HENRY O. SEVERANCE, Librarian.

EXTENSION OF LIBRARY PRIVILEGES.

The Executive Board at its meeting on February 27, 1908, passed the following resolution:

"That the privilege of borrowing books from the library of the University be extended in the discretion of the librarian, to other institutions of the state, to clubs and organizations, to graduates and to former students of the University, and to other responsible private citizens of the state, under the regulations now in force governing the use of the library by students, provided that the borrower pay the cost of transportation."

Any citizen of Missouri wishing to avail himself of this privilege should address the Librarian, University of Missouri, Columbia, Missouri.

APPENDIX.

LIST OF SCIENTIFIC SERIALS IN THE LIBRARIES OF THE UNIVERSITY OF MISSOURI.

INCLUDING

GENERAL SCIENCE, MATHEMATICS, ASTRONOMY, PHYSICS,
CHEMISTRY, GEOLOGY, BIOLOGY, BOTANY,
ZOOLOGY, AND MEDICINE.

The letters following the title indicates the library where the set is shelved, as:

- | | |
|------------------------------|--------------------------------|
| Ag. Agricultural library. | H. Horticultural library. |
| C. Chemical library. | M. Medical library. |
| D. Dairy. | Obs. Astronomical observatory. |
| Exp. Sta. Experiment Station | V. Veterinary library. |
| library. | Z. Zoological library. |
| G. Geological library. | |

A plus sign (+) indicates that the serial is currently received and that the set is complete from the last volume number given.

Parallels (||) indicate that publication ceased with the preceding date or volume.

The sets are in the General library unless otherwise indicated.

UNIVERSITY OF MISSOURI

HANDBOOK
OF THE
LIBRARIES

COLUMBIA
UNIVERSITY COÖPERATIVE
STORE
1910

Price 10 Cents

STAFF.

Henry O. Severance, Librarian.

Walter K. Stone, First assistant librarian.

(Leave of absence, 1910-11.)

Florence Whittier, Assistant librarian.

Grace Lefler, in charge of catalog.

Grace D. Phillips, in charge of periodicals.

Bertha J. Bond, in charge of Law library.

Clarence W. Sumner, in charge of night service.

S. Blanche Hedrick, in charge of Agricultural library.

Bessie E. Tiffany, charging clerk.

Maude Higginbottom, stenographer and typist.

LIBRARY HOURS.

General Library—

Open 7:55-6:00; 6:45-10:00.

Sundays, 2:00-5:00.

Christmas holidays, 7:55-6:00.

Summer session, 7:55-5:30; 7:00-10:00.

Summer vacation, 8:00-12:00; 1:30-5:30.

Agricultural Library—

Open, 8:00-12:30; 2:00-5:00.

Engineering Library—

Open, 9:00-12:00; 2:00-4:30; 7:00-10:00.

Law Library—

Open, 8:00-12:30; 2:00-5:00; 7:00-9:00.

Medical Library—

Open, 9:00-1:00; 2:00-5:30.

HANDBOOK OF THE LIBRARIES

DIRECTORY OF LIBRARIES.

The libraries containing Sept. 1, 1910, 100,850 volumes and 20,000 pamphlets, are located in Academic Hall and in the various buildings of the several schools.

The General library occupies the first floor of the west wing of Academic Hall. The Reading room is open from 7:55 a. m. to 6 p. m. and 6:45-10 p. m. during the college year.

The Agricultural library containing about 5,000 volumes occupies the second floor of the west end of the New Agricultural building. It is open from 8-12:30 and 2-5. Miss S. Blanche Hedrick is in charge.

The Engineering library containing 3,400 volumes is located on the second floor of the west side of the annex to the Engineering building. It is open 9-1; 2-5 and 7-10. A student is in charge.

The Law library containing 14,650 volumes occupies a large part of the first floor of the Law building. It is open from 8-12:30; 2-5 and 7-9. Miss Bertha J. Bond is in charge.

The Medical library containing 3,852 volumes is located on the second floor, south side of the Medical building. It is open from 9-1, 2-5. A printed cata-

BORROWING BOOKS.**a. Students and citizens.**

Officers and students of the University may draw books from the Library without the formality of registration, but other citizens desiring to borrow books for home use for the first time, must sign a **registration card** at the Loan desk. The book desired should be looked up in the card catalog which is in the corridor of the Library. Then proceed in accordance with instructions given on page 16, How to draw a book. Citizens have the same privileges as students. The books on the Reference and Index shelves may be consulted without formality but they must not be taken from the room.

b. Non-residents.

Non-residents may also borrow books from the library under certain restrictions which may be known by addressing the Librarian. A catalog of the Medical library was issued in June and sent to all the physicians of the State which serves as a finding list. Many doctors are enjoying the privilege of borrowing books from the library.

c. Inter-library loans.

The library may borrow books from other libraries for the use of its readers. The library of the State Historical Society, Room 13, Academic Hall, the Public School library, in the High School building, and the Public Library of Columbia, located in the Court House, are at the service of the students.

ACCESSION BOOK.

The accession book may be consulted in the Seminary room for any information pertaining to the number of books in the Library, new books, or additions to any department. It is a record of all the books received by purchase, by gift or by exchange, entered and dated, in order of receipt, with full data as to price, source and the department ordering them.

CLASSIFICATION.

The books in the Library are arranged by the Dewey decimal classification. According to this scheme, the field of knowledge is divided into 9 main classes with one class marked 0 for works too general to belong to any special class, such as cyclopedias. Following is a list of the classes:—

- 000 General works, bibliography, cyclopedias, etc.
- 100 Philosophy, psychology, ethics.
- 200 Religion, Bible, Church history.
- 300 Sociology, economics, law, education.
- 400 Philology.
- 500 Natural science.
- 600 Useful arts and industries.
- 700 Fine arts.
- 800 Literature.
- 900 History, travel, biography.

Each class is divided into 10 divisions, and each division into 10 sub-divisions. Then a decimal point is used and the sub-dividing carried out till the

classification is as minute as desired. The numbers thus obtained are assigned to the books and the books are arranged in simple numerical order, the numbers being treated as decimals. Thus 512, Algebra, precedes 513, Geometry, and follows 511, Arithmetic. Taking 513.1 as an example, the analysis of a number is as follows:—

Class 5—natural science.

Division 1—mathematics.

Section 3—geometry.

Point 1—plane geometry.

Then all plane geometries are numbered 513.1 and thus kept together, and arranged alphabetically by authors.

Again all books on English history are kept in 942, analysis being:

Class 9—history.

Division 4—European history.

Section 2—history of Great Britain.

Then by using decimal points, the periods of history are grouped together.

A copy of the Decimal classification may be had at the loan desk.

The books are arranged in numerical order. When one of these numbers is assigned to a book it is called a class number. This is combined with another number known as the book number which distinguishes books by Nathaniel Hawthorne from books by Julian Hawthorne and insures their falling into alphabetical sequence with respect to books by Giddings, Larned, Manning, etc. The class number and

the book number together form the call number which will be found on the back of the book, and on the upper left hand corner of the catalog card. This call number should always be given with the name of the author and the title of the book when the reader makes out his ticket for a book.

SHELF-LIST.

The classed catalog or shelf-list is kept in the catalog room where it may be consulted. It is also a card catalog, but is arranged numerically according to the Decimal Classification and represents the order in which the books stand on the shelves. That is, all books of one class are here grouped together, so that while one would have to consult the name of each author or subject in the general catalog in order to find the material on the tariff, by consulting the shelf-list we find that all the books are listed under the general number for the tariff, as 337, arranged alphabetically by authors. The nearest approach to the shelf-list is the subject card in the general catalog. When one turns to the subject "tariff" in the catalog, one finds all the books on that subject listed alphabetically by authors. The shelf-list is especially useful for research work where one wishes to find everything the Library possesses upon a given subject. It is a more reliable source of information than the shelves themselves, as so many books are always in use.

CATALOGS.

Dictionary Catalog.

The catalog of the University Library is on cards and is kept in the case of drawers in the corridor of the Library. The catalog contains a card entry for the author, title and subject of every book in the Library, and the whole is arranged according to the dictionary plan in one alphabet. Thus one wishing Hastings' Dictionary of the Bible would look under "Hastings" till he found the title "Dictionary of the Bible." But if he knew the title of the book and did not know the author then he would look under the first word of the title, and there he would find a card giving the exact title with the author. Or, if the person wanted something on the Bible and didn't know what, then he would look under "Bible" where he would also find a card for this book.

The catalog further contains cross-references from all forms of headings not used to those that are used. Thus under "Twain, Mark" we find the reference "see Clemens, Samuel Langhorne" which means that the pseudonym "Mark Twain" is not used, but rather the author's real name, "Samuel Langhorne Clemens." So also, under "domestic science" we find the reference "see domestic economy." Likewise wherever there are several different headings under which similar material is entered, references are given to all the other headings: as "Banking, see also finance, money," etc.

Most of the books are kept in the stacks behind the loan desk and are to be obtained by presenting

a Reading room ticket properly made out to the clerk at the desk. All books not kept in the stacks, have the name of the library where they are kept stamped on the catalog card in red ink just below the number. Similarly all books belonging to the Reference collection and kept on the open shelves of the reading room, are stamped "Reference."

Many of the books are in departmental libraries. This fact is indicated on the cards by the name or the abbreviation of the name of the library just below the call number, such as

Agr. Lib., Agricultural library.

Med. Lib., Medical library.

Chem. Lab., Chemical laboratory, etc.

Titles so marked should be sought for in the special libraries.

Library of Congress Catalog.

There is another card catalog in the library—the catalog of the Library of Congress kept in the catalog room, but accessible to the public at all times. The cards are arranged alphabetically by authors. The Library of Congress, according to law, receives free two copies of every book copyrighted in this country, and is constantly adding foreign books to its collection by purchase, by gift and by exchange. It is now the largest library in America. It is printing cards for all new accessions and for the older books as they are re-cataloged. The University library gets the proof sheets of all these, cuts them into cards and files them in this catalog.

STACK ROOMS.

The books in the General library are shelved in the three rooms and corridors just east of the loan desk, on the wall cases in the Reading room, in north corridor in catalog room, in Room No. 6, in the Document room in the Duplicate room and in the basement reading room. In the main stacks back of the loan desk are shelved the books on religion, sociology, economics, political science, philology, art, architecture, music, literature and history, represented by the classes 200 to 400, 700 to 900. The textbook collection is also shelved here. The reference books and bound periodicals are in the Reading room. The books on science, 500-600 are shelved in the basement reading room; the bibliographical books in Room No. 6 and in the catalog room; the books on philosophy 100-199 in the north corridor, the government documents in the Document room and the duplicates and the University publications used for exchanges in the Duplicate room.

READING ROOMS.

There are two reading rooms, one on the first floor and one in the basement of the library. The basement room is intended for graduate and semi-nary students and others doing research work. The room on the first floor is for the undergraduates and the public. This room has been made attractive by the loan and gift of paintings.

The following were loaned by Professor J. S. Ankeney:

Landscapes: In France; Tower Bridge; On the Seine; A Brittany Farm; Last of the Snow; Spring

in Missouri; In the Luxembourg Gardens; Sunset in the River; Paris from the Terrace at Meudon; Pont Neuf; A March Sunset; Under the Trees; The Missouri at Rocheport.

Interiors: A Brittany Fire Place; In an Old Church, France.

Still Life: Shell, Plate and Oranges; Blue and Brass; Brass and Copper.

Decoration: Perugino's Crucifixion (copy).

Lippi's Madonna and Child and the Child and Bird are copies executed and owned by Miss Heinrici; Sylvester's Two Sisters is loaned by Professor Streer; the Columns and the bust of Emerson, by D. C. French, were purchased by the library; the two engravings, Frederick Schiller and Mark Twain are gifts, the former presented by Der Deutsche Klub. So also are the portraits of Dr. Jesse, painted by Professor Ankeney, and Dr. Hill, painted by Miss Heinrici, presented by Alpha Phi Sigma. The portraits of Wm. F. Switzler and Governor Hadley decorate the corridor and those of B. B. Minor, president of the University 1860-62; Wm. H. Duncan, treasurer 1841-55; Joseph Ficklin, professor of Mathematics 1865-77; Joseph Norwood, librarian 1862-77 and dean of Medical faculty 1872-80, in the cataloging room.

The Loan desk is in the main reading room. Application should be made to the attendant at this desk for all books. Those books which are drawn for home use should be registered with the Charging clerk at the south end of the Loan desk. Books borrowed for home use must be returned to this desk in order to have the books discharged.

HOW TO DRAW A BOOK.

When a reader visits the library for the first time he should learn the location of the card catalog, the indexes to books, the indexes to periodicals, the Atlases, dictionaries, cyclopedias and the reference books. For the description and location of these he should consult the index of this handbook. Any books in these classes may be used freely without the formality of Reading room slips.

If the reader wishes the use of a book shelved in the stacks, he should fill in a Reading room slip for it. First consult the card catalog. The cards are arranged by authors, titles, and subjects in one alphabet like the subject matter of a dictionary or encyclopaedia. If he knows the author he should turn directly to it in the catalog; if he knows the title and not the author, he should turn directly to the first word of the title. If both the author and the title are unknown, he should turn to the subject where he will find a list of the books bearing on that subject. To illustrate: If a reader wishes to find a book on **taxation** which he knows was written by Seligman he should turn to Seligman where he will find a card for "On the Shifting and Incidence of Taxation." If he wishes to find a book on taxation but does not remember the author he should turn to the subject of **taxation** where he will find cards for the books treating this subject. The subject cards have red edges and the subjects are written in red at the top of the card.

The reader should notice that when the same name is given to a person, a place and a title, the cards are alphabetized in this order, person, place, title.

Example:

London, Jack.

Call of the Wild.

London (City) Board of Education.

London and Edinburgh philosophical magazine.

New Bedford.

New York (City).

New York (State).

New York medical journal.

Newark.

The call number in the upper left-hand corner of the card called the class mark, together with the author and title should be written on one of the Reading room tickets kept for that purpose in the trays at each end of the catalog case. The ticket should then be handed to one of the attendants at the Loan desk. To insure quick service one should never fail to include the class mark on the Reading room ticket. Use a white ticket for books to be used in the Reading room. Use a pink ticket for books to be used at home. A student may draw three books at a time with a limit of 14 days on each book. A fine of 5 cents a day is incurred for overdue books. "Reference" and "reserved" books may be drawn for overnight use only. See page 37.

FACULTY AND ALUMNI COLLECTION.

This is a collection of books written by members of the Faculty and by Alumni. It is shelved in the carved mahogany case in the corridor of the library. The case came from the German exhibit at the St. Louis Exposition.

RED STAR COLLECTION.

This is a selection of popular books for cultural reading, including fiction, travel, description, biography, etc. The books are changed occasionally and new ones are being frequently added. These may be drawn with a limit of 14 days on each book. They are shelved in the Reading room on the wall case to the north of the Loan desk. It is called the "Red star" collection because of the red star label stamped on the back of the books.

TEXT-BOOK COLLECTION.

This collection, as the title indicates, consists of text-books in the several departments of knowledge. A great many of the books were donated by the publishers. It is now shelved in Room C of the stacks and contains about 400 volumes.

THESES.

The theses for the master's and doctor's degree have been bound and cataloged and may be borrowed like books. The Engineering theses are in the Engineering library.

GOVERNMENT DOCUMENTS.

The government documents are shelved in the "Document room" on the second floor. Readers wishing to consult the documents should apply to the book clerk.

The indexes to the government documents are shelved with the other indexes opposite the catalog in the corridor of the Library. They are:

Poore, B. P. Descriptive catalog of the government publications of the United States, Sept. 5, 1774-Mar. 4, 1881. General arrangement is chronological with author and subject index.

U. S. tables of and annotated index to the congressional series of the U. S. documents. 15th-52d. Congress, 1817-1893. The material is arranged alphabetically by author, subject and title.

Ames, J. G. Comprehensive index to government publications, 1881-93. Includes publications of departmental and congressional sets with author index.

U. S. Comprehensive index; catalog of the documents, 1889-date. Issued at the close of each regular Congress. Includes departmental and congressional sets. Arrangement, alphabetic by subject.

U. S. Monthly catalog of public documents, 1895-date. Priced list by bureau and division (formerly by department), a monthly index from 1900-05, a cumulative index every six months, with an annual index in December. The special value of the catalog is to show how and where the documents may be obtained, and the prices of those available for distribution.

REFERENCE COLLECTION.

The reference collection of books containing about 5,000 volumes, is arranged on open shelves around the reading-room so that readers may have free access to the books. These are all arranged numerically according to the classification number on the catalog cards. This reference collection contains the principal bibliographies and catalogs, encyclopedias—American, English, French and German—dictionaries—English and foreign—atlasses, bound volumes of the popular periodicals and the most frequently used works upon all subjects. On the north end of the delivery desk will be found a special card catalog of all books on the reference and index shelves. Reference books should be returned to their places on the shelves promptly after using.

BIBLIOGRAPHIES.

The reference collection begins with the bibliographies, indexes and catalogs which are shelved in the corridor of the Library opposite the catalog-case.

The case in the corridor contains a collection of books which supplements the card catalog called "Indexes." It contains indexes of the government documents, the International catalog of scientific literature, dictionaries of quotations, contemporary biography, statesman's year-book, almanacs, etc.

DICTIONARIES.

The dictionaries are shelved on the dictionary case in the center of the Reading room. The more important ones are the following:

Century, Webster's International, Standard, Murray's English, Skeat's Entymological, Bosworth's Anglo-Saxon, Larouse (French), Lippincott's Gazetter, Thomas's Biographical dictionary, and the smaller dictionaries of most of the languages.

If the reader wishes the pronunciation and brief definition of a word he should consult Webster's International or the Standard. If he is looking for definition of scientific terms and encyclopaedic information he should consult the Century, both the old and the new volumes. If he wishes the history of a word with examples of its usage in ancient and modern times, he should consult Murray's dictionary, sometimes called the Oxford dictionary.

Dictionaries of biography are shelved with the reference books—920—but the current biographical dictionaries like the Who's Who, are on the Index case. Dictionaries of special subjects are shelved with their respective subjects in the reference collection, such as Hasting's Dictionary of the Bible which is classed with religion.

ATLASES AND MAPS.

The atlases are on the atlas case at the west end of the dictionary case. The more important ones are the Century, Rand MacNally's and Cram's. The topographic and geologic maps comprising a large

and valuable collection are shelved in the Geological building. Political and other maps of which the library has but few are shelved in the basement stack room.

ENCYCLOPAEDIAS.

The general encyclopaedias are kept on the wall case in the Reading room opposite the Loan desk. The special encyclopaedias are shelved with their subjects in the Reference collection. Lalor's Cyclopaedia of political economy is shelved with the books on economics in 330. Of the general cyclopaedias the library has: The American, the Americana, the Britannica, the New International, the Johnson's, and Brockhaus Conversations-lexikon.

Every encyclopaedia has its strong points. Some are old and some recent. The reader must determine therefore, beforehand the exact information he wishes to secure and which encyclopaedia will give him the information with the least effort and briefest time. The Americana is the latest encyclopaedia and is especially full on scientific topics. The New International is the busy man's book of facts. The annuals bring the matter down to the close of 1909. The Britannica is old but it contains exhaustive treatises on a limited number of subjects out of date for modern history and all science. Use the index volume. Subjects are not arranged alphabetically.

CURRENT PERIODICALS.

The library receives currently 1300 periodicals. The agricultural, engineering, legal, and medical periodi-

cals are sent to the respective departmental libraries. The others are kept in the pigeon holes built against the wall spaces in the south end of the Reading room. This gives a collection of 640 periodicals accessible to every reader. They are thrown into classes and arranged alphabetically under each class, with the subjects printed in large letters at the top of the rows of pigeon holes. A printed list of current periodicals received by all the libraries may be had by enquiry at the Loan desk.

INDEXES TO PERIODICALS.

The indexes to the popular magazines are shelved in the Reading room. The indexes to technical literature are on the Index shelves; to medical literature are in the Medical library; to engineering literature, in the Engineering library; to agricultural literature, in the Agricultural library; and to legal literature in the Law library. The following indexes to the popular journals will be found in the Reading room:

Poole's index to periodical literature.

1802-1906—7 vols.

Indexes 427 periodicals.

Supplemented by:

Annual library index, 1901-1908.

Indexes 123 leading periodicals, and contains besides, a list of bibliographies, a necrology of authors and an index of dates for the year.

Readers' guide to periodical literature 1900-date.

Indexes 93 periodicals.

Annual magazine subject index.

Indexes 79 American and English periodicals; 44 from their first issues to December, 1907; 35 for 1907, and 13 more for 1908. Street's pandex of the news, 1908-9.
Current events index, 1908.

BOUND PERIODICALS IN THE READING ROOM.

Appleton,	Lippincott's,
Arena,	Living age,
Atlantic,	Nation,
Bookman,	Nineteenth century.
Century,	North American,
Chautauquan,	Outing,
Cosmopolitan,	Outlook,
Critic,	Putnam's,
Current literature,	Review of reviews,
Everybody's,	Scribner's,
Forum.	World to-day,
Harper's magazine,	World's work.
Independent,	

The rest of the bound periodicals are shelved in the stacks with the special classes to which they belong.

RULE FOR CIRCULATION OF PERIODICALS.

The last numbers of the following periodicals and the bound volumes of the sets shelved in the reading room are not to be drawn except for over-night use; to be drawn not earlier than 9:30 p. m. and to be returned before 8:05 a. m. the next morning or on Sunday before 2:05 p. m. The unbound back numbers of all periodicals in the pigeon holes in the reading room and the last numbers of those not listed below may be drawn for two days at a time.

American journal of sociology,	Masters in art.
American magazine,	Missouri school journal,
Appleton's magazine,	Munsey's magazine,
Atlantic monthly,	Nation,
Book review digest,	New England magazine,
Bookman,	North American review,
Century,	Outing,
Cosmopolitan,	Outlook,
Cumulative book index,	Overland monthly.
Current literature.	Political science quarterly,
Education,	Popular science monthly,
Educational review,	Publisher's weekly.
Elementary school teacher,	Putnam's magazine,
Everybody's magazine,	Quarterly jour. of economics,
Forum,	Review of reviews.
Harper's bazar,	St. Nicholas,
Harper's monthly,	School review,
Harper's weekly,	Science,
Independent,	Scientific American,
International studio,	Scientific Amer. supplement,
Ladies' home journal,	Scribner's magazine,
Lippincott's magazine,	Woman's home companion,
Literary digest,	World to-day.
Littell's living age,	World's work.
McClure's magazine,	

NEWSPAPERS.

Following are the principal newspapers received by the library:

Chicago daily socialist.	New York sun.
Chicago record-herald,	St. Joseph news-press,
Columbia daily tribune.	St. Louis globe-democrat,
Columbia statesman,	St. Louis republic,
Columbia weekly herald.	San Francisco chronicle,
Kansas City journal.	University Missourian.
Kansas City post,	Westliche post,
Kansas City star,	

The files of Missouri papers will be found in the Library of the State Historical Society, Room No. 13, Academic Hall.

The last seven issues of the dailies are always kept filed on the newspaper rack in the southwest corner of the room. Many of the county papers are received and papers from the smaller towns of the state. These are arranged alphabetically in the pigeon holes in the corner just behind the newspaper rack.

NEWSPAPER INDEXES.

The library has two newspaper indexes:

Current events index, 1908-date.

Quarterly with annual cumulations.

Street's Pandex of the news, 1908-1909.

Weekly with monthly, quarterly and annual cumulations.

These indexes are kept in holders in the case with the periodical indexes. They are alphabetical records of the subject matter of the newspapers of the United States, and are very useful in searching information on current topics which can not be found in any other form. They give the dates of events as well as brief notes about them.

NEW BOOKS.

The new books added to the library are first placed on open shelves in the Reading room in the case opposite the Loan desk, so that students and members of the Faculty may examine them before the books are sent to the stacks.

**AIDS IN THE SELECTION AND PURCHASE OF
BOOKS.**

Any one desiring guides in the selection and purchase of books, will find them in Room No. 6. These are contained, for the most part, in catalogs of other libraries, trade bibliographies, auction sale and second-hand catalogs. The important catalogs of other libraries are the following, shelved on the Index cases:

Library of Congress (card) catalog.

Boston Athenaeum.

Detroit Public library.

Bibliothèque nationale.

Peabody's Institute library.

Carnegie library, Pittsburgh.

A. L. A. Catalog, 8,000 vols. for a popular library with notes, 1904.

These are valuable in showing what material there is upon various subjects as well as what books different libraries contain. The A. L. A. Catalog, 1904, is the best guide for the general reader. It contains titles of 8,000 books selected by the American Library Association in 1904 for the average public library.

TRADE BIBLIOGRAPHIES.

(List of books published in various countries, giving place of publication, publisher, date and price.)

AMERICAN.

Evans, C..

American bibliography. 5 vol., 1639-1778. Other volumes to appear, bringing the list of books up to 1820. Books, pamphlets and manuscripts listed. Good descriptive and historical notes.

Roorbach, O. A.

Bibliotheca Americana. 1820-1855. Author list only.

American Catalog, 1876-date. Author and subject-list in separate alphabet. Up to 1895 it included a valuable list of government and state publications. This is an annual publication with five-year cumulations.

United States catalog.

Books in print, 1902.

Books printed in U. S. 1902-1905.

This is a dictionary catalog including authors, titles and subjects in one alphabet.

Cumulative book index, 1898-99, 1902-date. This is a monthly alphabetical list of current books, by author, title and subject; published in the United States with semi-annual and annual cumulations.

Book review digest 1905-date.

Published monthly with annual cumulations. This contains a list of the important publications in the U. S., with a digest of the reviews of the respective books.

Publishers' trade list annual, 1902-date.

Collection of publishers' catalogs in alphabetical order.

Publishers' weekly. A weekly list of current books published in the United States with annual cumulations. The annual is called the "Annual American Catalog."

ENGLISH.

Lowndes, W. T. Bibliographer's manual of English literature.

Author list of all important books published in Great Britain from the earliest times to 1834. Gives both the published price and the subsequent auction sale price of the work. Describes the various editions of a work.

London catalog of books, 1814-1846. Author list of books.

English catalog of books, 1835-date. Author, title and subject-list of books. Annual with frequent cumulations.

Reference catalog of current literature.

Biennial collection of publishers' catalogs in alphabetical order, with author and title index.

GERMAN.

Kayser, C. G.

Völlständiges bñcherlexicon, 1750-date. Author list with a subject index for the cumulated volumes.

Heinrich, J. C.

Halbjahrs-Katalog, 1903-date.

Funfjahrs-Katalog, 1901-5.

Deutscher literaturkatalog, annual, 1907-date. A trade catalog of German books, issued by F. A. Brockhaus, Leipzig.

Kürschner's deutscher literatur-kalendar, 1901-date.

Annual in 2 parts.

Part 1, Survey of the year, necrology, notices of literary clubs, etc.

Part 2, Author list of publications, list of periodicals, notices of theatrical boards, etc. Very inclusive.

FRENCH.

Lorenz, Otto.

Catalogue generale de la librairie francaise, 1840-date.

Author list with subject index. Characterization of each author. Appears irregularly.

Catalogue mensuel de la librairie francaise, 1900-date. A monthly list with an annual index.

ITALIAN.

Pagliaini, A. Catalogo generale della libreria italiana, 1847-1899.

3 Vols. and supplements not yet completed.

CATALOGS OF SECOND HAND BOOKS.

The library is constantly receiving lists of books at auction, and second hand books to be had at the prices affixed. These may be consulted in the Librarian's office. The following books may be found helpful in giving a knowledge of prices and editions:

Livingston, L. S.

American book-prices current; a record of books, manuscripts, and autographs sold at auction in New York, Boston and Philadelphia . . . with the prices realized. 1906-date.

Brunet, J. C.

Manuel du Librairie, 1860-80.

Lowndes, W. T.

Bibliographer's manual of English literature.

Sonnenschein, W. S.

Best books, ed. 2, 1891.

Reader's guide to contemporary literature, 1895.

AIDS FOR GENERAL READING.

On the wall case north of the Loan desk in the Reading room is the Red-star collection. This is a collection of books that have been selected to meet the demands of popular reading. Some of the latest novels and standard works of fiction, biography, history, travel, essays and the like are to be found here. These books may be drawn with a limit of 14 days on each book. Beside them, is a copy of Wilson & Co.'s Catalog of English prose fiction; a selected list of fiction entered by author and title with brief annotations. The entries checked are those contained in this library. This is a useful guide in choosing what to read.

The exhibition case in front of the Loan desk is used to display the new books received by the Library before they are sent to the stacks. The following books may be helpful:

- Baldwin, The book lover.
- Harrison, The choice of books.
- Koopman, The mastery of books.
- Leyboldt, List of books for girls and women.
- Porter, Books and reading.
- Right reading.
- Sonnenschein, The best books.
- A reader's guide to contemporary literature.
- Spofford, A book for all readers.
- Van Dyke and others, Counsel upon the reading of books.

AIDS FOR ORATORS AND DEBATERS.

The library has a good reference collection. Some information can be found on nearly any subject. It has been found that the debaters and public speakers make large use of the library. Those pursuing courses in oratory and argumentation will find the following books helpful:

- Alden, The art of debate.
- Baker & Huntington, Principles of argumentation.
- Brookings & Ringwalt, Briefs for debate on current, political and social topics.
- Buckley, Extemporaneous oratory.
- Byars, Handbook of oratory.
- Clark & Blanchard, Practical public speaking.
- Johnson, American orations, 3 vols.
- Mathews, Oratory and orators.
- Matson, References for literary workers with introductions to topics and questions for debate.
- Modern eloquence, 15 vols.
- Pearson, Intercollegiate debates.
- Power. Making of an orator.

Prather, Winning orations of the inter-state oratorical contests. 2 vols.

Raymond & Miller, The speaker.

Ringwalt, Briefs on public questions with selected lists of references.

Sears, History of oratory.

Shurter, Masterpieces of modern oratory.

Vaeder, Legal masterpieces; specimens of argumentation and position by eminent lawyers.

World's best orations, 10 vols.

SEMINARY ROOM.

The large lecture room in the basement below main reading room has been fitted up for reading room and stack room purposes. The south side constitute a reading room for graduate and seminar students. Books in constant demand by these students will be placed on open shelves and therefore readily accessible without the formality of a reading room slip. The professors in charge of the work will furnish the librarian a list of all students entitled to admission to this room. Other students not be admitted except in case the main reading room is crowded.

The north end of the room contains stacks holding all the books on the sciences not shelved in departmental collections. A student assistant will be in charge of the room to assist readers in the matter of getting books and the like. Admission to the reading room does not imply admission to the stacks located there.

LAW LIBRARY.

The Law library contains 14,650 volumes and occupies five rooms on the first floor of the Law building. The main room contains the catalog, the encyclopaedias, dictionaries, the United States and State reports. The English reports occupy the northeast room; the bound periodicals the northwest room; the Digests and statutes the southeast room. The text-books are in the librarian's office. The students have free access to all the books, except the text-books, without formality. The text-books are issued on reading room tickets. The text-books may be drawn for overnight use. Failure to return a book of this class by 9 o'clock the next morning subjects the borrower to a fine of 25 cents. A few books of a popular nature, such as biographies may be drawn for a period of 10 days. The books other than those in the "Text-book" collection do not circulate outside of the building. The reading rooms have a seating capacity of 60 and are open from 8 a. m. to 1 p. m. and 2-5 p. m. and 7-9 p. m. Miss Bertha Bond is in charge.

AGRICULTURAL LIBRARY.

The Agricultural library contains upwards of 5000 volumes and occupies the second floor of the west end of the new Agricultural building. The old Agricultural library, the Agricultural experiment station library and a large number of books from the Horticultural and general libraries were brought together

in 1909 and formed the present Agricultural library. The Reading room will seat 50 people. It contains the Agricultural periodicals, both the current numbers and the bound volumes, the card catalog, the dictionaries and encyclopaedias, the herd books, and the librarian's desk. The stack room contains all the other books, consisting of the latest and most useful books on the various subjects studied. The library possesses a complete card index of all the publications of the U. S. Department of Agriculture. It also has the subject cards for publications of all state experiment stations.

The books on home economics and rural education are shelved in the General library. The horticultural and botanical books are located in the Horticultural building, and the dairy, and veterinary are on the farm. The library was opened last September. It is now in good condition with the books all catalogued, the cards filed.

The library is open from 8 a. m. to 12:30 p. m. and 2-5 p. m. Miss S. Blanche Hedrick is in charge.

The other departmental libraries are also listed in the Directory of the libraries.

REFERENCE BOOKS.

The Librarian will give a one-hour course of instruction on the use of reference books in the School of Journalism during the first semester 1910-11. For a description of the course see University of Missouri catalog 1909-10, page 333, Bibliography.

LIBRARY METHODS.

The Librarian will give a one-hour course of instruction in the School of Education on "Library Methods" during the year 1910-11. For a description of the course see University of Missouri catalog 1909-10, page 270, Library Methods.

GENERAL LIBRARY.

UNIVERSITY OF MISSOURI.

Regulations for the Circulation of Books, Periodicals, Etc.
September 1, 1910.

1. During the College year the Library is open every week day from 7:55 a. m. to 6:00 p. m., and from 6:45 p. m. to 10:00 p. m., except Thanksgiving Day, the Christmas Holidays and Washington's Birthday. On Sundays the reading room is open from 2 to 5 p. m.

During the Christmas Holidays the Library is open every week day from 8:00 a. m. to 12:00 m. and 1:30 to 5:00 p. m., except Christmas Day and New Year's Day.

During the Summer Session, the Library is open from 7:55 a. m. to 5:30 p. m., and 7:00 to 10:00 p. m., except July 4th.

During the summer vacation the Library is open from 8:00 a. m. to 12 m., and from 1:30 to 5 p. m.

2. The book-stacks are not open to the public, in general, but admission to a specified section of the stacks may be given, temporarily, at the discretion of the Librarian, and a card of admission for a limited time may be issued to students who are doing special research work, and to others recommended by an officer of instruction.

3. Books may be drawn by all officers and students of the University. This privilege may be extended in the discretion of the Librarian to graduates and former students of the University, to other responsible private citizens of the State, to libraries, to clubs, and other organizations, under the regulations now in force governing the use of the Library by students, provided that the borrower pay the cost of transportation.

4. The last numbers of certain periodicals, a list of which is posted at the Loan Desk, may not be drawn, except for overnight use, without the special permission of the Librarian or his assistant in charge.

Works of fiction may be drawn with a limit of 14 days on each book, subject to renewal, provided the work is not in demand. Fiction, as a rule, will not be loaned to out-of-town readers.

Works which are rare, costly or otherwise unsuited for general circulation, are lent only under special conditions and the discretion of the Librarian.

5. Books must not be taken from the Library until they have been charged at the Loan Desk. Failure to have the book charged will subject the borrower to a fine of one dollar.

6. All officers of the University may borrow as many books as are needed for their work, provided the books are not in demand at the library. All such books must be returned before Commencement day every year. Works of fiction may be drawn with a limit of 14 days on each book.

Students, student assistants, and others may borrow three books at a time with a limit of 14 days on each book, Sundays and holidays not included.

7. A fine of five cents a day will be imposed for each book that a book is kept over-time; the fine to be paid when the book is returned. If the book is not returned within ten days after the fine is due, the borrower shall be required to pay the accumulated fines and the value of the book. If the book is lost, he shall pay the cost of the book, and the fines accumulated at the time he notifies the library that the book is lost.

8. Students are permitted to renew books at the expiration of the 14-day period, except in the case of books in demand, books asked for by another borrower, and books overdue.

9. Citizens other than officers and students of the University applying for the privilege of borrowing books for the first time must sign a registration card at the Loan Desk. All persons wishing to borrow books for home use should apply during the hours 8 a. m. to 12 m., 1:30 to 5 p. m.

10. Any person who desires to obtain from the Library books already lent will receive prompt notice of its return, provided he leaves a self-addressed postal or stamped envelope. If the book is not in demand, it will be held subject to his order

that a particular book held by him has been applied for and that its return is desired.

11. No student shall be recommended for a degree until he has paid all fines and has returned in good order, or replaced every book that he has borrowed; or, in default thereof, has deposited with the Librarian the value of it in money; or, if it belong to a set, the value of the whole set in the case the single volume cannot be purchased separately.

12. The reference books in the reading room are not intended for circulation. They must on no account be removed from the reading room, except with the express permission of the assistant in charge of the reading room, and they are to be used with a due regard for the rights of others. Books in the reference library and "reserved books" may, at the discretion of the Librarian, be loaned to students after 9:30 p. m. for over-night use, and over Sunday. They must be returned before 8:05 a. m. Failure to do so, will subject the borrower to a fine of 25 cents and a possible withdrawal of the privilege. If not returned by 9 a. m., a messenger will be sent for the book and the expense paid by the borrower. If he should fail to secure the book the borrower shall pay 5 cents an hour until the book is returned.

13. The departmental libraries are in general, reference collections, not for circulation. They are open for consultation as a rule from 9 a. m. to 12 m., and from 2 to 5 p. m. The same rules and regulations obtain in the departmental libraries.

BOOKS FOR FARMERS AND FARMERS' WIVES

"If country life is to become all that it should be, if the career of the farmer is to rank with any other career in the country as a dignified and desirable way of earning a living, the farmer must take advantage of all that agricultural knowledge has to offer, and also of all that has raised the standard of living and intelligence in other callings."—Theodore Roosevelt in Introduction to the Report of the Commission on Country Life.

The purpose of this bulletin is to place before the farmers and farmers' wives of Missouri the names and the descriptions of a few useful books which may be of service to them in their work. I am convinced that many farm homes would possess books dealing with the various departments of home and farm activity if the farmers knew precisely what books would give them the information they desire. If the farmer should have in his home the best books on poultry where he could consult them daily, he would increase his poultry products many times. If he had constant access to the best methods of caring for his sheep, and hogs, and cows, and would be guided by the experience of other men who have been successful stock raisers, he would make money more rapidly.

A resident of Columbia purchased twelve pullets and five cockerels in December, 1910. He studied several poultry books continually and followed directions and suggestions as well as he could with his lack of conveniences, and at the end of the first year he had a net gain of (\$28) twenty-eight dollars. It pays in dollars to have the best books in dealing with specific problems. To make the most money out of poultry, a poultry raiser must master his subject. He must know the best methods of raising chicks, of feeding and housing his laying stock, and the like. The same is true in any other vocation. Many farmers have not had an opportunity to study these problems in the College of Agriculture. Their observation and experience

have not been sufficiently wide to make them adept in all departments of farming.

The farmer's wife, too, has her problems. There is the care of the babies, the preparation of the food, the decoration of the home, all of which may be done more efficiently by the mothers and wives who study those problems in the light of the experience of others. If the housewife is interested in foods let her consult some book in our list on foods. If she is specially interested in the healthy growth of her boys and girls, let her read Hutchinson's Handbook of health and Holt's Care and feeding of children. These are the books which apply to her problems.

If the industry of your county is dairying, then here is a list of books on dairying, any one of which would be useful to you. If your county is devoted to fruit raising, then this list of books on horticulture may be worth while.

The books are grouped by subject and only a few of the best books are listed. These books have been recommended by the several professors in the College of Agriculture who teach the several subjects included in these lists. The library possesses other books on these subjects, which will be loaned if the readers wish them. The library contains books on a multitude of subjects. If information is wanted which can not be supplied by the books listed below, address the Librarian and state your problem. A book treating your problem will be sent if it is in the library and not in use.

The individual books listed may be loaned to residents of the state, provided the borrower pay the cost of transportation. The amount of postage in each case is indicated. These may be loaned for a period of (14) fourteen days subject to a renewal of (14) fourteen days, making a total of (28) twenty-eight days. If a reader should desire a book for a longer period, he should write to the Librarian about it. The fine for not returning a book on time is five cents a day.

These books may also circulate in groups. If several

families in a community wish to study horticulture, all the books in this list may be sent as a travelling library on the request of two or more residents of the community. The library in that case may remain for a period of three months. Arrangements have been made with the Missouri Library Commission, Jefferson City, to send out these groups in travelling libraries. Application for a travelling library may be made on the enclosed blank card. The card may be mailed direct to the Secretary of the Commission, or to the Librarian of the University.

These lists may also serve as a guide to the purchase of books for the home library. The names and addresses of the publishers and the prices at which the books were published is given to facilitate their purchase. They may be secured through the local book-seller or from the publishers themselves. The library has none of them for sale.

HOME ECONOMICS.

A. GENERAL.

Hutchinson, Woods. Handbook of health. Illus. N. Y., Houghton, 1911. 347 pp. Publisher's price, \$1.25; postage, 12c.

"This is a handbook of practical instruction for running the human body." "And seeing that, like other machines, it derives the whole of its energy from its fuel, the subject of foods, their properties, uses, and methods of preparation has been gone into with unusual care." Preface.

Richards, Ellen H. Cost of food: a study in dietaries. N. Y., Wiley, 1901. 161 pp. Publisher's price, \$1.00; postage, 8c.

"A study of food requirements and economical means of meeting them."

Richards, Ellen H. Cost of cleanness. N. Y., Wiley, 1908. 114 pp. Publisher's price, \$1.00; postage, 8c.

Contents: Clean house, personal cleanness and the disposal of personal wastes, the clean city, the cost of uncleanness, the way to future cleanness.

Richards, Ellen H. Cost of living as modified by sanitary

science. Ed 3, N. Y., Wiley, 1905. 164 pp. Publisher's price, \$1.00; postage, 8c.

"Attempts to indicate best methods and the proper division of economics."

Van de Water, V. T. From kitchen to garret. (Young farmer's practical library). N. Y., Sturgis and Walton, 1910. 262 pp. Publisher's price, 75c; postage 8c.

"It aims to simplify household duties of wife and daughter."

B. CHILDREN.

Brown, D. R. Baby: a book for mothers and nurses. Boston, Whitcomb & Barrows, 1908. 200 pp. Publisher's price, \$1.00; postage, 7c.

"The writer knows all that is to be known about babies."

Holt, L. E. Care and feeding of children: a catechism for the use of mothers and children's nurses. Ed. 3. N. Y., Appleton & Co., 1903. 143 pp. Publisher's price, 75c; postage, 7c.

"A standard work."

C. FOODS.

Barrows, Anna. Principles of cookery. Chicago, American School of home economics. 1907. (Library of home economics, v. 5). Publisher's price, \$1.50; postage, 12c.

A course for home study.

Church, A. H. Food. Some account of its sources, constituents and uses. Lond. Chapman, 1900. 260 pp. Publisher's price, \$1.00; postage, 8c.

Part 1. Of food in general.

Part 2. Of vegetable foods.

Part 3. Of animal foods.

Part 4. Of food adjuncts.

Part 5. Of diet and dietaries.

Conn, H. W. Bacteria, yeasts and molds in the home. Boston, Ginn. 299 pp. Publisher's price, \$1.00; postage, 9c.

The work is designed for all persons who have practical charge of homes and are interested in keeping them in the best and most healthful condition.

Hutchison, Robert. Food and the principles of dietetics. Ed. 3. N. Y., Wood, 1911. 635 pp. Publisher's price, \$3.00; postage, 30c.

A comprehensive treatment of the subject. The lectures were first given to students, then revised and enlarged and printed in book form. The author says: "It is hoped that it may also prove intelligent and interesting to anyone desiring to acquire some knowledge of foods and the difficult problems of nutrition."

Norton, Alice P. Food and dietetics. Chicago, American school of home economics, 1907. (Library of home economics v. 6). 227 pp. Publisher's price, \$1.50; postage, 13c.

A course of home study.

Snyder, Harry. Human foods and their nutritive value. N. Y., Macmillan, 1908. 368 pp. Publisher's price, \$1.25; postage, 13c.

"Its aims to present some of the principles of human nutrition along with a study of more common articles of food. Prominence is given to those—as flour, bread, cereals, vegetables, meats, milk, dairy products, and fruit, that are most extensively used in the dietary." Preface.

Other books of worth on this subject, which we do not circulate to non-residents, are:

Lincoln and Barrows. Home science cook book. Boston.

Whitcomb and Barrows. Publisher's price, \$1.00.

Farmer. Boston cooking school cook book. Boston, Little, Brown & Co. Publisher's price, \$2.00.

Fireless cooker. Chicago, American school of home economics. Publisher's price, 10c.

D. HOME DECORATION.

Clark, T. M. Care of a house. A volume of suggestions to householders, housekeepers, landlords, tenants, trustees, for the economic and efficient care of dwelling houses. Illustrated. N. Y., Macmillan, 1903. 291 pp. Publisher's price, \$1.50; postage, 14c.

"Valuable handbook on the repair and maintenance of houses. for non-technical readers."

Daniels, Fred H. Furnishing of a modest home. Illus.

Worcester, Mass., Davis Press, 1908. 114 pp. Publisher's price, \$1.00; postage, 8c.

"The aim of the book is to promote good taste in the home." Introd. Treats of plan of the house, the walls and floors, the several rooms and their decoration, pictures, casts and small ornaments.

French, Lillie H. Homes and their decoration. N. Y., Dodd, 1903. Illustrated. 446 pp. Publisher's price, \$3.00; postage, 21c.

A thorough discussion of decorations and furnishings of the home.

Kellogg, Alice M. Home furnishings, practical and artistic, with 55 illustrations from photographs. N., Y. Stokes, 1905. 278 pp. Publisher's price, \$1.50; postage, 12c.

Object: "To give practical aid to the aspiring home artist. The author has considered the different parts of the house in turn, and suggested the appropriate furnishings and decorations for each." Preface.

Priestman, Dorthy T. Home decoration. Philadelphia, Penn Pub. Co., 1909. 208 pp. Publisher's price \$1.00; postage, 10c.

Treats such subjects as selecting furniture, floor coverings, wall decorations, window trimmings, decorative ornaments, the nursery, the kitchen, home-made rugs, etc.

Richards, Ellen H. Cost of shelter. N. Y., Wiley, 1905. 142 pp. Publisher's price, \$1.00; postage, 8c.

"A thorough discussion of housing problems."

Wheeler, Candace. Principles of home decoration, with practical examples. Illus. N. Y., Doubleday, 1903. 227 pp. Publisher's price, \$1.80.

Deals with theory and specific applications.

ANIMAL HUSBANDRY.

Coburn, F. D. Swine in America. A text book for the breeder, feeder, and student. Illustrated. N. Y., Judd, 1910. 619 pp. Publisher's price, \$2.50; postage, 22c.

This book deals with breeds and breeding, feeds, such as alfalfa, roots, corn, wheat, etc., housing, preparing for market, and diseases.

Craig, John A. Judging live stock. Des Moines, Iowa.

Kenyon Printing Co., 1910. 187 pp. Publisher's price, \$1.50; postage, 13c.

Includes judging horses, cattle, sheep and swine.

Davenport, E. Domesticated animals and plants. A brief treatise upon the origin and development of domesticated races with special reference to the methods of improvement. Boston, Ginn, 1910. 335 pp. Publisher's price, \$1.25; postage, 11c.

"After all, the main purpose of the book and the main hope of the writer is to interest the student in affairs of the farm, and to enlist on the part of high schools the same interest in the teaching of agriculture and the preparation for the affairs of country life as is now exercised in the teaching of other subjects and the preparation for other phases of life."

Harper, M. W. Manual of farm animals; a practical guide to the choosing, breeding, and keep of horses, cattle, sheep, and swine. N. Y., Macmillan, 1911. 570 pp. Publisher's price, \$2.00; postage, 18c.

Henry, W. A. Feeds and feeding. A handbook for the student and stockman. Ed. 10. Madison, Wis., The Author, 1910. 619 pp. Publisher's price, \$2.25; postage, 20c.

Part 1. Plant growth and animal nutrition.

Part 2. Feeding stuffs.

Part 3. Feeding farm animals.

Johnstone, J. H. S. The horse book. A practical treatise on the American horse breeding industry as allied to the farm. Chicago, Sanders, 1908. 299 pp. Publisher's price, \$2.00; postage, 12c.

"The work is designed primarily to be of practical value to those who have in view the production of the types of horses in general request upon the farms and in the market places of the United States." Preface.

Jordan, W. H. The feeding of animals. N. Y., Macmillan, 1903. 467 pp. Publisher's price, \$1.50; postage, 15c.

"A valuable contribution to agricultural literature. Not a statement of rules or details of practice, but an effort to present the main facts and principles fundamental to the art of feeding animals."—New England Farmer.

Kleinheinz, F. Sheep management. A handbook for the shepherd and student. The Author, Madison, Wis.,

1911. Illus. 245 pp. Publisher's price, \$1.50; postage, 9c.

"....this handbook has been prepared to serve as a brief guide to sheep management. It treats only of the practical problems of the care and management of the flock which every shepherd engaged in the business has to confront." Preface.

Marshall, F. R. Breeding farm animals. Chicago, Breeder's Gazette, 1911. Ill. 287 pp. Publisher's price, \$1.25; postage, 12c.

"The main object of this book is to direct attention away from profitless speculations that have necessarily characterized some earlier books and to stimulate interest in the more tangible, the physical basis of heredity." Preface.

Mumford, H. W. Beef production. Urbana, Ill., The Author, 1908. 209 pp. Publisher's price, \$1.50; postage, 9c.

Contains: Fattening cattle for the market; breeding beef cattle for the market; elementary principles of stock feeding.

Plumb, Charles, S. Types and breeds of farm animals. Boston, Ginn, 1906. 573 pp. Publisher's price, \$2.00; postage, 18c.

Part 1. Horse, mule, ass.

Part 2. Cattle.

Part 3. Sheep.

Part 4. Pigs.

United States. Department of Agriculture. Special report on diseases of cattle. Rev ed., 1908. Illus. 551 pp. Publisher's price, \$1.00; postage, 22c.

Contains: Administration of medicines, diseases of the special organs, poisoning, surgical operations, infectious diseases, etc.

United States. Department of Agriculture. Special report on the diseases of the horse. Rev. ed. 1907. 608 pp. Illus. Publisher's price, 65c; postage, 22c.

Contains: Examination of a sick horse, methods of administering medicines, diseases of the special organs, general diseases, wounds, shoeing, etc.

DAIRY HUSBANDRY.

Conn, H. W. Bacteria in milk and its products. Designed for the use of students in dairying and for all others concerned in the handling of milk, butter, or cheese.

Phila., Blakiston, 1903. Illustrated. 314 pp. Publisher's price, \$1.25; postage, 9c.

Eckles, C. H. Dairy cattle and milk production. Illus. N. Y., Macmillan, 1911. Publisher's price, \$1.60; postage, 13c.

Each of the dairy breeds is discussed by the author, their characteristics and adaptation being pointed out; the selection of the individual, calf raising, the management of the cow, feeding and stable construction are also included.

Gurler, H. B. The farm dairy. Chicago, Breeder's Gazette, 1908. 163 pp. Publisher's price, \$1.00; postage, 9c.

Henry, W. A. Feeds and feeding. A handbook for the student and stockman. Ed. 10. Madison, Wis. The Author, 1910. 619 pp. Publisher's price, \$2.25; postage, 20c.

Part 1. Plant growth and animal nutrition.

Part 2. Feeding stuffs.

Part 3. Feeding farm animals.

Lane, C. B. Business of dairying. How to conduct dairy farming for the largest profit. N. Y., Judd, 1909. Illustrated. 246 pp. Publisher's price, \$1.25; postage, 13c.

Part 1. The soil.

Part 2. The crops.

Part 3. Dairy herd.

Part 4. Feeds and feeding.

Part 5. Products.

Part 6. Sales.

Plumb, Charles S. Types and breeds of farm animals. Boston, Ginn, 1906. 573 pp. Publisher's price \$2.00; postage, 18c.

Part 1. Horse, Mule, Ass.

Part 2. Cattle.

Part 3. Sheep.

Part 4. Pigs.

Van Slyke, L. L. Modern methods of testing milk and milk products: a handbook prepared for the use of dairy students, butter makers, cheese makers, producers of milk, operators in condenseries, managers of milk shipping stations, milk inspectors, physicians, etc. N. Y., Judd, 1906. 226 pp. Publisher's price, 75c; postage, 9c.

Van Slyke, L. L. and Publow, Chas. A. The science and practice of cheese-making. A treatise on the manufacture of American cheddar cheese and other varieties. Illus. N. Y., Judd, 1910. 594 pp. Publisher's price, \$1.75; postage, 16c.

"A work which represents both scientific and practical sides of cheese-making."

Wing, H. H. Milk and its products. A treatise upon the nature and qualities of dairy milk and the manufacture of butter and cheese. Ed. 13. N. Y., Macmillan, 1909. 325 pp. Publisher's price, \$1.50; postage, 16c.

FARM CROPS. .

Bowman, M. L. and Crossley, B. W. Corn growing, judging, breeding, feeding, marketing, for the farmer and student of agriculture. Ed. 2. Illus. Ames, Iowa, The Authors, 1911. 508 pp. Publisher's price, \$2.50; postage, 17c.

Hunt, T. F. The cereals in America. N. Y., Judd, 1910. 449 pp. Publisher's price, \$1.75; postage, 16c.

Discusses wheat, maize, oats, barley, rye, rice, sorghum, buckwheat.

Hunt, T. F. The forage and fiber crops in America. N. Y., Judd, 1910. 434 pp. Publisher's price, \$1.75; postage, 16c.

"The characteristics of the forage and fiber crops are discussed, and the results of experiment and experience as to their climatic and soil adaptation, cultural methods, insect enemies, fungous diseases, harvesting, use and marketing are summarized with special reference to American conditions." Preface.

Spillman, W. J. Farm grasses of the United States. A practical treatise on the grass crop, seeding and management of meadows and pastures, descriptions of the best varieties, and the seed and its impurities, grasses for special conditions, etc. Illus. N. Y., Judd, 1909. 264 pp. Publisher's price, \$1.00; postage, 10c.

Voorhees, E. B. Forage crops for soiling, silage, hay and pasture. N. Y., Macmillan, 1907. 421 pp. Publisher's price, \$1.50; postage, 16c.

"The work is intended to give brief and practical farming suggestions that will be helpful in the growing and using of forage crops." Preface.

Wing, J. E. Alfalfa farming in America. Chicago, Sanders, 1909. 480 pp. Publisher's price, \$2.00; postage, 16c.

FARM MANAGEMENT.

Hunt, Thos. F. How to choose a farm, with a discussion of American lands. N. Y., Macmillan, 1906. 430 pp. Publisher's price, \$1.75; postage, 18c.

Chapters 1-11 treat of the selection of a farm for profit, with some illustrations of the principles involved. Chapters 12-19 deal with the thirty different regions into which the author has divided America for the purpose of treatment.

Full of advice to those wanting to buy land, to make estimates of the value of farm property, or to know the agricultural resources and possibilities of different localities."

Roberts, I. P. The farmer's business handbook. A manual of simple farm accounts and brief advice on rural law. Ed. 3. N. Y., Macmillan, 1909. 313 pp. Publisher's price \$1.25; postage, 13c.

Part 1. Farm accounts.

Part 2. Rural law.

Part 3. Inventories from the census.

Roberts, I. P. The farmstead. The making of the rural home and the lay-out of the farm. Ed. 5. N. Y., Macmillan, 1910. 356 pp. Publisher's price, \$1.50; postage, 16c.

Treats of the selection of the farm, the lay-out, the house, barns, yards, sanitation, household economy and comfort.

Steiner, H. L. How to keep farm accounts. A practical book for the practical farmer and a text bok for use in agricultural schools. Toledo, O. The Author, 1908. 152 pp. Publisher's price, \$1.00; postage, 7c.

FARM MECHANICS.

Davidson, J. B. and Chase, L. W. Farm machinery and farm motors. N. Y., Judd, 1911. Illus. 521 pp. Publisher's price, \$2.00; postage, 18c.

Part 1. Farm machinery.

Part 2. Farm motors.

Discusses all the more important machines used in modern farming operations.

Farm buildings. New and enlarged edition. A compilation of plans for general farm barns, cattle barns, dairy barns, horse barns, sheep folds, swine pens, poultry houses, silos, feeding racks, farm gates, sheds, portable fences, concrete construction, handy devices, etc. Chicago, Sanders Publishing Co., 1909. 354 pp. Publisher's price, \$1.75; postage, 18c.

This book is a compilation of the best farm building plans published in the Breeders Gazette during recent years.

FORESTRY.

Graves, Henry S. Principles of handling woodlands. N. Y., Wiley, 1911. 347 pp. Publisher's price, \$1.50; postage, 16c.

"The book deals primarily with the principles of cutting mature stands of timber with a view to their replacement by new growth; cutting immature stands made for their improvement; and forest protection, with particular reference to forest fires." Preface.

Green, Samuel B. Principles of American forestry. N. Y., Wiley, 1903. 348 pp. Publisher's price, \$1.50; postage, 14c.

"This is a book on elementary forestry, and has been prepared especially for students and others beginning this subject. It is also intended for the general reader who wishes to secure a general idea of the subject of forestry in North America." Preface.

Keller, Harriet L. Our native trees and how to identify them. A popular study of these habits and their peculiarities. Illus. Fifth ed. N. Y., Scribner, 1907. 557 pp. Publisher's price, \$2.00; postage, 18c.

Roth, Filbert. First book of forestry. Boston, Ginn, 1902. 301 pp. Publisher's price, \$1.00; postage, 10c.

"An effort has been made to present in simple, non-technical language some of the general principles underlying the science, and to state the methods which are employed and the objects to be obtained in the practice of forestry." Preface.

Pinchot, Gifford. A Primer of forestry. Part 1. The forest.

Part 2. Practical forestry. U. S. Department of Agriculture. Farmer's bulletin No. 171 (Part 1); No. 358 (Part 2).

"Part 1 deals with the units which compose the forest, with its character as an organic whole and with its enemies." Preface.

"Part 2 deals with the practice of forestry, with work in the woods, and with the relation of the forest to the weather and the streams, and concludes with a short account of forestry at home and abroad." Preface.

HORTICULTURE.

Bailey, L. H. Garden-making. Suggestions for the utilizing of home grounds. Illus. N. Y., Macmillan, 1909. 425 pp. Publisher's price, \$1.50; postage, 17c.

Treats of ornamental gardening, of fruits and vegetables for home use.

Bailey, L. H. Horticulturists' rule-book. A compendium of useful information for fruit growers, truck-gardeners, florists and others. Ed 2. N. Y. Macmillan. 221 pp. Publisher's price, 75c; postage, 8c.

Bailey, L. H. Nursery-book. A complete guide to the multiplication of plants. Ed. 14. N. Y., Macmillan, 1910. 377 pp. Publisher's price, \$1.50; postage, 16c.

"This little handbook aims at nothing more than an account of the methods commonly employed in the propagation and crossing of plants." Preface.

Bailey, L. H. Principles of fruit growing. N. Y., Macmillan, 1909. Ed. 12. 534 pp. Publisher's price, \$1.50; postage, 13c.

Contains: Location, tillage, fertilization, care of fruit grounds, diseases, harvesting and marketing fruits.

Bailey, L. H. Principles of vegetable gardening. N. Y., Macmillan, 1910. Ed. 9. 468 pp. Publisher's price, \$1.50; postage, 18c.

Part 1. General view.

Part 2. Vegetable gardening crops.

Treats of "making hot-beds, cold frames, the soil and its treatment; all about seeds; lay-out of the garden, marketing and storing produce." The treatment of each vegetable is taken up.

Bailey L. H. The pruning book. A monograph on the pruning and training of plants as applied to American

conditions. N. Y., Macmillan, 1909. 555 pp. Publisher's price, \$1.50; postage, 16c.

Part 1. Fundamentals—fruit buds, healing of wounds, and principles of pruning.

Part 2. Incidentals—some specific modes of training, American grape training.

Fraser, S. The potato. A practical treatise on the potato, its characteristics, planting, cultivation, harvesting, storing, marketing, insects, and diseases, and their remedies, etc., etc. Illus. N. Y., Judd, 1910. 201 pp. Publisher's price, 75c postage, 8c.

Fuller, A. S. Small fruit culturist. N. Y., Judd, 1891. 298 pp. Publisher's price, \$1.00; postage, 11c.

Contains: Barberry, strawberry, raspberry, blackberry, cherry, currant, gooseberry, cranberry, huckleberry, etc.

Hunn, C. E. and Bailey, L. H. Practical garden-book containing the simplest directions for the growing of the commonest things about the house and garden. Ed. 2. N. Y., Macmillan, 1901. 250 pp. Publisher's price, \$1.00; postage, 8c.

POULTRY.

American standard of perfection. Illustrated. A complete description of all recognized varieties of fowls. American poultry association, 1910. 331 pp. Publisher's price, \$1.50; postage, 14.

Class 1. American breeds—Plymouth rocks, Wyandottes, Javas, Rhode Island reds, etc.

Class 2. Asiatic breeds—Brahmas, cochins, langshans.

Class 3. Mediterranean breeds—leghorns, minorcas, etc.

Class 4. English breeds—dorkings, orpingtons, redcaps.

Class 5. Polish breeds.

Class 6. Hamburgs.

Class 7. French.

Class 8. Games and game bantams.

Class 9. Orientals.

Class 10. Ornamental bantams.

Hawks, Earl B. Science and art of poultry culture. A practical text book of poultry husbandry in its various branches. Illus. The Author, 1909. 500 pp. Publisher's price, \$2.75; postage, 14c.

Kains, M. G. Profitable poultry production. N. Y., Judd, 1910. 288 pp. Publisher's price, \$1.50; postage, 12c.

"This book is written to present the case fairly and squarely so the farmer may see the advantages that poultry offers as a means of making money. The book lays special emphasis upon all the important practices and new wrinkles that have been found profitable by professional breeders and poultrymen." Preface.

Purvis, Miller. Poultry breeding. A complete guide for keepers of poultry. Chicago. Sanders Publishing Co., 1910. 323 pp. Publisher's price, \$1.50; postage, 11c.

The topics are arranged in alphabetical order like the topics in an encyclopedia.

Robinson, John H. Principles and practice of poultry culture. Illus. (Country life education series). Boston, Ginn, 1912. 627 pp. Publisher's price, \$2.50; postage, 20c.

Part 1. Poultry industry.

Part 2. Production—location, coops, buildings, fences, fittings, foods, incubation, growth and marketing, egg production, etc.

Part 3. Reproduction—types, breeds, etc.

Part 4. Poultry, fancy—exhibits and judging.

RURAL ECONOMICS AND SOCIOLOGY.

Bailey, L. H. Country life movement in the United States. N. Y., Macmillan, 1911. 231 pp. Publisher's price, \$1.25; postage, 11c.

This volume deals with the present movement for the redirection of rural civilization, discussing the real country-life problem as distinguished from the city problem, known as the back-to-the-land movement.

Bailey, L. H. The state and the farmer. N. Y., Macmillan, 1908. 189 pp. Publisher's price, \$1.25; postage, 9c.

Professor Bailey here discusses the relation of the farmer to the government in its varying aspects. He deals specifically with the change in agricultural methods, in the shifting of the geographical centers of farming in the United States, and in the growth of agricultural institutions.

Butterfield, K. L. Chapters in rural progress. Chicago, University of Chicago Press, 1908. 262 pp. Publisher's price, \$1.00; postage, 9c.

Contents: The study of rural life, problems of progress, expansion of farm life, the new farmer, culture from the corn-plot, education for the farmer, farmers' institutes, rural school, the grange, opportunities for farm women, the country church and progress, summary of progress, social side of farm question, federation for rural progress, etc.

Butterfield, K. L. The country church and the rural problem. Chicago, Univ. of Chicago Press, 1911. 162 pp. Publisher's price, \$1.00; postage, 8c.

Carver, T. N. Principles of rural economics. Boston, Ginn, 1911. 386 pp. Publisher's price, \$1.30; postage, 13c.

An exceptionally clear treatment—the best yet published—of agriculture and the rural problems in their relation to national economy. After a brief history of agriculture in America, the author takes up the factors of agricultural production and management, the distribution of the agricultural income and the problems of rural social life, emphasizing throughout public and social aspects more, and the business aspect less, than has been done in earlier works.

Coulter, J. L. Co-operation among farmers the keystone of rural prosperity (Young farmer's practical library). N. Y., Sturgis & Walton, 1911. 281 pp. Illus. Publisher's price, 75c; postage, 8c.

Plea for co-operative selling, buying and organization in the rural districts in order to bring about educational and social betterment.

Fairchild, G. T. Rural wealth and welfare. N. Y., Macmillan. Publisher's price, \$1.25; postage, 12c.

Discusses agriculture as the chief factor in the production of wealth. Special chapters are devoted to the analysis of forces in the production of wealth, aims of industry, methods of association, special incentives to production, showing the rate of increase and value of farms, farm stock, farm crops, etc.

Field, Jessie. The corn lady: the story of a country teacher's work. Chicago. Flanagan Co., 1911. 107 pp. Publisher's price, \$1.20; postage, 10c.

Harris, H. F. Health on the farm (Young farmer's practical library). N. Y. Sturgis & Walton, 1911. 306 pp. Publisher's price, 75c; postage, 8c.

A simple, practical volume covering all phases of personal and some general rural hygienic problems and differing from other books in being especially adapted to southern conditions.

Hays, W. M. Farm development. N. Y., Judd, 1910. Illus. 391 pp. Publisher's price, \$1.50; postage, 15c.

A comprehensive manual discussing farming as a vocation, the selection of a farm home, planning the farm, subduing the land, drainage, irrigation, roads, bridges and fences.

Ogden, H. N. Rural hygiene. (Rural science series). N. Y., Macmillan. Illus. 434 pp. Publisher's price, \$1.50; postage, 10c.

"An excellent work,—it is untechnical, suited to the average reader and to village health officers." A. L. A. Booklist.

National Society for the Study of Education. Tenth year book, part 2. The rural school as a community center. Chicago. University of Chicago press. Publisher's price, 75c; postage, 5c.

A collection of eight papers discussing the problem of wider social usefulness for rural schools, with concrete examples of methods already in practice.

Powell, E. P. How to live in the country. N. Y. Outing, 1911. Illus. 300 pp. Publisher's price, \$1.75; postage, 14c.

"Those who will find it really most interesting and valuable are the amateur farmers, already 'in being'. To them its practical advice and suggestions will be altogether useful."

U. S. Commission on Country Life. Report with an introduction by Theodore Roosevelt. N. Y. Sturgis & Walton, 1911. 150 pp. Publisher's price, 75c; postage, 8c.

"The purpose of the Commission was to determine the present status of country life in the United States, to point out its main deficiencies and to suggest lines of action and inquiry."

SOILS.

Hopkins, C. G. Soil fertility and permanent agriculture. Ginn, Boston, 1910. 676 pp. Publisher's price, \$2.25; postage, 20c.

"It is the first business of every farmer to reduce the fertility of the soil, by removing the largest crops of which the soil is capable; but ultimate failure results for the land owner unless provision is made for restoring and maintaining productivity. * * * It is the purpose of this book to teach the science of soil fertility and permanent agriculture, chiefly by reporting facts rather than by offering theories." Introduction.

King, F. H. The soil, its nature, relations, and fundamental

principles of management. N. Y., Macmillan, 1909.
318 pp. Publisher's price, \$1.50; postage, 15c.

"The soil has been considered as a scene of life, where altered sunshine maintains an endless cycle of changes, rather than as mere chemical and mechanical mixture, and so far as possible the problems have been given definiteness by treating them quantitatively." Preface.

Roberts, I. P. Fertility of the land. A summary sketch of the relationship of farm practice to the maintaining and increasing of the productivity of the soil. N. Y., Macmillan. Ed. 10. 438 pp. Publisher's price, \$1.50; postage, 17c.

Vivian, A. First principles of soil fertility. N. Y., Judd, 1908. Illus. 273 pp. Publisher's price, \$1.00; postage, 10c.

- Contains: 1. Plant food—its nature and source.
2. Making potential plant food available.
3. Barnyard manure.
4. Commercial fertilizers.

Voorhees, E. B. Fertilizers, the source, character and composition of natural, home-made and manufactured fertilizers; and suggestions as to their use for different crops and conditions. N. Y., Macmillan, 1910. Ed. 11. 349 pp. Publisher's price, \$1.25; postage, 13c.

There is much valuable material published by the United States Department of Agriculture, by State agricultural experiment stations, and by the State boards of agriculture. This material is free. The experiment station of the College of Agriculture of the University of Missouri has published 99 bulletins, 53 circulars, and 4 research bulletins. Ask to have your name placed on the mailing list to receive all publications of the Station. Following is a list of those available for free distribution. Address the Director of the Agricultural Experiment Station, Columbia, Mo.

- Bulletin 54. The strawberry false worm. The strawberry leaf-roller.
Bulletin 55. Pruning peach trees.
Bulletin 71. The fruit tree leaf-roller.
Bulletin 83. Soil experiments on the upland loam of southeast Missouri.

- Bulletin 84. Soil experiments on the prairie silt loam of south-west Missouri.
- Bulletin 87. Co-operative variety tests of corn. Variety tests of corn at Columbia.
- Bulletin 88. Soil management in the Ozark region.
- Bulletin 89. Forest conditions of the Ozark region of Missouri.
- Bulletin 92. Soils of Sullivan County.
- Bulletin 93. Soils of Audrain County.
- Bulletin 97. Co-operation among fruit growers.
- Bulletin 98. San Jose Scale in Missouri.
- Bulletin 99. Inspection of commercial fertilizers, 1911.
- Bulletin 100. Influence of fatness of cow at parturition on percent of fat in milk.
- Bulletin 101. Report of Director, 1911.
- Bulletin 102. Combating orchard and garden enemies.
- Bulletin 103. Silo for Missouri farmers.
- Circular 37. Variations in cream tests.
- Circular 38. The principles of maintaining soil fertility.
- Circular 40. The seeding of alfalfa.
- Circular 41. Directions for testing milk on the farm.
- Circular 42. The seeding of clovers and grasses.
- Circular 43. Wheat growing in Missouri.
- Circular 44. Feeding for milk production.
- Circular 46. Factors influencing the yield of oats.
- Circular 47. Raising calves on skim milk.
- Circular 48. The plastered or Gurler silo.
- Circular 50. Selection of corn for seed and show.
- Circular 51. How to prolong the life of fence posts.
- Circular 52. Growing a woodlot from seed.
- Circular 53. The seeding of cowpeas.

The State Board of Agriculture has published reports from 1865 to date and 10 volumes of bulletins. The following bulletins are still available for free distribution. Address the Secretary of the State Board of Agriculture, Columbia, Mo.

- Bulletin 12, (Vol. 5). Meat inspection.
- Bulletin 6, (Vol. 6). Raising calves on skim milk.
- Bulletin 7a, (Vol. 6). Some experiments on Missouri soils.
- Bulletin 11, (Vol. 6). Apiary inspection.
- Bulletin 3, (Vol. 7). Home Makers' conference association, 1909.
- Bulletin 10, (Vol. 7). The brood sow and her litter.
- Bulletin 11, (Vol. 7). The silo.
- Bulletin 12, (Vol. 7). Crop review for 1909.
- Bulletin 8, (Vol. 3). Corn growing in Missouri.
- Bulletin 4, (Vol. 8). Ornamental planting for the farm home.
- Bulletin 5, (Vol. 8). Cement for the farm home.
- Bulletin 8, (Vol. 8). Steps in agriculture.
- Bulletin 10, (Vol. 8). First prize five-acre farm plan.
- Bulletin 11, (Vol. 8). Second prize five-acre farm plan.
- Bulletin 12, (Vol. 8). Crop review for 1910.
- Bulletin 5, (Vol. 9). Partial list of pure bred live stock.
- Bulletin 8, (Vol. 9). Methods of corn cultivation in Missouri.
- Bulletin 10, (Vol. 9). General Forms for roads and culverts.

Bulletin 11, (Vol. 9). Butchering hogs on Missouri farms.

Bulletin 12, (Vol. 9). Crop review for 1911.

Booklet: A tip on Missouri corn.

Bulletin 1, (Vol. 10). Growing cowpeas in Missouri.

The State Poultry Board has issued two valuable bulletins which will be sent on request. T. E. Quisenberry is Secretary, Mountain Grove, Missouri.

By addressing the Secretary of the Department of Agriculture, Washington, D. C., and requesting that your name be placed on his mailing list you may receive the year books, the farmers' bulletins, and other publications as issued. You could get a list of the publications of this department which are available for free distributon and for sale and then ask for only those in which you are interested.

A list of the experiment stations in the middle west is added for the convenience of those who may have occasion to write to them for information or for some of their bulletins.

Illinois experiment station, Urbana, Ill.

Indiana experiment station, La Fayette, Ind.

Iowa experiment station, Ames, Iowa.

Kansas experiment station, Manhattan, Kansas.

Michigan experiment station, Agricultural College, Mich.

Minnesota experiment station, Minneapolis, Minn.

Wisconsin experiment station, Madison, Wis.

Readers of this bulletin who may wish a list of the best journals, in dairy husbandry, horticulture, animal husbandry and the like or a list of general agricultural periodicals should address F. B. Mumford, Dean of the College of Agriculture of the University of Missouri and Director of the Experiment Station. Information on this and other subjects of interest to farmers will be given cheerfully.

THE UNIVERSITY OF MISSOURI BULLETIN

LIBRARY SERIES

VOLUME 2 NUMBER 1

PARTIAL BIBLIOGRAPHY AND INDEX

OF THE

Publications of the College of Agriculture
and the Agricultural Experiment
Station

UNIVERSITY OF MISSOURI
COLUMBIA, MISSOURI
July, 1912

Partial Bibliography and Index
of the
Publications of The
College of Agriculture
and the
Agricultural Experiment Station

PREFACE.

The purpose of this bulletin is to make available the material published by the College of Agriculture and the Agricultural Experiment Station and to record, in permanent form, the serial publication of the College and the Station. The Station has published fifty-three circulars and one hundred and three bulletins. The following list includes only forty-five of the former and eighty-two of the latter. This may be explained from the fact that beginning with number eighty-three, the bulletins are paged continuously to include number ninety-six, which constitutes a volume, for which a title page, table of contents and index has already been published. Hereafter, indexes will be published on the completion of volumes. Circulars one to forty-three have been bound. However, beginning with number thirty-six, the paging is continuous for the present volume, on the completion of which, an index will be issued. The reports of the Director have been irregular in publication. The list is given below as a record for readers who wish to have complete files. The Research bulletins are not included as only five numbers have been issued. When volume one is completed, a title page and index will be issued. There has been no attempt to preserve and record the press bulletins, one of which is issued for practically every publication of the station. The preliminary indexing was done by Miss Louise Wheeler, assistant in the General Library.

HENRY ORMAL SEVERANCE,
Librarian, University of Missouri.

June 28th, 1912.

MISSOURI STATE AGRICULTURAL COLLEGE FARM BULLETINS.

(These bulletins are out of print.)

There were twenty bulletins issued under the title, "Missouri State agricultural college farm bulletins." Numbers 1—8 were published in the "Annual Catalogue of the Missouri University at Columbia, Missouri, 1883-1884." Numbers 9—14 were published in the catalogue for 1884-1885; and numbers 15—19 in the catalogue for 1885-1886.

Bulletins 21—35 were issued under the title: "Missouri State Agricultural College bulletin"; numbers 19—29, and 22—27 were published in the Annual report of the State Board of Agriculture for 1886-1887; numbers 28—30 in the report for 1887-1888; and 31—35 in the report for 1888-1889. Numbers 9—12, 14, 21, and 23—33 were also issued separately. Bulletin 35 is also bulletin number 2 of the Agricultural experiment station. Numbers 1, 16, and 24 were also published in the report of the Dean of the College of Agriculture, 1887.

MISSOURI STATE AGRICULTURAL COLLEGE FARM BULLETINS.

(These bulletins are out of print.)

1. [Feeding hogs.] [By J. W. Sanborn.] 1883. 3p.
2. Feeding steers. [By J. W. Sanborn.] 1883. 5p.
3. Report of test of varieties of wheat and corn. [By J. W. Sanborn.] 1883. 3p.
4. Mulching. [By J. W. Sanborn.] 1883. 4p.
5. Relation of tillage to soil moisture. [By J. W. Sanborn.] 1883. 3p.
6. Relation of dew to soil moisture. [By J. W. Sanborn.] 1883. 5p.
7. Feeding wheat and corn. [By J. W. Sanborn.] 1884. 4p.
8. Meal feeding stock at pasture. [By J. W. Sanborn.] 1884. 4p.
9. Grass-fed pigs. [By J. W. Sanborn.] 1884. 3p.
10. Pig feeding experiments. [By J. W. Sanborn.] 1884. 4p.
11. [Corn fodder as stock food.] [By J. W. Sanborn.] 1884. 4p.
12. [Seed potatoes.] [By J. W. Sanborn.] 1884. 4p.

13. Good roads and broad wheel tires. [By J. W. Sanborn.] 1884. 7p.
14. Feeding for lean meat. [By J. W. Sanborn.] 1885. 6p.
15. Contagious Pleuro-pneumonia. [By Paul Paquin.] 1885. 5p.
16. Glanders. Second report of state veterinarian. [By Paul Paquin.] 1885. 8p.
17. General observations. [By J. W. Sanborn.] 1885. 4p.
18. [Sub-soiling.] [By J. W. Sanborn.] 1885. 5p.
19. Feeding for lean meat. [By J. W. Sanborn.] 1886. 6p.
20. Report of investigations and observations in the Horticultural department. [By L. R. Taft.] 1886. 6p.
21. Plants and their uses. [By S. M. Tracy.] 1888. Chart.
22. Corn harvesting. [By J. W. Sanborn.] 1886. 6p.
23. Relation of dew to soil moisture. [By J. W. Sanborn.] 1886. 14p.
24. Report of state veterinary inspector. [By Paul Paquin.] 1886. 22p.
25. [Data regarding several economic problems in ordinary farm practice.] [By J. W. Sanborn.] 1886. 7p.
26. [Report of trials of varieties of vegetables and fruits.] [By L. R. Taft.] 1887. 7p.
27. Feeding for flesh. [By J. W. Sanborn.] 1887. 15p.
28. Maintenance ration for pigs. [By J. W. Sanborn.] 1887. 25p.
29. Rotation of crops. [By J. W. Sanborn.] 1887. 10p.
30. Fertilization. [By J. W. Sanborn.] 1887. 14p.
31. Texas fever and other diseases. [By Paul Paquin.] 1887. 13p.
32. Plows and plowing. [By J. W. Sanborn.] 1888. 19p.
33. Glanders, mad itch of cattle, etc. [By Paul Paquin.] 1888. 15p.
34. Experimental farming. [By J. W. Sanborn.] 1888. 10p.
35. Grasses for pastures and for meadows. [By J. W. Sanborn.] 1888. 9p.

AGRICULTURAL EXPERIMENT STATION BULLETINS.

The following numbers of the bulletins are out of print:

1 to 53, 56 to 70, and 72 to 82. An index has been issued for bulletins 83 to 96. Future volumes will be indexed as published. An index will be issued with the completion of each volume of the Research bulletins.

1. Announcement to farmers; the so called "Hatch Bill"; Assent of Governor; plan of organization; work and experiments proposed this season; personnel of station. [By P. Schweitzer.] 1888.

BIBLIOGRAPHY AND INDEX

2. Grasses for pastures and for meadows. [By J. W. Sanborn. 1888.
3. Generalities and experiments in spraying cattle. Appendix o glanders. By Paul Paquin.
4. A list of tillage implements. By J. W. Sanborn. 1888.
5. Soil, weather, field trials with corn. By P. Schweitzer. 1889.
6. Experiments on seed germination, pea weevil and apples. [B J. W. Clark.]
7. Experiments on green versus dry storage of fodder. [By J. W. Sanborn.]
8. Experiments on feeding ensilage against dry fodder. [B J. W. Sanborn.]
9. Study of the life history of corn at its different periods of growth. By P. Schweitzer. 1889.
10. Analysis of apples at various stages of growth. Bordeaux mixture for grape rot. Comparative tests of small fruits and potatoes. [By J. W. Clark.] 1890.
11. Texas fever. By Paul Paquin. 1890.
12. Black leg. By Paul Paquin. 1890.
13. Reports on spraying for the codling moth, apple scab and black rot of the grape. Reports on strawberries, raspberries, blackberries, tomatoes, peas and potatoes. List of new fruits received for testing. [By J. W. Clark.] 1891.
14. Field experiments with corn. [By H. J. Waters.] 1891.
15. Wheat—test of varieties, 1889, 1891. Oats—test of varieties 1889, 1891. Change of seed—wheat, oats and potatoes. [B H. J. Waters.] 1891.
16. Covering peach trees to protect the fruit buds. Spread of pea blight, temperature and rain tables, strawberry tests, potato trials, seedling fruits. [By J. W. Clark.] 1891.
17. Sugar beets. [By Chas. Fox.] 1892.
18. Strawberries. [By Chas. Keffer.] 1892.
19. Soils and fertilizers, Part 1. [By P. Schweitzer.] 1892.
20. Soils and fertilizers, Part 2. [By Paul Schweitzer.] 1893.
21. Field experiments with wheat. [By C. M. Conner.] 1893.
22. Seedling strawberries. [By Chas. Keffer.] 1893.
23. Grape culture. [By Chas. Keffer.] 1893.
24. Comparative tests of different breeds of beef cattle. [By P. Schweitzer.] 1894.
25. An inquiry into the composition of the flesh of cattle. [By P. Schweitzer.] 1894.
26. Dairy management. [By A. M. Soule.] 1894.

27. Spraying apple trees for destruction of insects, and prevention of fungous diseases. [By Chas. Keffer.] 1894.
28. Feeding tests with different breeds of beef cattle. [By P. Schweitzer.] 1895.
29. Feeding wheat to pigs. [By P. Schweitzer.] 1895.
30. Spray calendar. [By E. G. Lodeman.] 1895.
31. Spraying orchards and vineyards. [J. C. Whitten.] 1895.
32. Field experiments with corn. [By H. J. Waters and C. M. Conner.] 1895.
33. Enquiry into the principles of potato growing and tests of varieties. [By P. Schweitzer.] 1896.
34. Manures and fertilizers. [By H. J. Waters.] 1896.
35. The Wooly-Aphis of the apple. [By J. M. Stedman.] 1896.
36. The lesser apple leaf folder. The leaf crumpler. [By J. M. Stedman.] 1896.
37. Texas fever. [By John W. Connaway.] 1897.
38. Winter protection of the peach. Peach growing in Missouri. [By J. C. Whitten.] 1897.
39. Influence of width of tire on draft of wagons. [By H. J. Waters.] 1897.
40. Sugar Beet. [By H. J. Waters.] 1897.
41. San Jose scale in Missouri. [By J. M. Stedman.] 1898.
42. A new orchard pest: the fringed-wing apple-bud moth. [By J. M. Stedman.] 1898.
43. Winter forcing of asparagus in the open field. Asparagus culture for Missouri. [By J. C. Whitten.] 1898.
44. The fruit tree bark-beetle. The common apple tree and peach tree borers. [By J. M. Stedman.] 1898.
45. The sugar beet. [By H. J. Waters.] 1899.
46. Grapes: 1. The study of types and varieties. 2. The study of the pollination of cultivated grapes. 3. Methods pursued by practical growers. [By J. C. Whitten.] 1899.
47. The tarnished plant bug. [By J. M. Stedman.] 1899.
48. Texas fever. [By J. W. Connaway and M. Francis.] 1899.
49. Apple orchard. [By J. C. Whitten.] 1900.
50. Test of spray nozzles. [By N. O. Booth.] 1900.
51. The chinch bug. [by J. M. Stedman.] 1902.
52. Influence of height of wheel on the draft of farm wagons. [By T. I. Mairs.] 1901.
53. Breeding experiments with sheep: 1. Some factors influencing the weight of lambs at birth. 2. Milk and food records of ewes. [By Frederick B. Mumford.] 1901.

54. The strawberry false-worm. The strawberry leaf-roller. [By J. M. Stedman.] 1901.
55. Pruning peach trees. [By J. C. Whitten.] 1902.
56. Dairy husbandry. [By C. H. Eckles.] 1902.
57. Raising calves with skim milk. [By C. H. Eckles.] 1902.
58. Feeding the dairy cow. [By C. H. Eckles.] 1902.
59. Corn improvement for Missouri. [By Geo. M. Tucker.] 1902.
60. A new Bordeaux powder. [By R. M. Bird.] 1903.
61. Apple growing in Missouri. [By J. C. Whitten.] 1903.
62. Hessian fly in Missouri. [By J. M. Stedman.] 1903.
63. Commercial fertilizers. [By F. B. Mumford.] 1904.
64. The "sting" in the apple. [By J. M. Stedman.] 1904.
65. Grain rations for dry lot hog feeding. By E. B. Forbes. 1905.
66. Analyses of commercial fertilizers. By P. Schweitzer and R. M. Bird. 1904.
67. Supplements to corn for fattening hogs. [By E. B. Forbes.] 1905.
68. Department of dairy husbandry. [By C. H. Eckles.] 1905.
 1. A test of tin can separators.
 2. A test of a fly repellant.
69. Three fungous diseases of the cultivated ginseng. [By Howard S. Reed.] 1905.
70. Analyses of commercial fertilizers. By P. Schweitzer and R. M. Bird. 1905.
71. Fruit tree leaf-roller. ([By J. M. Stedman.] 1906.
72. Alfalfa growing in Missouri. [By M. F. Miller.] 1906.
73. Cowpeas. [By A. E. Grantham.] 1906.
74. Winter killing of peach buds as influenced by previous treatment. (By W. H. Chandler.] 1907.
75. Wintering yearling cattle. [By H. J. Waters.] 1907.
76. Fattening cattle for the market. [By H. J. Waters.] 1907.
77. Inspection of commercial fertilizers. [By H. J. Waters.] 1907.
78. Inspection of commercial fertilizers. [By P. F. Trowbridge.] 1908.
79. Green forage for hogs. [By H. J. Waters.] 1908.
80. Inspection of commercial fertilizers. [By P. F. Trowbridge.] 1908.
81. Specific effects of rations on the development of swine. [By P. Schweitzer.] 1909.
82. Inspection of commercial fertilizers. [By P. F. Trowbridge.] 1908.

CIRCULARS OF INFORMATION.

1. Chinch bugs and their extermination. 1895.
2. Chinch bug infection. 1895.
3. San Jose scale in Missouri. 1896.
4. Peach yellows and peach rosette. 1897.
5. Sugar beet. 1897.
6. Clover and cow peas. 1898.
7. The Woolly-Aphis of the apple. 1898.
8. Agricultural experiment station. Third biennial report of the Director, on the enforcement of Fertilizer Control law. 1898.
9. Agricultural experiment station. Practical value of the work of the experiment station. 1899.
10. Agricultural experiment station. Spray calendar. 1902.
11. Corn as a stock food. 1902.
12. Factors in beef production. 1902.
13. Plant propagation. 1902.
14. Commercial fruit evaporators. 1902.
15. The principles of plant propagation: The Seed. 1903.
16. Fifth biennial report of the Missouri Agricultural experiment station on the enforcement of the Fertilizer Control law. 1903.
17. On the planting and care of trees for the street and lawn. 1904.
18. The farmers' creamery in Missouri: When and how to build. 1905.
19. Suggestions for Missouri corn growers. 1905.
20. Directions for making Bordeaux powder. 1905.
21. Some fungous diseases and their treatment. 1905.
22. Feeding the orchard. 1905.
23. Fungicides, insecticides and spray calendar. 1906.
24. Beef production on high priced land. 1908.
25. Rational sheep feeding. 1908.
26. Feeding the dairy cow. 1908.
27. Feeding and care of horses. 1908.
28. Swine feeding. 1908.
29. Immunization of swine against hog cholera. 1908.
30. Missouri Housekeepers' Conference association. 1908.
31. Hardiness of peach buds, blossoms and young fruit as influenced by the care of the orchard. 1908.
32. Missouri apple growing. 1908.
33. Hotbeds and coldframes. Their preparation and management. 1908.
34. Instructions for spraying. 1908.
35. Protecting orchards against frosts and freezes. 1909.

36. Co-operative experiments of the department of agronomy. 1910.
37. Variations in cream tests. 1910.
38. The principles of maintaining soil fertility. 1910.
39. The seeding of cow peas. 1910.
40. The seeding of alfalfa. 1910.
41. Directions for testing milk on the farm. 1910.
42. The seeding of clovers and grasses. 1910.
43. Wheat growing in Missouri. 1910.
44. Feeding for milk production. 1910.
45. Selecting and judging corn. 1910.

REPORTS OF THE DIRECTOR OF THE AGRICULTURAL EXPERIMENT STATION.

No reports were published from 1889 to 1895 and from 1904 to 1909. Beginning with 1910, the annual report has been published as a bulletin and will be so indexed. The report for 1910 is bulletin 96. Only those papers contained in the reports, which were not published in the bulletins, are indexed as being in the reports. In the index the reports are indicated by R with the date as R 1898.

1888. First annual report of Missouri agricultural experiment station. 1888.
1896. University of the state of Missouri. College of agriculture and mechanic arts. Agricultural experiment station. Annual report. 1896. Columbia, Missouri. December, 1896. Burekhardt & Rice, Printers, Columbia, Missouri.
1897. University of the state of Missouri. College of agriculture and mechanic arts. Agricultural experiment station. Annual report. 1897. Columbia, Missouri. December, 1897. E. W. Stephens, Columbia, Missouri.

Contents:

Report of the director	VI
Manures and fertilizers, by H. J. Waters.....	1
Woolly-Aphis of the apple, by J. M. Stedman.....	36
Lesser apple leaf folder, by J. M. Stedman.....	62
Texas fever, by John W. Connoway.....	81
Winter protection of the peach, by J. C. Whitten.	140
Influence of width of tire on draft of wagons, by H. J. Waters	165

1898. University of the state of Missouri. College of agriculture and mechanic arts. Agricultural experiment station.

Annual report. 1898. Columbia, Missouri. December, 1898.
E. W. Stephens, Printer, Columbia, Missouri.

Contents:

	Report of the director	VI
	Sugar beet, by H. J. Waters.....	1
	Fringed-wing apple bud moth, by J. M. Stedman..	36
	Winter forcing of asparagus in the open field, by J. C. Whitten	54
	Third biennial report on the enforcement of the fertilizer control law, by H. J. Waters.....	70
	Sunday chemical studies, by P. Schweitzer.....	77
	Amount of food consumed by a cow producing a large quantity of milk and butter, by W. B. Cody	113
	Preliminary ecological study of plants of Colum- bia, by F. P. Daniels.....	125
1899.	University of Missouri. College of agriculture and me- chanic arts. Agricultural experiment station. Annual re- port. 1899. Columbia, Missouri. December, 1899. Press of E. W. Stephens, Columbia, Missouri.	
1900.	University of Missouri. College of agriculture and me- chanic arts. Agricultural experiment station. Annual re- port, 1900. Columbia, Missouri. December, 1900. Press of E. W. Stephens, Columbia, Missouri.	
1901.	University of Missouri. College of agriculture and me- chanic arts. Agricultural experiment station. Annual re- port. 1901. Columbia, Missouri. December, 1901. Press of E. W. Stephens, Columbia, Missouri.	
1902.	University of Missouri. College of agriculture and me- chanic arts. Agricultural experiment station. Annual re- port. 1902. Columbia, Missouri. December, 1902. Press of E. W. Stephens, Columbia, Missouri.	
1903.	University of Missouri. College of agriculture and me- chanic arts, Agricultural experiment station. Annual re- port. 1903. Columbia, Missouri. December, 1903. Press of E. W. Stephens, Columbia, Missouri.	

INDEX.

Bulletins of the College.....	1-35, 1883-1888
Bulletins of the Station.....	1-82, 1888-1904
Circulars of the Station.....	1-45, 1895-1903
Reports of the Director.....	1888-1903

The numbers of the bulletins are printed in **black face type**.

The farm bulletins are preceded by the letter "A". The reports are indicated by the letter "R", followed by the year covered by the report. The circulars are indicated by a "C" prefixed to the circular number.

Acclimation fever, see Texas fever

Agricultural experiment stations, Law 1: 5-9

Alfalfa 2: 15; 72; A 17; C 38; C 40

Alfalfa as feed 72: 6

Alfalfa as a pasture 72: 8

THE
UNIVERSITY OF MISSOURI
BULLETIN

VOLUME 15 NUMBER 2

LIBRARY SERIES 6

CHECK LIST OF THE
OFFICIAL SERIAL PUBLICATIONS
OF THE
UNIVERSITY

UNIVERSITY OF MISSOURI
COLUMBIA, MISSOURI
January 9, 1914

PREFACE

The purpose of this bulletin is to record in permanent form the serial material published by the University of Missouri and to furnish a check list for those libraries and institutions which wish to complete their files of any one or all of the series. Neither the University library nor the library of the State historical society of Missouri has complete files of the publications listed in this bulletin. It is hoped that alumni and other citizens who have any of the publications in this list which they do not care to preserve will send them to the University library. If there is any one place where these publications should be found, it is in the stacks of the University of Missouri library.

There is a large amount of ephemeral material published by the University from year to year which does not reach the library. It will not be surprising, therefore, if the record in the following pages should not be absolutely correct. The compiler would consider it a favor if the reader would notify him of any errors in record or in omission.

On October 5, 1910, the Board of Curators created a committee on University publications for the purpose of systematizing, co-ordinating, and developing the several series of publications. The committee has classified the publications under three general heads:

- A. University of Missouri studies.
- B. University of Missouri bulletin.
- C. Publications of the Agricultural experiment station.

For the purpose of bringing about a closer co-ordination of the different series, the committee adopted wherever practicable a uniform size, title-page, and typographical arrangement, and manuscripts and illustrations submitted for publication must henceforth conform to these standards, unless it should be considered necessary to make an exception in an individual case.

Unless otherwise stated, copies of the various publications in print may be secured by addressing the Librarian of the University.

HENRY ORMAL SEVERANCE.

January 1, 1914.

THE UNIVERSITY OF MISSOURI STUDIES

Edited by George Lefevre

The Studies are devoted to the publication of extensive papers embodying the results of original research made by members of the faculty and by graduate students. No paper that has appeared elsewhere will be accepted for publication in the Studies.

After the publication of two volumes of miscellaneous papers, the Studies were differentiated into series, of which the following are now being issued: 1, Social science series; 2, Science series; 3, Literary and linguistic series; 4, Philosophy and education series; 5. Mathematics series. New series will be established, as papers which may not properly fall in any of the above groups are accepted for publication.

VOLUME 1

1. Contributions to a psychological theory of music, by Max Meyer, Ph. D., Professor of Experimental Psychology. vi, 80 p. 1901. 75 cents. Out of print.
2. Origin of the Covenant Vivien, by Raymond Weeks, Ph. D., Professor of Romance Languages. viii, 64 p. 1902. 75 cents. Out of print.
3. The evolution of the northern part of the lowlands of southeast Missouri, by C. F. Marbut, A. M., Professor of Geology. viii, 63 p. 1902. \$1.25. Out of print.
4. Eileithyia, by Paul V. C. Baur, Ph. D., Acting Professor of Classical Archæology. vi, 90 p. 1902. \$1.00.
5. The right of sanctuary in England, by Norman Maclaren Trenholme, Ph. D., Professor of History. viii, 106 p. 1903. 75 cents. Out of print.

VOLUME 2

1. Ithaca or Leucas? by William Gwathmey Manly, A. M., Professor of Greek Language and Literature. vi, 52 p. 1903. \$1.00.
2. Public relief and private charity in England, by Charles A. Ellwood, Ph. D., Professor of Sociology. viii, 96 p. 1903. 75 cents. Out of print.

3. The process of inductive inference, by Frank Thilly, Ph. D., Professor of Philosophy. v, 40 p. 1904. 35 cents.
4. Regeneration of Crayfish Appendages, by Mary I. Steele, M. A. viii, 47 p. 1904. 75 cents. Out of print.
5. The spermatogenesis of Anax Junius, by Caroline McGill. viii, 15 p. 1904. 75 cents. Out of print.

MATHEMATICAL SERIES

VOLUME 1

1. On the definition of the sum of a divergent series, by Louis Lazarus Silverman, Ph. D. v, 96p. 1913. \$1.00.

SCIENCE SERIES

VOLUME 1

1. Topography of the thorax and abdomen, by Peter Potter, M. A., M. D. vii, 142p. 1905. \$1.75.
2. The flora of Columbia and vicinity, by Francis Potter Daniels, Ph. D. x, 319p. 1907. \$1.25.

VOLUME 2

1. An introduction to the mechanics of the inner ear, by Max Meyer, Ph. D., Professor of Experimental Psychology. viii, 140p. 1907. \$1.00.
2. The flora of Boulder, Colorado, and vicinity, by Francis Potter Daniels, Ph. D. viii, 453p. 1911. \$1.50.

SOCIAL SCIENCE SERIES

VOLUME 1

- The clothing industry in New York, by Jesse E. Pope, Ph. D., Professor of economics and finance. xviii, 340 p. 1905. \$1.25.

VOLUME 2

1. The social function of religious belief, by William Wilson Elwang, Ph. D. viii, 100p. 1908. \$1.00.
2. The origin and early development of the English universities to the close of the thirteenth century, by Earnest Vancouver Vaughn, A. M., Instructor in History. viii, 147p. 1908. \$1.00.
3. The origin of the Werewolf superstition, by Caroline Taylor

Stewart, A. M., Ph. D., Assistant Professor of Germanic Languages. iv, 32p. 1909. 50 cents.

4. The transitional period, 1788-1789, in the government of the United States, by Frank Fletcher Stephens, Ph. M., Ph. D., Instructor in American History. viii, 126p. 1909. \$1.00

LITERARY AND LINGUISTIC SERIES

VOLUME 1

Chevalerie Vivien, Facsimile phototypes, with an introduction and notes, by Raymond Weeks, Ph. D., formerly Professor of Romance Languages. 12p, plates 24. 1909. \$1.25.

VOLUME 2

The cyclic relations of the Chanson de Willame, by Theodore Ely Hamilton, A. M., Ph. D. ix, 301p. 1911. \$1.25.

PHILOSOPHY AND EDUCATION SERIES

VOLUME 1

1. The treatment of personality by Locke, Berkeley and Hume, by Jay William Hudson, Ph. D., Assistant Professor of Philosophy. xvi, 96p. 1911. 75 cents.

THE UNIVERSITY OF MISSOURI BULLETIN

From 1892 to 1900 there were various bulletins, circulars, and announcements published and distributed, but they were not numbered consecutively nor published regularly. One number of the bulletin is known to have been published August 25, 1893, and three to have been published in 1894, but such ephemeral material was not preserved. There undoubtedly were other bulletins. Beginning with volume 1, number 1, February, 1900, the bulletins have a consecutive number.

Bulletin, volumes 1 to 3, number 4, had the title, Bulletin of the University of the State of Missouri. In 1911 a new series of the bulletins was issued. The series which began with volume 1, 1900, was given the title, General series, 1911-1913, with a continuation of the volume number which the bulletin had before, the new series was begun. Those with a star (*) preceding the title are still available for distribution. Others are out of print. In addition to the series noted in this bulletin, a Social science series has been authorized, but no bulletins have been published thus far.

GENERAL SERIES

Published monthly

Edited by Hugh J. MacKay

The object of this series is to furnish information regarding the University and its several colleges and schools. It accordingly consists of the general catalogue and the individual announcements of the several divisions of the University.

VOLUME 1, 1900

1. February. Summer school, June 4 to August 25. 13p. il.
2. Announcement to teachers of work in progress in certain classes. 15 Mar-1 June, 1900. 7p.
3. June. Catalogue 1899-1900. 224p.
3. June. Circular of information. 4p.
- *4. July. Department of medicine. 4p.
5. August. School of engineering. 4p.
- *6. September. The growth of the University. 4p.
7. October. Short winter courses in agriculture and horticulture. 4p.
8. November. Short winter courses in agriculture and horticulture. 16p.

VOLUME 2, 1901

1. January. Circular of information. 4p.
2. February. Announcement to teachers of work in progress in certain classes, 15 March to 1 June, 1901. 8p.
3. March. Summer school, June 3 to August 24, 1901. 16p. il.
- *4. April. Department of law. 4p.
- *5. May. Catalogue 1900-1901. 268p.
- *6. June. Department of medicine. 4p.
- *7. July. Circular of information. 4p.
- *8. August. Department of engineering. 4p.
- *9. September. Agriculture, mechanic arts, household economics. 4p.
- *10. October. Special winter courses in agriculture, horticulture and dairying. 4p. il.
- *11. November. Results of a religious census of Columbia. 4p. (Called No. 10)
- *12. December. Short winter courses in agriculture, horticulture and dairying. January 1, 1902, to March 22, 1902. 16p.

VOLUME 3, 1902

- *1. January. Buildings, libraries, laboratories. 4p.
- *2. February. Growth in eleven years, 1890-1901. 4p.
- *3. March. Summer session for 1902, June 2 to August 30. 15p.
- *4. April. Department of law. 4p.
- *5. May. Announcement of the department of medicine, 1902-1903. 10p.
- *6. June. Catalogue, 1901-1902. 244p.
- *7. July. Circular of information. 4p.
- *8. August. School of engineering. 4p.
- *9. September. School of agriculture. 4p.
- *10. October. Special winter courses in agriculture, animal husbandry, horticulture and dairying. 4p. il.
- *11. November. Short winter courses in agriculture, horticulture, animal husbandry, and dairying. 18p. il.
- *12. December. What the University has done for Missouri. 9p.

VOLUME 4, 1903

- *1. January. The condition of the almshouses in Missouri. 6p.
- *1. Supplement. The condition of the county jails in Missouri. 8p.
- *2. February. Former students living in Missouri. 1st ed. 24p. 2d ed. (without title), 26p.
- *3. March. Summer session for 1903. (June 1 to August 28). 16p.

- *4. April. Department of law. 2 editions, one 4p., the other 4p. and 4p. il.
- *5. May. Catalogue, 1902-1903. 242p.
- *6. June. Department of medicine, 2 editions, one 4 p., the other 4p. and 8p. il.
- *7. July. Circular of information, 2 editions, one 4p., the other 4p. and 16p. il.
- *8. August. School of engineering, 2 editions, one 4p. the other 4p. and 8p. il.
- *9. September. College of agriculture, 2 editions, one 4p., the other 4p. and 8p. il.
- *10. October. College of agriculture. Short winter courses in agriculture, dairying, and animal husbandry. Courses begin January 5, 1904. 16p. il.
- *11. November. Parker memorial hospital, 10p. il.
- *12. December. Student homes. 12p. il.

VOLUME 5, 1904

- *1. January. Former students living in Missouri. 28p.
- *2. February. Academic department. Circular of information. 12p.
- *3. March. Summer session for 1904 (June 2 to August 21). 16p.
- *4. April. Department of law announcement, 1904-1905. 27p.
- *5. May. Catalogue, 1903-1904. 292p.
- *6. June. Department of medicine. 4p.
Incorrectly numbered v. 6, no. 6, afterwards enlarged and correctly numbered, 7p.
- *7. July. Circular of information. 4p.
- *8. August. School of engineering. 4p.
- *9. September. College of agriculture. 4p.
- *10. October. College of agriculture. Short winter courses: agriculture, dairying and animal husbandry. 10p.
- *11. November. What the University has done for Missouri. 16p.
- *12. December. Growth in thirteen years (1890-1903). 4p.

VOLUME 6, 1905.

- *1. January, 1905. The University of Missouri. 52p.
- *2. February. Catalogue, 1904-1905. 345p.
- *3. March. Summer session for 1905 (June 10 to August 10). 25p.
- *4. April. Department of law announcement, 1905-1906. 24p.
- *5. May. Academic department. Circular of information, 1905-1906. 16p.
- *6. June. Department of medicine, 1905-1906. 16p.
- *6. June. Teachers' college,

- *7. July. General announcement, 1905-6. 16p.
- *8. August. School of engineering. Circular of information 1905-6. 26p.
- *9. September. College of agriculture. Announcement 1905-6. 20p.
- *10. October. College of agriculture. Short winter courses; agriculture, dairying and animal husbandry. 16p.
- *11. November. Obligations and opportunities of the churches at the University of Missouri. 4p.
- *12. December. Announcement of the second semester. January 30 to June 6, 1906. 4p.

VOLUME 7, 1906

- *1. January. Purpose of the summer session. 4p.
- *2. February. University of Missouri (views). 32p.
- *3. March. Academic department. Teachers college 1906-1907. 36p.
- *4. April. Department of law. Announcement 1906-7. 24p.
- 5. May. Catalogue 1905-6. 400p.
- 6. June. Department of medicine. Announcement 1906-7. 4p.
- 7. July. General announcement. 8 p. il.
- 8. August. School of engineering 1906-7. 14p.
- 9. September. College of Agriculture. 1906-7. 16p.
- 10. October. College of Agriculture. Short winter courses, agriculture, dairying and animal husbandry, 20p.
- 11. November. Announcement for second semester.
- *12. December. Alumni directory. 105p.

VOLUME 8, 1907

- *1. January. The success of the college graduate, by J. C. Jones. 16p.
- 2. February. Views of the University of Missouri. 32p.
- *3. March. Announcement of the summer session for 1907. 29p.
- 4. April. Department of law announcement 1907-8. 24p.
- *5. May. Catalogue 1906-7. 427p.
- *6. June. Teachers College announcement 1907-8. 29p.
- 7. July. University of Missouri. General announcement. 8p. il.
- 8. August. Department of engineering. Circular of information 1907-8. 16p.
- 9. September. College of agriculture. Announcement 1907-8.
- *10. October. Medical department. Announcement 1907-8. 30p. il.
- *11. November. College of agriculture. Short winter courses, agriculture, dairying and animal husbandry. 23p.

- *12. December. Announcements for second semester, January 29 to June 5, 1908.

VOLUME 9, 1908

- *1. January. Missouri state military school announcement 1907-8. 16p.
*2. February. Announcement of summer session 1908. 30p.
*3. March. College of arts and science announcement 1908-9. 48p.
*4. April. Department of law announcement 1908-9. 24p.
*5. May. Catalogue 1907-8. 468p.
*6. June. Medical department announcement 1908-9. 27p. il.
*7. July. Views of the University of Missouri. 16p.
*8. August. Department of engineering circular of information 1908-9. 19p.
*9. September. Not published.
10. October. Practical instruction for young farmers, 16p.
11. November. Agriculture as a career (numbered vol. 8, No. 12, without date).
*12. December. Announcements for the second semester. 8p.

VOLUME 10, 1909

- *1. January. Announcement of summer session 1909. 32p.
*2. February. Teachers college announcement 1909-10. 4p.
3. March. Not published.
*4. April. School of law announcement 1909-10. 24p.
*5. May. Catalogue 1908-9. 512p.
*6. June. School of medicine announcement 1909-10. 24p.
*7. July. Announcement of the School of engineering 1909-10. 10p.
*8. August. Education for agriculture. 24p. il.
*9. September. Short winter courses in agriculture 1909-10. 24p.
*10. October. Rural education. The soil by R. H. Emberson. 8p.
*11. January. 1910, Rural education. The horse by R. H. Emberson. 8p.
*12. December, 1909, Second semester courses 1910. 18p.

VOLUME 11, 1910

- *1. January. Announcement of the summer session 1910. 32p.
*2. February. Announcement of the School of education 1910-11. 38p.
3. March. Not published.
*4. April. School of law announcement 1910-11. (Numbered as v. 10, No. 4). 24p.

- *5. May. Catalogue 1909-10. 521p.
- *6. June. School of medicine announcement 1910-11. 24p.
- *7. July. Announcement of the School of journalism 1910-11. 15p.
- *8. August. Education for agriculture. 24p.
- 9. September. Announcement of the School of engineering 1910-11. (Numbered as v. 10, No. 9). 20p.
- *10. October. Short winter courses in agriculture. 23p. il.
- *11. November. Second semester courses. 18p.
- 12. December. Not published.

VOLUME 12, 1911

- *1. January. Announcement of the Summer session 1911. 40p.
- *2. February. Announcement of the Graduate school 1911-12. 64p.
- *3. March. Announcement of the School of education 1911-12. 27p.
- *4. April. Announcement of the School of law. 24p.
- *5. May. Catalogue 1910-11.
- *6. June. Announcement of the School of medicine 1910-11. 22p.
- *7. July. Announcement of the College of arts and science 1911-12. 40p.
- *8. August. Announcement of the School of journalism 1911-12. 14p.
- *9. September. Announcement of the School of engineering 1911-12. 27p.
- *10. October. Announcement of the College of agriculture (regular session) 1911-12. 43p.
- *11. November. Announcement of the two-year winter course College of agriculture 1911-12. 53p. il.
- *12. December. Announcement of second semester courses 1911-12. 23p.

VOLUME 13, 1912

- *1. January. Announcement of the Summer session 1912. 48p. il.
- *2. February. "Every day at the University" (A glimpse of student activities with views of the buildings). 48p.
- *3. March. Announcement of the Graduate school 1912-13. 62p.
- *4. April. Catalogue 1911-12. 526p.
- *5. May. Announcement of the School of education 1912-13. 32p. il.
- *6. June. Announcement of the School of medicine 1912-13. 41p.
- *7. July. Announcement of the School of law 1912-13. 17p.
- *8. August. Announcement of the School of journalism 1912-13. 18p.
- 9. September. Not published.
- *10. October. Announcement of the College of agriculture (regular session) 1912-13. 55p.

- *11. November. Announcement of the two year winter and short courses, College of agriculture 1912-13. 51p.
- *12. December. Announcement of the Second semester courses 1912-13. 20p.

VOLUME 14, 1913

- *1. January. Announcement of the Summer session 1913. 46p. il.
- *2. February. Announcement of the College of arts and science 1913-14. 33p.
- *3. March. Announcement of the Graduate school 1913-14. 61p.
- *4. April. Announcement of the School of education 1913-14. 31p.
- *5. May. Catalogue 1912-13. 488p.
- *6. June. Announcement of the School of medicine 1913-14. 32p.
- *7. July. Announcement of the School of law 1913-14. 34p.
- *8. August. Announcement of the School of journalism 1913-14. 14p.
- *9. September. Announcement of the School of engineering 1913-14. 44p. il.
- *10. October. Announcement of the College of agriculture (regular session 1913-14. 58p. il.
- *11. November. Announcement of the two year winter course and other short courses, College of Agriculture, 1913-14. 42p. il.
- *12. December. Announcement of the second semester courses 1913-14. 22p.

ASTRONOMICAL SERIES

(Laws observatory bulletin)

Published irregularly.

Edited by Robert Horace Baker.

This bulletin is devoted exclusively to the publications of astronomical researches conducted in the Laws observatory. Numbers one to sixteen were edited by Frederick Hanley Scares under the title, Laws Observatory. Bulletin 1902-1908. It was then placed in the astronomical series of the University bulletin.

Copies may be obtained from the Librarian, except numbers 1-9, which are out of print.

VOLUME 1

- 1. Observations and elements of comet b 1902 (Perrine).
- 2. Observations of comets.
- 3. Observations of comet a 1904 (Brooks).

4. Observations of comet e 1904 (Borrelly).
Photometric observations of Nova Geminorum ch. 2387.
Special time signals from the U. S. naval observatory.
5. The polaris vertical circle method of determining time and azimuth introduction.
6. The algol variable 188. 1904 Draconis.
7. Photometric investigations.
The disc photometer.
The wedge photometer.
Investigation of the wedges.
8. A grant from the Gould fund.
General remarks concerning variable star observations.
A new variable, 88.1906 Lacertae.
Preliminary results for V Lacertae, 110.1904.
The variable V Vulpeculae, 4.1904.
Preliminary note on variable 108.1905 Capricorni.
9. The Algol variable RR Draconis (188.1904).
Preliminary announcement concerning the Algol variable 121.1906 Draconis.
10. Announcement of preliminary results for variable stars.
(1) General remarks and star list.
(2) Preliminary results.
11. The variable RS Cassiopeiae (108.1904).
12. Finding ephemerides for comet 1894 IV (E. Swift).
13. The Zöllner-Müller photometer.
The Gans-Crawford telescope.
The variable X Lacertae (88.1906).
The variable V Lacertae (110.1904).
14. The variable RV Tauri (45.1905).
15. The Algol variable RW Monocerotis (24.1907).
Preliminary announcements concerning variable stars.
16. The long-period Algol variable RZ Ophiuchi (103.1905).
Preliminary announcement concerning SW Andromedae (5.1907)

VOLUME 2

17. The antalogol variable St. Ophiuchi (52.1907).
18. The Algol variable Rx Draconis (121.1906).
19. The Algol variable Rz Draconis (26.1907).
20. Studies with the polarizing photometer.
21. The rotating ellipsoid Ru Camelopardalis.

EDUCATION SERIES

Published irregularly

Edited by Jesse H. Coursault

The object of the Education series is the publication of new formulations of educational principles and data of direct value to the schools of the state, and of educational researches which have significance for other schools of education.

Copies of these bulletins may be obtained from the editor.

VOLUME 1

1. June, 1911. Circular of information to accredited schools. Fifth edition revised. 123p.
2. November, 1911. Rural school consolidation in Missouri, by O. L. Kunkel and W. W. Charters. 36p.
3. February, 1912. Journalism for teachers, by Frank L. Martin. 27p.
4. December, 1912. Geography of Missouri, by Frederick Emerson. 74p.
5. The teaching of poetry in the high school, by A. H. R. Fairchild (in preparation).
6. January, 1913. An experimental study of methods of teaching high school German, by Mamie M. Clarahan. 32p.

VOLUME 2

1. October, 1913. Circular of information to accredited schools. Sixth edition, revised. 139p.

ENGINEERING EXPERIMENT STATION SERIES

Published quarterly

"This series is the official publication of the Engineering experiment station of the University, which was established by the Board of Curators on July 1, 1909, for the investigation of such problems in engineering as appear to be of the most direct and immediate value to the people of the state and for researches of importance to manufacturing and industrial interests and to engineers."

Some experiments in the storage of coal by E. A. Fessenden and J. R. Wharton. (Published in 1908, previous to the establishment of the Experiment station.)

Copies of these bulletins may be obtained from the Dean of School of engineering.

VOLUME 1, 1910

1. March. Acetylene for lighting country homes by J. D. Bowles. 34p.
2. June. Water supply for country homes by K. A. McVey. 35-54p.
3. September. Sanitation and sewage disposal for country homes by W. C. Davidson. 55-72p.
4. Not published.

VOLUME 2, 1911

1. March. Heating value and proximate analysis of Missouri coals by C. W. Marx and Paul Schweitzer. (Reprint of report published previous to establishment of Experiment station). 16p.
2. June. Friction and lubrication testing apparatus by Alan E. Flowers. 20p.
3. September. An investigation of the road making properties of Missouri stone and gravel by W. S. Williams and R. Warren Roberts. 70p.
4. Not published.

VOLUME 3, 1912

1. March. The use of metal conductors to protect buildings from lightning by E. W. Kellogg. 55p.
2. June. Firing tests of Missouri coal by H. N. Sharp. 44p.
3. September. Report of steam boiler trials under operating conditions by A. L. Wescott. 21p.
4. Not published.

VOLUME 4, 1913

1. March. Economics of rural distribution of electric power by L. E. Hildebrand. 50p.
2. June. Comparative tests of cylinder oils by M. P. Weinbach. 28p.
3. Artesian waters in Missouri by A. W. McCoy. 73p.
4. Friction tests of lubricating greases and oils by A. L. Westcott.

EXTENSION SERIES

Published irregularly

Edited by Charles H. Williams

This series of bulletins is the official publication of the Extension division of the University, object of which is to "serve citizens

of the commonwealth who are unable to attend established institutions; to guide them in the pursuit of a more effective education; to give every person in the state an opportunity to get the most complete education possible at the lowest practicable cost; to make the University the center of every movement which concerns the interests of the state; and to bring the University and the home in close touch."

Copies of these bulletins may be obtained from the editor.

VOLUME 1

Announcement of the Extension division 1912-13. November, 1912.

1. April, 1913. A new departure for University extension. 4p.
2. July, 1913. School improvement agencies. Suggestions for superintendents and principals by W. W. Charters. 15p.
3. October, 1913. Consolidation of schools of Missouri by R. H. Emberson. 20p.
4. November, 1913. Correspondence courses in high school subjects. 8p.
5. December, 1913. Announcement of the Extension division.

JOURNALISM SERIES

Published quarterly

Edited by Charles Griffith Ross

This series of bulletins discusses problems of the newspaper office. Both the editorial and business departments are considered.

Copies of these bulletins may be obtained from the Dean of the School of journalism.

VOLUME 1.

1. April, 1912. Missouri laws affecting newspapers compiled by Walter Williams. 66p.
2. May, 1912. Journalism week in print. 64p.
3. July, 1912. Retail advertising and the newspaper by Joseph E. Chasnoff. 47p.
4. March, 1913. The news in the country paper by Charles G. Ross. 44p.

VOLUME 2

1. May, 1913. Journalism week, 1913. 63p.

LAW SERIES

Published irregularly

Edited by Charles K. Burdick

"The purpose of the Law series of the bulletin will be to offer to the lawyers of Missouri articles dealing with Missouri law or with questions of federal law which have arisen or are likely to arise in Missouri, as well as short notes on recent Missouri decisions."

Copies may be obtained from the editor.

1. November, 1913. Estates tail in Missouri by Manley O. Hudson. Notes on recent Missouri cases by the student editors. 47p.

LIBRARY SERIES

Published irregularly

Edited by Henry Ormal Severance

The purpose of this bulletin is to furnish a medium for the publication of bibliographical researches, papers on library science, and such other material pertaining to library work as may be of interest to the people of Missouri and to libraries and institutions of the state.

Copies may be obtained from the editor.

VOLUME 1

1. 1908. Annual report of the librarian 1907. Appendix contains list of scientific serials in the libraries of the University. 60p.
2. August, 1910. List of periodicals currently received by the libraries. 20p.
3. September, 1910. Handbook of the libraries. 42p.
4. April, 1912. Books for farmers and farmers' wives. 24p.

VOLUME 2.

1. July, 1912. Partial bibliography and index of the publications of the College of Agriculture and the Agricultural experiment station. 19p.
2. January, 1914. Check list of the official serial publications of the University.

MEDICAL SERIES

Published irregularly

Edited by D. H. Dolley

"This series will be issued quarterly and is devoted primarily to topics within the general field of hygiene and preventive medicine. These bulletins will be illustrated and popular in character and as thorough and practical as possible."

Copies may be obtained from the Department of preventive medicine.

VOLUME 1, 1913

1. January. Bacteria and disease, by O. W. H. Mitchell. 39p.
2. April. Prevention of typhoid fever, by W. J. Calvert. 38p.
3. July. Prevention of contagious diseases in school children, by W. J. Calvert. 31p.
4. On Resuscitation, by D. H. Dolley. 29p.

RURAL EDUCATION SERIES

Edited by Richard Huff Emberson

VOLUME 1

1. August, 1909. Ten lessons on the study of Indian corn, prepared by M. F. Miller and arranged by R. H. Emberson. (Not numbered).
2. October, 1909. The soil. Prepared by R. H. Emberson. (Numbered v. 10, No. 10. General series).
3. January, 1910. The horse. Prepared by R. H. Emberson. (Numbered v. 10, No. 11. General series).
4. February, 1911. A study of cattle. (Numbered v. 12, No. 4. Rural education series).
(Continued in the Extension series of the University of Missouri bulletins).

SCIENCE SERIES

Published irregularly

Edited by George Lefevre

The science series of the bulletin is devoted to the publication of short original papers, preliminary announcements of results of research, and of articles of a general or popular character which are

of sufficient interest and importance to warrant their publication.
Copies may be obtained from the Librarian.

VOLUME 1

Non-technical lectures on the sciences, by members of the faculty of the University of Missouri:

1. The unity of science by Arthur O. Lovejoy, formerly professor of philosophy. 34p. 1912. 30 cents.
2. Mathematics, by Earle R. Hedrick, professor of mathematics. 19p. 1912. 25 cents.
3. Physics, by Oscar Milton Stewart, professor of physics. 22p. 1912. 25 cents.
4. Chemistry, by William George Brown, professor of industrial chemistry. 26p. 1912. 25 cents.
5. Astronomy, by Herbert Meredith Reese, assistant professor of physics. 17p. 1913. 25 cents.
6. Geology, by Curtis Fletcher Marbut. 1913.
7. Botany, by C. Stuart Gager. 1913.
8. Experimental zoology, by Winterton Conway Curtis (in preparation).
9. Evolutional zoology, by George Lefevre (in preparation).

VOLUME 2

1. The implantation of the glochidium on the fish, by Daisy Young, assistant in zoology. 22p, plates 3. 1911. 50 cents.
2. Notes on the Ohio shales and their faunas, by E. B. Branson, professor of geology. 16p. plates 3. 1911. 50 cents.
3. The blonde race and the Aryan culture, by Thorstein B. Veblen. 19p. 1913. 25 cents.

SOCIAL SCIENCE SERIES

Published irregularly.

Edited by Norman Maclaren Trenholme.

The social science series of the bulletin aims to provide for the publication of brief studies or accounts of political, social, economic or historical character which will be of interest and value to the people of the state.

(In preparation).

THE PUBLICATIONS OF THE COLLEGE OF AGRICULTURE AND OF THE AGRICULTURAL EXPERIMENT STATION.

Edited by Arthur J. Meyer.

The Agricultural experiment station issues the following three series of publications: 1, Research bulletins; 2, Bulletins; 3, Circulars of information.

Research bulletins—The results of fundamental research are published in small editions and distributed among investigators and public libraries. These bulletins, five of which have already been issued, are not intended for distribution among farmers.

Bulletins—These bulletins are intended to include the results of original research, but differ from the Research bulletins in that the results are primarily of interest to farmers. All of the larger editions of the bulletins are widely distributed among the farmers of the state. Bulletins of this series are also sent to libraries and investigators at other agricultural experiment stations. One hundred and fifteen numbers have been published.

Circulars of information—These publications do not necessarily include the results of original investigation carried on by the Experiment station, but are intended to be a means of distributing to the farmers of the state valuable information on important agricultural subjects. Sixty-six circulars have already been issued.

All publications of the Experiment station available for distribution are starred.

Address Director of the Agricultural experiment station for copies.

MISSOURI STATE AGRICULTURAL COLLEGE FARM BULLETINS

(These bulletins are out of print.)

There were twenty bulletins issued under the title, "Missouri state agricultural college farm bulletins." Numbers 1—8 were published in the "Annual catalogue of the Missouri University at Columbia, Missouri, 1883-1884." Numbers 9—14 were published in the catalogue for 1884-1885; and numbers 15—19 in the catalogue for 1885-1886. The following bulletins were issued in separate pamphlet form: Nos. 1—8, 10—12, 14, 16, 18—21, 23—25, 29—34. Number 21 was issued only in pamphlet.

Bulletins 21—35 were issued under the title: "Missouri state agricultural college bulletin": numbers 19—20. and 22—27 were pub-

lished in the annual report of the State board of agriculture for 1886-1887; numbers 28—30 in the report for 1887-1888; and 31—35 in the report for 1888-1889. Numbers 9—12, 14, 21, and 28—33 were also issued separately. Bulletin 35 is also bulletin number 2 of the Agricultural experiment station. Numbers 15, 16, and 24 were also published in the report of the dean of the College of agriculture, 1887.

1. [Feeding hogs.] [By J. W. Sanborn.] 1883. 3p.
2. Feeding steers. [By J. W. Sanborn.] 1883. 5p.
3. Report of test of varieties of wheat and corn. [By J. W. Sanborn.] 1883. 3p.
4. Mulching. [By J. W. Sanborn.] 1883. 4p.
5. Relation of tillage to soil moisture. [By J. W. Sanborn.] 1883. 3p.
6. Relation of dew to soil moisture. [By J. W. Sanborn.] 1883. 5p.
7. Feeding wheat and corn. [By J. W. Sanborn.] 1884. 4p.
8. Meal feeding stock at pasture. [By J. W. Sanborn.] 1884. 4p.
9. Grass-fed pigs. [By J. W. Sanborn.] 1884. 3p.
10. Pig feeding experiments. [By J. W. Sanborn.] 1884. 4p.
11. [Corn fodder as stock food.] [By J. W. Sanborn.] 1884. 4p.
12. [Seed potatoes.] [By J. W. Sanborn.] 1884. 4p.
13. Good roads and broad wheel tires. [By J. W. Sanborn.] 1884. 7p.
14. Feeding for lean meat. [By J. W. Sanborn.] 1885. 6p.
15. Contagious Pleuro-pneumonia. [By Paul Paquin.] 1885. 5p.
16. Glanders. Second report of state veterinarian. [By Paul Paquin.] 1885. 8p.
17. General observations. [By J. W. Sanborn.] 1885. 4p.
18. [Sub-soiling.] [By J. W. Sanborn.] 1885. 5p.
19. Feeding for lean meat. [By J. W. Sanborn.] 1886. 6p.
20. Report of investigations and observations in the Horticultural department. [By L. R. Taft.] 1886. 6p.
21. Plants and their uses. [By S. M. Tracy.] 1888. Chart.
22. Corn harvesting. [By J. W. Sanborn.] 1886. 6p.
23. Relation of dew to soil moisture. [By J. W. Sanborn.] 1886. 14p.
24. Report of state veterinary inspector. [By Paul Paquin.] 1886. 22p.
25. [Data regarding several economic problems in ordinary farm practice.] [By J. W. Sanborn.] 1886. 7p.
26. [Report of trials of varieties of vegetables and fruits.] [By L. R. Taft.] 1887. 7p.
27. Feeding for flesh. [By J. W. Sanborn.] 1887. 15p.
28. Maintenance ration for pigs. [By J. W. Sanborn.] 1887. 25p.

29. Rotation of crops. [By J. W. Sanborn.] 1887. 10p.
30. Fertilization. [By J. W. Sanborn.] 1887. 14p.
31. Texas fever and other diseases. [By Paul Paquin.] 1887. 13p.
32. Plows and plowing. [By J. W. Sanborn.] 1888. 19p.
33. Glanders, mad itch of cattle, etc. [By Paul Paquin.] 1888. 15p.
34. Experimental farming. [By J. W. Sanborn.] 1888. 10p.
35. Grasses for pastures and for meadows. [By J. W. Sanborn.] 1888. 9p.

AGRICULTURAL EXPERIMENT STATION BULLETINS

The following number of the bulletins are out of print: 1-101, 103-106. An index has been issued for bulletins 1 to 104. Future volumes will be indexed as published. An index will be issued with the completion of each volume of the Research bulletins.

1. Announcement to farmers; the so-called "Hatch bill"; Assent of governor; plan of organization; work and experiments proposed this season; personnel of station. [By P. Schweitzer.] 1888.
2. Grasses for pastures and for meadows. [By J. W. Sanborn.] 1888.
3. Generalities and experiments in spraying cattle. Appendix on glanders. By Paul Paquin.
4. A list of tillage implements. By J. W. Sanborn. 1888.
5. Soil, weather, field trials with corn. By P. Schweitzer. 1889.
6. Experiments on seed germination, pea weevil and apples. [By J. W. Clark.]
7. Experiments on green versus dry storage of fodder. [By J. W. Sanborn.]
8. Experiments on feeding ensilage against dry fodder. [By J. W. Sanborn.]
9. Study of the life history of corn at its different periods of growth. By P. Schweitzer. 1889.
10. Analysis of apples at various stages of growth. Bordeaux mixture for grape rot. Comparative tests of small fruits and potatoes. [By J. W. Clark.] 1890.
11. Texas fever. By Paul Paquin. 1890.
12. Black leg. By Paul Paquin. 1890.
13. Reports on spraying for the codling moth, apple scab and black rot of the grape. Reports on strawberries, raspberries, blackberries, tomatoes, peas and potatoes. List of new fruits received for testing. [By J. W. Clark.] 1891.
14. Field experiments with corn. [By H. J. Waters.] 1891.
15. Wheat—test of varieties, 1889, 1891. Oats—test of varieties,

- 1889, 1891. Change of seed—wheat, oats and potatoes. [By H. J. Waters.] 1891.
16. Covering peach trees to protect the fruit buds. Spread of pear blight, temperature and rain tables, strawberry tests, potato trials, seedling fruits. [By J. W. Clark.] 1891.
17. Sugar beets. [By Chas. Fox.] 1892.
18. Strawberries. [By Chas. Keffer.] 1892.
19. Soils and fertilizers, Part 1. [By P. Schweitzer.] 1892.
20. Soils and fertilizers, Part 2. [By Paul Schweitzer.] 1893.
21. Field experiments with wheat. [By C. M. Conner.] 1893.
22. Seedling strawberries. [By Chas. Keffer.] 1893.
23. Grape culture. [By Chas. Keffer.] 1893.
24. Comparative tests of different breeds of beef cattle. [By P. Schweitzer.] 1894.
25. An inquiry into the composition of the flesh of cattle. [By P. Schweitzer.] 1894.
26. Dairy management. [By A. M. Soule.] 1894.
27. Spraying apple trees for destruction of insects, and prevention of fungous diseases. [By Chas. Keffer.] 1894.
28. Feeding tests with difference breeds of beef cattle. [By P. Schweitzer.] 1895.
29. Feeding wheat to pigs. [By P. Schweitzer.] 1895.
30. Spray calendar. [By E. G. Lodeman.] 1895.
31. Spraying orchards and vineyards. [J. C. Whitten.] 1895.
32. Field experiments with corn. [By H. J. Waters and C. M. Conner.] 1895.
33. Enquiry into the principles of potato growing and tests of varieties. [By P. Schweitzer.] 1896.
34. Manures and fertilizers. [By H. J. Waters.] 1896.
35. The Woolly-Aphis of the apple. [By J. M. Stedman.] 1896.
36. The lesser apple leaf folder. The leaf crumpler. [By J. M. Stedman.] 1896.
37. Texas fever. [By John W. Connaway.] 1897.
38. Winter protection of the peach. Peach growing in Missouri. [By J. C. Whitten.] 1897.
39. Influence of width of tire on draft of wagons. [By H. J. Waters.] 1897.
40. Sugar beet. [By H. J. Waters.] 1897.
41. San Jose scale in Missouri. [By J. M. Stedman.] 1898.
42. A new orchard pest: the fringed-wing apple-bud moth. [By J. M. Stedman.] 1898.
43. Winter forcing of asparagus in the open field. Asparagus culture for Missouri. [By J. C. Whitten.] 1898.

44. The fruit tree bark beetle. The common apple tree and peach tree borers. [By J. M. Stedman.] 1898.
45. The sugar beet. [By H. J. Waters.] 1899.
46. Grapes: 1. The study of types and varieties. 2. The study of the pollination of cultivated grapes. 3. Methods pursued by practical growers. [By J. C. Whitten.] 1899.
47. The tarnished plant bug. [By J. M. Stedman.] 1899.
48. Texas fever. [By J. W. Connaway and M. Francis.] 1899.
49. Apple orchard. [By J. C. Whitten.] 1900.
50. Test of spray nozzles. [By N. O. Booth.] 1900.
51. The chinch bug. [By J. M. Stedman.] 1902.
52. Influence of height of wheel on the draft of farm wagons. [By T. I. Mairs.] 1901.
53. Breeding experiments with sheep: 1. Some factors influencing the weight of lambs at birth. 2. Milk and food records of ewes. [By Frederick B. Mumford.] 1901.
54. The strawberry false-worm. The strawberry leaf-roller. [By J. M. Stedman.] 1901.
55. Pruning peach trees. [By J. C. Whitten.] 1902.
56. Dairy husbandry. [By C. H. Eckles.] 1902.
57. Raising calves with skim milk. [By C. H. Eckles.] 1902.
58. Feeding the dairy cow. [By C. H. Eckles.] 1902.
59. Corn improvement for Missouri. [By Geo. M. Tucker.] 1902.
60. A new Bordeaux powder. [By R. M. Bird.] 1903.
61. Apple growing in Missouri. [By J. C. Whitten.] 1903.
62. Hessian fly in Missouri. [By J. M. Stedman.] 1903.
63. Commercial fertilizers. [By F. B. Mumford.] 1904.
64. The "sting" in the apple. [By J. M. Stedman.] 1904.
65. Grain rations for dry lot hog feeding. By E. B. Forbes. 1905.
66. Analyses of commercial fertilizers. By P. Schweitzer and R. M. Bird. 1904.
67. Supplements to corn for fattening hogs. [By E. B. Forbes.] 1905.
68. Department of dairy husbandry. [By C. H. Eckles.] 1905.
 1. A test of tin can separators.
 2. A test of a fly repellent.
69. Three fungous diseases of the cultivated ginseng. [By Howard S. Reed.] 1905.
70. Analyses of commercial fertilizers. By P. Schweitzer and R. M. Bird. 1905.
71. Fruit tree leaf-roller. [By J. M. Stedman.] 1906.
72. Alfalfa growing in Missouri. [By M. F. Miller.] 1906.
73. Cowpeas. [By A. E. Grantham.] 1906.
74. Winter killing of peach buds as influenced by previous treat-

- ment. [By W. H. Chandler.] 1907.
75. Wintering yearling cattle. [By H. J. Waters.] 1907.
76. Fattening cattle for the market. [By H. J. Waters.] 1907.
77. Inspection of commercial fertilizers. [By H. J. Waters.] 1907.
78. Inspection of commercial fertilizers. [By P. F. Trowbridge.] 1908.
79. Green forage for hogs. [By H. J. Waters.] 1908.
80. Inspection of commercial fertilizers. [By P. F. Trowbridge.] 1908.
81. Specific effects of rations on the development of swine. [By P. Schweitzer.] 1909.
82. Inspection of commercial fertilizers. [By P. F. Trowbridge.] 1908.
83. Soil experiments on the upland loam of southwest Missouri.
84. Soil experiments on the prairie silt loam of southwest Missouri.
85. Inspection of commercial fertilizers 1909.
86. Soil experiments on the rolling limestone upland of southwest Missouri.
87. Co-operative variety tests of corn. Variety tests of corn at Columbia.
88. Soil management in the Ozark region.
89. Forest conditions of the Ozark region of Missouri.
90. Fattening cattle on blue grass pasture.
91. Inspection of commercial fertilizers 1910.
92. Soils of Sullivan county.
93. Soils of Audrain county.
94. Factors affecting the per cent of fat in cream from farm separators.
95. Pork production with forage crops, clover, alfalfa, rape, corn, rye, grain, cowpeas, soybeans, sorghum.
96. Report of the Director for year ending June 30, 1910.
97. Co-operation among fruit growers, 1911.
98. The San Jose scale in Missouri. 1912.
99. Inspection of commercial fertilizers, 1912.
100. Influence of fatness of cow at parturition on percent of fat in milk, 1912.
101. Report of the director. 1912.
102. Combating orchard and garden enemies. 1912.
103. The silo for Missouri farmers. 1912.
104. The evergreen bagworm. 1912.
105. Partial bibliography and index of the publications of the Col-

lege of Agriculture and the Agricultural experiment station. 1912.

- 106. Co-operative experiments with alfalfa. 1912.
- *107. Farm poultry house construction, 1912.
- *108. Inspection of commercial fertilizers.
- *109. Grass investigation in the Ozark uplands.
- *110. Forage crop rotations for pork production. 1913.
- *111. Report of the director for the year ending June 30, 1912.
- *112. Corn silage for fattening two-year-old steers. 1913.
- *113. Commercial fertilizers for strawberries. 1913.
- *114. Corn versus oats for work mules. 1913.
- *115. Rations for fattening western yearling sheep. 1913.

CIRCULARS OF INFORMATION

- 1. Chinch bugs and their extermination. 1895.
- 2. Chinch bug infection. 1895.
- 3. San Jose scale in Missouri. 1896.
- 4. Peach yellows and peach rosette. 1897.
- 5. Sugar beet. 1897.
- 6. Clover and cow peas. 1898.
- 7. The Woolly-Aphis of the apple. 1898.
- 8. Agricultural experiment station. Third biennial report of the director, on the enforcement of fertilizer control law. 1898.
- 9. Agricultural experiment station. Practical value of the work of the experiment station. 1899.
- 10. Agricultural experiment station. Spray calendar. 1902.
- 11. Corn as a stock food. 1902.
- 12. Factors in beef production. 1902.
- 13. Plant propagation. 1902.
- 14. Commercial fruit evaporators. 1902.
- 15. The principles of plant propagation: The Seed. 1903.
- 16. Fifth biennial report of the Missouri agricultural experiment station on the enforcement of the fertilizer control law. 1903.
- 17. On the planting and care of trees for the street and lawn. 1904.
- 18. The farmers' creamery in Missouri: When and how to build. 1905.
- 19. Suggestions for Missouri corn growers. 1905.
- 20. Directions for making Bordeaux powder. 1905.
- 21. Some fungous diseases and their treatment. 1905.
- 22. Feeding the orchard. 1905.
- 23. Fungicides, insecticides and spray calendar. 1906.
- 24. Beef production on high priced land. 1908.
- 25. Rational sheep feeding. 1908.

26. Feeding the dairy cow. 1908.
27. Feeding and care of horses. 1908.
28. Swine feeding. 1908.
29. Immunization of swine against hog cholera. 1908.
30. Missouri housekeepers' conference association. 1908.
31. Hardiness of peach buds, blossoms and young fruit as influenced by the care of the orchard. 1908.
32. Missouri apple growing. 1908.
33. Hotbeds and coldframes. Their preparation and management. 1908.
34. Instructions for spraying. 1908.
35. Protecting orchards against frosts and freezes. 1909.
36. Co-operative experiments of the department of agronomy. 1910.
- *37. Variations in cream tests. 1910.
- *38. The principles of maintaining soil fertility. 1910.
39. The seeding of cow peas. 1910.
- *40. The seeding of alfalfa. 1910.
41. Directions for testing milk on the farm. 1910.
- *42. The seeding of clovers and grasses. 1910.
43. Wheat growing in Missouri. 1910.
44. Feeding for milk production. 1910.
45. Selecting and judging corn. 1910.
- *46. Factors influencing the yield of oats. 1910.
- *47. Raising of calves on skim-milk. 1911.
- *48. The plastered or Gurler silo. 1911.
49. The reinforced concrete silo. 1911.
- *50. Selection of corn for seed and for show. 1911.
51. How to prolong the life of fence posts. 1911.
52. Growing a woodlot from seed. 1911.
- *53. The seeding of cowpeas. 1912.
54. Co-operative experiments of the Department of agronomy. 1912.
55. Forage crops for swine. 1912.
- *56. Some factors in wheat production, 1912.
- *57. Keeping records of dairy cows, 1912.
58. The Missouri fertilizer law.
59. The farm adviser in Missouri.
60. The county farm adviser plan.
- *61. Docking and castrating lambs.
62. Chinch bug and its control.
- *63. Inspection service, control of insect pests and plant diseases.
64. Directions for testing cream.
65. Advantages from use of pure bred ram.
- *66. Cotton seed selection for southeast Missouri.

PRESS BULLETINS

No. 1, Sept. 6, 1912 to date.

No attempt has been made to collect and record the press bulletins of the Experiment station issued before 1912. A press bulletin has been issued for practically every publication of the station.

PUBLIC SCHOOL BULLETIN

1. Plant propagation by W. L. Howard. 1902.
2. Principles of plant propagation. The seed by F. B. Mumford. 1902. Ed. 2; 1906.
3. The falling of the leaves by J. C. Whitten. 1904.
(All out of print.)

REPORT OF THE DIRECTOR OF THE AGRICULTURAL
EXPERIMENT STATION

No reports were published from 1889 to 1895 and from 1905 to 1909. Beginning with 1910, the annual report has been published as a bulletin and will be so indexed. The report for 1910 is bulletin 96. Only those papers contained in the reports, which were not published in the bulletins, are indexed as being in the reports.

1888. First annual report of Missouri agricultural experiment station. 1888.
1896. University of the state of Missouri. College of agriculture and mechanic arts. Agricultural experiment station. Annual report. 1896. Columbia, Missouri. December, 1896. Burckhardt & Rice, Printers, Columbia, Missouri.
1897. University of the state of Missouri. College of agriculture and mechanic arts. Agricultural experiment station. Annual report. 1897. Columbia, Missouri. December, 1897. E. W. Stephens, Columbia, Missouri.

Contents:

Report of the director.....	VI
Manures and fertilizers, by H. J. Waters.....	1
Woolly-Aphis of the apple, by J. M. Stedman.....	36
Lesser apple leaf folder, by J. M. Stedman.....	62
Texas fever, by John W. Connaway.....	81
Winter protection of the peach, by J. C. Whitten.....	140
Influence of width of tire on draft of wagons, by H. J. Waters	165

1898. University of the state of Missouri. College of agriculture and mechanic arts. Agricultural experiment station. Annual

report. 1898. Columbia, Missouri. December, 1898. E. W. Stephens, Printer, Columbia, Missouri.

Contents:

1902. University of Missouri. College of agriculture and mechanic arts. Agricultural experiment station. Annual report. 1902. Columbia, Missouri. December, 1902. Press of E. W. Stephens, Columbia, Missouri.	
1903. University of Missouri. College of agriculture and mechanic arts. Agricultural experiment station. Annual report. 1903. Columbia, Missouri. December, 1903. Press of E. W. Stephens, Columbia, Missouri.	
1904. Annual report December, 1904. Press of E. W. Stephens, Columbia, Mo.	

RESEARCH BULLETINS

No. 1

An experimental study of the rest period in plants. The winter rest.
1910.

No. 2

A study of the cause of wide variation in milk production by dairy cows. 1910.

No. 3

Soil conditions in the Ozarks. Out of print.

No. 4

Digestion trial with two Jersey cows on full ration and on maintenance. 1911.

No. 5

Maintenance trials with five Jersey cows. 1911.

No. 6

Distribution of farm labor by O. R. Johnson. 1913.

No. 7

Nutrients required for milk production. 1913.

No. 8

The killing of plant tissues by low temperature. 1913.

SHORT WINTER COURSES IN AGRICULTURE

1894 to date.

The title of the course given January-March, 1893-1896 was Farmers short courses. From 1900 to date this is published as a number of the University bulletins. The title now is "Announcement of the two-year winter course and the Short courses, College of Agriculture" The list follows:

- Farmers' lecture course. January 2, 1894, to March 31, 1894.
- Short winter course in agriculture. January 2, 1896, to March 26, 1896.
- Short winter course in agriculture, and Short winter course in horticulture, January 5, to March 30, 1897.
- Short winter course in agriculture, and Short winter course in horticulture. January 4, to March 29, 1898.
- Short winter course in agriculture, and Short winter course in horticulture. January 3, to March 28, 1899.
- Short winter courses in agriculture. January 2, to March 23, 1900.
- Short winter courses in agriculture, horticulture and dairying. January 1, 1902, to March 22.
- Short winter courses: agriculture, dairying, and animal husbandry. January 4, 1906.

- Short winter courses: agriculture, Dairying and animal husbandry.
January 2, 1908.
- Short winter course in agriculture. November 1, 1909, to February 25,
1910.
- Short winter course in agriculture. November 1, 1910, to February
23, 1911.
- Two year winter course and the Short courses. October 31, 1911,
to February 22, 1912.
- Two year winter course and the short courses. November 4, 1912,
to February 21, 1913.
- Two year winter course and the short courses. November 3, 1913,
to February 21, 1914.

SCHOOL OF MINES**BULLETIN**

Issued quarterly

VOLUME 1, 1908-9

1. December. Commencement address "The human side of a mining engineer's life" by Edmund B. Kirby.
2. March. 38th Annual Catalogue.
3. June. Education for utility and culture, by Calvin M. Woodward.
4. September. The history and the development of the cyanide process, by Horace Tharp Mann.

VOLUME 2, 1909-10

1. December. The Jackling Field.
2. March. 39th Annual Catalogue.
3. June. Commencement address, "Some of the essentials of success" by Charles Sumner Howe.
4. September. Friction in small air pipes, by Professor E. G. Harris, Albert Park, and H. K. Peterson.

VOLUME 3, 1910-11

1. December. Some relations between the composition of a mineral and its physical properties, by Professor G. H. Cox and E. P. Murray.
2. March. Catalogue 1910-1911.
3. June. Providing for future generations, by E. R. Buckley.
4. September. (General information).

VOLUME 4, 1911-12

1. December. Fortieth anniversary. Parker memorial address, etc.
2. March. Catalogue 1911-12.
3. June. Commencement address, Mining and civilization, by James Ralph Finlay.
4. September. (General information).

VOLUME 5, 1912-13

1. November. (General information)..
2. March, 1913. Catalogue 1912-13.

TECHNICAL SERIES

Published quarterly

VOLUME 1

1. November, 1911. Friction in air pipes, by E. G. Harris.
2. February, 1912. Metallurgical and ore dressing laboratories of the Missouri School of Mines and Metallurgy, by D. Copeland, H. T. Mann, and H. A. Roesler.
3. May, 1912. Some apparatus and methods for demonstrating rock drilling and the loading of drill holes in tunneling, by L. E. Young.
4. August, 1912. Friction in air pipes by G. E. Harris.

Biennial report of the executive committee, 1889-1890 to date.

Note: The biennial report of the board of curators contains also reports on the School of Mines.

Announcement of the Summer School. Annually 1909 to date.

Catalogue: Number 1, 1872, to date.

(Also published in the Catalogue of the University but not in the same form.)

Scientiae baccalaureus: Vol. 1, 1890-91.

(No more published)

APPENDIX

Miscellaneous publications:

- A. Publications issued regularly.
- B. Publications suspended.

A. PUBLICATIONS ISSUED REGULARLY

BOARD OF CURATORS

Biennial report.

Annual report, 1840-48, biennial 1849-50 to date.

Note—"Before 1855 the reports were made to the secretary of state; afterwards to the General Assembly. The second report was for 1841-2. No reports were made for 1843, 1845, or 1847. Until 1866 the reports were included in the appendices to the Journals." The report from 1892 to date are still available for distribution.

Annual report to the governor. 1870 to date.

This report has been published in the annual catalogue of the University since 1870.

BOARD OF VISITORS

Report on the conditions and needs of the University of Missouri: 1873 in Catalogue 1873 appendix A, p. 129. 1889-90, 1900, 1901, 1902, 1904, 1906, in Biennial reports of the Board of Curators. 1904, 1906, 1908, 1910, 1911, 1912, published separately. None available for distribution.

UNIVERSITY OF MISSOURI CATALOGUE

1843 to date

This has appeared annually except from 1862 to 1865 when the Catalogue 1862-65 was published in one pamphlet. The first catalogue had eight pages, the last 1911-12 had five hundred and twenty-six pages. The title varies. In 1843 the title ran, "Catalogue of the officers and students of the University of Missouri." In 1867-9 it ran, "Annual announcement of the University of the State of Missouri containing catalogue," etc. In 1870-76 it ran, "Report by the Curators to the Governor containing catalogue announcements," etc.; in 1878-9, "Triennial Catalogue; 1886, "Annual Catalogue of the Missouri Agricultural College and University; 1891 to date it has a subtitle, "Report of the Curators to the Governor." From 1900 to date it has been published as a number of the bulletin.

The phrase "University of the State of Missouri" obtained during the years 1843 to 1851, 1857 to 1875, 1886-1900; "Missouri University" 1852-6, 1876-1886; "University of Missouri" has been in the title since 1901.

The catalogues contain considerable matter not usually found in such official publications. A catalogue of officers and graduates

appears in the catalogues for the years 1857, 1858, 1859, 1865, 1866, 1879, 1887, 1890, 1902. The catalogue for 1872 contains the address of President Read upon the opening of the School of Mines; contributions to a knowledge of the iron ores of Missouri by Professor Williams; and selections from a speech by Hon. James S. Rollins. The catalogue for 1873 contains address of President Read upon the opening of the Law College, October 9, 1872.

The catalogue for 1874 contains Missouri zinc ores and their products by C. P. Williams; contributions from the laboratory of the State University by P. Schweitzer; and Special advantages of the College of agriculture as being connected with the University by President Read.

The catalogue for 1875 contains True composition of coal and water supply of Columbia by Paul Schweitzer; and Commercial leads of Missouri by C. P. Williams.

The catalogue for 1876 contains President Read's Baccalaureate address to the law class of 1876; contributions from the laboratory of the State University by P. Schweitzer; contributions from the School of mines and metallurgy No. 4 by C. P. Williams, and report of C. P. Williams on the transfer of the geological survey to the School of mines.

The catalogue for 1877 contains report of the Missouri plow trial; for 1884-1886, Missouri State Agricultural College Farm bulletins Nos. 1-19; for 1888, Plan of co-operation of the University and the Missouri high schools and academies 1888.

The catalogue for 1902 was published in two editions, one containing graduates of the University of Missouri from its foundation to 1902.

From 1901 to date the Catalogue contains quotations from the ordinance of 1787.

Catalogues available for distribution are: 1871, 1876, 1891-6, 1897, 1905, 1906 to date.

CIRCULAR OF INFORMATION

Issued by the committee on accredited schools. Conditions for the accrediting of schools and recommendations concerning courses of study, methods of instruction and the equipment of laboratories and libraries in secondary schools. 1896, 1897, 1901, 1902 third edition revised; 1907 fourth edition revised; 1911 fifth edition revised (pub. as University bulletin education series, vol. 1, no. 1).

In 1896-7 the title was Suggestions to secondary schools for the equipment of laboratories, etc. All out of print.

ANNOUNCEMENTS OF THE VARIOUS SCHOOLS

The announcements of the courses offered by the various schools are now published in the general series of the bulletin. Only those schools whose publications begin prior to the first volume of the bulletin are treated separately.

SCHOOL OF ENGINEERING. ANNOUNCEMENTS

1878 to date.

(Not published in 1912)

Since 1900 the announcement has been published as a number of the University bulletin. For numbers available for distribution see University bulletin.

GRADUATE SCHOOL. ANNOUNCEMENTS

1899-1900 to date.

Since 1910-11 this has been published as a number of the University bulletin. 1899-1908 are out of print.

SCHOOL OF LAW. ANNOUNCEMENTS

1875 to date

Since 1901 the announcement has been published as a number of the University bulletin. (The Medical and Law School announcements for 1875-6 were published in one pamphlet.) The announcements for 1873-4 were published in the annual catalogue. For numbers available for distribution see University bulletin.

SCHOOL OF MEDICINE. ANNOUNCEMENTS.

1875 to date

Since 1900 the announcement has been published as a number of the University bulletin. (The Medical and Law school announcements for 1875 were published in one pamphlet.) The announcements for 1873-4 were published in the annual Catalogue of the University. For numbers available for distribution, see University bulletin.

SUMMER SCHOOL. ANNOUNCEMENTS.

1892 to date

From 1900 to date the announcement has been published as a number of the University bulletin. (The early numbers bore the title "Special courses of instruction offered by professors in the University of the State of Missouri to the teachers of the state.") For numbers available for distribution, see University bulletin.

COMMENCEMENT PROGRAMS

1843 to date

COMMITTEE ON STATISTICS.

Report of statistics on scholarship of fraternities, sororities, athletes, etc. 1908 (summer session) to date.

The Committee makes two reports annually, one for each semester. The Committee also reports irregularly on statistics of grading. For copies of these reports address, Chairman Committee on Statistics.

HIGH SCHOOL DAY

Annual announcement 1904 to date. Out of print.

UNIVERSITY HIGH SCHOOL

(Formerly Teachers College high school.)

Annual announcement 1906-7 to date. Out of print.

UNIVERSITY OF MISSOURI DIRECTORY

A register of the offices of instruction and administration and the students at Columbia. Annual 1911-1912 to date. Out of print.

Rules and regulations for the guidance of students. Annually 1893 to date. Out of print.

Schedule of lectures and recitations and directory. 1891, 1898, 1900 to date. Out of print.

B. PUBLICATIONS SUSPENDED

HISTORY AND POLITICAL SCIENCE DEPARTMENT.

Announcements 1892 to 1908-9.

Irregular. Title varied. In 1892 it was Political science department; 1893-4 History and political economy department; 1908-9 an-

nouncement of the division of history and political sciences, comprising the departments of history, economics, political science and public law, and sociology. (Out of print.)

Kansas City Society of University Extension.

Lectures offered by professors in the University of the State of Missouri. 1892; 1893. Out of print.

Official Directory, University, Teachers, Officers, etc. 1906-07—1910-11. This was a narrow broadside giving the names, telephones, offices, etc., of teachers and officers of the University. Continued by University of Missouri directory, 1911-12. Out of print.

Program of Examinations.

Published for each semester. 1885, 1893-1905. In 1902 the title was Schedule of examinations. Out of print.

UNIVERSITY OF MISSOURI MUSEUM BULLETIN.

Vol. 1, No. 1, May, 1884. Niagara fossils, by J. W. Spencer. Out of print.

UNIVERSITY NEWS ITEM

Semi-monthly. (Feb. to Aug. 1899). Ten cents a year (Broadside). W. G. Manly, Manager. Out of print.

UNIVERSITY NEWSLETTER

March 1, 1900, to September 3, 1901. Thirty-seven numbers. Milton M. Dearing, editor. Published semi-monthly. (The first 16 numbers were broadsides.) Out of print.

UNIVERSITY OF MISSOURI NEWSLETTER

Vol. 1, No. 1, Sept. 1, 1906. Merrill Otis, editor.

The number of Newsletters published is not known. There were special newspaper bulletins published during 1897-1898. Newspaper bulletins in 1902, and in 1904, and Press bulletins in 1904, edited by Fred Kelsey, publisher. The files have not been preserved, consequently it is not known precisely what was published. The purpose of all these bulletins and newsletters was to furnish the press of the state with exact information in regard to the University.

UNIVERSITY OF MISSOURI NEWSPAPER BULLETINS

It is not known what numbers were published. Some have dates, some are without. Probably published between 1902 and 1904. A special newspaper bulletin was also published, eleven number appearing during 1897-8.

PRESIDENT'S REPORTS

President's annual report to the Board of Curators 1900-1901 to 1907-1908. Still available for distribution, 1900-01 to 1902. 1903-4 to 1908.

THE
UNIVERSITY OF MISSOURI
BULLETIN

VOLUME 16 NUMBER 30

LIBRARY SERIES 7

A LIBRARY PRIMER
FOR
MISSOURI HIGH SCHOOLS

BY
HENRY ORMAL SEVERANCE
Librarian

UNIVERSITY OF MISSOURI
COLUMBIA, MISSOURI
October, 1915

PREFACE

The purpose of this bulletin is to furnish a guide for teachers who wish to organize high school libraries. It will be found serviceable as well to the untrained librarian of the small public library.

The importance of a modern high school is being stressed by educators. The Committee on accredited schools of the University of Missouri is insisting on library facilities as a condition of accrediting schools. It is said that about ninety per cent of the high schools of the United States have collections of books for the use of the students and teachers. The laboratory method of teaching presupposes a high school library. In fact, no really good high school is possible without a fair library equipment.

In the preparation of this Library Primer I have made use of all similar publications, and am indebted especially to Miss Elizabeth B. Wales, Secretary of the Missouri library commission, for her criticisms and suggestions, and for the article on Cataloging.

HENRY O. SEVERANCE,

Columbia, Missouri.

Librarian.

Appendix. Abridged classification	29

CHAPTER I

THE PARTS OF A BOOK

(a) Physical parts.

If we should dissect a book, we would find that it is made up of a number of sections, and each section of a number of leaves. The sections are known as forms and are usually numbered by figures, the number being placed on the lower right-hand corner of the first page of the section. These sections are made up of sixteen leaves in the medium sized books and four leaves in the folio books.

The leaves of each section are sewed together. At the middle of each section in the fold between the two pages, the long stitches are visible. These sections in turn are fastened to each other in sewing. In new books, all the sewing is done by machinery. In re-binding, it is done by hand and the sections are sewed to tapes or cords.

In binding new books, the book is pressed, the back rounded, and a strip of thin cloth, called "super", is glued on the back to reinforce the sewing and to form supports for the cover. This strip projects about half an inch each side of the book. The covers for such books, called "cases", are put on, and the projecting edges of the super are pasted to the inside of the cover. Then the cover paper is pasted on over this to the inside covers of the book. The super, which is not so strong as cheescloth, is not durable. It is especially liable to break, on account of the glue, when the book is opened violently the first time.

To open a stiff new book, hold it with the back down on a table, letting the lids lie open so that they also touch the table. Open the leaves a short distance from the front and then an equal distance from the end, gently pressing them down; open a few more leaves from the front and again at the end, and so on until you reach the middle of the book. Do this to ease the book a couple of times if necessary. Opening a new book quickly or forcing it open is liable to "break its back".

(b) The printed parts of a book.

The principal parts of a printed book are: the title page, preface, contents, text, and index. Frequently there are only two parts, the title page and the body of the book, as in the case of many novels. In most books, the title page is preceded by a half title, sometimes called the binder's title, which is often the same as the title printed on the back of the bound book. The copyright notice is usually on the back of the title page. Many books have a dedication which is

on the page following the copyright notice. A few writers find it convenient to put illustrative matter, statistics, and the like in an appendix. The appendix follows the text and precedes the index.

Title page. The title page contains the title of the book, the author's name, the publisher, date and place of publication. The edition other than the first is printed on this page, as is also the name of the editor or translator, if it is a book which has been edited or translated by another writer. The title usually gives an indication of the contents of the book, such as "Guide to periodicals and serials", which indicates the content and scope of the book. The name of the author followed by a list of his works or by the names of the societies of which he is a member indicates to a large extent the value of the work. The edition of the work designated as revised, enlarged, etc. indicates that the book has been corrected, or rewritten, and additions made. The term "edition" is often used for "impression". The publishers may run off five thousand copies of A's History in 1913 and from the same plates with a new date on the title page a thousand in 1914. This would be a new impression. The copyright date is the infallible guide to the date the book was printed. Publishers as a rule secure new copyrights whenever any corrections or additions have been made in the text of the work. The date on the title page is frequently misleading.

The name of the publisher will tell whether we may expect a correct text. The name of Houghton, Mifflin & Company or the Mac-Millan Company, for instance, on the title page means that the book is worth while, that the text is free from omissions and mistakes, and that the typography and paper are excellent. The names of certain publishers are practically a guarantee that the mechanical features of the book are first class.

Preface. The "preface", frequently termed "introduction", usually gives the writer's purpose in writing the book and, in general terms, the content and scope. Occasionally, the introduction is written by a friend of the author who is in entire sympathy with the author's aims and views. A "foreword" is another term sometimes used for introduction.

Contents. The table of contents follows the preface and precedes the list of illustrations. The table is a list of the titles of the chapters, or of the subjects treated in the book. The list is arranged, not alphabetically, but in the order of treatment in the book. These titles are usually brief but may be of sufficient length to indicate the scope and content of the chapters. The classifier can usually determine from the title page, preface, and contents the subject of the book and consequently the class to which it belongs.

The text. This is the main part of the book and is usually divided into chapters. Explanatory notes and references to source material

are printed at the bottom of the pages in smaller type. They are separated from the text so as not to interrupt the thought with too much detail. In case the reader may want further information, he can secure it by examining the references given at the bottom of the page.

Index. An index is an essential adjunct to a large work and a great convenience to a small one. It is an alphabetical list of all subjects treated in the text with the numbers of the pages on which they are mentioned. "It is the key to the book". When there are several volumes in a work, the index is in the last volume.*

CHAPTER II

REFERENCE BOOKS

The Circular of information to accredited schools contains a good list of books to be purchased for high school libraries.* It is the purpose of this chapter to suggest and describe others which are distinctively "reference books". We mean by this term those books which are used in the library to answer questions. They are books not to be read through but to be consulted for information. They are books which are liable to be used any minute to answer questions. They are books containing a great many facts, and include such works as dictionaries, encyclopedias, almanacs, yearbooks, and the like. This list is somewhat restricted thru a desire to describe only those which would be recommended for a small library.

Dictionaries.

There are two excellent medium priced dictionaries: The New international, and The New standard. The one or the other should be in every school whether a district school or a high school.

The New International Dictionary, Springfield, Mass., Merriam, \$12. It contains about 400,000 words. This work has been thoroughly revised. The supplementary material which had been published in the Supplement from 1890 to 1909 has been included in the main work. Statistical matter was added, and a few other changes were made in 1913. The supplementary lists, with the exception of the geographical gazetteer and the biographical dictionary, have been incorporated in

*See Ward, Practical use of books, p. 8, for illustration of indexes.

*This circular may be secured by addressing Dr. J. H. Coursault, editor of the Education series of the University bulletins.

the main work. Each page is divided horizontally by a heavy black line. Above this line are the words in general use, below are the unusual, the obsolete, abbreviations, and the like. The definitions are concise, illustrations ample, quotations plentiful, and synonyms good. It is a "dictionary of long standing and has a reputation for all round use".

The New Standard, N. Y., Funk & Wagnall, \$12, is a revision of the Standard made in 1913 and contains about 450,000 words. It is full of illustrations and quotations. It is Encyclopædic in character, giving fuller definitions than are usual in a dictionary. Proper names and abbreviations are included in the body of the dictionary. "A popularly arranged and good all round dictionary, particularly for office and journalistic use."

The Century dictionary and encyclopædia, N. Y., Century Co., \$75, revised in 1911, has been placed on the market at a great reduction, owing to the publisher's discontinuing the work. It is a scholarly work containing dictionary and encyclopædic features, cyclopædia of names, and an atlas. It contains about 500,000 words, is rich in quotations, and well illustrated. It is worth while for the small school libraries, and is indispensable for the larger libraries. It can be purchased now for about \$30 in buckram binding.

Encyclopædias.

The encyclopædia differs from the dictionary in that the former treats subjects, the latter words. The two are somewhat combined in the Century Dictionary and Encyclopædia. The whole realm of knowledge is the province of the encyclopædist. It is a "work in which the various topics included under several or all branches of knowledge are treated separately". The modern general encyclopædia is alphabetical in arrangement, and treats 40,000 to 70,000 different subjects. For reference work, the encyclopædia is the indispensable tool. Every library, therefore, should have a good encyclopædia.

New International Encyclopædia, ed. 2, 24 volumes, N. Y., Dodd, Mead & Co., \$120. This work is being revised and published a few volumes at a time. The first appeared in 1914, and the last will be published probably in 1916. It is a scholarly work, carefully edited, with excellent maps and illustrations, is popular in its treatment of technical subjects, embraces about 70,000 topics, is full of cross references, and is first class in every way and unsurpassed as a ready reference work. The work will be kept up to date by the New international yearbooks. "Its strength is in its all-roundness".

Encyclopædia Americana, 1913, 22 volumes, N. Y., Scientific American compiling department, \$132. "Its strength is apparent in its ample treatment of scientific topics generally, and more especially in its American topics."

Encyclopædia Britannica, ed. 11, 1910, 29 volumes, N. Y., Cambridge University Press, \$145. This is a standard scholarly work of reference. The articles were rewritten for this edition. The larger subjects like geology have been broken up in smaller divisions. It still retains many monographic features. The whole work is indexed in volume 29. It is, therefore, a scholarly reference work, but not a ready reference work in the sense that the New international encyclopædia is. A "Handy Volume" issue of this work, which sells for \$48, cash, ordinary paper, cloth binding, is being put out by Sears, Roebuck & Co. of Chicago.

There are several cheaper encyclopædias which have worth. If a library cannot afford one of the encyclopædias described above it might purchase Appleton's New practical cyclopædia, six volumes, N. Y., 1910. \$18. This is a small popular work.

Indexes to Periodicals.

The value of periodical material is greatly enhanced by indexes. The index is a key to the articles published in the journals analyzed. There are indexes covering the several fields of knowledge, but the indexes to general literature are the only ones recommended to small libraries.

Poole's index to periodical literature. Abridged in one volume. Boston, Houghton, Mifflin & Co., \$12. This indexed 37 magazines from 1815 to 1899 and with a supplement, 1899-1905, \$5, brings the titles up to 1905.

Readers' guide to periodical literature, White Plains, N. Y., The H. W. Wilson Co. This contains an author and a subject index to sixty-two magazines and to a considerable number of books. It is published monthly with monthly, quarterly and yearly cumulations, at \$12 a year. The quarterly numbers may be furnished to libraries which receive currently not more than twenty periodicals indexed in the Guide, for \$4 a year. The annual Eclectic catalog which preceded the Quarterly cumulations of the Guide, could be purchased from the H. W. Wilson Company for \$3.50. The work beginning in 1908 together with the quarterly numbers of the Guide would be sufficient for the small library.

The Poole indexes, not abridged, and the Readers' guide with its supplement and monthly cumulations are indispensable in the larger libraries.

Information, \$2 a year, N. Y., R. R. Bowker Company. This periodical is a continuation of Index to dates of current events. It gives information on current events and references to dates when the material appeared in the newspapers.

Other good indexes are:

Readers' guide supplement, which indexed 74 periodicals not covered by the indexes listed above, and published by the H. W. Wilson Company, White Plains, N. Y.

Industrial arts index, a subject index to a selected list of engineering and trade periodicals and published by the H. W. Wilson Company, White Plains, N. Y.

A. L. A. Index to general literature, which indexes books of a composite nature like essays, monographs, papers, etc. Published by American Library Association, Chicago.

Guide to Current periodicals and serials of the United States and Canada, 1914. Ann Arbor, Mich., George Wahr, \$2.50. Part 1 is an alphabetical list of the periodicals with publisher, place and date of publication. Part 2 is a classified list of the periodicals given in part 1.

Sociology.

Bliss, New Encyclopædia of Social Reform. N. Y., Funk Wagnall, \$7.50. Recent information on social problems will be found in the current magazines such as the Survey and the American journal of sociology. The encyclopædia is a compact work of reference, designed for workers and students of social reform. It was written by specialists and contains references on the topics discussed.

A Guide to reading in social ethics and allied subjects. Cambridge, Mass., Harvard University, \$1.25. The purpose of the work is to give a selected list of books on such subjects as social institutions, social service, industrial education, immigration, religious education, etc. The descriptive notes following the titles of the books indicate the value of the works.

Statistics, Annuals, etc.

Current statistics are found in periodicals and the annual publications described below.

World almanac, 50 cents in cloth binding, N. Y., The World. This is probably the most useful book in the library and should be in every school. It covers practically every topic on which one wishes statistical information.

Statesman's year book, N. Y., MacMillan Co., \$3.00. This is one of the most important year books. It gives descriptive and statistical information in regard to all the countries of the world such as area, population, government officials, education, religion, finance, production, commerce and the like.

The statistical abstract of the United States. Free. This is published annually and is the most useful summary of statistics relating to the United States.

U. S. census office. Abstract of the 13th census. Free. Contains in condensed form the principal statistics of the 1910 census on population, agriculture, manufacturing, and mining. Many libraries will find the ten volumes of the 13th census and the census reports on special subjects very useful.

U. S. Congress. Official congressional directory. Free. A new issue is published at the beginning of each session of Congress. It contains names and addresses of congressmen and other government officials, including U. S. consuls and foreign consuls in the United States.

These government publications may be secured through representatives and senators in Congress.

Wyer, J., jr. U. S. Government documents in small libraries, Chicago American Library Association, \$0.15. Gives method of securing documents and descriptive list of documents suitable to smaller libraries.

The American year book and the New international year book are very useful reference books. Either one should find its place in the high school library.

Missouri blue book. Official manual of the State of Missouri published annually by the Secretary of State. Free. Should be in every library in the state. It is a comprehensive work giving biographical sketches of all state officers, the departments of the state government, the state institutions political parties, etc. It is a handbook of information on Missouri.

Missouri red book, published annually by the Bureau of Labor Statistics. Free. Gives information on labor resources, advantages, opportunities, and production of the State.

Education.

Monroe, Paul, Cyclopædia of education, 5 volumes, The MacMillan Company, \$25. The best work of its kind.

U. S. Bureau of education. Bulletins and annual reports. These can be had from the Bureau on request. They contain useful material for any library.

Useful Arts.

Hopkins, A. A., Scientific american cyclopædia of formulas, N. Y., Munn & Co., \$5. 15000 recipes and formulas used in the trades, arts and household. Covers such subjects as inks, vermin exterminators, dyes, bleaches, garment cleaning, photographic formulas, extracts, syrups, bronzing and gilding.

Literature.

Hoyt and Ward. Cyclopædia of practical quotations, N. Y., Funk & Wagnall, \$6. Arranged under subjects instead of chronologically

like Bartlett's, English quotations first, then Latin and foreign. Full indexes. The most useful work for quotations by subjects.

Brewer, E. C. Dictionary of phrase and fable. New ed., Phila., Lippincott, \$3.50. "Derivation, source and origin of common phrases, allusions, and words that have a special meaning." Appendix contains a list of English authors and their works.

Warner. Library of the world's best literature, ancient and modern, 31 volumes, N. Y., Warner Library Co., \$77.50. Can be purchased second hand for about \$30. Best compilation of its kind. Furnishes a mine of information which cannot be found in the ordinary school or public library.

Stedman and Hutchinson. Library of American literature, 11 volumes, N. Y., Charles L. Webster & Co., \$33.00. Contains selections from American authors, sketches of their lives, list of noted sayings, etc. "The design is to afford the reader a general view of the course of American literature from the outset."

Bryant. New library of poetry and song, with his review of poetry, and poetry from the time of Chaucer. N. Y., Baker and Taylor. \$5.00. Popular poems and poetical extracts. Indexes. **History, Biography and Geography.**

Harper's dictionary of classical literature and antiquities, N. Y., American Book Company, \$10. Includes Greek and Roman antiquities, biography, geography, history, literature, mythology. Has illustrations and maps.

Lippincott's biographical dictionary, Philadelphia, Lippincott, \$8. An excellent general biographical reference book bringing the record of noted persons down to the close of the 19th century.

Lippincott's new gazetteer, Philadelphia, Lippincott, \$10. It is a geographical dictionary of the world. An excellent reference work.

Heilprin, Historical reference book, N. Y., Appleton & Company, \$2.50.

Harper's Encyclopædia of United States history, 10 volumes. N. Y., Harper and Brothers. Second-hand about \$10.

There are several good reference books on historical subjects such as Larned's History for ready reference, 7 volumes, \$35.00, and Hayden's Dictionary of dates, but for the small library Harper's Encyclopædia would answer most questions on American history.

Cram's Universal Atlas, Chicago, George F. Cram, \$10.

Rand McNally Unrivalled atlas of the world, Chicago, Rand McNally, \$7.

Of the larger atlases, the library atlas of the World, 2 volumes, Chicago, Rand McNally, \$25 is the latest and best. The Century atlas which is a volume of the Century dictionary is very satisfactory.

Debating Material.

Debaters handbook series, \$1 each. These handbooks of which twenty-seven have been published, furnish bibliographies on all the questions treated and give selections from magazines and from other material on the various questions such as woman suffrage, municipal ownership, and the like. The H. W. Wilson Company who publish the handbooks, loan articles printed in magazines, either singly or collectively at a nominal price. If a library should wish to borrow several articles on any debate question it could get them from this firm.

Craig. Pros and Cons. \$1.50. Complete debates with questions fully discussed on both sides.

Foster. Debating for boys. \$1.

Phelps. Debaters' Manual. \$1.

CHAPTER III**BOOK SELECTION, BUYING AND ACCESSIONING****Book Selection**

It is an easy matter to select the first hundred books for a school library as the law requires them to be selected from the list published by the Superintendent of Public Instruction of the State.*

Schools accredited by the University of Missouri are urged to purchase from the list issued in the circular of information to accredited schools, 7th edition, 1915, part III, Suggestions for the equipment of libraries. Outside of these lists there is some latitude of choice. The following are desirable helps:

A. L. A. booklist. Chicago, American Library Association, \$1 a year. This is the best source from which to select current books. The purpose of this periodical is to help small libraries make selections for purchase. Brief descriptions and evaluations are given.

A. L. A. catalog of 8000 volumes for a popular library well selected and classified. 1904. Washington, Superintendent of Documents. \$1. The work contains the best books on all subjects. Part I is a classified catalog; part II is a dictionary catalog of authors, titles and subjects. The decimal and the expansive classification numbers follow every title. The book is therefore helpful in the selection of books and in classifying them for the shelves.

*See Course of study for rural and graded schools, 1913, p. 168 and Course of study for Missouri high schools, 1914, p. 79.

A. L. A. catalog supplement. 1904-1911. Chicago, American Library Association, \$1.50.

Brown, Zaidee. Buying list of books for small libraries, 1913. Chicago, American Library Association, 10 cents. Copies may be secured free of expense by requesting them from the Missouri State Library Commission, Jefferson City, Mo.

Small libraries will need a few good magazines. A descriptive list has been compiled by F. K. Walter entitled *Periodicals for the small library*, 1913. Chicago, American Library Association, 10 cents. This will be found very helpful.

If the library can afford other helps it should subscribe to the Cumulative book index, monthly with an annual cumulation. The H. W. Wilson Co., \$6.00 This gives all the necessary information about new books to enable one to place orders. It also gives the order number of the Library of Congress printed cards.

Children's Books. Even the small library must provide literature for children. The librarian need make no mistake in selecting books for children's reading in as much as several excellent lists have been prepared. One of the best of these is *Catalogue of books* annotated and arranged by the Carnegie library of Pittsburgh for the use of the first eight grades in the Pittsburgh schools. The books are arranged by grades. The publisher, price and class mark are given. A copy might be secured free from the Carnegie library.

Another excellent book is Hewin's *Books for boys and girls*, 3d edition 1915. Chicago, American Library Association, 20 cents.

The United States Bureau of Education has issued a circular with the title; 1000 good books for children. Classified and graded list prepared by the National Congress of Mothers literature committee. 1914. Free. The University library has recently issued *Books for children*, a list of 107 books which is intended to aid in selecting books for children. Free.

Book Buying

It is usually the best policy to purchase books through the local book store, provided the book store can furnish the books practically as cheap as book stores in large cities. If a book should be imperfect or damaged, or the wrong edition or the wrong title sent, it would be more convenient to return it to the local store. On the other hand a large reliable firm like A. C. McClurg & Company which makes a specialty of furnishing books to libraries, can usually supply the books cheaper than the local store, and the library has the advantage of the expert service of experienced bookmen who can discriminate between editions and select the most satisfactory ones for the library. In either case, the cost of transportation must be taken into account. Library books could be shipped along with the local

bookstore books thereby lessening freight charges and getting shipments oftener. It is more desirable to have new books coming into the library at frequent intervals than to have large shipments once or twice a year.

Seldom, if ever, should purchases be made through subscription agents. Subscription books can usually be secured through book dealers on favorable terms. Furthermore, the works offered by agents can usually be secured from second hand dealers, at one-half or two-thirds of the subscription price. It is not economy for a small library, or for any library with limited funds, to buy fine illustrated editions and editions in fine bindings. It is best to buy standard editions of well known authors in readable type on good paper and in durable bindings.

Make carbon copies of all orders and keep the duplicate copy on file. In the order, give author, title, place and date of publication, as: *Ward, Gilbert O. Practical use of books and libraries. Ed. 2. Boston, Boston Book Company, 1914.* Inform the book seller how to send, whether by mail, express or freight. When the books are received check them with the invoice and with the order list, crossing out all titles which have been received and noting those not supplied. These last should be reordered. Return at once any book not ordered or which is imperfect. The source, date received, and cost should be written in the book just back of the title page. Books should be collated to detect imperfections. Open the books as described elsewhere, cut the leaves with a paper knife using care not to tear the leaves in cutting.

Accessioning.

The accession book should contain a list of all the books belonging to the library. It should give the source of the book, the price paid (if purchased) and the name of the donor if it was presented. As soon as a book has been checked by the invoice and collated, it should be accessioned. The number of the book in the accession record should be put into the book on the bottom of the second page following the title.

The accession book will furnish statistics for the annual report; will identify lost books, and will serve as an inventory for insurance purposes if the library should be destroyed by fire. It is the library's chief record and should contain a complete history of every volume on its shelves.

The condensed accession book, press board covers, 1000 lines, a book to a line, costs only \$1.00, Library Bureau. Directions for accessioning are printed in the book with a list of abbreviations and directions for the use of capital letters.

After the book has been accessioned, marks of ownership should be placed on its pages. Several kinds of stamps may be used for

this purpose. In the small libraries, a rubber ink stamp would answer the purpose and would be inexpensive. It should have in clear type the name of the library and should be stamped on the title page and some other page in the books such as page 99 or page 49, and the outside front cover of magazines.

Book pockets are desirable and can be made inexpensively. A square slip of paper about three by five inches tipped with paste on the bottom and the four corners to the inside front cover answers every purpose. If there is a book plate the inside back cover could be used for the pocket. Loan cards, the proper size to insert in the pocket, may be made from card board or stiff paper. Pockets with library rules printed on them and the loan cards to be used in them may be purchased if so desired. These cards should have the author's name and brief title and the call number on them.

CHAPTER IV

CLASSIFICATION AND CATALOGING

Classification

Books should always be arranged by classes even though the library is small. It is most convenient to have all the histories of the U. S. together; all the American literature by itself; all the arithmetics by themselves and so on. The purpose of classifying the books is to bring likes together, that is, books which treat of the same subject. The books should be arranged alphabetically by the author within the classes.

Books should not be classified by title. Examine the table of contents, read the preface or introduction, and if necessary, read parts of the book, especially the conclusion. The table of contents will not always give the character of the book. Usually, the preface contains a statement of the author's purpose in writing the book and his theme.

There are two systems of classification in use: the Expansive and the Decimal, but probably only one is used in the small libraries of Missouri, the Dewey Decimal System. An abbreviated form of this system will be found in the appendix. The *Abridged Decimal Classification and Relatif Index Revised*, may be secured from the Library Bureau, Chicago, in cloth at \$1.50. This abridged edition would be serviceable to libraries having 1000 volumes or more to classify. The classes could be subdivided more minutely. There are ten general

classes, each divided into ten divisions. Then a decimal point is used and the division carried out until the classification is as minute as desired. The numbers thus obtained are assigned to books, and the books are arranged in simple numerical order, the numbers being treated as decimals. Thus 512 algebra precedes 513 geometry and follows 511 arithmetic. These numbers are called class numbers. If we take 942 as an example, the analysis of the number is:

Class 9—history.

Division 4—European history.

Section 2—history of Gt. Britain.

This class number is combined with another number called the book number which distinguishes one author from another in the same class such as Nathaniel Hawthorne from Julian Hawthorne and Oliver Wendell Holmes, and insures the books falling into alphabetical sequence. The class number and the book number form the call number which should be placed on the back of the book, on the book pocket, back of the title page and on the upper left hand corner of the catalog cards, example:

025—class no.

W21—book no.

The two form the call number.

In small libraries having fewer than 1000 volumes, a book number is not necessary. Only the first letter of the author's name should be used.

In individual biography the book number should be taken from the surname of the person written about so that all of his lives will come together on the shelves. In public documents consider the government as the author such as *Missouri. Secretary of State. Legislative Manual.*

In the case of societies use the name of the society, association or institute as author, such as *American chemical society. Journal.*

In periodicals take the book number from the title of the periodical such as *North American Review.*

In anonymous books take the book number from the title of the book. In fiction many libraries assign no class number but arrange the books alphabetically by authors. If a class number is desired, 823 could be used for all fiction in the English language.

Shelf List

A shelf list is a list of the books as they stand on the shelf in the order of their classification. This is usually made on cards. If printed cards are used in cataloging, one card, after having the call number and the accession number entered upon it, may be used for the shelf list. If cards are typed or written by hand, the author and short title

with the call number and the accession number are sufficient. The following illustrations show the form to be used:

631	Vivian
V	First principles of Soil Fertility, 1913
	2793

The shelf list is useful in taking the inventory of the books. It is called "reading the shelves". It shows number of books in the various classes such as American literature, history and the like.

Cataloging

Library catalogs are made on cards, 3 x 5 inches in size and arranged alphabetically including authors, titles and subjects. These cards are filed in trays with rods passing through holes in the bottoms of the cards to hold them in the tray. The catalog is an index to the library and is more important for the readers than the shelf list. It can be kept up to date by inserting cards for the new books from day to day. Every book in the library is represented by two cards, often by three cards or more, an author card, a subject card and a title card.

Author Card.

Write the call numbers on the upper left hand corner of the card on all cards except cross reference cards. Write the author's forename, if there is only one and use initials if more than one, surname first, on the top line. Indent under author's name for title.

631	Vivian, Alfred
V	First principles of soil fertility.
265p.	1913.
Figure 1. Author card.	

In joint author cards, write both names as indicated.

422 Greenough, James and Kittredge, George L.

G Words and their ways in English
speech. 431p. 1901.

Figure 2. Joint Author Card.

When the author has a pseudonym use a cross reference card.

Twain, Mark, pseud. see
Clemens, Samuel L.

Figure 3. Reference for pseudonym

Collections are cataloged under the editor's or compiler's name.

820.8 Manly, John M., ed.
M

English prose. 544p. 1909.

Figure 4. Editor card.

When the author's, the editor's, or the compiler's name is not given, catalog the work under the title.

822

E Everyman and other miracle plays.
208p. 1909. (Everyman's Library).

Figure 5. Title card.

Catalog the publications of a society or an institution under the name of the society.

510.1 Society for promotion of engineering
 S education.
 Syllabus of mathematics. 136p.
 1912.

Figure 6. Name of society as author.

Catalog a state or city publication under the name of the state or city.

317 Missouri—Secretary of State.
 M Official manual of the state of
 Missouri.
 Library has:
 1909-10
 1911-12
 1913-14

Figure 7. Name of State as author.

Always copy the title from the title page, not from the half title, nor from the title printed on the back of the book. Capitalize no words in the title except the first word, proper names, and adjectives derived therefrom. The articles, *a*, *an*, *the*, occurring as the first word in a title should be omitted. The name of the translator or editor should appear in the title as,

873 Vergil
 V Aeneid of Vergil done into
 English verse by William Morris
 ed. 2 382p 1876.

Figure 8, Translator's name in title.

When the translator or editor is a noted man, an editor or translator card should be made for him as,

873 Morris, William, tr.
 V Vergil.
 Aeneid. ed. 2, 382 p. 1876.

Figure 9. Translator card.

When two books are bound together use form, as shown in figures 10 and 11.

821 Gray, Thomas

G

Collected poems. 151p. 1891

Bound with Goldsmith, Oliver, Complete poems.

Figure 10. Two books bound in one.

821 Goldsmith, Oliver,

G

Complete poems. 201p. 1888.

Bound with Gray, Thomas, collected poems.

Figure 11. Two books bound in one.

The number of pages in the books in single volumes should be given using the paging of the body of the work. If the work is in two or more volumes give the number of volumes as,

977 Roosevelt, Theodore

R

Winning of the west. 4 v. 1889-96

Figure 12 showing no. of volumes.

Give the date of publication as on title page. If this is lacking, give copyright date found on back of title page. In writing this date, it should be preceded by a small c, thus: c1885.

921 Morse, John jr.

M

John Quincy Adams. P. 331. c1882.
(American statesman series, v. 15)

Figure 13, showing copyright date.

Give names of series and volume in parentheses after the date. See figure 13.

Title card.

Cards bearing the title on the top line and the author's name beneath should be made whenever a book is likely to be known by its title. This is true of all fiction and of story books and in cases of striking titles. In writing title cards, keep the indentation of both author and titles, the same as that of the author card.

914	Innocents abroad.
C	
	Clemens, Samuel L.

Figure 14, Title card.

Periodical cards are similar to title cards. The title or name of the periodical should be indented.

605	School arts magazine.
S	
	Library has:
	1904-1908 v.4-7
	1908-9 v.8
	1909-10 v.9

Figure 15. Periodical card.

Subject cards.

A subject card has, as a heading, the name of the subject of which the book treats. The subject headings are usually written in red ink at the top of the card, indented, with the call number in the usual place. Below the subject heading make an exact copy of the author card. In other words write an author card, then write the subject heading indented above the author's name and the result will be the subject card.

631	Soils
V	Vivian, Alfred
	First principles of soil fertility.
	265p. 1913.

Figure 15, Subject card.

Considerable care should be exercised in assigning subject headings so as to avoid confusion in the catalog. Take as a guide the headings used in the American Library association catalog of 1904, and when other headings are used make a permanent note of the words used as headings and of all references made thereto.

Analytical cards.

In the small library every bit of information should be made available. A chapter in a book or an article in a magazine may be worth a subject card in the catalog. These subjects may take the form of an author, a title, and a subject analytical card. The sample cards, Figures 16, 17, 18, will fully illustrate these entries.

808.5	Demosthenes	
S	Oration on the crown.	
	Servis, G. P.	
	Eloquence, 214p.	1912.
	see p. 204-208.	
	Figure 16. Author analytical card.	

821	Essay on man.	
P.	Pope, Alexander	
	Poetical works. 505p.	1907
	(Globe edition).	
	See p. 191.	
	Figure 17. Title analytical card.	

938	Oracles.	
O	Oman, C. W. C.	
	History of Greece. 560p.	1905.
	See p. 39-46	
	Figure 18. Subject analytical card.	

Cross Reference Cards.

Cross reference cards refer the reader to the author, the title or the subject which gives further information. The reference may be from a pseudonym to the real name as Twain, Mark, see Clemens, Samuel L.; or from a general subject like philosophy to a special subject like hygiene.

Tracings.

Tracing is of value to the librarian as a record of the cards made for each book. The record is made on the back of the author card and should indicate the headings of all the other cards made for that book. Use t. c. to indicate title cards and Jt. auth. to indicate joint-author cards but write out names of subjects in full, and use surnames to indicate editors or translators for which extra cards have been made. The accession number should also be written on the back.

Library of Congress Printed Cards.

It is advisable from the economic standpoint and from the point of accuracy and neatness to purchase printed cards from the library of Congress. It would be the exception for the small library to acquire a book for which the Library of Congress doesn't have printed cards. The Library prints cards for all copyrighted books and all other books acquired either by purchase or by gift. A duplicate of the order list could be sent to the Library of Congress as a card order. The Library of Congress prints only author cards. The subjects, titles and other cards are indicated at the bottom of the card. If there are two subjects indicated, then the librarian should order four cards; one for the author, one for the shelf list and one for each of the subjects. The subjects would need to be written above the author's name. There is a formula used in ordering which will bring the desired number of cards. Write to the Library of Congress and ask for Methods of ordering cards. The cards cost approximately 2 cents for the first card, and $\frac{1}{2}$ cent each for the duplicate cards. If four cards on one author were ordered, the cards would cost about $3\frac{1}{2}$ cents. The printed cards solve many difficulties for the librarian.

For further information on cataloging consult: Hitchler, Theresa- Cataloging for small libraries. 15 cents. American Library Association.

CHAPTER V

PREPARATION OF BOOKS FOR THE SHELVES

Charging System, Mending, etc.

After the book has been classed and cataloged, the call number should be written above the book pocket on the inside cover of the book, depending of course on the position of the book pocket. If the library has no book plate, the pocket may be pasted on the inside of the front cover. The call number should also be written on a label

pasted on the back of the book. The Dennison label A16 extra gummed has been found most satisfactory in the University library. This should be placed on the books at a uniform height from the bottom edge of the book. An inch and a half or two inches is a good height. The call number should be written on the label after it has been pasted on the book. India ink is the best; Sanford's or other brands will do. Shellacking the label after lettering tends to prevent soiling the label and helps to hold it on.

An inexpensive pocket consists of a plain manila slip of paper $3\frac{1}{4} \times 4\frac{3}{4}$ inches, costing about 40 cents a 1000. The card for this pocket should be a Bristol card 2×5 inches, and would cost about \$1.50 a 1000. At the top of the card, write the call number, the author and title. The lines below are for the reader's name and date. When the reader borrows the book he should sign the card.

Charging System.

The library meets the public at the loan desk. In small libraries the reference work is done here and general information is given out. It is the place to make friends of the public. A system of charging books must be simple and expeditious, so that the reader suffers no inconvenience by delays and incorrect records.

If pockets are put into books and cards made for the pockets as described above, the matter of charging is very simple. Take the card from the pocket and let the reader sign it. Then stamp the date the book is due on the book pocket and on the card. Let the reader take the book, file the card in the date, filing back of the date when the book is due. Usually books are loaned for two weeks at a time with a privilege of renewal. When the book is returned, open the book and look for the date on the pocket. Look in the card file for the corresponding date. Take out the card, stamp date of return, and insert it in the pocket. The book is then ready to be shelved again.

Fines of at least 2 cents a day are usually charged on books not returned on time.

Bindings and Repairs.

In the first chapter on the physical parts of a book, we dissected a volume to ascertain how the parts were put together. We found that the sections or forms were sewed to tape or cords, and to one another. When the thread holding a form to its companion breaks and lets the form loose, the book should be resewed. If a leaf becomes loose, put library paste on the inside edge, put it in place in the book and press it down with a paper knife. Another way to fasten in leaves is to use opaque gummed paper. Two or more leaves may be tipped in, in this way. The danger comes from the additional strain on the form to which they are fastened. When the form gives way there is only one thing to do—rebind the book.

For the repair of torn leaves use transparent adhesive tape, which comes in spools. When books come out of the covers, use double stitched binder. Remove the super and glue from the back. Then take the cover and with an eraser or some sharp instrument remove the super on the inside back edge of the cover. Then moisten the gummed cloth, lay the cover on its back, set the book into it, bring up the covers against the book and press the gummed cloth against the covers. This method is well illustrated in Gaylord Brothers Catalog of library supplies. If the cloth on the back of the book is worn, torn and dirty, it should be removed and another back put on by pasting the strip, the exact size, to the covers. Then the title can be printed on in black or white ink. A typewritten label might be pasted on the back.

Magazine Binders.

There are several good temporary magazine binders. The one found most serviceable at the University is the spring backbinder manufactured by W. G. Johnston & Company, Pittsburg, Pa. Price varies with the size of the magazine. An inexpensive temporary binding is made from heavy manila card board. Cut the board the right size for the magazine, cut off the front outside cover and paste it on the board. Perforate the boards and the magazine, and fasten the covers on with shoestrings. Press board could be used instead of manila card board. The flexo binders manufactured by the Gaylord Brothers are good, cheap binders, and are used by some large libraries.

Pamphlet Binders.

The Gaylord Brothers have a very satisfactory binder for temporary or permanent use. The gray photo-mount binders are good, and cost about \$4.00 per hundred.

Care of Books.

The life of a book will be greatly lengthened if the following "don'ts" are observed.

- Don't let the direct rays of the sun strike the backs of the books.
- Don't crowd books on the shelves so that one of them cannot be withdrawn without pulling others off the shelf.
- Don't let a book fall upon the floor.
- Don't pick it up by one cover.
- Don't lay a book on the table with the open face downward.
- Don't put anything on top of an open book.
- Don't set a book on its front edge; the binding will break.
- Don't use a book as a portfolio to carry notes and paper in.
- Don't use a lead pencil for a book mark.
- Don't mark or mutilate a book.
- Don't turn the corners of the leaves down.
- Don't handle a book with dirty hands.

CHAPTER VI

EQUIPMENT AND SUPPLIES

Equipment.

The library reading room should be well lighted both by day and night. The north light is preferable for day. The desk light is to be preferred for evening. The lamp should be properly shaded to keep the direct rays from the eyes of the reader. The library rooms should be well ventilated and heated.

Shelving.

The shelving should be placed against the wall spaces of the room. If this space is not sufficient then free standing cases can be installed. The cases should be made with adjustable shelves. The cases should be not over seven feet high which would accommodate seven shelves, six of which are moveable. The stationary shelf should be three or four inches above the floor so that it will not catch all the dust. The shelves should be three feet long, and eight inches wide. These can be made by the local carpenter or steel cases can be purchased. The bottom shelves might be twelve inches wide to take the folio books. In estimating the capacity of shelving, use eight books to the foot as a basis. The current periodicals could be laid on their sides on the shelves in one section devoted to periodical literature, or a few pigeon holes could be made for them. These holes should be 12 inches high, 10 inches wide and 12 inches deep for the average sized periodical. A few larger ones might be made for the folio ones like the Scientific American.

Tables and Chairs.

The size of tables depends upon the size of the room. Tables ten feet long and three and a half or four feet wide make convenient study tables. Such a table will accommodate twelve readers. Any good chair will answer the purpose. Arm chairs take up too much room at the table. Cheboygan chairs, costing about \$2.00 each, have been found economical and satisfactory.

Librarian's desk and chair.

These may be secured thru a local dealer. The flat-top desk and swivel chair would cost about \$25.00. The desk should have drawers on either side of the opening in front. It should be placed near the exit so that readers must pass by the librarian's desk. In small libraries, there should be free access to the shelves. If the library can afford it, a charging desk should also be provided.

Supplies.

Secure catalogs from the following firms. Order by numbers and descriptions as given in the catalogs. Items not mentioned in this

list may be useful. The descriptions and illustrations in the catalogs will be suggestive.

Democrat Printing Company, Madison, Wisconsin;
Gaylord Brothers, Syracuse, N. Y.;
Globe Wernicke Company, Cincinnati, Ohio;
Library Bureau, 6 North Michigan Avenue, Chicago, Ill.;
Library of Congress, Washington, D. C. (for information on printed cards).

Accession record. 2000 line condensed accession book. \$3.00.

Size rule with scale for book sizes. 20 cents.

Classification. Dewey classification decimal. Abridged. Cloth, \$1.50.

Card catalog. 4 tray catalog case about \$8.00.

Catalog cards and shelf list cards. (6000). If cards are to be written by hand get "Ruled for pen" cards. If typewritten, get unruled cards. Get best grade of cards which will cost from \$1.75 to \$3.00 a 1000. If printed cards are to be used get not more than 1000 blank cards at first.

Buff bristol guide cards. 200 in thirds. Same size as catalog cards. 50 cents per 100.

Book pockets 2000. Printed with rules for borrowers \$2.50 to \$4.00 a 1000.

Book cards or charging cards. Ruled. 75 cents to \$1.25 a 1000.

Charging tray 55 cents.

Date guides, 1-31 in buff bristol (one set) 25 cents.

Band dater and ink pad, about 75 cents.

Dennison. Extra gummed labels, plain white. A16 oblong. 25 cents to 30 cents a box, containing 1000.

Higgins. India ink for marking labels. 25 cents a bottle.

Carters' "Koal black ink".

Carters' fast red ink.

Rubber stamp having name of the library. 50 cents.

Blank slips of paper 3 by 5 inches for notes.

White shellac, 10 cents. (Gaylord Bros.)

Ammonia 5 cents.

Camel's hair brushes. For shellac ($\frac{1}{4}$ inch) and for paste ($\frac{1}{2}$ inch).

Library paste.

Mending materials. Consult the catalogs.

Stationery.

Tray for shelf list. Shelf list may be filed in a part of the catalog.

It would be preferable to have a drawer for this purpose which should be kept on the librarian's desk. It could be kept in the boxes in which the cards were received.

Cork pen holders.

Good stub pens.

Covered glass inkwell.
 Desk blotters.
 Hand blotters.
 Hard and medium lead pencils.
 Best knife steel eraser.
 Rubber eraser.
 Shears.
 Flat bone or ivory paper knife. 50 cents.

APPENDIX

ABRIDGED CLASSIFICATION

Libraries having a 1000 volumes and more should purchase a copy of the abridged decimal classification which gives many necessary subdivisions not indicated below.

Classification

000	General works	220	Bible
010	Bibliography	230	Doctrinal. Dogmatics. Theology
020	Library economy		
030	General cyclopedias	240	Devotional. Practical
040	General collections	250	Homiletic. Pastoral. Parochial
050	General Periodicals		
060	General societies	260	Church. Institutions. Work
070	Newspapers	270	Religious history
080	Special libraries. Polygraphy	280	Christian churches and sects
090	Book rarities	290	Ethnic. Non-Christian
100	Philosophy	300	Sociology
110	Metaphysics	310	Statistics
120	Special metaphysical topics	320	Political science
130	Mind and body	330	Political economy
140	Philosophical systems	340	Law
150	Mental faculties. Psychology	350	Administration
		360	Associations and institutions
160	Logic. Dialectics		
170	Ethics	370	Education
180	Ancient philosophers	380	Commerce. Communication
190	Modern philosophers	390	Customs. Costumes. Folklore
200	Religion		
210	Natural theology	400	Philology

410	Comparative	710	Landscape gardening
420	English	720	Architecture
430	German	730	Sculpture
440	French	740	Drawing. Decoration. Design
450	Italian	750	Painting
460	Spanish	760	Engraving
470	Latin	770	Photography
480	Greek	780	Music
490	Minor languages	790	Amusements
500	Natural science	800	Literature
510	Mathematics	810	American
520	Astronomy	820	English
530	Physics	830	German
540	Chemistry	840	French
550	Geology	850	Italian
560	Paleontology	860	Spanish
570	Biology	870	Latin
580	Botany	880	Greek
590	Zoology	890	Minor languages
600	Useful arts	900	History
610.	Medicine	910	Geography and travels
620	Engineering	920	Biography
630	Agriculture	930	Ancient history
640	Domestic economy	940	Europe
650	Communication. Commerce	950	Asia
660	Chemical technology	960	Africa

LIBRARY SERIES 8

OPENING EXERCISES OF THE
NEW LIBRARY BUILDING
JANUARY 6, 1916

EDITED BY
HENRY ORMAL SEVERANCE
LIBRARIAN

UNIVERSITY OF MISSOURI
COLUMBIA, MISSOURI
MAY, 1916

New Library Building—Completed view

INTRODUCTORY

The opening exercises of the new library building were held in the reading room of the library January 6, 1916, in the presence of about three hundred people. President A. Ross Hill presided and before introducing the speakers said in part:

I wish only to call attention to the fact that the need of a library building has been very keenly felt in the University of Missouri for a great many years. From the time that the institution came to have an enrolment of seven or eight hundred students it has been found impracticable to carry on study by students efficiently under the conditions that prevailed when the library was housed in the main building.

In the first place, it wasn't possible for any individual to work under proper conditions, and in the next place there wasn't room enough for the increasing number of students that had to make use of the library. Furthermore, the collection of books had been gradually increasing and the risk of extensive loss by fire became constantly greater, so that the need of the building became more and more keenly felt as the years went by.

Certainly we presented the needs of the University for this building to the Legislature often enough to have educated the entire state to the need of a building. I don't know how far back that plea goes but I know that from my first acquaintance with the University, and this is the thirteenth year of my connection with the institution, I have heard the call for a new library building. Perhaps it was fortunate that we didn't get the building at the time we first began to dream of it. We should not then have realized the need of a large enough building because we didn't know what the future had in store in the enrolment of students in the University. We certainly would not then have been able to secure a building large enough if we had succeeded in getting it when the institution was smaller. Furthermore, one particularly fortunate thing about it is that we missed making a great mistake in its location by getting it later. Had the library been secured about ten years ago it would doubtless have been located on the West Campus near the north end, which in the long run is going to be a remote corner of the campus. The fact that we came to build up a new campus led us to think of this location as central and thus to make the request of the Legislature to furnish a site as well as a building, and I think in the long run it is going to prove quite as important to have this site as to have secured the building at the time we did.

The building will not be completed now — just when we cannot say. But we do know this: That the facilities we find here are so much superior to those we had under the old conditions that we find ourselves in luxury to be able to move into this central portion of the building.

That brings up another matter, namely, that it seemed clearer to us as we had experience in presenting the need for this building that we were not going to get an adequate building appropriated at one time, so we had plans made for the complete building and submitted them to the Legislature, and requested the appropriation of enough money to build the central portion only. The Legislature knew that we were going to build only about half of the building with the two hundred thousand dollars that was appropriated, so they will not be surprised when we ask for an appropriation to build the wings.

The President then introduced Dr. Jay William Hudson, who gave the principal address of the occasion.

THE LIBRARY AND THE MODERN UNIVERSITY

BY JAY WILLIAM HUDSON, PH.D.,
PROFESSOR OF PHILOSOPHY, UNIVERSITY OF MISSOURI

Three days ago I stood before the new Widener Library of Harvard University. I tried to think back two hundred and seventy-eight years to the time when "The Reverend Mr John Harvard sometimes Minister of Gods Word at Charlstown, by his last Will & Testament gave towards the erecting the aboves^d School or Colledge, th' one Moiety or halfe parte of his Estate', and all his books." As it was with Harvard, so has it been with nearly every great university; its founding has been inaugurated by the founding of a library, and the growth of the library has almost invariable been the concomitant of the university's development.

This historic relation of the library to the university has been made infinitely more vital because of recent changes in conceptions of education. There are four such changes which are especially significant.

First, the library has had to meet the demands occasioned by the rapid multiplication of courses, which in turn has been largely due to the rise of the elective system. More and more the modern university has tried to fulfill Ezra Cornell's ideal of a university, a place where anyone can obtain instruction in any subject. An illustration of this

multiplication of courses is found in the history of the University of Missouri during the last fifteen years. In 1900, the number of courses offered by the College of Arts was 166. During the next eight years, they had more than doubled, being 367 in 1908. In the current catalog, the number is 476, exclusive of courses offered twice during the year. This multiplication of subjects offered by the modern university has naturally meant a vast increase of the number of books absolutely needed for the purposes of instruction.

Second, the functions of the university library have become increasingly important because of the widespread adoption of the laboratory or research method in education. The laboratory method, which was once quite largely restricted to the natural sciences, is now a vital part of instruction in the social sciences as well. We are sending the students to the sources; and this means sending students to the library, for, in the social sciences, the sources, to a great extent, are books. Add to this that the natural sciences themselves increasingly encourage, besides work in the laboratories of experiment, original readings of the masters of science, then one may appreciate the significant truth that the library is not merely a laboratory co-ordinate with others, but is the central laboratory of the entire university.

A third significant fact in modern education is the growth of specialization. This specialization is most obvious in the development of graduate schools; but our universities have shown a sane reaction against an overfree election of courses by undergraduates, until there is a marked tendency to insist upon a coherence and deepening of the students' curricula. Thus, while the elective system means an increase of the library in the number of subjects represented by its books, the growth of specialization means a necessary increase in the number of books on single subjects. The modern university library must not only be extensive but intensive.

Fourth, the modern teacher is growingly constrained to adopt the sort of pedagogy which teaches a subject thru its history. Probably much of this interest in genetics is due to the widespread discussion of the concept of evolution, a concept which, rightly or wrongly, has been applied to almost every subject taught in a university. For a long time it has been the custom of philosophers to introduce the problems of philosophy through a history of philosophy. Quite recently I was in the habit of hearing teachers of certain physical sciences allege as a reason for this that since philosophy had never come to any demonstrable truths concerning any of its problems, there was nothing else for it to do than to teach the history of its failures! But now, not only are such subjects as psychology, sociology and political science taught in terms of a history of theories, but the natural scientist himself is beginning to see that one of the best introductions to the appreciation of the nature of a scientific problem is thru discovering how it first arose and how it developed thru successive attempts to solve it. For the library, this has meant not only an in-

President A. Ross Hill

crease in the number of books taking up the genesis and history of university subjects, but it has meant a vast increase of such books as open to the student the sources of yesterday's thinking, even tho the conclusions of that thinking be now modified or discarded. When I first heard that there was considerable doubt among biologists with regard to whether one can inherit acquired characteristics, I was distressed. For it seemed to me then that the doctrine was somehow necessary to make human progress possible. How could the race improve if the hard won achievements of parents could not be inherited in any measure by their children? Well, since then I have become reconciled to the newer view, principally because I realize that the characteristics most worth acquiring by succeeding generations are handed down to them thru books. An Aristotle, a Shakespeare, a Schiller, cannot indeed transmit to offspring their acquired physical characteristics, but they can do what is of much more importance to the progress of the race; they can hand down to succeeding generations forever the characteristics which they value most and which mankind cherishes most—their ideals and all the spiritual achievements wrought in the masterful pursuit of them.

It is well for our American democracy that we are thus gaining an evaluation of the present thru a perspective of the past. For it is one of the subtle dangers of our forward-looking democracy that it shall lightly and even rebelliously isolate itself from the past and thus fail truly to appreciate the real problems of the present and the responsibilities of the future. Let us hope that the new and widespread study of the great problems thru their geneses will mean a new historic consciousness which will give us that logic of history fundamentally required by democracy's tasks.

But the library of the modern university has not grown only in terms of these vital changes in education. It must grow to be a still more important factor in university life because of needs of reform in our system of education—needs which are now beginning to be felt very keenly by all who have the welfare of higher education at heart. We are beginning to see that while our students can do what they are told to do fairly well, they lack, what it is one of the chief functions of education to induce, an initiative which impels them to look beyond the textbook and the lecture for the mastery of a field. It is not merely or chiefly the performance of the task set by the teacher that counts as genuine education, but the creation of desires which shall become at length spontaneous and which shall express themselves in supplementary reading and research arising from a genuine devotion to a subject. This sort of initiative is now so rare among students in our American universities that I well remember the surprise I felt a few years ago when, in a certain class in elementary psychology, a student actually volunteered information upon the lesson of the day, derived from the voluntary reading of unassigned texts! It is the function of the library to invite this sort of initiative. And it is the

Dr. Jau William Hudson

business of the instructor so to articulate teaching with library research that the student will utilize its manifold opportunities without specific direction and as a matter of course. I am persuaded that the chief reason for the lack of this sort of initiative rests not so much with the student as with the instructor, who should create so conscious a relation between his courses and the library that the pertinent books shall be easily accessible and the pedagogical inducements to use them compelling.

Another great need in present day education is the organizing by the student of his separate courses into some semblance of a connected curriculum. The variety of courses in the modern university, together with the freedom of the elective system, has too much tended to make a student's education a mere atomistic aggregate of discrete courses rather than a rational whole. Even where the student pursues subjects more or less related, as required by the majoring and minoring systems of most American universities, they do not really articulate these subjects so successfully as they should. Here, again, we educators ourselves are largely responsible. In most of our universities there is no machinery by which a student is required to think of his various studies in terms of an organized mastery of them, except, possibly, in the vocational schools. In these, the incentive is obvious, but where is there such an incentive in what is usually known as the College of Liberal Arts? Too often the student is led, at the conclusion of a course, thru our lack of curriculum-thinking, to throw away his notebooks, sell his text, and exclaim with triumph, "Thank God, I'm thru with that!" And the worst of it is he is thru with it, as it is thru with him.

This ideal of organization in the student's education cannot be achieved successfully unless the student has learned to fill in the gaps between his separate courses by a judicious use of the university library. There are many ways of encouraging this. One way, that has given rise to some favorable discussion, is to provide for an examination at the close of the senior year on the courses that make up the student's major work, with the aim of determining how far the student has succeeded in mastering the fundamentals of the field he was supposed to cover and how far he has achieved a rational synthesis and interrelation. The question of ways and means, however, is still a question for serious discussion. The main point is that the student should be encouraged in some way or other so to organize his work that he shall perforce read, as generously as his time will permit, unassigned books that will aid him to gain a total survey of the field of his major studies. Once more, this means a more conscious relation to the functions of the university library than the average instructor has yet attained.

Closely related to the obvious need of initiative and organization in the modern student's work is the need of so regarding his education that many of the studies begun in college shall be continued be-

yond Commencement Day. How common it is to find that the American student, after graduation, has forever laid aside vital interests awakened during his college course! All of us have known of students—indeed, most of us would probably find ourselves among the number—who have gained, say, a good reading knowledge of Greek or Latin literature, or a quite respectable mastery of the fundamental problems of economics or philosophy, but who have never seriously read a single book in these subjects after the benediction at the Commencement exercises. Can university education be truly said to be a success under such circumstances? Now, of course, it would be fatuous to say that the university library has the responsibility of curing such a fundamental defect in the spirit of our educational process. Yet, one can say with truth that if the student, during his college course, learns to read for himself outside of the routine requirements of the class room, he will be more likely, thru the acquirement of such a habit, to continue such reading when his college days are over. I have not the time now to discuss the changes necessary in our conception of education to make it probable that the student will achieve such habits of independent reading. I only know that such habits should be fostered, or our higher education is largely in vain. Again, this means a much closer relation to the university library on the part of both student and instructor.

But nothing of all this can be rightly achieved by cut-and-dried methods of pedagogy or by the machinery of rules passed by faculties or enjoined by the policies of administrators. I have seen faculties of large universities become so engrossed in the making of rules that the larger purposes and aims of education were lost in the clamorous click of the machinery of methods which have lost the life of the very ideals which they were genuinely meant to serve. It has even come to pass that often "mere ideals" are sneered at as so impalpable and indefinite that it is hardly worth while for a faculty to discuss them, in comparison with amendments to by-laws and modifications of grading systems, valuable as such considerations are. And yet, in the last resort, indeed, in the first resort, all education worth while is thru the contagion of virile, ever conscious, and growingly pervasive ideals. All the needs that I have mentioned—initiative, organization, continuity—are possible only thru the contagion of *constructive ideals*, communicated by instructors to students and by students to each other. Such conscious educational ideals comprise the only true college "spirit". I cannot teach philosophy successfully merely by compelling the student to become erudite in the great philosophic systems of history. These systems, to be understood from within, that is, vitally, must be taught in terms of the living ideal, which the student shall adopt as his very own, of the glory and the worth of what it is to be a philosopher. One cannot teach English composition merely thru enjoining the rules of grammar and of rhetoric. Indeed, it is a human impossibility to teach mere grammar and rhetoric to any student

who is worth while. Nobody cares anything about mere grammar and rhetoric, unless he be an undesirable pedant, and so a still more undesirable citizen. No; the only way successfully to teach the writing of English is to create in the student a genuine love for the great masterpieces of English literature, so that, by contagion of these masters, he shall long to express himself in language as near worthy of them as his ability can achieve. This, of course, will mean that he will study grammar and rhetoric, but grammar and rhetoric will be infused with life and meaning, transfigured from the dead, inert and burdensome baggage of a persecuted wanderer in the valley of the shadow to the means of a spirit finding its utterance and so finding itself.

Now, where shall the student find the contagion of such ideals? First of all he must find them in his instructor. They must be found there, or education is a mockery. Then, thru the inspiration of his instructor, he shall find the contagion of such ideals thru communion with the great masters of thought who perpetually dwell within the walls of the university library. This is not merely a Place of Books; it is a Place of Visions. Here, shall the students learn to know the masters face to face and soul to soul—to see them and feel them as concrete, pulsating lives which shall give new significance to the difficulty of every task and the forbidding hardness of every climb toward knowledge.

Thus it is that the normal growth of the modern university, as well as the growth that is to be, thru the fulfillment of new needs and of new ideals, has made the library not a mere adjunct but an integral and vital part of the process of education. The library of the modern university is not a mere department of the university, but it is the synthesis of all departments. Within these walls is housed the university's perpetual faculty, the masters of the sciences and humanities of all ages, the faculty to which we whose names appear in the annual catalog are but assistants. Who comprise the real faculty of the University of Missouri? Homer, Plato, Aristotle, Vergil, Dante, Bacon, Göethe, Von Humboldt, Shakespeare, Wordsworth, Darwin, and the remainder of the host of the "masters of those who know". Here is a faculty forever accessible to students, winter and summer. Here is to be found the true and perpetual exchange of professors. All countries and all times, from the first university to the last, have sent them here. Here is a faculty that asks no raise in salary; receives no harassing "calls"; who worry not over grading systems—happy immortals they! Here are the true teachers, for they give nothing save as the student gives of his diligence and his ideals. Here, culture knows no national boundaries, no castes, no clans. Here is the beginning of that new internationalism to which a world in conflict shall come at last. Here is the great world-parliament, of which the dreamers have prophesied. Here is democracy triumphant, for here is gathered the world's best society, with no qualifications for

Henry Ormal Severance Librarian

entrance save the ability and purpose of those who aspire to it. Justin Windsor once suggested that "had we instruments delicate enough to register them we might yet hear the footfalls of Plato walking in the Academy; the denunciation of Brutus on the Rostrum; the prayer of Columbus at San Salvador; the periods of Garrick at Drury Lane; the calm judgments of Washington in the federal convention". But, wonderful as such records would be, the library is stored with records infinitely more significant than these merely outward expressions of the human spirit. We cannot hear the footfalls of Plato; but we can read his innermost thought in his printed dialogues. We cannot listen to the denunciation of Brutus; but we can read his meaning in the unfolding drama of Rome's story. We cannot thrill with the periods of Garrick at Drury Lane; but the race can forever marvel over the lines that made Garrick great. We cannot listen to Washington in the Federal convention; but the thoughts he uttered, the ideals he formulated are here, forever accessible to those who, as future citizens, will incorporate the best of his dream into the building of the mightier state.

This library is the realization of the hopes of three-quarters of a century. From the administration of President Lathrop, nearly every president of the University has been aware of the increasing importance of an efficient library and has labored to achieve it. The obstacles have been great and the consummation has been slow. Up to the time of the Civil War the sum of not more than \$2500 was spent on books. It is interesting to note that during the Civil War the Federal troops were housed in the University building and that the library room was used as a guardroom. Now, it is evident that these soldiers were discriminating in matters relating to true culture, for "a considerable number of books disappeared"—went when the soldiers went. Who says that war and culture do not go together! Then in 1892, when the library had amassed some 23,000 volumes, the main building of the University burned and, with the exception of the few hundred books loaned out, the entire library was destroyed. Yet today, thru the devoted and energetic labors of those in whose hands the responsibility for the University's development has been placed, the library is one of the best in this section of the country, numbering 150,000 volumes. This achievement we owe not only to those who have efficiently administered University affairs in the office of President, but to the farseeing ideals of the Board of Curators, to the support of the Legislature, to the co-operation of the Historical Society, and to the devotion of the people of Missouri.

There are at least three requisites for a good university library building, requisites which this library happily fulfills. A library should be accessible to all departments of the university; this library is fortunately situated in the very heart of the University's life. A library should be spacious; in this reading room alone where we are gathered today there is desk space for 260 students. Besides this are

Exhibition Corridor and East Stairway

the long needed seminary rooms. Both these and space for readers will be increased as the University grows. And, finally, a library should be attractive—its portals should ever tempt one to enter; in many ways this library is the most attractive building that the University possesses.

Thus, the opening of this library marks a new and significant epoch in the development of the greater University of Missouri. Succeeding generations of faculties and students will realize this more fully than we of today can. It is possible that among all the encouraging achievements of President Hill's administration the realization of this building will be longest remembered and cherished. For the erection of this library is significant far beyond the event itself. Situated on a rise of ground higher than either of our campuses, it marks a linking of the old with the new. Up to now, there was a West Campus and an East Campus; hereafter there is really only one campus, of which the library is the center.

It will come to pass that a great university will increasingly be judged by the nature and use of its library. Not by the number of its volumes; not by the magnificence of its building; but by the books of power which it houses and by the manner in which the faculty encourages their abundant and judicious use. We intend this library to develop in such significant ways that it shall serve to invite scholars here and to draw serious minded students here. We intend this library to fulfill the paramount purpose of a great university library; the double purpose of exact scholarship and creative research, the research that finds truth, and the still greater research that leads the student to find himself.

As the University grows in its influence thruout the state, this library will become in many senses not merely the center of the University, but the intellectual center of Missouri. Under its roof are to be found not only the books of the University, but the valuable records of the Historical Society, which has worked hand in hand with the University for the realization of this building. Upon the seal of the University is to be found the motto, "*Salus Populi*", "the welfare of the people". It is for the service of this broad purpose that the University exists and it is to the uses of this service that this library is today formally opened, since we know full well that upon the knowledge and wisdom which its books represent, and the ideals which they stimulate in the future citizens of Missouri, the welfare of this commonwealth in some measure depends.

At the present time this building is incomplete, and we all look forward to the day when the people of Missouri will make actual the vision we have of the finished structure. And yet, in the most significant sense of all, a university library is always incomplete. It is a suggestion of the future even more than a record of the past. The best books are yet to be written; and what books these shall be depends to some extent upon the sort of thinkers this University creates

Reading Room of the Missouri State Historical Society

thru just such opportunities as this building presents—thinkers to some of whom we shall look to take their rightful places beside the masters who dwell within this House of Books.

At the close of Dr. Hudson's address, the President called upon Mr. O. H. Swearingen of Kansas City to speak. Mr. Swearingen was a member of the legislative committee which secured the money for the buildings of the East Campus, the Physics, Chemistry and Biology buildings, and he was chairman of the committee of the House which purchased this site and erected this part of the building. He spoke in part as follows:

This is indeed a great event. I would not be possessed of the ordinary sentiments that move men, did I not greatly appreciate the honor of being asked to participate even in this small way, in the ceremonies of this auspicious occasion. Whatever in my humble way I may have done to aid you, to aid the University, to aid the Historical Society in the consummation of their wish, in the realization of their dream, an adequate building to house this great library, I did without hope of favor or reward, simply as a matter of state pride. My present wish is that the Legislature may soon decide to complete your original plans. We must have buildings and equipment for all our institutions commensurate with the resources of this state and with its dignity and standing among the other members of the Union."

William R. Painter, Lieutenant Governor of Missouri, representing the State Historical Society, was next introduced by the President, who said: "Of all the state officers who have been interested in the construction of this building, and interested for many years in having a building secured here for the University and State Historical Society, I think we could very well place Lieutenant-Governor Painter at the top of the list." Mr. Painter said in part as follows:

I am here today to represent in a way the State Historical Society, of which I have been a member since its organization in 1898, when at Kansas City a committee was appointed by the Missouri Press Association to preserve in some way the History of Missouri.

The Missouri Press Association, representing practically all of the newspapers in the state, thought the time was ripe for us to begin to

preserve the history of this great state and to gather the books and the pamphlets, the messages and the letters and the pictures that had been made in the centuries past, and so this organization came about. At the meeting in Excelsior Springs in the same year the organization was perfected, and Mr. E. W. Stephens of this city was elected president and Professor Loeb was elected secretary. Without money, without any library, without any books, they began work, and we have in these few years accumulated as you know the books, pamphlets and newspapers that are kept in the Historical Society rooms.

The state soon recognized the State Historical Society and made an appropriation for its support. About that time Mr. Sampson was elected secretary of the organization, and he brought to it a library that he had been years in gathering, pamphlets and books that are invaluable. We could not secure in any way possible duplicates of the books that he brought to the State Historical Society. He served as secretary for many years, gathering here and there those pamphlets and books that were rare indeed, and being very familiar with all of these things from his study of them for years he knew where to locate and find and purchase things that would have been lost to the people of this state. Too much credit can not be given to him for that great work in which he engaged. And yet he is interested in trying to secure the things that are of interest and will be of more interest to the people of the state. And I think the thanks not only of the Historical Society, which have been given to him, but I think the thanks of this great University; not only that, the thanks of the people of the entire state of Missouri should be given to him for this great work in which he has been engaged.

The Historical Society has had only a few presidents and only three secretaries. Mr. E. W. Stephens was the first president; Mr. H. E. Robinson of Maryville was the second president; Mr. W. O. L. Jewett of Shelbyville was the third; Mr. Southern of Independence was the fourth, and the present president of the association is Mr. R. M. White of Mexico, Missouri. The secretary of the association is Mr. Shoemaker, with whom you are all well acquainted. I predict for the gentlemen who now have the matter in charge that the Historical Society will continue to grow, continue to become of more interest than it has ever been in the state. Since it is now housed in this beautiful building with its spacious reading room and its books and pamphlets so that they may be obtained easily by those who desire to study the history of the state, it seems to me that the room below will soon be too small for the purpose for which it was intended.

.

Mr. Charles E. Rush, librarian of the Free Public Library of St. Joseph, representing the Missouri State Library Association was the last speaker. He said:

The Missouri Library Association, representing the interests of nearly all of the college, public and university libraries thruout the state of Missouri, desires to offer felicitations on the dedication of this admirable new library building and in this official way extends congratulations to all those who have been charged with its construction and management, all those who have contributed to its erection and all those who shall become beneficiaries of its state and nationwide service.

Today the professional interest and best wishes of all Missouri librarians are centered upon this important and memorable event, which places the great state of Missouri in the front rank of sister states having the best and most efficient type of university library equipment.

This new building has that delightful air of bookish democracy and collegiate atmosphere which has lately become almost a lost art among university library architects, wherein all students feel welcome and comfortable, appealing to those who read by precept and assignment as well as those who read for the pure enjoyment of good reading. Furthermore, it is so constructed and arranged that it serves to emphasize the fact that upon use its contents become gifts finer and more wonderful than pure gold, that the wealth of brain, the value of experience and the power of inspiration stored herein will enrich the whole of life for all, while gold can only enrich the purse of the few.

May the entire state be not unmindful nor unappreciative of the "acts of faith" with which this great library has been founded, supported and housed, and may its confidence in the wise direction and educational administration of the library be not lessened but grow apace with the extension of library activities and service.

As pointed out by one of our famous present-day librarians, Dr. E. C. Richardson of Princeton University, the modern university library has become an indispensable teaching institution, having a far greater function than that of merely collecting and handing down to future generations the literature of modern times and of ages past. "It is above all things a teacher of the present generation," having become so "by its very existence as a separate organization, by its books, by its exhibition and laboratory facilities, and by its staff of library assistants".

Such a recognition of its importance and place in the sun of educational efforts has rightly led to the creation of this beautiful building, housing sufficient wisdom to free the shackles of all who are held in intellectual bondage thruout the commonwealth. Upon all who shall learn of better things in this great institution will be laid the

Main Reading Room—Looking east

blessed burden of disseminating to others the means of making this old world a happier and better place in which to live and to the end that they may realize life's great purpose that all shall so fit themselves that the opportunity of service may find seedbed and root and prosper accordingly, this building is today dedicated. May they not forget that, in this age of preparedness and in this time of "keep your powder dry", it is of supreme importance to neglect not the enlargement of the armament of the brain and the development of the aerial forces of the soul, "for what shall it profit a man if he shall gain the whole world and lose his own soul"? It was one of our great presidents who said: "I will study and get ready, for sometime my chance will come."

Shall we not on this impressive occasion recall again the words of another great student whose prophesy, "behind us lies endless power, before us awaits endless possibilities, and all about us are endless opportunities", is in a happy way applicable to this splendid library of the University of Missouri.

The President said in conclusion:

This building in its plans is really the result of a great deal of study. Mr. Severance, the librarian, was at work on it for a long time, canvassed the entire country, secured the opinions of all the experts and then formulated his plans. Mr. Jamieson, the architect, was able to take these suggestions and put them together and adapt them to the money and the site and the general situation; and I think we can join in our gratitude to Mr. Severance and Mr. Jamieson for the sort of building we have secured thus far. I trust that we shall not forget that Mr. Jamieson must complete the building, that we must not get another architect to build the wings. The greatest apprehension I have is that by some accident we may have another architect to replace the rest of the building.

Furthermore, the administration of the library is quite as important as getting the building, and I can say frankly to visitors that I have the testimony of our graduates who go elsewhere, to large universities like Columbia and Harvard with their great libraries, that nowhere have they found such facilities for getting at the materials as they have found in the University of Missouri; so that I judge the administration of the building and of the Library itself is such as to give satisfaction to all of us and enable us to look forward with confidence to the fullest possible effective use being made of this building and of the books that are housed here.

The University of Missouri library and the State Historical Society library are both housed here now and I trust will always continue to be housed together. My attention was called today to the fact that in another state these two institutions are united in one building and that each proceeds with its work without thought of the other, with the result that a great deal of money is wasted. No money is wasted here for not a dollar that the State Historical Society spends for books is duplicated in the expenditures of the University library, and *vice versa*, so that we have here a most complete and cordial co-operation. The University has had the expression of gratitude from the State Historical Society for the generosity shown in the amount of space given to that society, and in return the University wishes to express its gratitude that the material under the administration of the State Historical Society is here for the use of our students.

I now declare the University of Missouri Library Building open for use.

- 127. Soil experiments on the dark prairies of central and northeast Missouri.
- 128. Soil experiments on the rolling glacial land of southwest Missouri.
- 129. Soil experiments on the red limestone upland of southwest Missouri.
- 130. Soil experiments on the gray prairie of southwest Missouri, (second report.)
- 131. Work and progress of the Agricultural Experiment station for the year ending June 30, 1914.

VOLUME 8

132—142

April, 1915—June, 1916

- 132. The control of the San Jose scale in Missouri.
- 133. The silo and its use.
- 134. Insect pests of field crops.
- 135. The ration and age of calving as factors influencing the growth and dairy qualities of cows.

136. Feeding wheat to fattening swine.
137. The periodical cicada in Missouri.
138. Farm bee-keeping.
139. Inspection of commercial fertilizers: 1915.
140. Size of farm business.
141. Work and progress of the Agricultural Experiment Station for the year ended June 30, 1915.
142. Successful farm organization.

RESEARCH BULLETINS

VOLUME 2

4—14

October, 1911—May, 1914

4. Digestion trial with two Jersey Cows, in full ration and on maintenance.
5. Maintenance trials with five Jersey cows.
6. The distribution of farm labor.
7. Nutrients required for milk production.
8. The killing of plant tissue by low temperature.
9. Carotin—the principal natural yellow pigment of milk fat Part 1.
10. Carotin—the principal natural yellow pigment of milk fat Part 2.
11. Carotin—the principal natural yellow pigment of milk fat Part 3.
12. Carotin—the principal natural yellow pigment of milk fat—Part 4.
13. Lactochrome—The yellow pigment of milk whey.
14. Sap studies with horticultural plants.

VOLUME 3

15—24

July, 1914—June, 1916

15. An experimental study of the rest period in plants. The summer rest of bulbs and herbaceous perennials. Second report.
16. An experimental study of the rest period in plants. Pot grown woody plants. Third report.
17. An experimental study of the rest period in plants. Seeds. Fourth report.
18. The maintenance requirement of cattle as influenced by condition, plane of nutrition, age, season, time on maintenance, type, and size of animal.
19. Studies of the timothy plant. Part 1.
20. Studies of the timothy plant. Part 2.
21. An experimental study of the rest period in plants. Physiological changes accompanying breaking of the rest period. Fifth report.

22. Silage investigations. Normal temperatures and some factors influencing the quality of silage.
23. The powdery mildews of avena and triticum.
24. Influence of plane of nutrition of the cow upon the composition and properties of milk and butter fat. Influence of overfeeding.

VOLUME 4

25—

July 1, 1914—

25. Influence of plane of nutrition of the cow upon the composition and property of milk and butter fat. Influence of underfeeding.
26. The nutrients required to develop the bovine fetus.

AGRICULTURAL EXPERIMENT STATION CIRCULARS

VOLUME 1

1—68

67. How to build a Gurler silo.
68. The seeding of meadows and pastures.

VOLUME 2

69—81

April, 1914—June, 1916

69. The fertility of the soil.
70. The Hessian fly in Missouri.
71. Shock corn for silage.
72. Silage for horses and mules.
73. Rye and blue grass pasture for ewes.
74. The yellow color in cream and butter.
75. The farmers' poultry house.
76. Feeding for egg production.
77. The value of education to the farmer.
78. The control of soil washing.
79. Sour milk for chicken feeding.
80. The Missouri poultry house.
81. Pruning shade trees.

PREFACE

The purpose of the second edition of this check list is to make available the valuable material being published by the University and to record in permanent form the serial publications of the University up to and including 1920.

The first edition of the check list is out of print, and it is assumed that most libraries have copies. The information contained in the appendix of that list is not reprinted, but the titles in the supplement to the check list published in 1917 and all other serial publications issued previous to January 1, 1921, have been included.

A new feature of this check list is the general index of subjects and authors appearing in the publications. The publications have now become so numerous, that an index will prove very helpful in locating bulletins, circulars, studies, and the like.

The general series of the bulletins have not been indexed. This series is devoted to announcements of the courses in the several colleges and schools and contains nothing of a scientific or learned nature. The catalogs of the University have been published as bulletins since 1900. The report of the Board of Curators remains a separate biennial publication. It was annual 1840-48. Since that time it has been biennial.

Unless otherwise stated copies of the various publications in print may be secured by addressing the librarian of the University.

HENRY ORMAL SEVERANCE.

THE UNIVERSITY OF MISSOURI STUDIES

Edited by George Lefevre 1913—

The Studies are devoted to the publication of extensive papers embodying the results of original research made by members of the faculty and by graduate students. No paper that has appeared elsewhere will be accepted for publication in the Studies.

After the publication of two volumes of miscellaneous papers, the Studies were differentiated into series, of which the following are now being issued: 1, social science series; 2, science series; 3, literary and linguistic series; 4, philosophy and education series; 5, mathematics series. New series will be established, as papers which may not properly fall in any of the above groups are accepted for publication.

Frank Thilly editor 1901-1904

William G. Brown editor 1905-1912

VOLUME 1

1. Contributions to a psychological theory of music, by Max Meyer, Ph. D., professor of experimental psychology. vi, 80 p. 1901. 75 cents. Out of print.
2. Origin of Covenant Vivien, by Raymond Weeks, Ph. D., professor of romance languages. viii, 64 p. 1902. 75 cents. Out of print.
3. The evolution of the northern part of the lowlands of southeast Missouri, by C. F. Marbut, A. M., professor of geology. viii, 63 p. 1902. \$1.25. Out of print.
4. Eileithya, by Paul V. C. Baur, Ph. D., acting professor of classical archaeology. vi, 90 p. 1902. \$1.00.
5. The right of sanctuary in England, by Norman Maclaren Trenholme, Ph. D., professor of history. viii, 106 p. 1903. 75 cents. Out of print.

VOLUME 2

1. Ithica or Leucas? by William Gwathmey Manly, A. M., Professor of greek language and literature. vi, 52 p. 1903. \$1.00.
2. Public relief and private charity in England, by Charles A. Ellwood, Ph. D., professor of sociology. viii, 96 p. 1903. 75 cents. Out of print.
3. The process of inductive inference, by Frank Thilly, Ph. D., professor of philosophy. v, 40 p. 1904. 35 cents. Out of print.

4. Regeneration of crayfish appendages, by Mary I. Steele, M. A. viii, 47 p. 1904. 75 cents. Out of print.
5. The spermatogenesis of *anax junius*, by Caroline McGill. viii, 15 p. 1904. 75 cents. Out of print.

LITERARY AND LINGUISTIC SERIES

VOLUME 1

- Chevalerie Vivien, facsimile phototypes, with an introduction and notes, by Raymond Weeks, Ph. D., formerly professor of romance languages. 12 p, plates 24. 1909. \$1.25.

VOLUME 2

- The cyclic relations of the Chanson de Willame, by Theodore Ely Hamilton, A. M., Ph. D. ix, 301 p. 1911. \$1.25.

MATHEMATICAL SERIES

VOLUME 1

1. On the definition of the sum of a divergent series, by Louis Lazarus Silverman, Ph. D. v, 96 p. 1913. \$1.00.

PHILOSOPHY AND EDUCATION SERIES

VOLUME 1

1. The treatment of personality by Locke, Berkeley and Hume, by Jay William Hudson, Ph. D., assistant professor of philosophy. xvi, 96 p. 1911. 75 cents.

SCIENCE SERIES

VOLUME 1

1. Topography of the thorax and abdomen, by Peter Potter, M. A., M. D. vii, 142 p. 1905. \$1.75. Out of print.
2. The flora of Columbia and vicinity, by Francis Potter Daniels, Ph. D. x, 319 p. 1907. \$1.25.

VOLUME 2

1. An introduction to the mechanics of the inner ear, by Max Meyer, Ph. D., professor of experimental psychology. viii, 140 p. 1907. \$1.00.

CHECK LIST OF SERIAL PUBLICATIONS

7

2. The flora of Boulder, Colorado, and vicinity, by Francis Potter Daniels, Ph. D. viii, 453 p. 1911. \$1.50.

VOLUME 3

1. Barite deposits of Missouri and geology of the barite district, by William Arthur Tarr, associate professor of geology, University of Missouri. xii, 111 p. 10 pl. 1918. \$1.25.

SOCIAL SCIENCE SERIES

VOLUME 1

- The clothing industry in New York, by Jesse E. Pope, Ph. D., professor of economics and finance. xviii, 340 p. 1905. \$1.25.

VOLUME 2

1. The social function of religious belief, by William Wilson Elwang. Ph. D. viii, 100 p. 1908. \$1.00.
2. The origin and early development of the English universities to the close of the thirteenth century, by Earnest Vancourt Vaughn, A. M., instructor in history. viii, 147 p. 1908. \$1.00.
3. The origin of the werewolf superstition, by Caroline Taylor Stewart, A. M., Ph. D., assistant professor of germanic languages. iv, 32 p. 1909. 50 cents.
4. The transitional period, 1788-1789, in the government of the United States, by Frank Fletcher Stephens, Ph. M., Ph. D., instructor in American history. viii, 126 p. 1909. \$1.00.

VOLUME 3

1. Assyrian historiography: a source study, by Albert Ten Eyck Olmstead, Ph. D., associate professor of ancient history. pp. viii, 65. 1916. \$1.00.
2. Anton's oriental policy until the defeat of the parthian expedition, by Lucile Craven, Ph. D. pp. xii, 88, 1920. \$1.00.

THE UNIVERSITY OF MISSOURI BULLETIN

From 1892 to 1900 there were various bulletins, circulars, and announcements published and distributed, but they were not numbered consecutively nor published regularly. One number of the bulletin is known to have been published August 25, 1893, and three to have been published in 1894, but such ephemeral material was not preserved. There undoubtedly were other bulletins. Beginning with volume 1, number 1, February, 1900, the bulletins have a consecutive number.

Bulletin, volumes 1 to 3, number 4, had the title, Bulletin of the University of the State of Missouri. In 1911 a new series of the bulletins was issued. The series which began with volume 1, 1900, was given the title, General series, 1911-1913, with a continuation of the volume number which the bulletin had before the new series was begun. Bulletins issued previous to 1910 are mostly out of print. Practically all issued since then are available for distribution.

GENERAL SERIES

Published monthly

Edited by C. E. Kane

The object of this series is to furnish information regarding the University and its several colleges and schools. It accordingly consists of the general catalog and the individual announcements of the several divisions of the University.

VOLUME 1, 1900

1. February. Summer school, June 4 to August 25. 13 p. il.
2. Announcement to teachers of work in progress in certain classes. 15 Mar-1 June 1900. 7 p.
3. June. Catalog 1899-1900. 224 p.
3. June. Circular of information. 4 p.
4. July. Department of medicine. 4 p.
5. August. School of engineering. 4 p.
6. September. The growth of the University. 4 p.
7. October. Short winter courses in agriculture and horticulture. 4p.
8. November. Short winter courses in agriculture and horticulture. 16 p.

VOLUME 2, 1901

1. January. Circular of information. 4 p.
2. February. Announcement to teachers of work in progress in certain classes, 15 March to 1 June, 1901. 8 p.

3. March. Summer school, June 3 to August 24, 1901. 16 p. il.
4. April. Department of law. 4 p.
5. May. Catalog 1900-1901. 268 p.
6. June. Department of medicine. 4 p.
7. July. Circular of information. 4 p.
8. August. Department of engineering. 4 p.
9. September. Agriculture, mechanic arts, household economics. 4 p.
10. October. Special winter courses in agriculture, horticulture and dairying. 4 p. il.
11. November. Results of a religious census of Columbia. 4 p. (Called No. 10)
12. December. Short winter courses in agriculture, horticulture and dairying. January 1, 1902, to March 22, 1902. 16 p.

VOLUME 3, 1902

1. January. Buildings, libraries, laboratories. 4 p.
2. February. Growth in eleven years, 1890-1901. 4 p.
3. March. Summer session for 1902, June 2 to August 30. 15 p.
4. April. Department of law. 4 p.
5. May. Announcement of the department of medicine, 1902-1903. 19 p.
6. June. Catalog, 1901-1902. 244 p.
7. July. Circular of information. 4 p.
8. August. School of engineering. 4 p.
9. September. School of agriculture. 4 p.
10. October. Special winter courses in agriculture, animal husbandry, horticulture, and dairying. 4p. il.
11. November. Short winter courses in agriculture, horticulture, animal husbandry, and dairying. 18 p. il.
12. December. What the University has done for Missouri. 9 p.

VOLUME 4, 1903

1. January. The condition of the almshouses in Missouri. 6 p.
1. Supplement. The condition of the county jails in Missouri. 8 p.
2. February. Former students living in Missouri. 1st ed. 24 p. 2d ed. (without title), 26 p.
3. March. Summer session for 1903. (June 1 to August 28). 16 p.
4. April. Department of law. 2 editions, one 4 p., the other 4 p. and 4 p. il.
5. May. Catalog, 1902-1903. 242 p.
6. June. Department of medicine, 2 editions, one 4 p., the other 4 p. and 8 p. il.

7. July. Circular of information, 2 editions, one 4 p., the other 4 p. 4 p. and 8 p. il.
8. August. School of engineering, 2 editions, one 4 p. the other 4 p. and 16 p. il.
9. September. College of agriculture, 2 editions, one 4 p., the other 4 p. and 8 p. il.
10. October. College of agriculture. Short winter courses in agriculture, dairying, and animal husbandry. Courses begin January 5, 1904. 16 p. il.
11. November. Parker memorial hospital, 10 p. il.
12. December. Student homes. 12 p. il.

VOLUME 5, 1904

1. January. Former students living in Missouri. 28 p.
2. February. Academic department. Circular of information. 12 p.
3. March. Summer session for 1904 (June 2 to August 2). 16 p.
4. April. Department of law announcement, 1905-1906. 24 p.
5. May. Catalog, 1903-1904. 292 p.
6. June. Department of medicine. 4 p.
Incorrectly numbered v. 6, no. 6 afterwards enlarged and correctly numbered, 7 p.
7. July. Circular of information, 4 p.
8. August. School of engineering. 4 p.
9. September. College of agriculture. 4 p.
10. October. College of agriculture. Short winter courses; agriculture, dairying and animal husbandry. 19 p.
11. November. What the University has done for Missouri. 16 p.
12. December. Growth in thirteen years (1890-1903). 4 p.

VOLUME 6, 1905

1. January, 1905. The University of Missouri. 52 p.
2. February. Catalog, 1904-1905. 345 p.
3. March. Summer session for 1905 (June 10 to August 10). 25 p.
4. April. Department of law annou~~ncement~~ncement, 1905-1906. 24 p.
5. May. Academic department. Circular of information, 1905-1906. 16 p.
6. June. Department of medicine, 1905-1906. 16 p.
6. June. Teachers' college.
7. July. General announcement, 1905-6. 16 p.
8. August. School of engineering. Circular of information 1905-6. 26 p.
9. September. College of agriculture. Announcement 1905-6. 24 p.

10. October. College of agriculture. Short winter courses; agriculture, dairying and animal husbandry. 16 p.
11. November. Obligations and opportunities of the churches at the University of Missouri. 4 p.
12. December. Announcement of the second semester. January 30 to June 6, 1906. 4 p.

VOLUME 7, 1906

1. January. Purpose of the summer session. 4 p.
2. February. University of Missouri (views). 32 p.
3. March. Academic department. Teachers college 1906-1907. 36 p.
4. April. Department of law. Announcement 1906-7. 24 p.
5. May. Catalog 1905-6. 400 p.
6. June. Department of medicine. Announcement 1906-7. 4 p.
7. July. General announcement. 8 p. il.
8. August. School of engineering 1906-7. 14 p.
9. September. College of agriculture. 1906-7. 16 p.
10. October. College of agriculture. Short winter courses, agriculture, dairying and animal husbandry. 20 p.
11. November. Announcement for second semester.
12. December. Alumni directory. 105 p.

VOLUME 8, 1907

1. January. The success of the college graduate, by J. C. Jones. 16 p.
2. February. Views of the University of Missouri. 32 p.
3. March. Announcement of the summer session for 1907. 29 p.
4. April. Department of law announcement 1907-8. 24 p.
5. May. Catalog 1906-7. 427 p.
6. June. Teachers college announcement 1907-8. 29 p.
7. July. University of Missouri. General announcement. 8 p. il.
8. August. Department of engineering. Circular of information 1907-8. 16 p.
9. September. College of agriculture. Announcement 1907-8.
10. October. Medical department. Announcement 1907-8. 30 p. il.
11. November. College of agriculture. Short winter courses, agriculture, dairying and animal husbandry. 23 p.
12. December. Announcements for second semester, January 29 to June 5, 1908.

VOLUME 9, 1908

1. January. Missouri state military school announcement 1907-8. 16 p.

2. February. Announcement of summer session 1908. 30 p.
3. March. College of arts and science announcement 1908-9. 48 p.
4. April. Department of law announcement 1908-9. 24 p.
5. May. Catalogue 1907-8. 468 p.
6. June. Medical department announcement 1908-9. 27 p. il.
7. July. Views of the University of Missouri. 16 p.
8. August. Department of engineering circular of information 1908-9. 19 p.
9. September. Not published.
10. October. Practical instruction for young farmers. 16 p.
11. November. Agriculture as a career (numbered vol. 8, no. 12, without date).
12. December. Announcements for the second semester. 8 p.

VOLUME 10, 1909

1. January. Announcement of summer session 1909. 32 p.
2. February. Teachers college announcement 1909-10. 4 p.
3. March. Not published.
4. April. School of law announcement 1909-10. 24 p.
5. May. Catalogue 1908-9. 512 p.
6. June. School of medicine announcement 1909-10. 24 p.
7. July. Announcement of the school of engineering 1909-10. 16 p.
8. August. Education for agriculture. 24 p. il.
9. September. Short winter courses in agriculture 1909-10. 24 p.
10. October. Rural education. The soil by R. H. Emberson. 8 p.
11. January. 1910, rural education. The horse by R. H. Emberson. 8 p.
12. December. 1909, second semester courses 1910. 18 p.

VOLUME 11, 1910

1. January. Announcement of the summer session 1910. 32 p.
2. February. Announcement of the school of education 1910-11 38 p.
3. March. Not published.
4. April. School of law announcement 1910-11. (Numbered as v. 10, no. 4). 24 p.
5. May. Catalogue 1909-10. 521 p.
6. June. School of medicine announcement 1910-11. 24 p.
7. July. Announcement of the school of journalism 1910-11. 15 p.
8. August. Education for agriculture. 24 p.
9. September. Announcement of the school of engineering 1910-11. (numbered as v. 10, no. 9). 20 p.
10. October. Short winter courses in agriculture. 23 p. il.

11. November. Second semester courses. 18 p.
12. December. Not published.

VOLUME 12, 1911

1. January. Announcement of the summer session 1911. 40 p.
2. February. Announcement of the graduate school 1911-12. 64 p.
3. March. Announcement of the school of education 1911-12. 27 p.
4. April. Announcement of the school of law. 24 p.
5. May. Catalogue 1910-11.
6. June. Announcement of the school of medicine 1910-11. 22 p.
7. July. Announcement of the college of arts and science 1911-12. 40 p.
8. August. Announcement of the school of journalism. 1911-12. 14 p.
9. September. Announcement of the school of engineering 1911-12. 27 p.
10. October. Announcement of the college of agriculture (regular session) 1911-12. 43 p.
11. November. Announcement of the two-year winter course college of agriculture 1911-12. 53 p. il.
12. December. Announcement of second semester courses 1911-12. 23 p.

VOLUME 13, 1912

1. January. Announcement of summer session 1912. 48 p. il.
2. February. "Every day at the University" (A glimpse of student activities with views of the buildings). 48 p.
3. March. Announcement of the graduate school 1912-13. 62 p.
4. April. Catalogue 1911-12. 526 p.
5. May. Announcement of the school of education 1912-13. 32 p. il.
6. June. Announcement of the school of medicine 1912-13. 41 p.
7. July. Announcement of the school of law 1912-13. 17 p.
8. August. Announcement of the school of journalism 1912-13. 18 p.
9. September. Not published.
10. October. Announcement of the college of agriculture (regular session) 1912-13. 55 p.
11. November. Announcement of the two-year winter and short courses, college of agriculture 1912-13. 51 p.
12. December. Announcement of the second semester courses 1912-13. 20 p.

VOLUME 14, 1913

1. January. Announcement of the summer session 1913. 46 p. il.

2. February. Announcement of the college of arts and science 1913-14. 33 p.
3. March. Announcement of the graduate school 1913-14. 61 p
4. April. Announcement of the school of education 1913-14. 31 p
5. May. Catalogue 1912-13. 488 p.
6. June. Announcement of the school of medicine 1913-14. 32 p
7. July. Announcement of the school of law 1913-14. 34 p.
8. August. Announcement of the school of journalism 1913-14 14 p.
9. September. Announcement of the school of engineering 1913-14 44 p. il.
10. October. Announcement of the college of agriculture (regular session) 1913-14. 58 p. il.
11. November. Announcement of the two year winter course and other short courses, college of agriculture, 1913-14. 42 p. il.
12. December. Announcement of the second semester courses 1913 14. 22 p.

VOLUME 15, 1914

1. January. Announcement of the graduate school, 1914-15. 55 p
2. February. Announcement of the summer session, 1914. 44 p.
3. April. Catalogue 1913-14. 464 p.

5. June. Announcement of the school of law. 1916-17. 25 p.
6. July. Announcement of the college of agriculture. 1916-17. 43 p.
7. August. Announcement of the school of medicine. 1916-17. 23 p.
8. August. Announcement of the two-year winter course and other short courses. 1916-17. 50 p.

VOLUME 18, 1917

1. January. Announcement of the graduate school. 1917-18.
2. February. Announcement of summer session. 1917.
3. March. Announcement school of law. 1917-18.
4. March. Special announcement summer session. 1917.
5. March. Special announcement summer session. 1917.
6. April. Announcement of business & public administration. 1917-18.
7. May. Announcement school of journalism. 1917-18.
8. May. Catalog. 1917-18.
9. May. Announcement school of engineering. 1917-18.
10. June. College of agriculture announcement. 1917-18.
11. July. School of medicine announcement. 1917-18.
12. July. Two-year winter course announcement. 1917-18.
13. August. Schedule of courses. 1917-18.
14. December. Alumni directory 1843-1917 by H. H. Kinyon.

VOLUME 19, 1918

1. January. Graduate school announcement. 1918-19.
2. February. Summer session special announcement.
3. February. Summer session announcement. 1918.
4. March. New three-term calendar.
5. April. Engineering school announcement. 1918-19.
6. June. Catalog. 1918-19.
7. June. School of journalism announcement. 1918-19.
8. School of law announcement. 1918-19.

9. July. College of agriculture announcement. 1918-19.
10. July. School of business and public administration. 1918-19.
11. July. Two-year winter course announcement. 1918-19.
12. August. Schedule of courses fall and winter terms. 1918-19.
13. September. Missouri state military school.

VOLUME 20, 1919

1. February. Spring-summer term. Special announcement.
2. March. Spring-summer term announcement.
3. March. Graduate school announcement. 1919-20.
4. April. School of medicine announcement. 1919-20.
5. April. School of engineering announcement. 1919-20.
6. June. College of agriculture announcement. 1919-20.
7. June. School of business and public administration announcement. 1919-20.
8. July. Department of forestry announcement. 1919-20.
9. July. Catalog. 1919-20.
10. July. Two-year winter course in agriculture announcement. 1919-20.
11. August. School of journalism announcement. 1919-20.
12. (17) School of law announcement. 1919-20.
13. August. Two-year winter course in agriculture (special).
14. September. Schedule of courses.
15. September. Training for social work.
16. September. Graduate school announcement. 1920-21.

VOLUME 21, 1920

1. January. Spring-summer term announcement. 1920.
2. March. School for nurses announcement. 1920-21.
3. March. School of journalism announcement. 1920-21.
4. April. General catalog. 1920-21.
5. School of business and public administration announcement. 1920-21.
6. School of engineering announcement. 1920-21.
7. May. College of agriculture announcement. 1920-21.
8. Not published.
9. School of law announcement. 1920-21.
10. June. School of medicine announcement. 1920-21.
11. July. Two-year winter course in agriculture announcement. 1920-21.
12. August. Schedule of courses. 1920.
13. August. Schedule of courses. Two-year winter course in agriculture.

14. October. School of engineering. Courses for mechanics 1920-21.
15. December. Schedule of courses, winter. 1921.
16. December. Graduate school announcement. 1921-22.

ASTRONOMICAL SERIES

(Laws observatory bulletin)

Published irregularly.

Edited by Robert Horace Baker.

This bulletin is devoted exclusively to the publications of astronomical researches conducted in the laws observatory. Numbers one to sixteen were edited by Frederick Hanley Seares under the title, laws observatory. Bulletin 1902-1908. It was then placed in the astronomical series of the University bulletin.

Copies may be obtained from the librarian, except numbers 1-9, which are out of print.

VOLUME 1

1. Observations and elements of comet b 1402 (Perrine).
2. Observations of comets.
3. Observations of comet a 1904 (Brooks).
4. Observations of a comet e 1904 (Borrelly).
Photometric observations of Nova Germinorum ch. 2387.
Special time signals from U. S. naval observatory.
5. The polaris vertical circle method of determining time and azimuth introduction.
6. The agol variable 188. 1904 Draconis.
7. Photometric investigations.
The disc photometer.
The ~~w~~edge photometer.
Investigation of the wedges.
8. A grant from the gould fund.
General remarks concerning variable star observations.
A new variable, 88. 1906 Lacertae.
Preliminary results for V Lacertae, 110. 1904.
The variable V vulpeculae, 4.1904.
Preliminary note on variable 108.1905 Capricorni.
9. The Algol variable RR Draconis (188.1904).
Preliminary announcement concerning the Algol variable 121.-1906 Draconis.
10. Announcement of preliminary results for variable stars.
 - (1) General remarks and star list.
 - (2) Preliminary results.

11. The variable RS Cassiopeiae (108.1904).
12. Finding ephemerides for comet 1894 IV (E. Swift).
13. The Zöllner-Müller photometer.
The Gans-Crawford telescope.
The variable X Lacertae (88.1906).
The variable V Lacertae (110.1904).
14. The variable RV Tauri (45.1905).
15. The Algol variable RW Monocerotis (24.1907).
Preliminary announcements concerning variable stars.
16. The long-period Algol variable RZ Ophiuchi (193.1905).
Preliminary announcement concerning SW Andromedae (5.1907).

VOLUME 2

17. The antalogol variable St. Ophiuchi (52.1907).
18. The algol variable Rx Draconis (121.1906).
19. The Algol variable Rz Draconis (26.1907).
20. Studies with the polarizing photometer.
21. The rotating ellipsoid Ru Camelopardalis.
22. The visual and photographic light variations of RR Lyrae by C. C. Kiess.
23. The visual and photographic light variations of Rt Aurigae by C. C. Kiess.
24. Investigations in extra focal photometry by R. H. Baker and Edith E. Cummings.
25. The eclipsing binary Rx Herculis, by Robert H. Baker, and Edith E. Cummings.
26. The eclipsing binary Z Vulpeculae, by Robert H. Baker.
27. The eclipsing binary TV Cassiopeiae, by Edith E. Cummings.
28. The eclipsing binary u Herculis, by Robert H. Baker.

EDUCATION SERIES

Published irregularly

Edited by Jesse H. Coursault

The object of the education series is the publication of new formulations of educational principles and data of direct value to the schools of the state, and of educational researches which have significance for other schools of education.

Copies of these bulletins may be obtained from the editor.

1. June, 1911. Circular of information to accredited schools. Fifth edition revised. 123 p. Out of print.
2. November, 1911. Rural school consolidation in Missouri, by O. L. Kunkel and W. W. Charters. 36 p.

3. February, 1912. Journalism for teachers, by Frank L. Martin. 27 p.
4. December, 1912. Geography of Missouri, by Frederick Emerson. 74 p.
5. The teaching of poetry in the high school, by A. H. R. Fairchild. 104 p. 1914.
6. January, 1913. An experimental study of methods of teaching high school German, by Mamie M. Clarahan. 32 p.
7. Circular of information to accredited schools, sixth edition, revised. Issued by the committee on accredited schools, University of Missouri. 138 p. 1913.
8. The kind of scholarship records to be kept in schools, by Max R. Meyer, professor of experimental psychology. 14 p. 1914.
9. A course in grammar based on the mistakes made by school children in Kansas City, Missouri, by W. W. Charters, Dean of the faculty of education, and professor of theory of teaching, University of Missouri, and Edith Miller, teacher of English, Soldan high school, St. Louis, Mo. 41 p. 1915. Out of print.
10. Circular of information to accredited schools, seventh edition, revised. Issued by the committee on accredited schools, University of Missouri. 132 p. 1915.
11. Study of the rural schools of Saline County, Missouri, by Joseph D. Elliff, professor of high school administration, and Abner Jones, fellow in education, University of Missouri. 32 p. 1915.
12. Circular of information to accredited junior colleges, issued by the committee on accredited schools and colleges. Edited by J. H. Coursault, professor of history and philosophy of education. 182 p. 1918.
13. A standard library organization suggested for Missouri high schools, by Henry Ormal Severance, librarian, University of Missouri. 19 p. 1919. Out of print.

ENGINEERING EXPERIMENT STATION SERIES

Published quarterly

"This series is the official publication of the engineering experiment station of the University, which was established by the board of curators on July 1, 1909, for the investigation of such problems in engineering as appear to be of the most direct and immediate value to the people of the state and for researches of importance to manufacturing and industrial interests and to engineers."

Some experiments in the storage of coal by E. A. Fessenden and J. R. Wharton. (Published in 1908, previous to the establishment of the experiment station.)

Copies of these bulletins may be obtained from the dean of school of engineering.

VOLUME 1, 1910

1. March. Acetylene for lighting country homes by J. D. Bowles. 34 p.
2. June. Water supply for country homes by K. A. McVey. 35-54 p.
3. September. Sanitation and sewage disposal for country homes by W. C. Davidson. 55-72 p.
4. Not published.

VOLUME 2, 1911

1. March. Heating value and proximate analysis of Missouri coals by C. W. Marx and Paul Schweitzer. (Reprint of report published previous to establishment of experiment station). 16 p.
2. June. Friction and lubrication testing apparatus by Alan E. Flowers. 20 p.
3. September. An investigation of the road making properties of Missouri stone and gravel by W. S. Williams and R. Warren Roberts. 70 p.
4. Not published.

VOLUME 3, 1912

1. March. The use of metal conductors to protect buildings from lightning by E. W. Kellogg. 55 p.
2. June. Firing tests of Missouri coal by H. N. Sharp. 44 p.
3. September. Report of steam boiler trials under operating conditions, by A. L. Wescott. 21 p.
4. Not published.

VOLUME 4, 1913

1. March. Economics of rural distribution of electric power by L. E. Hildebrand. 50 p.
2. June. Comparative tests of cylinder oils by M. P. Weinbach. 28 p.
3. Artesian waters in Missouri by A. W. McCoy. 73 p. 1913.
4. Friction tests of lubricating greases and oils by A. L. Wescott. 72 p. 1913.

VOLUME 5, 1914

14. Effects of heat on Missouri granites by W. A. Tarr and L. N. Neuman. 64 p. 1914.
15. A preliminary study relating to water resources of Missouri by T. J. Rodhouse. Out of print.

16. The economics of electric cooking by P. W. Gumaer. 62 p. 1915.
17. Earth roads and oiling of roads by H. A. LaRue. 30 p. 1916.
18. Heat transmission through boiler tubes by Edwin Allen Fessenden and J. William Haney. 1916. 74 p.
19. Geology of Missouri, by E. B. Branson, professor of geology, University of Missouri. 172 p. 1918.
20. Energy necessary to shear steel at high temperatures by Guy D. Newton, associate professor of engineering drawing and machine design, University of Missouri. 16 p. 1920.
21. Water supply and sewage disposal for country homes by E. J. McCaustland, dean of engineering experiment station, University of Missouri. 36 p. 1920.
22. Study relating to the water resources of Missouri by T. J. Rodhouse, professor of hydraulic engineering, University of Missouri. 57 p. 1920.

EXTENSION SERIES

Published irregularly

Edited by Charles H. Williams

This series of bulletins is the official publication of the Extension division of the University, object of which is to "serve citizens of the commonwealth who are unable to attend established institutions; to guide them in the pursuit of a more effective education; to give every person in the state an opportunity to get the most complete education possible at the lowest practicable cost; to make the University the center of every movement which concerns the interests of the state; and to bring the University and the home in close touch."

Copies of these bulletins may be obtained from the editor.

1. April, 1913. A new departure for University extension. 4 p.
2. July, 1913. School improvement agencies. Suggestions for superintendents and principals by W. W. Charters. 15 p.
3. October, 1913. Consolidation of schools of Missouri by R. H. Emberson. 20 p.
4. November, 1913. Correspondence courses in high school subjects. 8 p.
5. December, 1913. Announcement of the extension division.
6. Preservation of food in the home by Louise Stanley and May E. McDonald. 1914.
7. Care of free text-books by Henry O. Severance. 1914.
8. Announcement of the extension division, 1914-15.
9. Abnormal and defective children by W. H. Pyle, 1914.

10. Correspondence courses in high school subjects. 1914.
11. House fly by M. P. Ravenel, 1914.
12. Correspondence courses in high school subjects, 1915.
13. Announcement of the Extension Division, 1915-16.
14. Technical manual arts for general educational purposes by Ira S. Griffith, 1916.
15. Country roads. Part 1. Road drainage; Part 2. Culverts by F. P. Spaulding. 1916.
16. Handwork in grades 1 to 6, by Ella V. Dobbs and Juliaetta Zeits.
17. Not published.
18. Not published.
19. Correspondence courses in high school subjects. 1916.
20. Announcement of the extension division. 1916-17.
21. Manual of mental and physical examinations. 1916.
22. Better highways by E. J. McCaustland.
23. Feeding of children by Hildegrade Kneeland, instructor in home economics University of Missouri. 12 p. 1917.
24. Feeding the baby, by Louise Stanley, associate professor of home economics. 11 p. 1917.
25. Announcement of the extension division. 1917.
26. Extension division announcement 1919-20. 1919.
27. Extension division announcement of courses 1919-20. 1919.
28. Extension division announcement 1920-21. 1920.
29. Manual for the mental and physical examination of school children (revised) by William Henry Pyle. 40 p. 1920.

JOURNALISM SERIES

Published quarterly

Edited by Robert S. Mann

This series of bulletins discusses problems of the newspaper office. Both the editorial and business departments are considered.

Copies of these bulletins may be obtained from the dean of the school of journalism.

VOLUME 1

1. April, 1912. Missouri laws affecting newspapers compiled by Walter Williams. 66 p.
2. May, 1912. Journalism week in print. 64 p.
3. July, 1912. Retail advertising and the newspaper by Joseph E. Chasnoff. 47 p. Out of print.
4. March, 1913. The news in the country paper by Charles G. Ross. 44 p.
5. May, 1913. Journalism week, 1913. 63 p.

6. Building a circulation: Methods and ideals for small-town newspapers by J. B. Powell, instructor in advertising. 42 p. 1914.
7. The editorial page, by Robert S. Mann, assistant in journalism.
8. Journalism week, 1914.
9. The world's journalism by Walter Williams, dean of the school of journalism.
10. Newspaper efficiency in the small town, by J. B. Powell, instructor in advertising. Out of print.
11. Journalism week, 1915.
12. Deskbook of the school of journalism, edited by Charles G. Ross, associate professor of journalism. 1915. 84 p.
13. The journalist's library: Books for reference and reading, by Charles E. Kane, assistant in journalism. 89 p. 1916. Out of print.
14. Making the printed picture: A treatise on photoengraving methods, by Herbert W. Smith, instructor in illustrative art. 8 p. 1916. Out of print.
15. The law and the newspaper by Frederick W. Lehmann. 26 p. 1917.
16. The journalism of Japan, by Frank L. Martin, professor of journalism, University of Missouri. 38 p. 1918.
17. Problems of advertising. Addresses delivered in journalism week 1918, by George Eads, N. A. Huse, and M. P. Linn. 20 p. 1918.
18. "The Missouri Intelligencer and Boon's Lick Advertiser." A brief history of the first American newspaper west of St. Louis, by E. W. Stephens.
19. Deskbook of the school of journalism, sixth edition 1919 revised by Robert S. Mann, assistant professor of journalism, University of Missouri. 80 p. 1919.
20. The small town newspaper as a business. 20 p. 1919.
21. Deskbook of the school of journalism, seventh edition 1920 revised by Robert S. Mann. 80 p. 1920.

LAW SERIES

Published quarterly

"The purpose of the law series of the bulletin will be to offer to the lawyers of Missouri articles dealing with Missouri law or with questions of federal law which have arisen or are likely to arise in Missouri, as well as short notes on recent Missouri decisions."

Copies may be obtained from the editor.

1. Estates tail in Missouri, by Manley O. Hudson, professor of law. Out of print.

2. Estates by the marital right and by the courtesy in Missouri, by Charles K. Burdick, professor of law.
3. The rule against perpetuities in Missouri, by Manley O. Hudson, professor of law. Out of print.
4. The real party in interest statute in Missouri, by George L. Clark, professor of law.
Limitations of personal property, by Manley O. Hudson, professor of law.
5. Conditions subsequent in conveyances in Missouri, by Manley O. Hudson, professor of law.
6. The writ of certiorari in Missouri, by J. P. McBaine, professor of law.
7. Tort liability for negligence in Missouri.—I. The duty to use care, by George L. Clark, professor of law.
8. Land tenure and conveyances in Missouri, by Manley O. Hudson, professor of law; index to law series, 1-8.
9. Preliminary stock subscription agreements in Missouri, by Manley O. Hudson, professor of law.
10. Some aspects of the status of children in Missouri, by Eldon R. James, professor of law.
11. Executory limitations of property in Missouri, by Manley O. Hudson, professor of law.
12. Tort liability for negligence in Missouri.—II. Legal or proximate cause.—III. Contributory misconduct of the plaintiff, by George L. Clark, professor of law.
13. The proposed regulation of Missouri procedure by rules of court, by Manley O. Hudson, professor of law.
Certiorari from the Missouri supreme court to the court of appeals, by J. P. McBaine, professor of law.
14. Transfer and partition of remainders in Missouri by Manley O. Hudson, professor of law, University of Missouri. Notes on recent Missouri cases. 57 p. 1917.
15. Some problems in hearsay and relevancy in Missouri by E. W. Hinton, professor of law, University of Missouri. Notes on recent Missouri cases. 40 p. 1917.
16. Equitable servitudes in Missouri by George L. Clark, professor of law, University of Missouri. Notes on recent Missouri cases. Index to law series 1-16. 60 p. 1917.
17. Bar bulletin. Equitable relief against nuisances and similar wrongs in Missouri by George L. Clark, professor of law, University of Missouri. Notes on recent Missouri cases. 71 p. 1919.
18. Bar bulletin. Payment of debt to foreign representatives or heirs by Robert B. Fizzell. Notes on recent Missouri cases. 52 p. 1920.

19. Bar bulletin. Local and special legislation by Roscoe E. Harper. Notes on recent Missouri cases. 76 p. 1920.
20. Bar bulletin. Local and special legislation (concluded) by Roscoe E. Harper. Notes on recent Missouri cases. 84 p. 1920.

LIBRARY SERIES

Published irregularly

Edited by Henry Ormal Severance

The purpose of this bulletin is to furnish a medium for the publication of bibliographical researches, papers on library science, and such other material pertaining to library work as may be of interest to the people of Missouri and to libraries and institutions of the state.

Copies may be obtained from the editor.

VOLUME 1

1. 1908. Annual report of the librarian 1907. Appendix contains list of scientific serials in the libraries of the University. 60 p.
2. August, 1910. List of periodicals currently received by the libraries. 20 p.
3. September, 1910. Handbook of the libraries. 42 p.
4. April, 1912. Books for farmers and farmers' wives by Henry O. Severance, librarian. 24 p.
5. July, 1912. Partial bibliography and index of the publications of the college of agriculture and the agricultural experiment station, by Henry O. Severance, librarian. 19 p.
6. January, 1914. Check list of the official serial publications of the University. 44 p. Out of print.
7. Whole No. 7. A library primer for Missouri high schools, by Henry O. Severance, librarian. 1915. 20 p. Out of print.
8. Whole No. 8. Opening exercises of the new library building. Jan. 6, 1916. By Henry O. Severance, librarian. 1916. 22 p.
9. Whole No. 9. Check list of the official serial publications of the University 1914, 1915, 1916.
10. Check list of the official serial publications of the University of Missouri, edition 2, compiled by Henry O. Severance, librarian. 1921.

LITERATURE SERIES

1. The congress of letters, by Fred Newton Scott, professor of rhetoric in the University of Michigan. 16 p. 1917.

2. An odious comparison by George Morlin, professor of Greek in the University of Colorado. 15 p. 1917.

MEDICAL SERIES

Published irregularly

Edited by D. H. Dolley

"This series will be issued quarterly and is devoted primarily to topics within the general field of hygiene and preventive medicine. These bulletins will be illustrated and popular in character and as thorough and practical as possible."

Copies may be obtained from the department of preventive medicine.

1. Bacteria and disease, by O. W. H. Mitchell, associate professor of pathology and bacteriology. 39 p. 1913.
2. Prevention of typhoid fever, by W. J. Calvert, professor of preventive medicine. 38 p. 1913.
3. Prevention of contagious diseases in school children, by W. J. Calvert. 1913. 31 p.
4. On resuscitation, by D. H. Dolley, professor of pathology. 29 p. 1913.
5. The relation of sight and hearing to early school life by Guy L. Noyes, acting dean of the faculty of medicine and formerly professor of diseases of the eye and ear. 34 p. 1914.
6. The prevention of tuberculosis, by O. W. H. Mitchell. 36 p. 1914.
7. Water—the prevention of its pollution, by O. W. H. Mitchell. 19 p. 1914.
8. Preventive medicine, its accomplishments and its aims, by M. P. Ravenel, professor of medical bacteriology and preventive medicine. 24 p. 1915.
9. The early diagnosis and treatment of cancer, by F. A. Martin, instructor in pathology. 12 p. 1915.
10. The prevention of malaria, by Elbert L. Spence, instructor in preventive medicine and medical bacteriology. 20 p. 1915.
11. Headache a symptom: its causes, prevention and cure, by Walden E. Muns, instructor in pathology. 34 p. 1916.

RURAL EDUCATION SERIES

Edited by Richard Huff Emberson.

VOLUME 1

1. August, 1909. Ten lessons on the study of Indian corn, prepared by M. F. Miller and arranged by R. H. Emberson. (Not numbered.)

2. October, 1909. The soil. Prepared by R. H. Emberson. (Numbered v. 10, No. 10. General series.)
3. January, 1910. The horse. Prepared by R. H. Emberson. (Numbered v. 10, No. 11. General series.)
4. February, 1911. A study of cattle. (Numbered v. 12, No. 4. Rural education series.)
(Continued in the extension series of the University of Missouri bulletins.)

SCIENCE SERIES

Published irregularly

Edited by George Lefevre

The science series of the bulletin is devoted to the publication of short original papers, preliminary announcements of results of research, and of articles of a general or popular character which are of sufficient interest and importance to warrant their publication.

Copies may be obtained from the librarian.

VOLUME 1

Non-technical lectures on the sciences, by members of the faculty of the University of Missouri.

1. The unity of science by Arthur O. Lovejoy, formerly professor of philosophy. 34 p. 1912. 30 cents.
2. Mathematics, by Earle R. Hedrick, professor of mathematics. 19 p. 1912. 25 cents.
3. Physics, by Oscar Milton Stewart, professor of physics. 22 p. 1912. 25 cents.
4. Chemistry, by William George Brown, professor of industrial chemistry. 26 p. 1912. 25 cents.
5. Astronomy, by Herbert Meredith Reese, assistant professor of physics. 17 p. 1913. 25 cents.
6. Geology, by Curtis Fletcher Marbut. 1913.
7. Botany, by C. Stuart Gager. 1913.
8. Experimental zoology, by Winterton Conway Curtis.
9. Evolutional zoology, by George Lefevre. May, 1914.

VOLUME 2

1. The implantation of the glochidium on the fish, by Daisy Young, assistant in zoology. 22 p. plates 3. 1911. 50 cents. Out of print.
2. Notes on the Ohio shales and their faunas, by E. B. Branson, professor of geology. 16 p. plates 3. 1911. 50 cents.

3. The blonde race and the Aryan culture, by Thorstein B. Veblen. 19 p. 1913. 25 cents.
4. The Devonian fishes of Missouri by E. B. Branson. 1914. 25 cents.

SOCIAL SCIENCE SERIES

Published irregularly

Edited by Norman Maclaren Trenholme

The social science series of the bulletin aims to provide for the publication of brief studies or accounts of political, social, economic or historical character which will be of interest and value to the people of the state.

VOLUME 1

1. The loan office experiment in Missouri, 1821-1836 by Albert J. McCulloch. 13 p. 1914. 25 cents.
2. The Monroe Doctrine—its origin, development, and recent interpretation, by Frank Fletcher Stephens. 26 p. 1916.
3. The social survey, its history and methods, by Carl C. Taylor, associate professor of sociology. 91 p. 1919.

THE PUBLICATIONS OF THE COLLEGE OF AGRICULTURE AND OF THE AGRICULTURAL EXPERIMENT STATION.

Edited by A. A. Jeffrey

The agricultural experiment station issues the following three series of publications: 1, Research bulletin; 2, Bulletins; 3, Circulars of information.

Research bulletins—The results of fundamental research are published in small editions and distributed among investigators and public libraries. These bulletins, five of which have already been issued, are not intended for distribution among farmers.

Bulletins—These bulletins are intended to include the results of original research, but differ from the research bulletins in that the results are primarily of interest to farmers. All of the large editions of the bulletins are widely distributed among the farmers of the state. Bulletins of this series are also sent to libraries and investigators at other agricultural experiment stations. One hundred and fifteen numbers have been published.

Circulars of information—These publications do not necessarily include the results of original investigation carried on by the experiment station, but are intended to be a means of distributing to the farmers of the state valuable information on important agricultural subjects. Sixty-six circulars have already been issued.

All publications of the experiment station available for distribution are starred.

Address Director of the agricultural experiment station for copies.

MISSOURI STATE AGRICULTURAL COLLEGE FARM BULLETINS

(These bulletins are out of print.)

There were twenty bulletins issued under the title, "Missouri state agricultural college farm bulletins." Numbers 1-8 were published in the "annual catalogue of the Missouri University at Columbia, Missouri, 1883-1884." Numbers 9-14 were published in the catalogue for 1884-1885; and numbers 15-19 in the catalogue for 1885-1886. The following bulletins were issued in separate pamphlet form: Nos. 1-8, 10-12, 14, 16, 18-21, 23-25, 29-34. Number 21 was issued only in pamphlet.

Bulletins 21-35 were issued under the title: "Missouri state agri-

cultural college bulletin"; numbers 19-20, and 22-27 were published in the annual report of the state board of agriculture for 1886-1887; numbers 28-30 in the report for 1887-1888; and 31-35 in the report for 1888-1889. Numbers 9-12, 14, 21, and 28-33 were also issued separately. Bulletin 35 is also bulletin number 2 of the agricultural experiment station. Numbers 15, 16, and 24 were also published in the report of the dean of the college of agriculture, 1887.

1. Feeding hogs, by J. W. Sanborn. 1883. 3 p.
2. Feeding steers, by J. W. Sanborn. 1883. 5 p.
3. Report of test of varieties of wheat and corn, by J. W. Sanborn. 1883. 3 p.
4. Mulching, by J. W. Sanborn. 1883. 4 p.
5. Relation of tillage to soil moisture, by J. W. Sanborn. 1883. 3 p.
6. Relation of dew to soil moisture, by J. W. Sanborn. 1883. 5 p.
7. Feeding wheat and corn, by J. W. Sanborn. 1884. 4 p.
8. Meal feeding stock at pasture, by J. W. Sanborn. 1884. 4 p.
9. Grass-fed pigs, by J. W. Sanborn. 1884. 4 p.
10. Pig feeding experiments, by J. W. Sanborn. 1884. 4 p.
11. Corn fodder as stock food, by J. W. Sanborn. 1884. 4 p.
12. Seed potatoes, by J. W. Sanborn. 1884. 4 p.
13. Good roads and broad wheel tires, by J. W. Sanborn. 1884. 7 p.
14. Feeding for lean meat, by J. W. Sanborn. 1885. 6 p.
15. Contagious pleuro-pneumonia, by Paul Paquin. 1885. 5 p.
16. Glanders. Second report of state veterinarian, by Paul Paquin. 1885. 8 p.
17. General observations, by J. W. Sanborn. 1885. 4 p.
18. Sub-soiling, by J. W. Sanborn. 1885. 5 p.
19. Feeding for lean meat, by J. W. Sanborn. 1886. 6 p.
20. Report of investigations and observations in the horticultural department, by L. R. Taft. 1886. 6 p.
21. Plants and their uses, by S. M. Tracy. 1888. Chart.
22. Corn harvesting, by J. W. Sanborn. 1886. 6 p.
23. Relation of dew to soil moisture, by J. W. Sanborn. 1886. 14 p.
24. Report of state veterinary inspector, by Paul Paquin. 1886. 22 p.
25. Data regarding several economic problems in ordinary farm practice, by J. W. Sanborn. 1886. 7 p.
26. Report of trials of varieties of vegetables and fruits, by L. R. Taft. 1887. 7 p.
27. Feeding for flesh, by J. W. Sanborn. 1887. 15 p.
28. Maintenance ration for pigs, by J. W. Sanborn. 1887. 25 p.
29. Rotation of crops, by J. W. Sanborn. 1887. 10 p.
30. Fertilization, by J. W. Sanborn. 1887. 14 p.
31. Texas fever and other diseases, by Paul Paquin. 1888. 15 p.
32. Plows and plowing, by J. W. Sanborn. 1888. 19 p.

33. Glanders, mad itch of cattle, etc., by Paul Paquin. 1888. 15 p.
34. Experimental farming, by J. W. Sanborn. 1888. 10 p.
35. Grasses for pastures and for meadows, by J. W. Sanborn. 1888. 9 p.

AGRICULTURAL EXPERIMENT STATION BULLETINS

The following number of bulletins are out of print: 1-101, 103-106. An index has been issued for bulletins 1 to 104. Future volumes will be indexed as published. An index will be issued with the completion of each volume of the Research bulletins.

1. Announcement to farmers, the so-called "Hatch bill"; assent of governor; plan of organization; work and experiments proposed this season; personnel of station, by P. Schweitzer. 1888.
2. Grasses for pastures and for meadows, by J. W. Sanborn. 1888
3. Generalities and experiments in spraying cattle. Appendix on glanders, by Paul Paquin.
4. A list of tillage implements, by J. W. Sanborn. 1888.
5. Soil, weather, field trials with corn, by P. Schweitzer. 1889.
6. Experiments on seed germination, pea weevil and apples, by J. W. Clark.
7. Experiments on green versus dry storage of fodder, by J. W. Sanborn.
8. Experiments on feeding ensilage against dry fodder, by J. W. Sanborn.
9. Study of the life history of corn at its different periods of growth, by P. Schweitzer. 1889.
10. Analysis of apples at various stages of growth. Bordeaux mixture for grape rot. Comparative tests of small fruits and potatoes. By J. W. Clark. 1890.
11. Texas fever, by Paul Paquin. 1890.
12. Black leg, by Paul Paquin. 1890.
13. Reports on spraying for the codling moth, apple scab and black rot of the grape. Reports on strawberries, raspberries, blackberries, tomatoes, peas and potatoes. List of new fruits received for testing. By J. W. Clark. 1891.
14. Field experiments with corn, by H. J. Waters. 1891.
15. Wheat—test of varieties, 1889, 1891. Oats—test of varieties, 1889, 1891. Change of seed—wheat, oats and potatoes, by H. J. Waters. 1891.
16. Covering peach trees to protect the fruit buds. Spread of pear blight, temperature and rain tables, strawberry tests, potato trials, seedling fruits. By J. W. Clark. 1891.
17. Sugar beets, by Chas. Fox. 1892.
18. Strawberries, by Chas. Keffer. 1892.

19. Soils and fertilizers. Part 1. By Paul Schweitzer. 1892.
20. Soils and fertilizers. Part 2. By Paul Schweitzer. 1893.
21. Field experiments with wheat, by C. M. Conner. 1893.
22. Seedling strawberries, by Chas. Keffer. 1893.
23. Grape culture, by Chas. Keffer. 1893.
24. Comparative tests of different breeds of beef cattle, by P. Schweitzer. 1894.
25. An inquiry into the composition of the flesh of cattle, by P. Schweitzer. 1894.
26. Dairy management, by A. M. Soule. 1894.
27. Spraying apple trees for destruction of insects, and prevention of fungous diseases, by Chas. Keffer. 1894.
28. Feeding tests with different breeds of dairy cattle, by P. Schweitzer. 1895.
29. Feeding wheat to pigs, by P. Schweitzer. 1895.
30. Spray calendar, by E. G. Lodeman. 1895.
31. Spraying orchards and vineyards, by J. C. Whitten. 1895.
32. Field experiments with corn, by H. J. Waters and C. M. Conner. 1895.
33. Inquiry into the principles of potato growing and tests of varieties, by P. Schweitzer. 1896.
34. Manures and fertilizers, by H. J. Waters. 1896.
35. The Woolly-Aphis of the apple, by J. M. Stedman. 1896.
36. The lesser apple leaf folder. The leaf crumpler. By J. M. Stedman. 1896.
37. Texas fever, by John W. Connaway. 1897.
38. Winter protection of the peach. Peach growing in Missouri. By J. C. Whitten. 1897.
39. Influence of width of tire on draft of wagons, by H. J. Waters. 1887.
40. Sugar beet, by H. J. Waters. 1897.
41. San Jose scale in Missouri, by J. M. Stedman. 1898.
42. A new orchard pest: the fringed-wing apple-bud moth, by J. M. Stedman. 1898.
43. Winter forcing of asparagus in the open field. Asparagus culture for Missouri. By J. C. Whitten. 1898.
44. The fruit tree bark beetle. The common apple tree and peach tree borers. By J. M. Stedman. 1898.
45. The sugar beet, by H. J. Waters. 1899.
46. Grapes: 1. The study of types and varieties. 2. The study of the pollination of cultivated grapes. 3. Methods pursued by practical growers. By J. C. Whitten. 1899.
47. The tarnished plant bug, by J. M. Stedman. 1899.
48. Texas fever, by J. W. Connaway and M. Francis. 1899.

49. Apple orchard, by J. C. Whitten. 1900.
50. Test of spray nozzles, by N. O. Booth. 1900.
51. The chinch bug, by J. M. Stedman. 1902.
52. Influence of height of wheel on the draft of farm wagons, by T. I. Mairs. 1901.
53. Breeding experiments with sheep: 1. Some factors influencing the weight of lambs at birth. 2. Milk and food records of ewes. By Frederick B. Mumford. 1901.
54. The strawberry false-worm. The strawberry leaf-roller. By J. M. Stedman. 1901.
55. Pruning peach trees, by J. C. Whitten. 1902.
56. Dairy husbandry, by C. H. Eckles. 1902.
57. Raising calves with skim milk, by C. H. Eckles. 1902.
58. Feeding the dairy cow, by C. H. Eckles. 1902.
59. Corn improvement for Missouri, by Geo. M. Tucker. 1902.
60. A new bordeaux powder, by R. M. Bird. 1903.
61. Apple growing in Missouri, by J. C. Whitten. 1903.
62. Hessian fly in Missouri, by J. M. Stedman. 1903.
63. Commercial fertilizers, by F. B. Mumford. 1904.
64. The "sting" in the apple, by J. M. Stedman. 1904.
65. Grain rations for dry lot hog feeding, by E. B. Forbes. 1905.
66. Analysis of commercial fertilizers, by P. Schweitzer and R. M. Bird. 1904.
67. Supplements to corn for fattening hogs, by E. B. Forbes. 1905.
68. Department of dairy husbandry, by C. H. Eckles. 1905.
 1. A test of tin can separators.
 2. A test of a fly repellent.
69. Three fungous diseases of the cultivated ginseng, by Howard S. Reed. 1905.
70. Analysis of commercial fertilizers, by P. Schweitzer and R. M. Bird. 1905.
71. Fruit tree leaf-roller, by J. M. Stedman. 1906.
72. Alfalfa growing in Missouri, by M. F. Miller. 1906.
73. Cowpeas, by A. E. Grantham. 1906.
74. Winter killing of peach buds as influenced by previous treatment, by W. H. Chandler. 1907.
75. Wintering yearling cattle, by H. J. Waters. 1907.
76. Fattening cattle for the market, by H. J. Waters. 1907.
77. Inspection of commercial fertilizers, by H. J. Waters. 1907.
78. Inspection of commercial fertilizers, by P. F. Trowbridge. 1908.
79. Green forage for hogs, by H. J. Waters. 1908.
80. Inspection of commercial fertilizers, by P. F. Trowbridge. 1908.
81. Specific effects of rations on the development of swine, by P. Schweitzer. 1909.

82. Inspection of commercial fertilizers, by P. F. Trowbridge. 1908.
83. Soil experiments on the upland loam of southeast Missouri by M. F. Miller and C. B. Hutchison. 1910. 16 p.
84. Soil experiments on the prairie silt loam of southwest Missouri, by M. F. Miller and C. B. Hutchison. 1910. 19 p.
85. Inspection of commercial fertilizers, by P. F. Trowbridge. 1910. 36 p.
86. Soil experiments on the rolling limestone upland of southwest Missouri, by M. F. Miller and C. B. Hutchison. 1910. 23 p.
87. Co-operative variety tests of corn. Variety tests of corn at Columbia, by M. F. Miller and H. D. Hughes. 1910. 64 p.
88. Soil management in the Ozark region, by M. F. Miller. 1910. 33 p.
89. Forest conditions of the Ozark region of Missouri, by Samuel J. Record. 1910. 89 p.
90. Fattening cattle on blue grass pasture, by F. B. Mumford. 1911. 108 p.
91. Inspection of commercial fertilizers, by P. F. Trowbridge, L. D. Haigh, C. R. Moulton, et al. 1911. 60 p.
92. Soils of Sullivan county, by R. C. Doneghue, H. H. Krusekopf, M. M. McCool and H. P. Rusk. 1911. 38 p.
93. Soils of Audrain county, by R. C. Doneghue and B. W. Tillman of the Missouri Agricultural Experiment Station. 1911. 28 p.
94. Factors affecting the per cent of fat in cream from farm separators, by C. H. Eckles and H. S. Wayman. 1911. 46 p.
95. Pork production with forage crops, clover, alfalfa, rape, corn, rye, grain, cowpeas, soybeans, sorghum, by F. B. Mumford and C. A. Willson. 1911. 40 p.
96. Report of the director for the year ending June 30, 1910, by F. B. Mumford. 1911. 26 p.
97. Co-operation among fruit growers, by W. H. Chandler. 1911. 58 p.
98. San Jose scale in Missouri, by Leonard Haseman. 1912. 58 p.
99. Inspection of commercial fertilizers, by P. F. Trowbridge, L. D. Haigh, C. R. Moulton, A. G. Hogan, L. E. Morgan, E. E. Vanatta, and D. M. Nelson. 1912. 66 p.
100. Influence of fatness of cow at parturition on per cent of fat in milk, by C. H. Eckles. 1912. 22 p.
101. Report of the director for the year ending June 30, 1911, by F. B. Mumford. 1912. 32 p.
102. Combating orchard and garden enemies, by W. H. Chandler 1912. 54 p.
103. Silo for Missouri farmers, by C. H. Eckles. 1912. 18 p.
104. Evergreen bagworm, by Leonard Haseman. 1912. 22 p.

105. Partial bibliography and index of the publications of the college of agriculture and the agricultural experiment station, by H. O. Severance. 1912. 20 p.
106. Co-operative experiments with alfalfa, by M. F. Miller and C. B. Hutchison. 1912. 36 p.
107. Farm poultry house construction, by H. L. Kempster. 1912. 34 p.
108. Grass investigations in the Ozark upland (first report), by M. F. Miller and C. B. Hutchison. 1913. 48 p.
109. Inspection of commercial fertilizers, by F. B. Mumford, director, and P. F. Trowbridge, chemist. 1913. 40 p.
110. Forage crop rotation for pork production, by F. B. Mumford and L. A. Weaver. 1913. 30 p.
111. Report of the director for the year ending June 30, 1912, by F. B. Mumford. 1913. 48 p.
112. Corn silage for fattening two-year old steers, by H. O. Allison. 1913. 20 p.
113. Commercial fertilizers for strawberries, by W. H. Chandler. 1913. 30 p.
114. Corn vs. oats for work mules, by E. A. Trowbridge. 1913. 20 p.
115. Rations for fattening western yearling sheep, by F. B. Mumford, E. A. Trowbridge and H. Hackedorn. 1913. 20 p.
116. Inspection of commercial fertilizers, for the year 1913, by P. F. Trowbridge. 1914. 54 p.
117. Report of the director for the year ending June 30, 1913, by F. B. Mumford. 1914. 44 p.
118. Drainage investigations on the northeast Missouri prairie (first report), by M. F. Miller, C. B. Hutchison, T. R. Douglass and R. R. Hudelson. 1914. 54 p.
119. Soil investigations—Jasper county experiment field, by M. F. Miller, R. R. Hudelson. 1914. 30 p.
120. Rations for breeding ewes, by Howard Hackedorn. 1914. 23 p.
121. Land tenure, by O. R. Johnson and W. E. Foard. 110 p. 1914.
122. Inspection of commercial fertilizer for the year 1914, by P. F. Trowbridge. 1915. 59 p.
123. Experiments with farm crops in southwest Missouri, by C. B. Hutchison, T. R. Douglass. 1915. 24 p.
124. Profits from spraying twenty-five Missouri orchards in 1914, by W. L. Howard. 1915. 100 p.
125. The cost of production on Missouri farms, by O. R. Johnson. W. E. Foard. 1915. 30 p.
126. Soil experiments on the dark prairies of central and northeast Missouri, by M. F. Miller, C. B. Hutchison, R. R. Hudelson. 1915. 31 p.

127. Soil experiments on the dark prairies of central and northeast Missouri, by M. F. Miller, C. B. Hutchison and R. R. Hudelson. 1915. 31 p.
128. Soil experiments on the rolling glacial land of southwest Missouri, by M. F. Miller, C. B. Hutchison, R. R. Hudelson. 1915. 19 p.
129. Soil experiments on the red limestone upland of southwest Missouri, M. F. Miller, C. B. Hutchison and R. R. Hudelson. 1915. 19 p.
130. Soil experiments on the gray prairies of southwest Missouri, (second report), by M. F. Miller, C. B. Hutchison, R. R. Hudelson. 1915. 22 p.
131. Work and progress of the agricultural experiment station for the year ending June 30, 1914, by F. B. Mumford. 1915. 69 p.
132. Control of the San Jose scale in Missouri, by L. Haseman. 1915. 9 p.
133. Silo and its use, by C. H. Eckles. 1915. 19 p.
134. Insect pests of field crops, by L. Haseman. 1915. 19 p.
135. Ration and age of calving as factors influencing the growth and dairy qualities of cows, by C. H. Eckles. 1915. 91 p.
136. Feeding wheat to fattening swine, by L. A. Weaver. 1915. 35 p.
137. Periodical cicada in Missouri, by L. Haseman. 1915. 33 p.
138. Farm beekeeping, by E. E. Tyler and L. Haseman. 1915. 40 p.
139. Inspection of commercial fertilizer 1915, by P. F. Trowbridge. 1916. 58 p.
140. Size of farm business, by O. R. Johnson and W. E. Foard. 1916. 40 p.
141. Work and progress of the agricultural experiment station for the year ended June 30, 1915, by F. B. Mumford. 1916. 56 p.
142. Successful farm organization, by O. R. Johnson. 1916. 26 p.
143. Variety tests of corn, by C. B. Hutchison, A. R. Evans, J. C. Hackleman, E. M. McDonald. 1916. 56 p.
144. Self feeders for fattening swine, by L. A. Weaver. 1917. 22 p.
145. Inspection of commercial fertilizers 1916, by P. F. Trowbridge. 1917. 41 p.
146. Agricultural lime, M. F. Miller and H. H. Krusekopf. 1917. 25 p.
147. Work and progress of the agricultural experiment station for year ending June 30, 1916, by F. B. Mumford. 1917. 64 p.
148. Soil experiment on the Ozark upland, by M. F. Miller, F. L. Duley. 1917. 28 p.
149. Preparation of corn for fattening steers, by H. O. Allison. 1917. 35 p.
150. Corn silage in rations for fattening steers, by H. O. Allison. 1917. 24 p.

151. How the station works, by F. B. Mumford. 1917. 24 p.
152. Cost of horse labor on the farm, by O. R. Johnson and R. M. Greene. 1918. 32 p.
153. Soils of Missouri, by M. F. Miller and H. H. Krusekopf. 1918. 130 p.
154. Inspection of commercial fertilizers 1917, by P. F. Trowbridge. 1918. 44 p.
155. Meat scraps and sour milk for egg production, by H. L. Kemperster and G. W. Hervey. 1918. 16 p.
156. Milk production costs and milk prices, by R. M. Greene, D. C. Wood, and A. C. Ragsdale. 1918. 36 p.
157. Fertilizer trials—Wentzville experiment field, by M. F. Miller and F. L. Duley. 1918. 23 p.
158. Winter rations for dairy heifers, by C. H. Eckles. 1918. 54 p.
159. Profits from milk cows on general corn belt farms, by O. R. Johnson and R. M. Greene. 1918. 20 p.
160. Inspection of commercial fertilizers 1918, by F. B. Mumford and L. D. Haigh. 1919. 31 p.
161. Combining dormant and first summer spray in apple orchards infested by San Jose scale, by T. J. Talbert. 1919. 15 p.
162. Legumes, Sudan grass, and cereal crops for silage, by C. H. Eckles. 1919. 25 p.
163. Work and progress of the agricultural experiment station 1917-1918, by F. B. Mumford. 1919. 78 p.
164. Capacity of silos and weight of silage, by C. H. Eckles, O. E. Reed and J. B. Fitch. 1919. 24 p.
165. Cost of producing some Missouri farm crops, by O. R. Johnson and R. M. Greene. 1919. 26 p.
166. Handling farm manure, by F. L. Duley. 1919. 29 p.
167. Renting land, by O. R. Johnson and R. M. Greene. 1920. 52 p.
168. Inspection of commercial fertilizers 1919, by F. B. Mumford and L. D. Haigh. 1920. 55 p.
169. Profitable tomato fertilizers, by J. T. Rosa, Jr. 1920. 12 p.
170. Insect pests of field crops, by L. Haseman. 1920. 39 p.
171. Agricultural lime, by M. F. Miller and H. H. Krusekopf. 1920. 24 p.
172. Work and progress of the experiment station 1918-19, by F. B. Mumford. 1920. 48 p.
173. Ashland community survey, by Carl C. Taylor and E. W. Lehman. 1920. 16 p.
174. Hog cholera and immature corn, by J. W. Connaway. 1920. 20 p.
175. Influence of capital on farm organizations, by O. R. Johnson and R. M. Greene. 1920. 20 p.
176. Nursery and orchard insect pests, by L. Haseman. 1920. 35 p.

177. Investigation of the dipping and fumigation of nursery stock, by K. C. Sullivan. 1920. 36 p.
178. Testing fertilizers for Missouri farmers, by F. B. Mumford and L. D. Haigh. 1920. 72 p.

RESEARCH BULLETINS

1. An experimental study of the rest period in plants, by W. L. Howard. 1910. 105 p.
2. A study of the cause of wide variation in milk production by dairy cows, by C. H. Eckles and O. E. Reed. 1910. 147 p.
3. Soils of the Ozark region, by C. F. Marbut. 1910. 124 p.
4. Digestion trial with two Jersey cows on full ration and on maintenance, by C. H. Eckles. 1911. 22 p.
5. Maintenance trials with five Jersey cows, by C. H. Eckles. 1911. 48 p.
6. Distribution of farm labor, by O. R. Johnson. 1913. 88 p.
7. Nutrients required for milk production, by C. H. Eckles. 1913. 140 p.
8. Killing of plant tissue by low temperatures, by W. H. Chandler. 1913. 169 p.
9. Carotin—The principal natural yellow pigment of milk fat—Part 1, by C. H. Eckles and L. S. Palmer. 1914. 26 p.
10. Carotin—The principal natural yellow pigment of milk fat—II, by C. H. Eckles and L. S. Palmer. 1914. 52 p.
11. Carotin—Part III, by C. H. Eckles and L. S. Palmer. 1914. 24 p.
12. Carotin—etc. Part IV, by C. H. Eckles and L. S. Palmer. 1914. 40 p.
13. Lactochrome—The yellow pigment of milk whey, by L. S. Palmer and L. H. Cooledge. 1914. 36 p.
14. Sap studies with horticultural plants, by W. H. Chandler. 1914. 66 p.
15. Experimental study of the rest period in plants, by W. L. Howard. 1915. 27 p.
16. Experimental study of the rest period in plants, by W. L. Howard. 1915. 27 p.
17. Experimental study of the rest period in plants, by W. L. Howard. 1915. 58 p.

18. Maintenance requirement of cattle, by P. F. Trowbridge, C. R. Moulton and L. D. Haigh. 1915. 62 p.
19. Studies of the timothy plant, by H. J. Waters. 1915. 68 p.
20. Studies of the timothy plant. Part II. By P. F. Trowbridge, L. D. Haigh and C. R. Moulton. 1915. 67 p.
21. Experimental study of the rest period in plants, 5th report, by W. L. Howard. 72 p.
22. Silage investigations, by C. H. Eckles, O. I. Oshel and D. M. Magruder. 1916. 32 p.
23. Powdery mildews of *Avena* and *Triticum*, by George M. Reed. 1916. 19 p.
24. Influence of plane of nutrition of the cow upon the composition and properties of milk and butter fat, by C. H. Eckles and L. S. Palmer. 1916. 39 p.
25. Influence of plane of nutrition of the cow upon the composition and properties of milk and butter fat, by C. H. Eckles and L. S. Palmer. 1916. 107 p.
26. Nutrients required to develop the bovine fetus, by C. H. Eckles. 1916. 36 p.
27. Effect of feeding cottonseed products on the composition and properties of butter, by C. H. Eckles and L. S. Palmer. 1916. 44 p.
28. Effect of limited food on growth of beef animals, by P. F. Trowbridge, L. D. Haigh and C. R. Moulton. 1918. 129 p.
29. Tarnished plant-bug and its injury to nursery stock, by Leonard Haseman. 1918. 26 p.
30. Composition of the beef animals and energy cost of fattening, by L. D. Haigh, C. R. Moulton and P. F. Trowbridge. 1919. 106 p.
31. Some factors influencing the growth of dairy heifers, by C. H. Eckles and W. W. Swett. 1918. 56 p.
32. Some factors favoring or opposing fruitfulness in apples, by C. C. Wiggins. 1918. 60 p.
33. Investigation in transplanting, by J. C. Whitten. 1919. 73 p.
34. Preservation of milk for chemical analysis, by L. S. Palmer. 1919. 31 p.
35. Study of the birth weight of calves, by C. H. Eckles. 1919. 11 p.
36. Normal growth of dairy cattle, by C. H. Eckles. 1920. 20 p.
37. Varietal resistance and susceptibility of oats to powdery mildew, crown rust and smuts, by George M. Reed. 1920. 41 p.
38. Composition of bovine at birth, by L. D. Haigh, C. R. Moulton and P. F. Trowbridge. 1920. 48 p.
39. Bud selection with special reference to the apple and strawberry, by V. R. Gardner. 1920. 30 p.

40. Seasonal changes in the chemical composition of apple spurs, by H. D. Hooker, Jr. 1920. 51 p.

EXTENSION CIRCULARS

1. Cooking of vegetables, by Louise Stanley. 1915. 8 p.
2. Hairy vetch for Missouri, by C. B. Hutchison. 1915. 4 p.
3. Growing rape for forage, by C. B. Hutchison. 1915. 4 p.
4. Controlling the chinch bug, by L. Haseman. 1915. 4 p.
5. Filling the silo, by J. G. Watson. 1915. 4 p.
6. Growing alfalfa in Missouri, by L. F. Childers. 1915. 14 p.
7. Farm garden, by J. S. Gardner. 1916. 7 p.
8. Judging of chickens, by H. L. Kempster. 1916. 24 p.
9. Canning in glass by cold pack method, by Bab Bell and Addie Root. 1916. 12 p.
10. Cold school lunch, by Bab Bell. 1916. 8 p.
11. Making light bread, by Addie D. Root. 1916. 11 p.
12. Farm kitchen, by Carrie L. Pancoast. 1916. 36 p.
13. Treatment of common parasites affecting farm animal, by L. S. Backus. 1917. 11 p.
14. Soil saving dam, by W. H. Baker. 1917. 4 p.
15. Control of some of the important garden and truck crop insects, by T. J. Talbert. 1917. 24 p.
16. House fly and its control, by L. Haseman. 1917. 11 p.
17. Control of hog cholera, by Dr. J. S. McDaniel. 1917. 8 p.
18. Exhibits and contests for boys' and girls' clubs, by R. H. Emberson. 1917. 20 p.
19. Homemakers' club, by Bab Bell. 1917. 4 p.
20. Way to grow soybeans, by W. C. Etheridge. 1917. 4 p.
21. Time of planting vegetables, by J. C. Whitten. 1917. 4 p.
22. Way to grow and use sudan grass, by W. C. Etheridge. 1917. 4 p.
23. Drying fruits and vegetables, by Addie D. Root. 1917. 4 p.
24. Crops for overflowed lands, by J. C. Hackleman. 1917. 4 p.
25. War breads, by Wenona Windsor. 1917. 4 p.
26. Story of a backyard flock, by H. L. Kempster. 1917. 4 p.
27. Work of Farmers' Exchange, by O. R. Johnson. 1917. 8 p.
28. Fertilizer for wheat, by R. R. Hudelson. 1917. 4 p.
29. Growing wheat in Missouri, by C. A. Helm. 1917. 4 p.
30. Farm cheesemaking, by L. G. Rinkle. 1917. 4 p.
31. Farming on a war basis, by O. R. Johnson. 1917. 20 p.
32. Silos and silage, S. T. Simpson. 1917. 8 p.
33. Community livestock breeding, by S. T. Simpson. 1917. 4 p.
34. Tile drainage, by E. W. Lehmann and F. C. Fenton. 1917. 16 p.

35. Pickles and relishes, by Carrie L. Pancoast. 1917. 4 p.
36. Sweet clover, by C. A. Helm. 1917. 8 p.
37. Hogging down corn, by L. A. Weaver. 1917. 4 p.
38. Farm buildings for Missouri, by F. C. Fenton. 1917. 8 p.
39. Farm lighting system, by E. W. Lehmann. 1917. 12 p.
40. Emergency agricultural agent, by P. H. Ross. 1917. 4 p.
41. Principles of sewing, by Mary E. Robinson. 1917. 28 p.
42. Hog butchering and pork curing, by P. F. Trowbridge. 1917. 16 p.
43. Profitable dairy herds thru cow testing, by A. C. Ragsdale. 1918. 20 p.
44. How to select and store household linens, by Mary E. Robinson. 1918. 4 p.
45. How to cook soybeans and cowpeas, by Wenona Windsor. 1918. 4 p.
46. How to save fats, by Bab Bell. 1918. 4 p.
47. How to save sugar, by Mary E. Robinson. 1918. 4 p.
48. How to test seed corn, by J. C. Hackleman. 1918. 16 p.
49. Water systems for farm homes, by F. C. Fenton. 1918. 16 p.
50. Cottage cheesemaking, by L. G. Rinkle. 1918. 4 p.
51. Selection and management of the dairy bull, by C. H. Eckles. 1918. 4 p.
52. Canning by the one-period cold pack method, by Addie D. Root. 1918. 14 p.
53. Storing vegetables, by J. T. Rosa, Jr. 1918. 8 p.
54. Prevent insect damage, by C. C. Hamilton. 1918. 4 p.
55. Winter's feed supply, by S. T. Simpson. 1918. 4 p.
56. Fattening lambs on forage, by H. Hackedorn and W. C. Etheridge. 1918. 7 p.
57. Making simple wash dresses and middy blouses, by Addie D. Root. 1919. 11 p.
58. Grain judging for boys' and girls' clubs, by George W. Reavis. 1919. 12 p.
59. Winter eggs for Missouri, by T. S. Townsley. 1918. 4 p.
60. Handling the alfalfa crop, by J. C. Hackleman. 1918. 4 p.
61. Liming for clover, by B. W. Tillman. 1918. 4 p.
62. Handling barnyard manure, by F. L. Duley. 1918. 4 p.
63. Purebred livestock and the average farm, by E. A. Trowbridge. 1918. 4 p.
64. Potato culture for Missouri, by J. T. Rosa, Jr. 1919. 16 p.
65. Planting a backyard orchard, by J. C. Whitten. 1919. 4 p.
66. Management of bluegrass pastures, by W. C. Etheridge. 1919. 7 p.
67. Keep sheep for profit, by D. A. Spencer. 1919. 8 p.

68. Country roads, by E. J. McCaustland. 1919. 8 p.
69. Farm buildings for Missouri, by F. A. Meckel. 1919. 10 p.
70. How to cull farm hens, by T. S. Townsley. 1919. 14 p.
71. Sewage disposal for farm homes, by Frank A. Meckel. 1919. 4 p.
72. How to breed good layers, by T. S. Townsley. 1920. 4 p.
73. Feeding the baby, by Anna C. Jenson. 1920. 8 p.
74. Missouri colony breeder house, by T. S. Townsley. 1920. 4 p.
75. Way to grow soybeans, by W. C. Etheridge. 1920. 4 p.
76. Cooperative wool marketing, by D. A. Spencer. 1920. 15 p.
77. Raising pigs, by F. L. Wright. 1920. 11 p.
78. Saving the summer eggs, by T. S. Townsley. 1920. 4 p.
79. Colds—their cause and treatment, by Mrs. L. Selbert. 1920. 4 p.
80. Hessian fly and its control, by L. Haseman. 1920. 4 p.
81. Raising calves, by W. F. Etz and L. B. Mann. 1920. 4 p.
82. How to pad a dress form, by Mary E. Robinson. 1920. 4 p.
83. Economical selection of textiles and clothing, by Mary E. Robinson. 1920. 4 p.
84. Profits from farm poultry flocks in Missouri for 1919, by T. S. Townsley. 1920. 4 p.
85. White diarrhea in chickens, by A. J. Durant. 1920. 4 p.
86. Paralysis of hind quarter in swine, by J. W. Connaway. 1920. 4 p.
87. Stomach worms in sheep, by J. W. Connaway. 1920. 7 p.
88. Pickling fruits and vegetables, by Essie M. Heyle. 1920. 4 p.
89. Sewing processes, by Mary E. Robinson. 1920. 22 p.
90. Garment making club, by Addie D. Root. 1920. 7 p.
91. Cooperative elevator association, by Ralph Loomis. 1920. 11 p.
92. Cooperative spraying demonstrations, by T. J. Talbert. 1920. 32 p.
93. Selected apple recipes, by Essie M. Heyle. 1920. 4 p.
94. How the college of agriculture serves Missouri farmers thru the agricultural extension service, by P. H. Ross. 1920. 4 p.
95. Modern rural home in Missouri, by Essie M. Heyle. 1920. 6 p.

BULLETINS OF THE MISSOURI SCHOOL OF MINES

GENERAL SERIES

Vol. 1, No. 1, Dec., 1908. The human side of a mining engineer's life, by Edmund B. Kirby. (Commencement address, June 10, 1908.)

Vol. 1, No. 2, March, 1909. 38th annual catalogue, 1908-1909.

Vol. 1, No. 3, June, 1909. Education for utility and culture, by Calvin M. Woodward. (Tau Beta Pi address.)

Vol. 1, No. 4, Sept., 1909. The history and the development of the cyanide process, by Horace Tharp Mann.

Vol. 2, No. 1, Dec., 1909. The Jackling field, school of mines and metallurgy.

Vol. 2, No. 2, March, 1910. 39th annual catalogue, 1909-1910. Out of print.

Vol. 2, No. 3, June, 1910. Some of the essentials of success, by Charles Summer Howe. (Commencement address, June 1, 1910.)

Vol. 2, No. 4, Sept., 1910. Friction in small air pipes, by E. G. Harris, Albert Park, and H. K. Peterson. (Continued by technical series, vol. 1, nos. 1 and 4.)

Vol. 3, No. 1, Dec., 1910. Some relations between the composition of a mineral and its physical properties, by G. H. Cox, and E. P. Murray.

Vol. 3, No. 2, March, 1911. 40th annual catalogue, 1910-1911.

Vol. 3, No. 3, June, 1911. Providing for future generations, by E. R. Buckley. (Tau Beta Pi address, May 24, 1911.)

Vol. 3, No. 4, Sept., 1911. Fall announcement of courses. Out of print.

Vol. 4, No. 1, Dec., 1911. Fortieth anniversary of the school of mines and metallurgy of the University of Missouri. Parker Hall memorial address. Laying of cornerstone of Parker Hall, Rolla, Missouri, October 24, 1911.

Vol. 4, No. 2, March, 1912. 41st annual catalogue, 1911-1912.

Vol. 4, No. 3, June, 1912. Mining and civilization, by J. R. Finlay. (Commencement address, May 31, 1912.)

Vol. 4, No. 4, Sept., 1912. Fall announcement of courses. Out of print.

Vol. 5, No. 1, Dec., 1912. Student life.

Vol. 5, No. 2, March, 1913. 42nd annual catalogue, 1912-1913.

Vol. 5, No. 3, never published.

Vol. 5, No. 4, never published.

Vol. 6, No. 1, never published.

Vol. 6, No. 2, March, 1914. 43rd annual catalogue, 1913-14.

Vol. 6, No. 3, never published.

Vol. 6, No. 4, never published.

Vol. 7, No. 1, Never Published.

Vol. 7, No. 2, March, 1915. 44th Annual Catalogue, 1914-1915.

Vol. 7, No. 3, March, 1915. Description of special courses in oil and gas and allied subjects.

Vol. 7, No. 4, September, 1915. Register of graduates, 1874-1915.

Vol. 8, No. 1, Jan., 1916. Bibliography on concentrating ores by flotation. Jesse Cunningham.

Vol. 8, No. 2, March, 1916. 45th Annual Catalogue, 1915-1916.

Vol. 8, No. 3, June, 1916. The Business of mining. W. R. Ingalls. (Commencement address, May 26, 1916.)

CHECK LIST OF SERIAL PUBLICATIONS

Vol. 8, No. 4, October, 1916. Register of graduates, 1874-191
(*Out of print.*)

Vol. 9, No. 1, Jan., 1917. Road problems in the Ozarks. E. G. Harris. Bibliography on rural roads. H. L. Wheeler.

Vol. 9, No. 2, March, 1917. 46th Annual Catalogue, 1916-191

Vol. 9, No. 3, June, 1917. What should a present-day metall education comprise? Charles Hermann Fulton. (Commenceme dress May 25, 1917.)

Vol. 9, No. 4, October, 1917. Register of graduates, 1874-191 S. M. men in military service.

Vol. 10, No. 1, Jan., 1918. Student life; revised edition.

Vol. 10, No. 2, March, 1918. 74th Annual Catalogue 1917-18

Vol. 10, No. 3, June, 1918. The Human side of mining engin James Furman Kemp. (Commencement address May 24, 1918.)

Vol. 10, No. 4, October, 1918. List of publications wanted Library, and of duplicates available for exchange: April 1, 192

Vol. 11, No. 1, January, 1919. (*Never published.*)

Vol. 11, No. 2, March, 1919. 48th Annual Catalogue 1918-191

Vol. 11, No. 3, June, 1919. Road problems in the Ozarks; 2^d tion, revised and extended. E. G. Harris. Bibliography on rural H. L. Wheeler

Vol. 11, No. 4, October, 1919. Register of graduates, 1874-191

Vol. 12, No. 1, Jan., 1920. War service records of the M School of Mines. Compiled by G. E. Ebmeyer.

Vol. 12, No. 2, March, 1920. 49th Annual Catalogue, 1919-192

Vol. 12, No. 3, June, 1920 (*Delayed.*) Contemporary nove novelists: a list of references. H. L. Wheeler.

Vol. 12, No. 4, Oct., 1920. Department of Vocational Educa

Vol. 13, No. 1, Jan., 1921.

Vol. 13, No. 2, March, 1922. 50th Annual Catalogue, 1920-

TECHNICAL SERIES

Vol. 1, No. 1, November, 1911. Friction in air pipes. E. G. J
(Continuation of General Series, Vol. 2, No. 4.)

Vol. 1, No. 2, February, 1912. Metallurgy and ore dressing i tories of the Missouri School of Mines and Metallurgy. D. Coj H. T. Mann, H. A. Roesler. (*Out of print.*)

Vol. 1, No. 3, May, 1912. Some apparatus and methods for onstrating rock drilling and the loading of drill holes in tunneling. Young.

Vol. 1, No. 4, August, 1912. Friction in air pipes. E. G. J
(Continuation of Vol. 1, No. 1, November, 1911.)

Vol. 2, No. 1, August, 1915. Comparative tests of piston drill bits. C. R. Forbes and L. M. Cummings.

Vol. 2, No. 2, November, 1915. Orifice measurements of air in large quantities. Elmo G. Harris.

Vol. 2, No. 3, February, 1916. Cupellation losses in assaying. Horace T. Mann and Charles Y. Clayton.

Vol. 2, No. 4, May, 1916. Geologic criteria for determining the structural position of sedimentary beds. G. H. Cox and C. L. Dake. (*Out of print.*)

Vol. 3, No. 1, August, 1916. Experiments from the flotation laboratory. C. Y. Clayton. (*Out of print.*)

Vol. 3, No. 2, November, 1916. Studies on the origin of Missouri cherts and zinc ores. G. H. Cox, R. S. Dean, and V. H. Gottschalk.

Vol. 3, No. 3, February, 1917. Preliminary report on blended Portland cement. E. S. McCandliss.

Vol. 3, No. 4, May, 1917. Studies in the production of oils and tars from bituminous materials. J. C. Ingram.

Vol. 4, No. 1, August, 1917. The hydrometallurgy and electrolytic precipitation of zinc. F. D. James.

Vol. 4, No. 2, November, 1917. The effect of addition agents in flotation; Part I. M. H. Thornberry and H. T. Mann.

Vol. 4, No. 3, February, 1918. Bibliography on the roasting, leaching, smelting and electrometallurgy of zinc. H. L. Wheeler.

Vol. 4, No. 4, May, 1918. An investigation of blended Portland cements. E. S. McCandliss and H. H. Armsby.

Vol. 5, No. 1, August, 1919. The carbonization of Missouri cannel coals. H. L. Dunlap, K. K. Kershner, and V. X. Smiley.

Vol. 5, No. 2, Nov., 1919. The effect of addition agents in flotation; Part II. M. H. Thornberry and H. T. Mann.

Vol. 5, No. 3, Feb., 1921. Coal mining methods in Missouri. W. W. Weigel.

GENERAL INDEX OF PUBLICATIONS

Abbreviations used in the index to indicate the series of publications.

Studies

- S = Stud.
 Sm = Stud. Mathematics series
 Ss = Stud. Science series
 Sos = Stud. Social science series
 Sl = Stud. Lit and linguistic series
 Sp = Stud. Phil. and edu. series

Bulletins

General series of the bulletin not indexed.

THE UNIVERSITY OF MISSOURI BULLETIN

VOLUME 22, NUMBER 16

LIBRARY SERIES 11

List of Periodicals Currently Received by the University Library

ISSUED THREE TIMES MONTHLY; ENTERED AS SECOND-CLASS MAT-
TER AT THE POSTOFFICE AT COLUMBIA, MISSOURI—500

MAY, 1921

PREFACE

This list includes periodicals which are being received in 1921. Many of our periodicals ceased publication during the war; of the others, many were gifts which publishers were unable to continue sending owing to the advance in cost of materials and labor. Annual publications and continuations have not been included. The list is intended to facilitate the location of titles in our large and important collection of current periodical literature. The library is receiving approximately 2000 periodicals. The second part of the bulletin contains the list of periodicals currently received in the branch libraries and laboratories.

The following abbreviations are used to denote locations:

Ag.—Agricultural library
B—Biological library
D—Dairy
E—Engineering library
H. E.—Home economics office
J—Journalism library
L—Law library
M—Medical library
O—Observatory

No abbreviations follow titles which are shelved in the General library.

HENRY O. SEVERANCE

April 14, 1921

LIBRARY SERIES

No. 12

CHECK LIST OF THE OFFICIAL SERIAL PUBLICATIONS OF THE UNIVERSITY

Edition 3

ISSUED FOUR TIMES MONTHLY; ENTERED AS SECOND-CLASS MATTER AT
THE POSTOFFICE AT COLUMBIA, MISSOURI—1000

APRIL, 21, 1926

PREFACE

The purpose of the third edition of this check list is to make available the valuable material being published by the University and to record in permanent form the serial publications of the University up to and including 1925.

A new feature of the second check list was the general index of subjects and authors appearing in the publication. This has been retained in the third edition. The publications have now become so numerous, that an index will prove very helpful in locating bulletins, circulars, studies, and the like.

The general series of the bulletins have not been indexed. This series is devoted to announcements of the courses in the several colleges and schools and contains nothing of a scientific or learned nature. The catalogs of the University have been published as bulletins since 1900.

Unless otherwise stated, copies of the various publications in print may be secured by addressing the librarian of the University.

HENRY ORMAL SEVERANCE.

THE UNIVERSITY OF MISSOURI STUDIES

The Studies are devoted to the publication of extensive papers embodying the results of original research made by members of the faculty and by graduate students. No paper that has appeared elsewhere will be accepted for publication in the Studies.

After the publication of two volumes of miscellaneous papers, the Studies were differentiated into series, of which the following are now being issued: 1, social science series; 2, science series; 3, literary and linguistic series; 4, philosophy and education series; 5, mathematics series. Continued, January 1, 1926 as the University of Missouri Studies: A Quarterly of Research.

Frank Thilly editor 1901-1904

William G. Brown editor 1905-1912

George Lefevre editor 1913-1923

VOLUME 1—*Out of Print*

1. Contributions to a psychological theory of music, by Max Meyer, Ph. D., professor of experimental psychology. vi, 80 p. 1901. 75 cents.
2. Origin of Covenant Vivien, by Raymond Weeks, Ph. D., professor of romance languages. viii, 64 p. 1902. 75 cents.
3. The evolution of the northern part of the lowlands of southeast Missouri, by C. F. Marbut, A. M., professor of geology. viii, 63 p. 1902. \$1.25.
4. Eileithyia, by Paul V. C. Baur, Ph. D., acting professor of classical archaeology. vi, 90 p. 1902 \$1.00.
5. The right of sanctuary in England, by Norman MacLaren Trenholme, Ph. D., professor of history. viii, 106 p. 1903. 75 cents.

VOLUME 2—*Out of Print*

1. Ithica or Leucas? by William Gwathmey Manly, A.M., Professor of Greek language and literature. vi, 52 p. 1903. \$1.00.
2. Public relief and private charity in England, by Charles A. Ellwood, Ph. D., professor of sociology. viii, 96 p. 1903. 75 cents.
3. The process of inductive inference, by Frank Thilly, Ph. D., professor of philosophy. v, 40 p. 1904. 35 cents.
4. Regeneration of crayfish appendages, by Mary I. Steele, M. A. viii, 47 p. 1904. 75 cents.
5. The spermatogenesis of anax junius, by Caroline McGill. viii, 15 p. 1904. 75 cents.

LITERARY AND LINGUISTIC SERIES

VOLUME 1

Chevalerie Vivien, facsimile phototypes, with an introduction and notes, by Raymond Weeks, Ph. D., formerly professor of romance languages. 12 p. plates 24. 1909. \$1.25.

VOLUME 2

The cyclic relations of the Chanson de Willame, by Theodore Ely Hamilton, A. M., Ph. D. ix, 301 p. 1911. \$1.25.

MATHEMATICAL SERIES**VOLUME 1**

1. On the definition of the sum of a divergent series by Louis Lazarus Silverman, Ph. D. v, 96 p. 1913. \$1.00.

PHILOSOPHY AND EDUCATION SERIES**VOLUME 1**

1. The treatment of personality by Locke, Berkeley and Hume, by Jay William Hudson, Ph. D., assistant professor of philosophy. xvi, 96 p. 1911. 75 cents.

SCIENCE SERIES**VOLUME 1**

1. Topography of the thorax and abdomen, by Peter Potter, M. A., M.D. vii, 142 p. 1905. \$1.75. Out of print.
2. The flora of Columbia and vicinity, by Francis Potter Daniels, Ph. D. x, 319 p. 1907. \$1.25.

VOLUME 2

1. An introduction to the mechanics of the inner ear, by Max Meyer, Ph. D., professor of experimental psychology, viii, 140 p. 1907. \$1.00. Out of print.
2. The flora of Boulder, Colorado, and vicinity, by Francis Potter Daniels, Ph. D. viii, 453 p. 1911. \$1.50.

VOLUME 3

1. Barite deposits of Missouri and geology of the barite district, by William Arthur Tarr, associate professor of geology, University of Missouri. xii, 111 p. 10 pl. 1918. \$1.25.

SOCIAL SCIENCE SERIES**VOLUME 1**

- The clothing industry in New York, by Jesse F. Pope, Ph. D., professor of economics and finance. xviii, 340 p. 1905. \$1.25.

VOLUME 2

1. The social function of religious belief by William Wilson Elwang, Ph. D. viii, 100 p. 1908. \$1.00.
2. The origin and early development of the English universities to the close of the thirteenth century, by Earnest Vancourt Vaughn, A.M., instructor in history. viii, 147 p. 1908. \$1.00.
3. The origin of the werewolf superstition, by Caroline Taylor Stewart, A. M., Ph. D., assistant professor of germanic languages. iv, 32 p. 1909. 50 cents.
4. The transitional period, 1788-1789, in the government of the United States, by Frank Fletcher Stephens, Ph. M., Ph. D., instructor in American history. viii, 126 p. 1909. \$1.00.

VOLUME 3

1. Assyrian historiography: a source study, by Albert Ten Eyck Olmstead, Ph. D., associate professor of ancient history. pp. viii, 65. 1916. \$1.00.
2. Anton's oriental policy until the defeat of the parthian expedition, by Lucile Craven, Ph. D. pp. xii, 88, 1920. \$1.00.
3. Children born out of wedlock. A sociological study of illegitimacy, with particular reference to the United States, by George B. Mangold, Ph. D. pp. X, 209, 1921. \$1.50.

THE UNIVERSITY OF MISSOURI STUDIES

A Quarterly of Research

Subscription: \$4.00 per year; \$1.25 per copy

Editor in charge: Robert J. Kerner. Board of Editors: Edgar Allen, Harry M. Belden, Jesse H. Coursault, Merritt F. Miller, James L. Parks, Henry O. Severance, Walter Williams.

1. The Isoelectric Point for Plant Tissue and its Importance in Absorption and Toxicity, by William J. Robbins, Ph.D., Professor of Botany. Parasitic and Wood-Destroying Fungi of Boone County, Missouri, by Willis E. Maneval, Ph.D., Assistant Professor of Botany.
2. The origin of Chert and Flint, by Professor William Arthur Tarr, Ph.D., Professor of Geology.
3. The Geography of the St. Francis Basin, by Samuel T. Bratton, B.S. in Ed., A.M., Associate Professor of Geology and Geography.
4. The Transformation of the Euler Condition in the Calculus of Variations, by Lee H. McFarlan, Ph.D., Fellow, National Research Council. An Extension of the Theory of Envelopes, by Finis Omer Duncan, Ph.D., Instructor in Mathematics.

UNIVERSITY OF MISSOURI BULLETIN

From 1892 to 1900 there were various bulletins, circulars and announcements published and distributed, but they were not numbered consecutively nor published regularly. One number of the bulletin is known to have been published August 25, 1893, and three to have been published in 1894, but such ephemeral material was not preserved. There undoubtedly were other bulletins. Beginning with volume 1 number 1, February, 1900, the bulletins have a consecutive number.

Bulletin, volumes 1 to 3, number 4, had the title, Bulletin of the University of the State of Missouri. In 1911 a new series of the bulletins was issued. The series which began with volume 1, 1900, was given the title, General series, 1911-1913, with a continuation of the volume number which the bulletin had before the new series was begun. Bulletins issued previous to 1910 are mostly out of print. Practically all issued since then are available for distribution.

GENERAL SERIES

Published monthly

Edited by John F. Williams, University Publisher

The object of this series is to furnish information regarding the University

and its several colleges and schools. It accordingly consists of the general catalog and the individual announcements of the several divisions of the University. Volume 1, was issued in 1900.

ASTRONOMICAL SERIES

UNIVERSITY OF MISSOURI OBSERVATORY BULLETIN

(Formerly Laws Observatory Bulletin)

Published irregularly.

Edited by Eli Stuart Haynes

This bulletin is devoted exclusively to the publications of astronomical researches conducted in the University of Missouri observatory. Numbers one to sixteen were edited by Frederick Hanley Sears under the title, Law Observatory Bulletin, 1902-1908. It was then placed in the astronomical series of the University bulletin.

Copies may be obtained from the University Publisher, except numbers 1-4, 6, which are out of print.

VOLUME 1

1. Observations and elements of comet b 1902 (Perrine).
2. Observations of comets.
3. Observation of comet a 1904 (Brooks).
4. Observations of a comet e 1904 (Borrelly).
Photometric observations of Nova Germinorum ch. 2387.
Special time signals from U. S. naval observatory.
5. The polaris vertical circle method of determining time and azimuth introduction.
6. The agol variable 188. 1904 Draconis.
7. Photometric investigations.
The disc photometer.
The wedge photometer.
Investigation of the wedges.
8. A grant from the Gould fund.
General remarks concerning variable star observations.
A new variable, 88. 1906 Lacertae.
Preliminary results for V Lacertae, 110. 1904.

- The variable V vulpeculae, 4. 1904.
 Preliminary note on variable 108. 1905 Capricorni.
9. The Algol variable RR Draconis (188.1904).
 Preliminary announcement concerning the Algol variable 121.-1906 Draconis.
 10. Announcement of preliminary results for variable stars.
 - (1) General remarks and star lists.
 - (2) Preliminary results.
 11. The variable RS Cassiopeiae (108.1904).
 12. Finding ephemerides for comet 1894 IV (E. Swift).
 13. The Zollner-Muller photometer.
 The Gans-Crawford telescope.
 The variable X Lacertae (88.1906).
 The variable V Lacertae (110.1904).
 14. The variable RV Tauri (45.1905).
 15. The Algol variable RW Monocerotis (24.1907).
 Preliminary announcements concerning variable stars.
 16. The long-period Algol variable RZ Ophiuchi (193.1905).
 Preliminary announcement concerning SW Andromedae (5.1907).

VOLUME 2

17. The antalogol variable St. Ophiuchi (52.1907).
18. The agol variable Rx Draconis (121.1906).
19. The Agol variable Rz Draconis (26.1907).
20. Studies with the polarizing photometer.
21. The rotating ellipsoid Ru Camelopardalis.
22. The visual and photographic light variations of RR Lyrae by C. C. Kiess.
23. The visual and photographic light variations of Rt Aurigae by C. C. Kiess.
24. Investigations in extra focal photometry by R. H. Baker and Edith E. Cummings.
25. The eclipsing binary Rx Herculis, by Robert H. Baker, and Edith E. Cummings.
26. The eclipsing binary Z Vulpeculae, by Robert H. Baker.
27. The eclipsing binary TV Cassiopeiae, by Edith E. Cummings.
28. The eclipsing binary u Herculis, by Robert H. Baker.
29. The Eclipsing Binary U Coronae by Robert H. Baker.
30. The Eclipsing Binary U. Cephei by Robert H. Baker.
31. The Eclipsing Binary TX Herculis by Robert H. Baker.
32. The Eclipsing Binary RS Vulpeculae by Robert H. Baker.
33. The Eclipsing Binary TW Draconis by Robert H. Baker.

EDUCATION SERIES

Published irregularly

Edited by Jesse H. Coursault

The object of the education series is the publication of new formulations of educational principles and data of direct value to the schools of the state and of educational researches which have significance for other schools of education.

Copies of these bulletins may be obtained from the university publisher.

1. June, 1911. Circular of information to accredited schools. Fifth edition revised. 123 p. Out of print.
2. November, 1911. Rural school consolidation in Missouri, by O. L. Kunkel and W. W. Charters. 36 p. Out of print.
3. February, 1912. Journalism for teachers, by Frank L. Martin. 27 p.
4. December, 1912. Geography of Missouri, by Frederick Emerson. 74 p.
5. The teaching of poetry in the high school, by A. H. R. Fairchild. 104 p. 1914. Out of print.
6. January, 1913. An experimental study of methods of teaching high school German, by Mamie M. Clarahan. 32 p.
7. Circular of information to accredited schools, sixth edition, revised. Issued by the committee on accredited schools, University of Missouri. 138 p. 1913. Out of print.
8. The kind of scholarship records to be kept in schools, by Max R. Meyer, professor of experimental psychology. 14 p. 1914. Out of print.
9. A course in grammar based on the mistakes made by school children in Kansas City, Missouri, by W. W. Charters, Dean of the faculty of education, and professor of theory of teaching, University of Missouri, and Edith Miller, teacher of English, Soldan high school, St. Louis, Mo. 41 p. 1915. Out of print.
10. Circular of information to accredited schools, seventh edition, revised. Issued by the committee on accredited schools, University of Missouri. 132 p. 1915.
11. Study of the rural schools of Saline County, Missouri, by Joseph D. Elliff, professor of high school administration, and Abner Jones, fellow in education, University of Missouri. 32 p. 1915.
12. Circular of information to accredited junior colleges, issued by the committee on accredited schools and colleges. Edited by J. H. Coursault, professor of history and philosophy of education. 182 p. 1918. Out of print.

ENGINEERING EXPERIMENT STATION SERIES

Published irregularly

Edited by E. J. McCaustland

"This series is the official publication of the engineering experiment station of the University, which was established by the board of curators on July 1, 1909, for the investigation of such problems in engineering as appear to be of the most direct and immediate value to the people of the state and for researches of importance to manufacturing and industrial interests and to engineers."

Some experiments in the storage of coal by E. A. Fessenden and J. R. Wharton. (Published in 1908, previous to the establishment of the experiment station.)

Copies of these bulletins may be obtained from the university publisher.

VOLUME 1, 1910

1. March. Acetylene for lighting country homes by J. D. Bowles. 34 p.
2. June. Water supply for country homes by K. A. McVey 35-54 p.
3. September. Sanitation and sewage disposal for country homes by W. C. Davidson. 55-72 p.
4. Not published.

VOLUME 2, 1911

1. March. Heating value and proximate analysis of Missouri coals by C. W. Marx and Paul Schweitzer. (Reprint of report published previous to establishment of experiment station). 16 p.
2. June. Friction and lubrication testing apparatus by Alan E. Flowers. 20 p.
3. September. An investigation of the road making properties of Missouri stone and gravel by W. S. Williams and R. Warren Roberts. 70 p.
4. Not published.

VOLUME 3, 1912

1. March. The use of metal conductors to protect buildings from lightning by E. W. Kellogg. 55 p.
2. June. Firing tests of Missouri coal by H. N. Sharp. 44 p.
3. September. Report of steam boiler trails under operating conditions, by A. L. Wescott. 21 p.
4. Not published.

VOLUME 4, 1913

1. March. Economics of rural distribution of electric power by L. E. Hildebrand. 50 p.
2. June. Comparative tests of cylinder oils by M. P. Weinbach. 28 p.
3. Artesian waters in Missouri by A. W. McCoy. 73 p. 1913.
4. Friction tests of lubricating greases and oils by A. L. Wescott. 72 p. 1913.

VOLUME 5, 1914

14. Effects of heat on Missouri granites by W. A. Tarr and L. N. Neuman. 64 p. 1914. Out of print.

15. A preliminary study relating to water resources of Missouri by T. J. Rodhouse. Out of print.
16. The economics of electric cooking by P. W. Gumaer. 62 p. 1915. Out of print.
17. Earth roads and oiling of roads by H. A. LaRue. 30 p. 1916. Out of print.
18. Heat transmission through boiler tubes by Edwin Allen Fessenden and J. William Haney. 1916. 74 p. Out of print.
19. Geology of Missouri, by E. B. Branson, professor of geology, University of Missouri. 172 p. 1918. Out of print.
20. Energy necessary to shear steel at high temperatures by Guy D. Newton, associate professor of engineering drawing and machine design, University of Missouri. 16 p. 1920. Out of print.
21. Water supply and sewage disposal for country homes by E. J. McCaustland, dean of engineering experiment station, University of Missouri. 36 p. 1920.
22. Study relating to the water resources of Missouri by T. J. Rodhouse, professor of hydraulic engineering, University of Missouri. 57 p. 1920.
23. Experiments on the Extraction and Recovery of Radium from Typical American Carnotite Ores including Contributions to Methods of Measuring Radium by Howard H. Barker. 87 p. 1923.
24. The Grading of Earth Roads by Harry A. LaRue Associate Professor of Highway Engineering 24 p. 1923.
25. Experiments on Sunflower Seed Oil by H. E. French and H. O. Humphrey Feb. 14, 1926 p. 27.

EXTENSION SERIES

Published irregularly

Edited by Charles H. Williams

This series of bulletins is the official publication of the Extension division of the University, object of which is to "serve citizens of the commonwealth who are unable to attend established institutions; to guide them in the pursuit of a more effective education; to give every person in the state an opportunity to get the most complete education possible at the lowest practicable cost; to make the University the center of every movement which concerns the interests of the state; and to bring the University and the home in close touch."

Copies of these bulletins may be obtained from the university publisher.

1. April, 1913. A new departure for University extension. 4 p. Out of print.
2. July, 1913. School improvement agencies. Suggestions for superintendents and principals by W. W. Charters, 15 p.
3. October, 1913. Consolidation of schools of Missouri by R. H. Emberson. 20 p. Out of print.
4. November, 1913. Correspondence courses in high school subjects. 8 p.
5. December, 1913. Announcement of the extension division. Out of print.
6. Preservation of food in the home by Louise Stanley and May E. McDonald. 1914.
7. Care of free text-books by Henry O. Severance. 1914.
8. Announcement of the extension division, 1914-15.
9. Abnormal and defective children by W. H. Pyle, 1914.
10. Correspondence courses in high school subjects. 1914.
11. House fly by M. P. Ravenel, 1914.

12. Correspondence courses in high school subjects, 1915.
13. Announcement of the Extension Division, 1915-16.
14. Technical manual arts for general educational purposes by Ira S. Griffith, 1916
15. Country roads. Part 1. Road drainage; Part 2. Culverts by F. P. Spaulding. 1916.
16. Handwork in grades 1 to 6, by Ella V. Dobbs and Juliaetta Zeits.
17. Not published.
18. Not published.
19. Correspondence courses in high school subjects. 1916. Out of print.
20. Announcement of the extension division. 1916-17.
21. Manual of mental and physical examinations. 1916. Out of print.
22. Better highways by E. J. McCaustland.
23. Feeding of children by Hildegrade Kneeland, instructor in home economics University of Missouri. 12 p. 1917.
24. Feeding the baby, by Louise Stanley, associate professor of home economics. 11 p. 1917.
25. Announcement of the extension division. 1917.
26. Extension division announcement 1919-20. 1919.
27. Extension division announcement of courses 1919-20. 1919.
28. Extension division announcement 1920-21. 1920.
29. Manual for the mental and physical examination of school children (revised) by William Henry Pyle. 40 p. 1920. Out of print.
30. Extension Division Announcement 1921-22 36 p. 1921.
31. Extension Division Announcement 1922-23 31 p. 1922.
32. Extension Division Announcement of Correspondence Courses 1923-24. 1923. 8 p.
33. Extension Division Announcement of University Library Books for loan 7 p. 1923.
34. Extension Division Announcement 1924-25. 30 p. September.
35. Extension Division Announcement 1924-25. 20 p. October.
36. Plays and Recitations. 11 p. 1923.
37. Extension Class Courses Announcement 1924-25 8 p. 1924.
38. Correspondence Courses in High School Subjects 7 p. 1924.
39. Extension Division Announcement of Correspondence Courses, 1925-26. 24 p. 1925.
40. Extension Division Announcement 1925-26. 38 p. 1925. March 1.
41. Extension Class Courses Announcement 1925-26 19 p. 1925 March 10.
42. Plays and Recitations. 19. p. 1925.
43. Visual Education Service Catalog of Slides, Films and Other Visual Aids. 23 p. 1925.
44. Extension Division Announcement of Correspondence Courses, 1926-27. 26 p. 1926.

JOURNALISM SERIES

Published irregularly

Edited by Robert S. Mann

This series of bulletins discusses problems of the newspaper office. Both the editorial and business departments are considered.

Copies of these bulletins may be obtained from the Dean of the school of journalism.

29. Bar bulletin. *Legal Education and American Law Institute* by Herbert S. Hadley.
The Domicile of a Married Woman by James Lewis Parks.
Program of Missouri Bar Association by Guy A. Thompson. Notes on Recent Missouri Cases. 54 p. 1924.
30. Bar bulletin. *The Extraordinary Writ of Prohibition in Missouri* by J. P. McBaine.
Judicial Control of the Missouri Public Service Commission by James W. Simonton.
Notes on Recent Missouri Cases. 63 p. 1924.
31. Bar bulletin. *The Extraordinary Writ of Prohibition in Missouri (continued)* by J. P. McBaine.
Judicial Control of the Missouri Public Service Commission (continued) by James W. Simonton.
Notes on Recent Missouri Cases. 82 p. 1924.
32. Bar bulletin. *The Extraordinary Writ of Prohibition in Missouri (concluded)* by J. P. McBaine.
Notes on Recent Missouri Cases. 90 p. 1925.
33. Bar bulletin. *Contracts for the Benefit of Third Persons* by James Lewis Parks. Notes on Recent Missouri Cases. 50 p. 1925.

LIBRARY SERIES

Published irregularly

Edited by Henry Ormal Severance

The purpose of this bulletin is to furnish a medium for the publication of bibliographical researches, papers on library science, and such other material pertaining to library work as may be of interest to the people of Missouri and to libraries and institutions of the state.

Copies may be obtained from the Librarian.

VOLUME 1

1. 1908. Annual report of the librarian 1908. Appendix contains list of scientific serials in the libraries of the University. 60 p.
2. August, 1910. List of periodicals currently received by the libraries. 20 p. Out of print.
3. September, 1910. Handbook of the libraries. 42 p. Out of print.

4. April, 1912. Books for farmers and farmers' wives by Henry O. Severance, librarian. 24 p.
5. July, 1912. Partial bibliography and index of the publications of the college of agriculture and the agricultural experiment station, by Henry O. Severance, librarian. 19 p.
6. January, 1914. Check list of the official serial publications of the University. 44 p. Out of print.
7. Whole No. 7. A library primer for Missouri high schools, by Henry O. Severance, librarian. 1915. 20 p. Out of print.
8. Whole No. 8. Opening exercises of the new library building. Jan. 6, 1916. By Henry O. Severance, librarian. 1916. 22 p.
9. Whole No. 9. Check list of the official serial publications of the University 1914, 1915, 1916. Out of print.
10. Check list of the official serial publications of the University of Missouri, edition 2, compiled by Henry O. Severance, librarian. 1921.
11. List of Periodicals Currently Received by the University Library 1921.
12. Check List of the Official Serial Publications of the University. 1926. Edition 3.

LITERATURE SERIES

Publication ceased

1. The congress of letters, by Fred Newton Scott, professor of rhetoric in the University of Michigan. 16 p. 1917.
2. An odious comparison by George Morlin, professor of Greek in the University of Colorado. 15 p. 1917.

MEDICAL SERIES

Publication ceased

"This series will be issued quarterly and is devoted primarily to topics within the general field of hygiene and preventive medicine. These bulletins will be illustrated and popular in character and as thorough and practical as possible."

Copies may be obtained from the librarian.

1. Bacteria and disease, by O. W. H. Mitchell, associate professor of pathology and bacteriology. 39 p. 1913.
2. Prevention of typhoid fever, by W. J. Calvert, professor of preventive medicine. 38 p. 1913.
3. Prevention of contagious diseases in school children, by W. J. Calvert. 1913. 31 p.
4. On resuscitation, by D. H. Dolley, professor of pathology. 29 p. 1913.
5. The relation of sight and hearing to early school life by Guy L. Noyes, acting dean of the faculty of medicine and formerly professor of diseases of the eye and ear. 34 p. 1914.
6. The prevention of tuberculosis, by O. W. H. Mitchell. 36 p. 1914.
7. Water—the prevention of its pollution, by O. W. H. Mitchell. 19 p. 1914.
8. Preventive medicine, its accomplishments and its aims, by M. P. Ravenel, professor of medical bacteriology and preventive medicine. 24 p. 1915.

9. The early diagnosis and treatment of cancer, by F. A. Martin, instructor in pathology. 12 p. 1915.
10. The prevention of malaria, by Elbert L. Spence, instructor in preventive medicine and medical bacteriology. 20 p. 1915.
11. Headache a symptom: its causes, prevention and cure, by Walden E. Muns, instructor in pathology. 34 p. 1916.

RURAL EDUCATION SERIES

Edited by Richard Huff Emberson

VOLUME 1

1. August, 1909. Ten lessons on the study of Indian corn, prepared by M. F. Miller and arranged by R. H. Emberson. (Not numbered.) Out of print.
 2. October, 1909. The soil. Prepared by R. H. Emberson. (Numbered v. 10, No. 10. General series.) Out of print.
 3. January, 1910. The horse. Prepared by R. H. Emberson. (Numbered v. 10, No. 11. General series.)
 4. February, 1911. A study of cattle. (Numbered v. 12, No. 4. Rural education series.) Out of Print.
- (Continued in the extension series of the University of Missouri bulletins.)

SCIENCE SERIES

Publication ceased

Edited by George Lefevre

The science series of the bulletin is devoted to the publication of short original papers, preliminary announcements of results of research, and of articles of a general or popular character which are of sufficient interest and importance to warrant their publication.

Copies may be obtained from the librarian.

VOLUME 1

Non-technical lectures on the sciences, by members of the faculty of the University of Missouri.

1. The unity of science by Arthur O. Lovejoy, formerly professor of philosophy. 34 p. 1912. 30 cents.
2. Mathematics, by Earle R. Hedrick, professor of mathematics. 19 p. 1912. 25 cents.
3. Physics, by Oscar Milton Stewart, professor of physics. 22 p. 1912. 25 cents.
4. Chemistry, by William George Brown, professor of industrial chemistry 26 p. 1912. 25 cents.
5. Astronomy, by Herbert Meredith Reese, assistant professor of physics. 17 p. 1913. 25 cents.
6. Geology, by Curtis Fletcher Marbut. 1913.
7. Botany, by C. Stuart Gager. 1913.
8. Experimental zoology, by Winterton Conway Curtis.
9. Evolutional zoology, by George Lefevre. May, 1914.

VOLUME 2

1. The implantation of the glochidium on the fish, by Daisy Young, assistant in zoology. 22 p. plates 3. 1911. 50 cents. Out of print.
2. Notes on the Ohio shales and their faunas, by E. B. Branson, professor of geology. 16 p. plates 3. 1911. 50 cents. Out of print.
3. The blonde race and the Aryan culture, by Thorstein B. Veblen. 19 p. 1913. 25 cents. Out of print.
4. The Devonian fishes of Missouri by E. B. Branson. 1914. 25 cents.

SOCIAL SCIENCE SERIES

Publication ceased

Edited by Norman Maclaren Trenholme

The social science series of the bulletin aims to provide for the publication of brief studies or accounts of political, social, economic or historical character which will be of interest and value to the people of the state.

1. The loan office experiment in Missouri, 1821-1836 by Albert J. McCulloch. 13 p. 1914. 25 cents.
2. The Monroe Doctrine—its origin, development, and recent interpretation, by Frank Fletcher Stephens. 26 p. 1916.
3. The social survey, its history and methods, by Carl C. Taylor, associate professor of sociology. 91 p. 1919. Out of print.

THE PUBLICATIONS OF THE COLLEGE OF AGRICULTURE AND
OF THE AGRICULTURAL EXPERIMENT STATION

Edited by A. A. Jeffrey

The agricultural experiment station issues the following seven series of publications: 1, Research bulletin; 2, Bulletins; 3, Circulars of information; 4, Extension circulars; 5, Extension service leaflets; 6, Boys' and Girls' Club Circulars; and 7, Project Announcements.

Research bulletins—The results of fundamental research are published in small editions and distributed among investigators and public libraries. These bulletins, are not intended for distribution among farmers.

Bulletins—These bulletins are intended to include the results of original research, but differ from the research bulletins in that the results are primarily of interest to farmers. All of the large editions of the bulletins are widely distributed among the farmers of the state. Bulletins of this series are also sent to libraries and investigators at other agricultural experiment stations.

Circulars of information—These publications do not necessarily include the results of original investigation carried on by the experiment station, but are intended to be a means of distributing to the farmers of the state valuable information on important agricultural subjects.

All publications of the experiment station available for distribution are starred.

Address Director of the agricultural experiment station for copies.

Missouri State Agricultural College Farm Bulletins

(These bulletins are out of print.)

There were twenty bulletins issued under the title, "Missouri state agricultural college farm bulletins." Number 1-8 were published in the "annual catalogue of the Missouri University at Columbia, Missouri, 1883-1884." Numbers 9-14 were published in the catalogue for 1884-1885; and numbers 15-19 in the catalogue for 1885-1886. The following bulletins were issued in separate pamphlet form: Nos. 1-8, 10-12, 14, 16, 18-21, 23-25, 29-34. Number 21 was issued only in pamphlet.

Bulletins 21-35 were issued under the title: "Missouri state agricultural college bulletin"; numbers 19-20 and 22-27 were published in the annual report of the state board of agriculture for 1886-1887; numbers 28-30 in the report for 1887-1888; and 31-35 in the report for 1888-1889. Numbers 9-12, 14, 21, and 28-33 were also issued separately. Bulletin 35 is also bulletin number 2 of the agricultural experiment station. Numbers 15, 16, and 24 were also published in the report of the dean of the college of agriculture, 1887.

1. Feeding hogs, by J. W. Sanborn. 1883. 3 p.
2. Feeding steers, by J. W. Sanborn. 1883. 5 p.
3. Report of test of varieties of wheat and corn, by J. W. Sanborn. 1883. 3 p.
4. Mulching, by J. W. Sanborn. 1883. 4 p.
5. Relation of tillage to soil moisture, by J. W. Sanborn. 1883. 3 p.
6. Relation of dew to soil moisture, by J. W. Sanborn. 1883. 5 p.
7. Feeding what and corn, by J. W. Sanborn. 1884. 4 p.
8. Meal feeding stock at pasture, by J. W. Sanborn. 1884. 4 p.
9. Grass-fed pigs, by J. W. Sanborn. 1884. 4 p.
10. Pig feeding experiments, by J. W. Sanborn. 1884. 4 p.
11. Corn fodder as stock food, by J. W. Sanborn. 1884. 4 p.
12. Seed potatoes, by J. W. Sanborn. 1884. 4 p.
13. Good roads and broad wheel tires, by J. W. Sanborn, 1884. 7 p.
14. Feeding for lean meat, by J. W. Sanborn. 1885. 6 p.
15. Contagious pleuro-pneumonia, by Paul Paquin. 1885. 5 p.
16. Glanders. Second report of state veterinarian, by Paul Paquin, 1885. 8 p.
17. General observations, by J. W. Sanborn. 1885. 4 p.
18. Sub-soiling, by J. W. Sanborn. 1885. 5 p.
19. Feeding for lean meat, by J. W. Sanborn. 1886. 6 p.
20. Report of investigations and observations in the horticultural department, by L. R. Taft. 1886. 6 p.
21. Plants and their uses, by S. M. Tracy. 1888. Chart.
22. Corn harvesting by J. W. Sanborn. 1886. 6 p.
23. Relation of dew to soil moisture, by J. W. Sanborn. 1886. 14 p.
24. Report of state veterinary inspector, Paul Paquin. 1886. 22 p.
25. Data regarding several economic problems in ordinary farm practice, by J. W. Sanborn. 1886. 7 p.
26. Report of trials of varieties of vegetables and fruits, by L. R. Taft. 1887. 7 p.
27. Feeding for flesh, by J. W. Sanborn. 1887. 15 p.
28. Maintenance ration for pigs, by J. W. Sanborn. 1887. 25 p.
29. Rotation of crops, by J. W. Sanborn. 1887. 10 p.
30. Fertilization, by J. W. Sanborn. 1887. 14 p.
31. Texas fever and other diseases, by Paul Paquin. 1888. 15 p.

- 32. Plows and plowing, by J. W. Sanborn. 1888. 19 p.
- 33. Glanders, mad itch of cattle, etc., by Paul Paquin. 1888. 15 p.
- 34. Experimental farming, by J. W. Sanborn. 1888. 10 p.
- 35. Grasses for pastures and for meadows, by J. W. Sanborn. 1888. 9 p.

Agricultural Experiment Station Bulletins

The following number of bulletins are out of print: 1-101, 103-106. An index has been issued for bulletins 1 to 104. Future volumes will be indexed as published. An index will be issued with the completion of each volume of the Research bulletins.

- 1. Announcement to farmers, the so-called "Hatch bill"; assent of governor; plan of organization; work and experiments proposed this season; personnel of station, by P. Schweitzer. 1888.
- 2. Grasses for pastures and for meadows, by J. W. Sanborn. 1888.
- 3. Generalities and experiments in spraying cattle. Appendix on glanders, by Paul Paquin.
- 4. A list of tillage implements, by J. W. Sanborn. 1888.
- 5. Soil, weather, field trials with corn, by P. Schweitzer. 1889.
- 6. Experiments on seed germination, pea weevil and apples, by J. W. Clark.
- 7. Experiments on green versus dry storage of fodder, by J. W. Sanborn.
- 8. Experiments on feeding ensilage against dry fodder, by J. W. Sanborn.
- 9. Study of the life history of corn at its different periods of growth, by P. Schweitzer. 1889.
- 10. Analysis of apples at various stages of growth. Bordeaux mixture for grape rot. Comparative tests of small fruits and potatoes. By J. W. Clark. 1890.
- 11. Texas fever, by Paul Paquin. 1890.
- 12. Black leg, by Paul Paquin. 1890.
- 13. Reports on spraying for the codling moth, apple scab and black rot of the grape. Reports on strawberries, raspberries, blackberries, tomatoes, peas and potatoes. List of new fruits received for testing. By J. W. Clark. 1891.
- 14. Field experiments with corn, by H. J. Waters. 1891.
- 15. Wheat—test of varieties, 1889, 1891. Oats—test of varieties, 1889, 1891. Change of seed—wheat, oats and potatoes, by H. J. Waters. 1891.
- 16. Covering peach trees to protect the fruit buds. Spread of pear blight, temperature and rain tables, strawberry tests, potato trials, seedling fruits. By J. W. Clark. 1891.
- 17. Sugar beets, by Chas. Fox. 1892.
- 18. Strawberries, by Chas. Keffer. 1892.
- 19. Soils and fertilizers. Part 1. By Paul Schweitzer. 1892.
- 20. Soils and fertilizers. Part 2. By Paul Schweitzer. 1893.
- 21. Field experiments with wheat, by C. M. Conner. 1893.
- 22. Seedling strawberries, by Chas. Keffer. 1893.
- 23. Grape culture, by Chas. Keffer. 1893.
- 24. Comparative tests of different breeds of beef cattle, by P. Schweitzer. 1894.
- 25. An inquiry into the composition of the flesh of cattle, by P. Schweitzer. 1894.
- 26. Dairy management, by A. M. Soule, 1894.

27. Spraying apple trees for destruction of insects and prevention of fungous diseases, by Chas. Keffer. 1894.
28. Feeding tests with different breeds of dairy cattle, by P. Schweitzer. 1895.
29. Feeding wheat to pigs, by P. Schweitzer. 1895.
30. Spray calendar, E. G. Lodeman, 1895.
31. Spraying orchards and vineyards, by J. C. Whitten. 1895.
32. Field experiments with corn, by H. J. Waters and C. M. Conner. 1895.
33. Inquiry into the principles of potato growing and tests of varieties, by P. Schweitzer. 1896.
34. Manures and fertilizers, by H. J. Waters. 1896.
35. The Woody-Aphis of the apple, by J. M. Stedman. 1896.
36. The lesser apple leaf folder. The leaf crumpler. by J. M. Stedman. 1896.
37. Texas fever, by John W. Connaway. 1897.
38. Winter protection of the peach. Peach growing in Missouri by J. C. Whitten. 1897.
39. Influence of width of tire on draft of wagons, by H. J. Waters. 1887.
40. Sugar beet, by H. J. Waters. 1897.
41. San Jose scale in Missouri, by J. M. Stedman. 1898.
42. A new orchard pest: the fringed-wing apple-bud moth, by J. M. Stedman. 1898.
43. Winter forcing of asparagus in the open field. Asparagus culture for Missouri. By J. C. Whitten. 1898.
44. The fruit tree bark beetle. The common apple tree and peach tree borers. By J. M. Stedman. 1898.
45. The sugar beet, by H. J. Waters. 1899.
46. Grapes: 1. The study of types and varieties. 2. The study of the pollination of cultivated grapes. 3. Methods pursued by practical growers. By J. C. Whitten. 1899.
47. The tarnished plant bug, by J. M. Stedham. 1899.
48. Texas fever, by J. W. Connaway and M. Francis. 1899.
49. Apple orchard, by J. C. Whitten. 1900.
50. Test of spray nozzles, by N. O. Booth. 1900.
51. The chinch bug, by J. M. Stedham. 1902.
52. Influence of height of wheel on the draft of farm wagons, by T. I. Mairs. 1901.
53. Breeding experiments with sheep: 1. Some factors influencing the weight of lambs at birth. 2. Milk and food records of ewes. By Frederick B. Mumford. 1901.
54. The strawberry false-worm. The strawberry leaf-roller. By J. M. Stedman. 1901.
55. Pruning peach trees, by J. C. Whitten. 1902.
56. Dairy husbandry, by C. H. Eckles. 1902.
57. Raising calves with skim milk, by C. H. Eckles. 1902.
58. Feeding the dairy cow, by C. H. Eckles. 1902.
59. Corn improvement for Missouri, by Geo. M. Tucker. 1902.
60. A new bordeaux powder, by R. M. Bird. 1903.
61. Apple growing in Missouri, by J. C. Whitten. 1903.
62. Hessian fly in Missouri, by J. M. Stedman. 1903.
63. Commercial fertilizers, by F. B. Mumford. 1904.
64. The "sting" in the apple, by J. M. Stedman. 1904.
65. Grain rations for dry lot hog feeding, by E. B. Forbes. 1905.

66. Analysis of commercial fertilizers, by P. Schweitzer and R. M. Bird. 1904.
67. Supplements to corn for fattening hogs, by E. B. Forbes. 1905.
68. Department of dairy husbandry, by C. H. Eckles. 1905.
 1. A test of tin can separators.
 2. A test of a fly repellent.
69. Three fungous diseases of the cultivated ginseng, by Howard S. Reed. 1905.
70. Analysis of commercial fertilizers, by P. Schweitzer and R. M. Bird. 1905.
71. Fruit tree leaf-roller, by J. M. Stedman. 1906.
72. Alfalfa growing in Missouri, by M. F. Miller. 1906.
73. Cowpeas, by A. E. Grantham. 1906.
74. Winter killing of peach buds as influenced by previous treatment, by W. H. Chandler. 1907.
75. Wintering yearling cattle, by H. J. Waters. 1907.
76. Fattening cattle for the market, by H. J. Waters. 1907.
77. Inspection of commercial fertilizers, by H. J. Waters. 1907.
78. Inspection of commercial fertilizers, by P. F. Trowbridge. 1908.
79. Green forage for hogs, by H. J. Waters. 1908.
80. Inspection of commercial fertilizers, by P. F. Trowbridge. 1908.
81. Specific effects of rations on the development of swine, by P. Schweitzer. 1909.
82. Inspection of commercial fertilizers, by P. F. Trowbridge. 1908.
83. Soil experiments on the upland loam of southeast Missouri by M. F. Miller and C. B. Hutchison. 1910. 16 p.
84. Soil experiments on the prairie silt loam of southwest Missouri, by M. F. Miller and C. B. Hutchison. 1910. 19 p.
85. Inspection of commercial fertilizers, by P. F. Trowbridge. 1910. 36 p.
86. Soil experiments on the rolling limestone upland of southwest Missouri by M. F. Miller and C. B. Hutchison. 1910. 23 p.
87. Co-operative variety tests of corn. Variety tests of corn at Columbia. by M. F. Miller and H. D. Hughes. 1910. 64 p.
88. Soil management in the Ozark region, by M. F. Miller. 1910. 33 p.
89. Forest conditions of the Ozark region of Missouri, by Samuel J. Record. 1910. 89 p.
90. Fattening cattle on blue grass pasture, by F. B. Mumford. 1911. 108 p.
91. Inspection of commercial fertilizers, by P. F. Trowbridge, L. D. Haigh, C. R. Moulton, et al. 1911. 60 p.
92. Soils of Sullivan county, by R. C. Doneghue, H. H. Krusekopf, M. M. McCool and H. P. Rusk. 1911. 38 p.
93. Soils of Audrain county, by R. C. Doneghue and B. W. Tillman of the Missouri Experiment Station. 1911. 28 p.
94. Factors affecting the per cent of fat in cream from farm separators, by C. H. Eckles and H. S. Wayman. 1911. 46 p.
95. Pork production with forage crops, clover, alfalfa, rape, corn, rye, grain cowpeas, soybeans, sorghum, by F. B. Mumford and C. A. Willson. 1911. 40 p.
96. Report of the director for the year ending June 30, 1910, by F. B. Mumford. 1911. 26 p.
97. Co-operation among fruit growers by W. H. Chandler. 1911. 58 p.
98. San Jose scale in Missouri, by Leonard Haseman. 1912. 58 p.

99. Inspection of commercial fertilizers, by P. F. Trowbridge, L. D. Haigh, C. R. Moulton, A. G. Hogan, L. E. Morgan, E. E. Vanatta, and D. M. Nelson. 1912. 66 p.
100. Influence of fatness of cow at parturition on per cent of fat in milk, by C. H. Eckles. 1912. 22 p.
101. Report of the director for the year ending June 30, 1911, by F. B. Mumford. 1912. 32 p.
102. Combating orchard and garden enemies, by W. H. Chandler. 1912. 544 p.
103. Silo for Missouri farmers, by C. H. Eckles. 1912. 18 p.
104. Evergreen bagworm, by Leonard Haseman. 1912. 22 p.
105. Partial bibliography and index of the publications of the college of agriculture and the agricultural experiment station, by H. O. Severance. 1912. 20 p.
106. Co-operative experiments with alfalfa, by M. F. Miller and C. B. Hutchison. 1912. 36 p.
107. Farm poultry house construction, by H. L. Kempster. 1912. 34 p.
108. Grass investigations in the Ozark upland (first report), by M. F. Miller and C. B. Hutchison. 1913. 48 p.
109. Inspection of commercial fertilizers, by F. B. Mumford, director, and P. F. Trowbridge, chemist. 1913. 40 p.
110. Forage crop rotation for pork production, by F. B. Mumford and L. A. Weaver. 1913. 30 p.
111. Report of the director for the year ending June 30, 1912. by F. B. Mumford. 1913. 48 p.
112. Corn silage for fattening two-year old steers, by H. O. Allison. 1913. 20 p.
113. Commercial fertilizers for strawberries, by W. H. Chandler. 1913. 30 p.
114. Corn vs. oats for work mules, by E. A. Trowbridge. 1913. 20 p.
115. Rations for fattening western yearling sheep. by F. B. Mumford, E. A. Trowbridge and H. Hackedorn. 1913. 20 p.
116. Inspection of commercial fertilizers, for the year 1913. by P. F. Trowbridge. 1914. 54 p.
117. Report of the director for the year ending June 30, 1913, by F. B. Mumford. 1914. 44 p.
- *118. Drainage investigations on the northeast Missouri prairie (first report), by M. F. Miller, C. B. Hutchison, R. T. Douglass and R. R. Hudelson. 1914. 54 p.
- *119. Soil investigations—Jasper county experiment field, by M. F. Miller, R. R. Hudelson. 1914. 30 p.
- *120. Rations for breeding ewes, by Howard Hackedorn. 1914, 23 p.
121. Land tenure, by O. R. Johnson and W. E. Foard. 110 p. 1914.
122. Inspection of commercial fertilizer for the year 1914, by P. F. Trowbridge. 1915. 59 p.
123. Experiments with farm crops in southwest Missouri, by C. B. Hutchison, T. R. Douglass. 1915. 24 p.
124. Profits from spraying twenty-five Missouri orchards in 1914, by W. L. Howard. 1915. 100 p.
125. The cost of production on Missouri farms, by O. R. Johnson. W. E. Foard. 1915. 30 p.
- *126. Soil experiments on the dark prairies of central and northeast Missouri, by M. F. Miller, C. B. Hutchison, R. R. Hudelson. 1915. 31 p.

127. Soil experiments on the dark prairies of central and northeast Missouri, by M. F. Miller, C. B. Hutchison and R. R. Hudelson. 1915. 31 p.
128. Soil experiments on the rolling glacial land of southwest Missouri, by M. F. Miller, C. B. Hutchison, R. R. Hudelson. 1915. 19 p.
129. Soil experiments on the red limestone upland of southwest Missouri, by M. F. Miller, C. B. Hutchison, and R. R. Hudelson. 1915. 19 p.
- *130. Soil experiments on the gray prairies of southwest Missouri. (second report), by M. F. Miller, C. B. Hutchison, R. R. Hudelson. 1915. 22 p.
131. Work and progress of the agricultural experiment station for the year ending June 30, 1914, by F. B. Mumford. 1915. 69 p.
- *132. Control of the San Jose scale in Missouri, by L. Haseman. 1915. 9 p.
133. Silo and its use, by C. H. Eckles. 1915. 19 p.
134. Insect pests of field crops, by L. Haseman. 1915. 19 p.
135. Ration and age of calving as factors influencing the growth and dairy qualities of cows, by C. H. Eckles. 1915. 91 p.
- *136. Feeding wheat to fattening swine, by L. A. Weaver. 1915. 35 p.
137. Periodical cacida in Missouri, by L. Haseman. 1915. 33 p.
138. Farm beekeeping, by E. E. Tyler and L. Haseman. 1915. 40 p.
139. Inspection of commercial fertilizer 1915, by P. F. Trowbridge. 1916. 58 p.
140. Size of farm business, by O. R. Johnson and W. E. Foard. 1916. 40 p.
141. Work and progress of the agricultural experiment station for the year ending June 30, 1915, by F. B. Mumford. 1916. 56 p.
142. Successful farm organization, by O. R. Johnson. 1916. 26 p.
143. Variety tests of corn, by C. B. Hutchison, A. R. Evas, J. C. Hackleman, E. M. McDonald. 1916. 56 p.
144. Self feeders for fattening swine, by L. A. Weaver. 1917. 22 p.
145. Inspection of commercial fertilizers 1916. by P. F. Trowbridge. 1917. 41 p.
146. Agricultural lime, M. F. Miller and H. H. Krusekopf. 1917. 25 p.
147. Work and progress of the agricultural experiment station for year ending June 30, 1916, by F. B. Mumford. 1917. 64 p.
- *148. Soil experiment on the Ozark upland, by M. F. Miller, F. L. Duley. 1917. 28 p.
- *149. Preparation of corn for fattening steers, by H. O. Allison. 1917. 35 p.
150. Corn silage in rations for fattening steers, by H. O. Allison. 1917. 24 p.
151. How the station works, by F. B. Mumford. 1917. 24 p.
- *152. Cost of horse labor on the farm. by O. R. Johnson and R. M. Greene. 1918. 32 p.
153. Soils of Missouri, by M. F. Miller, and H. H. Krusekopf. 1918. 130 p.
154. Inspection of commercial fertilizers. 1917, by P. F. Trowbridge. 1918. 44 p.
155. Meat scraps and sour milk for egg production, by H. L. Kempster and G. W. Hervey. 1918. 16 p.
156. Milk production costs and milk prices, by R. M. Greene, D. C. Wood, and A. C. Ragsdale. 1918. 36 p.
- *157. Fertilizer trials—Wentzville experiment field, by M. F. Miller and F. L. Duley. 1918. 23 p.
158. Winter rations for dairy heifers, by C. H. Eckles. 1918. 54 p.
159. Profits from milk cows on general corn belt farms, by O. R. Johnson and R. M. Greene. 1918. 20 p.

160. Inspection of commercial fertilizers 1918, by F. B. Mumford and L. D. Haigh. 1919. 31 p.
161. Combining dormant and first summer spray in apple orchards infested by San Jose scale, by T. J. Talbert. 1919. 15 p.
162. Legumes, Sudan grass, and cereal crops for silage, by C. H. Eckles. 1919. 25 p.
163. Work and progress of the agricultural experiment station 1917-1918, by F. B. Mumford. 1919. 78 p.
- *164. Capacity of silos and weight of silage, by C. H. Eckles, O. E. Reed and J. B. Fitch. 1919. 24 p.
165. Cost of producing some Missouri farm crops, by O. R. Johnson and R. M. Greene. 1919. 26 p.
- *166. Handling farm manure, by F. L. Duley. 1919. 29 p.
- *167. Renting land, by O. R. Johnson and R. M. Greene. 1920. 52 p.
- *168. Inspection of commercial fertilizers 1919, by F. B. Mumford and L. D. Haigh. 1920. 55 p.
169. Profitable tomato fertilizers, by J. T. Rosa, Jr. 1920. 12 p.
- *170. Insect pests of field crops by L. Haseman. 1920. 39 p.
171. Agricultural lime, by M. F. Miller, and H. H. Krusekopf. 1920. 24 p.
172. Work and progress of the experiment station 1918-19, by F. B. Mumford. 1920. 48 p.
173. Ashland community survey, by Carl C. Taylor and E. W. Leghman. 1920. 16 p.
174. Hog cholera and immature corn, by J. W. Connaway. 1920. 20 p.
- *175. Influence of capital on farm organizations, by O. R. Johnson and R. M. Greene. 1920. 20 p.
- *176. Nursery and orchard insect pests, by L. Haseman. 1920. 35 p.
177. Investigation of the dipping and fumigation of nursery stock by K. C. Sullivan. 1920. 36 p.
178. Testing fertilizers for Missouri farmers, by F. B. Mumford and L. D. Haigh. 1920. 72 p.
179. What the Agricultural Experiment Station is Doing for Missouri, by F. B. Mumford, 1921, 60 pages.
180. Bat Guano and Its Fertilizing Value, by Wm. A. Albrecht, 1921, 15 pp.
181. Corn in Missouri, Part I, by L. J. Stadler and C. A. Helm, 1921, 51 pp.
- *182. Thirty Years of Field Experiment With Crop Rotations, Manure and Fertilizers, by M. F. Miller, and R. R. Hudelson, 1921, 43 pp.
- *183. Crop Rotations for Missouri Soils, by R. R. Hudelson and C. A. Helm, 1921, 27 pp.
184. Small Fruits Growing in Missouri, by H. G. Swartwout, 1921. 27 pp.
185. Corn in Missouri, Part II, by C. A. Helm, 1921, 200 pp.
- *186. Actinomycosis in Cattle (Lump Jaw, Big Jaw and Wooden Tongue), by J. W. Connaway, 1921, 16 pp.
- *187. Infectious Abortion in Swine, by J. W. Connaway, J. H. Durant, H. G. Newman, 1921 28 pp.
188. Productive Methods for Wheat in Missouri. C. A. Helm and L. J. Stadler, 1921, 40 pp.
189. One Year's Work. The Agricultural Experiment Station, by F. B. Mumford, 1921, 64 pp.
190. The Cost of Crop Production in Missouri, by B. H. Frame, 1921, 16 pp.
191. Seed Studies With Irish Potatoes, by J. T. Rosa, Jr., 1922, 32 pp.

192. Testing Fertilizers for Missouri Farmers: 1921, by L. D. Haigh and F. B. Mumford, 1922, 70 pp.
193. The Home Vegetable Garden as a Business Proposition, by J. T. Rosa, Jr. 1922, 16 pp.
194. Better Methods of Tomato Production, by J. T. Rosa, Jr., 1922, 24 pp.
- *195. Productive Methods for Soybeans in Missouri, by W. C. Etheridge and C. A. Helm, 1922, 32 pp.
196. Roup in Fowls, by A. J. Durant, 1922, 12 pp.

EXPERIMENT STATION CIRCULARS

CIRCULARS OF INFORMATION

1. Chinch bugs and their extermination. 1895.
2. Chinch bug infection. 1895.
3. San Jose scale in Missouri. 1896.
4. Peach yellows and peach rosette, by J. C. Whitten. 1897.
5. Sugar beet, by H. J. Waters, 1897.
6. Clover and cow peas, by H. J. Waters. 1897.
7. The Woolly-Aphis of the apple, by J. M. Stedman. 1898.
8. Agricultural experiment station. Third biennial report of the director, on the enforcement of fertilizer control law. 1898.
9. Agricultural experiment station. Practical value of the work of the experiment station. 1899.
10. Agricultural experiment station. Spray calendar. by N. O. Booth. 1902
11. Corn as a stock food by H. J. Waters. 1902.
12. Factors in beef production, by F. B. Mumford. 1902.
13. Plant propagation, by W. L. Howard. 1902.
14. Commercial fruit evaporators. 1902.
15. The principles of plant propagation: the seed, by F. B. Mumford. 1903.
16. Fifth biennial report of the Missouri agricultural experiment station on the enforcement of the fertilizer control law. 1903.
17. On the planting and care of trees for the street and lawn, by H. S. Reed. 1904.

18. The farmers' creamery in Missouri: when and how to build, by R. M. Washburn. 1905.
19. Suggestions for Missouri corn growers, by M. F. Miller. 1905.
20. Directions for making Bordeaux powder by R. M. Byrd. 1905.
21. Some fungous diseases and their treatment, by B. F. Floyd. 1905.
22. Feeding the orchard, by H. J. Waters. 1905.
23. Fungicides, insecticides, and spray calendar, by E. H. Favor. 1906.
24. Beef production on high priced land, by H. J. Waters. 1908.
25. Rational sheep feeding, by F. B. Mumford. 1908.
26. Feeding the dairy cow, by C. H. Eckles. 1908.
27. Feeding and care of horses, by E. A. Trowbridge. 1908.
28. Swine feeding, by C. A. Willson. 1908.
29. Immunization of swine against hog cholera, by J. W. Connaway. 1908.
30. Missouri housekeepers' conference association. 1908.
31. Hardiness of peach buds, blossoms and young fruit as influenced by the care of the orchard, by W. H. Chandler. 1908.
32. Missouri apple growing, by J. C. Whitten. 1908.
33. Hotbeds and coldframes. Their preparation and management, by W. L. Howard. 1908.
34. Instructions for spraying, by W. H. Chandler. 1908.
35. Protecting orchards against frosts and freezes, by W. L. Howard. 1909.
36. Co-operative experiments of the department of agronomy, by M. F. Miller and C. B. Hutchison. 1910.
37. Variations in cream test, by C. H. Eckles. 1910.
38. The principles of maintaining soil fertility, by M. F. Miller. 1910.
39. The seeding of cow peas, by M. F. Miller. 1910.
40. The seeding of alfalfa, by C. B. Hutchison. 1910.
41. Directions for testing milk on the farm, by H. E. McNatt. 1910.
42. The seeding of clovers and grasses, by M. F. Miller. 1910.
43. Wheat growing in Missouri, by F. H. Demaree. 1910.
44. Feeding for milk production, by C. H. Eckles. 1910.
45. Selecting and judging corn, by C. B. Hutchison. 1910.
46. Factors influencing the yield of oats, by F. H. Demaree. 1913. 98 p.
47. Raising calves on skim milk, by C. H. Eckles. 1913. 8 p.
48. Plastered or Guerler silo, by H. E. McNatt. 1911. 8 p.
49. Reinforced concrete silo, by F. H. Demaree. 1911. 8 p.
50. Selection of corn for feed and show, by C. B. Hutchison. 1911. 12 p.
51. How to prolong the life of fence posts by J. A. Ferguson. 1911. 4 p.
52. Growing a woodlot from seed, by J. A. Ferguson. 1912. 8 p.
53. The testing of cowpeas, by M. F. Miller. 1912. 4 p.
54. Cooperative experiment of the department of agronomy, by M. F. Miller and C. B. Hutchison. 1912. 12 p.
55. Forage crops for swine, by L. A. Weaver. 1912. 4 p.
56. Some factors in wheat production, by M. F. Miller and J. C. Hackleman. 1912. 11 p.
57. Keeping records of dairy cows, by C. H. Eckles. 1912. 8 p.
58. Missouri fertilizer law, by F. B. Mumford. 1913. 4 p.
59. Farm advisor in Missouri, by F. B. Mumford and D. H. Doane. 1913. 14 p.
60. County farm advisor plan, by D. H. Doane. 1913. 4 p.
61. Docking and castrating lambs, by H. Hackedorn. 1913. 4 p.
62. Chinch bug and its control, by L. Haseman. 1913. 4 p.

- *63. Control of insect pests and plant diseases, by L. Haseman. 1913. 8 p.
- 64. Directions for testing creams, by L. G. Rinkle. 1913. 8 p.
- *65. Advantages from use of purebred ram, by H. Hackedorn. 1913. 11 p.
- 66. Cotton seed selection for southeast Missouri, by A. R. Evans. 1913. 4 p.
- 67. How to build a Guerler silo, by P. M. Brandt. 1914. 11 p.
- 68. Seeding of meadows and pastures, by C. B. Hutchison. 1914. 7 p.
- 69. Fertility of the soil, by M. F. Miller. 1914. 19 p.
- 70. Hessian fly in Missouri, by Leonard Haseman. 1914. 4 p.
- 71. Shock corn for silage, by C. H. Eckles. 1914. 4 p.
- 72. Silage for horses and mules, by E. A. Trowbridge. 1914. 4 p.
- 73. Rye and bluegrass pastures with and without grain, for ewes and suckling lambs, by H. Hackedorn. 1915. 8 p.
- 74. Yellow color in cream and butter, by L. S. Palmer. 1915. 6 p.
- 75. Farmer's poultry house, by H. L. Kempster. 1915. 12 p.
- 76. Feeding for egg production, by H. L. Kempster. 1915. 12 p.
- 77. Value of education to the farmer, by O. R. Johnson. 1915. 4 p.
- 78. Control of soil washing, by M. F. Miller. 1915. 12 p.
- 79. Sour milk for chicken feeding, by H. L. Kempster. 1916. 4 p.
- 80. Missouri poultry house, by H. L. Kempster. 1916. 8 p.
- 81. Pruning shade trees, by H. F. Major. 1916. 6 p.
- 82. Protein feeds for laying hens, by H. L. Kempster. 1917. 12 p.
- 83. Home vegetable garden, by J. C. Whitten. 1918. 22 p.
- 84. How to keep farm accounts, by R. M. Greene and D. C. Wood. 1918. 28 p.
- *85. Farmers' beef club, by P. F. Trowbridge. 1918. 32 p.
- 86. Soil inoculation for legumes, by William A. Albrecht. 1919. 15 p.
- 87. Growing tomatoes for the canning factory, by J. T. Rosa, Jr. 1919. 16 p.
- 88. Raising calves on farms where whole milk is sold, by W. W. Swett. 1919. 13 p.
- *89. Estimating silo capacities and silage weights, by C. H. Eckles. 1919. 4 p.
- 90. Pruning the apple, by V. R. Gardner. 1920. 20 p.
- 91. Feeding baby chicks, by H. L. Kempster. 1920. 4 p.
- 92. Bagworms destructive in Missouri, by L. Haseman. 1920. 4 p.
- 93. Missouri poultry house, by H. L. Kempster. 1920. 9 p.
- 94. European corn borer, by L. Haseman. 1920. 4 p.
- 95. Growing late potatoes, by J. T. Rosa, Jr. 1920. 4 p.
- 96. Official testing of dairy cows, by A. C. Ragsdale and C. W. Turner. 1920. 12 p.
- 97. Cost and price tendencies on the farm, by R. M. Greene. 1920. 8 p.
- *98. Magnum terrace, by E. W. Lehman and F. L. Duley. 1920. 8 p.
- *99. Federal and state laws regulating the propagation and distribution of nursery stock, by L. Haseman. 1920. 24 p.
- *100. Cost of producing wheat and oats in Missouri, by O. R. Johnson. 1920. 4 p.
- 101. Plant inspection in Missouri, by K. C. Sullivan. 1920. 16 p.
- *102. Keeping soils productive, by R. R. Hudelson. 1921. 24 p.
- 103. Sweet potato culture in Missouri, by J. T. Rosa, Jr., 1921. 12 p.
- 104. The Missouri Soil Survey, by H. H. Krusekopf, 1921, 20 pp.
- *105. Productive Methods for Oats in Missouri, by C. A. Helm and L. J. Stadler, 1922, 16 pp.
- 106. Seed Potatoes for Better Yields, by J. T. Rosa, Jr., 1922, 8 pp.

- *107. Winter Injury of Fruit in Missouri, by F. C. Bradford, 1922, 7 pp.
- 108. The Durability of Fence Posts, by J. C. Wolley, 1922, 4 p.
- *109. Controlling San Jose Scale with Lubricating Oil Emulsion, by L. Hase-man and K. C. Sullivan, 1923, 4 pp.
- *110. The Missouri Colony Brooder House, by H. L. Kempster, 1923, 2 pp.
- *111. Feeding for Egg Production, by H. L. Kempster, 1923, 12 pp.
- *112. Controlling Peach Tree Borers with Paradichlorobenzene, by O. C. Mc-Bride, 1923, 4 pp.
- 113. Picking, Handling and Exhibiting Fruit, by T. J. Talbert, and A. M. Burroughs, 1923, 8 p.
- *114. The Missouri Fertilizer Law, by F. B. Mumford and L. D. Haigh, 1923, 4 pp.
- *115. Feeding Dairy Cows, by A. C. Ragsdale, 1923, 12 p.
- *116. Winter Rations for Dairy Heifers, by A. C. Ragsdale, 1923, 8 pp.
- *117. Corn Root Rot, by B. B. Branstetter, 1924, 8 p.
- *118. Self-Feeders for Fattening Swine, by L. A. Weaver, 1924, 8 p.
- *119. Testing Milk and Cream, by W. P. Hays, 1924, 12 pp.
- *120. Pruning Apple and Pear Trees, by T. J. Talbert, 1924, 16 pp.
- *121. Inoculation for Legumes, by W. A. Albrecht, 1924, 12 pp.
- *122. The Pickle Worm and Its Control, by K. C. Sullivan, 1924, 4 p.
- *123. Strawberry Culture in Missouri, by T. J. Talbert, 1924, 12 p.
- *124. Apple Blotch Control in Missouri by T. J. Talbert, 1924, 8 p.
- *125. Corn Versus Oats for Work Mules, by E. A. Trowbridge, 1924, 4 p.
- *126. Corn Selection for Exhibit Purposes, by C. A. Helm, 1924, 8 p.
- *127. Selection and Management of the Dairy Bull, by A. C. Ragsdale, 1924, 12 pp.
- *128. Annual Report of N. E. Missouri Crops Experiment Field (1924) by W. C. Etheridge and C. A. Helm, 1924, 2 p.
- *129. The 30 x 30 Missouri Poultry House, by H. L. Kempster, 1924, 8 p.
- *130. Growing Orchard Grass in South Missouri, by C. A. Helm, 1924, 8 p.
- *131. Home-Made Labor Saving Devices for the Hog Farm, by J. C. Wooley, 1924, 12 p.
- *132. Report on Southeast Missouri Cotton Experiment Fields: 1924, by B. M. King, 1925, 4 pp.
- *133. Feeding Baby Chicks, by H. L. Kempster, 1925, 4 pp.
- *134. Common Parasites of Farm Animals, by L. S. Backus, 1925, 16 p.
- *135. Cedar Rust of Apples in Missouri, by T. J. Talbert, 1925, 8 p.
- *136. Lawns and Lawn Making, by Horace F. Major, 1925, 12 pp.
- *137. Fire Blight of Apples and Pears, by T. J. Talbert, 1925, 8 p.
- *138. Fattening Farm Poultry, by E. W. Henderson, 1925, 4 pp.

RESEARCH BULLETINS

- *1. An experimental study of the rest period in plants, by W. L. Howard, 1910. 105 p.
- *2. A study of the cause of wide variation in milk production by dairy cows, by C. H. Eckles and O. E. Reed. 1920. 147 p.
- 3. Soils of the Ozark region, by C. F. Marbut. 1910. 124 p.
- *4. Digestion trial with two Jersey cows on full ration and on maintenance, by C. H. Eckles. 1911. 22 p.
- *5. Maintenance trials with five Jersey cows, by C. H. Eckles. 1911. 48 p.
- 6. Distribution of farm labor, by O. R. Johnson. 1913. 88 p.

7. Nutrients required for milk production, by C. H. Eckles. 1913. 140 p.
- *8. Killing of plant tissue by low temperatures, by W. H. Chandler. 1913. 169 p.
9. Carotin—The principal natural yellow pigment of milk fat—Part I, by C. H. Eckles and L. S. Palmer. 1914. 26 p.
- *10. Carotin—The principal natural yellow pigment of milk fat—II, by C. H. Eckles and L. S. Palmer. 1914. 52 p.
- *11. Carotin—Part III, by C. H. Eckles and L. S. Palmer. 1914. 24 p.
- *12. Carotin—etc. Part IV, by C. H. Eckles and L. S. Palmer. 1914. 40 p.
- *13. Lactochrome—The yellow pigment of milk whey, by L. S. Palmer and L. H. Cooledge. 1914. 36 p.
14. Sap studies with horticultural plants, by W. H. Chandler. 1914. 66 p.
- *15. Experimental study of the rest period in plants, by W. L. Howard. 1915. 27 p.
- *16. Experimental study of the rest period in plants, by W. L. Howard. 1915. 27 p.
17. Experimental study of the rest period in plants, by W. L. Howard. 1915. 58 p.
18. Maintenance requirement of cattle, by P. F. Trowbridge, C. R. Moulton and L. D. Haigh. 1915. 62 p.
19. Studies of the timothy plant. by H. J. Waters. 1915. 68 p.
- *20. Studies of the timothy plant. Part II. by P. F. Trowbridge, L. D. Haigh and C. R. Molton. 1915. 67 p.
21. Experimental study of the rest period in plants, 5th report, by W. L. Howard. 72 p.
- *22. Silage investigations, by C. H. Eckles, O. I. Oshel and D. M. Magruder. 1916. 32 p.
23. Powdery mildews of *Avena* and *Triticum*, by George M. Reed. 1916. 19 p.
24. Influence of plane of nutrition of the cow upon the composition and properties of milk and butter fat, by C. H. Eckles and L. S. Palmer. 1916. 39 p.
25. Influence of plane of nutrition of the cow upon the composition and properties of milk and butter fat, by C. H. Eckles and L. S. Palmer. 1916. 107 p.
- *26. Nutrients required to develop the bovine fetus, by C. H. Eckles. 1916. 36 p.
27. Effect of feeding cottonseed products on the composition and properties of butter, by C. H. Eckles and L. S. Palmer. 1916. 44 p.
- *28. Effect of limited food on growth of beef animals, by P. F. Trowbridge, L. D. Haigh and C. R. Moulton. 1918. 129 p.
- *29. Tarnished plant bug and its injury to nursery stock, by Leonard Hase-man. 1918. 26 p.
- *30. Composition of the beef animals and energy cost of fattening, by L. D. Haigh, C. R. Moulton and P. F. Trowbridge. 1919. 106 p.
31. Some factors influencing the growth of dairy heifers, by C. H. Eckles and W. W. Swett. 1918. 56 p.
- *32. Some factors favoring or opposing fruitfulness in apples, by C. C. Wiggins. 1918. 60 p.
33. Investigation in transplanting, by J. C. Whitten. 1919. 73 p.
- *34. Preservation of milk for chemical analysis, by L. S. Palmer. 1919. 31 p.

- '35. Study of the birth weight of calves. by C. H. Eckles. 1919. 11 p.
- '36. Normal growth of dairy cattle, by C. H. Eckles. 1920. 20 p.
- '37. Varietal resistance and susceptibility of oats to powdery mildew, crown rust and smuts, by George M. Reed. 1920. 41 p.
- *38. Composition of bovine at birth, by L. D. Haigh, C. R. Moulton and P. F. Trowbridge. 1920. 48 p.
- '39. Bud selection with special reference to the apple and strawberry, by V. R. Gardner. 1920. 30 p.
- *40. Seasonal changes in the chemical composition of apple spurs, by H. D. Hooker, Jr. 1920. 51 p.
- 41. Growth of Oaks in the Ozarks, by Frederick Dunlap. 1921, 28 p.
- *42. The Effect of a Varying Supply of Nutrients Upon the Character and Composition of the Maize Plant at Different Periods of Growth, by F. L. Duley, and M. F. Miller, 1921, 66 p.
- *43. Studies in Animal Nutrition, Part I, C. R. Moulton, P. F. Trowbridge, and L. D. Haigh, 1921, 111 pp.
- 44. Precipitation and Growth of Oaks at Columbia, Missouri, by Wm. J. Robbins, 1921, 21 p.
- 45. The Effect on Growth of Breeding Immature Animals, by F. B. Mumford, 1921, 37 p.
- *46. Characters Connected With Yield in the Corn Plant, by W. C. Etheridge, 1921, 17 p.
- 47. Localization of the Factors Determining Fruit Bud Formation, by H. D. Hooker and F. C. Bradford, 1921, 19 pp.
- *48. Investigations on the Hardening Process in Vegetable Plants, by J. T. Rosa, Jr., 1921, 97 pp.
- *49. Experiments in Field Plot Technic for the Preliminary Determination of Comparative Yields in the Small Grains, by L. J. Stadler, 1921, 78 p.
- *50. Certain Responses of Apple Trees to Nitrogen Application of Different Kinds and Different Seasons, by H. D. Hooker, Jr., 1922, 18 p.
- 51. The Influence of the Plane of Nutrition on the Maintenance Requirement of Cattle, A. G. Hogan, W. D. Salmon and H. D. Fox, 1922, 40 p.
- 52. Scarred Endosperm and Size Inheritance in Kernels of Maize, by Wm. H. Eyster, 1922, 11 p.
- *53. The Relation of Temperature to Blossoming in the Apple and Peach, by F. C. Bradford, 1922, 51 p.
- *54. Studies in Animal Nutrition, Part II, by C. R. Moulton, P. F. Trowbridge and L. D. Haigh, 1922, 76 p.
- *55. Studies in Animal Nutrition, Part III, by C. R. Moulton, P. F. Trowbridge and L. D. Haigh, 1922, 88 p.
- 56. Observations of Winter Injury, by F. C. Bradford, and H. A. Cardinell, 1922, 26 p.
- *57. Studies in the Nutrition of the Strawberry, by V. R. Gardner, 1922, 32 p.

BULLETINS OF THE MISSOURI SCHOOL OF MINES

These may be obtained from the librarian of the School of Mines at Rolla, Missouri.

GENERAL SERIES

VOLUME 1

No. 1, Dec., 1908. The human side of a mining engineer's life, by Edmund B. Kirby. (Commencement address, June 10, 1908.)

No. 2, March, 1909. 38th annual catalogue, 1908-1909.

No. 3, June 1909. Education for utility and culture, by Calvin M. Woodward. (Tau Beta Pi address.)

No. 4, Sept., 1909. The history and the development of the cyanide process, by Horace Tharp Mann.

VOLUME 2

No. 1, Dec., 1909. The Jackling field, school of mines and metallurgy.

No. 2, March, 1910. 39th annual catalogue, 1909-1910. Out of print.

No. 3, June 1910. Some of the essentials of success, by Charles Summer Howe. (Commencement address, June 1, 1910.)

No. 4, Sept., 1910. Friction in small air pipes, by E. G. Harris, Albert Park, and H. K. Peterson. (Continued by technical series, vol. 1, nos. 1 and 4.)

VOLUME 3

No. 1, Dec., 1910. Some relations between the composition of a mineral and its physical properties, by G. H. Cox, and E. P. Murray.

No. 2, March, 1911. 40th annual catalogue, 1910-1911.

No. 3, June, 1911. Providing for future generations, by E. R. Buckley. (Tau Beta Pi address, May 24, 1911.)

No. 4, Sept. 1911. Fall announcement of courses. Out of print.

VOLUME 4

No. 1, Dec., 1911. Fortieth Anniversary of the school of mines and metallurgy of the University of Missouri. Parker Hall memorial address. Laying of cornerstone of Parker Hall, Rolla, Missouri. October 24, 1911.

No. 2, March, 1912. 41st annual catalogue, 1911-1912.

No. 3, June 1912. Mining and civilization, by J. R. Finlay. (Commencement address, May 31, 1912.)

No. 4, Sept., 1912. Fall announcement of courses. Out of print.

VOLUME 5

No. 1, Dec., 1912. Student life.

No. 2, March, 1913. 42nd annual catalogue, 1912-1913.

No. 3, never published.

No. 4, never published.

VOLUME 6

No. 1, never published.

No. 2, March, 1914. 43rd annual catalogue, 1913-14.

No. 3, never published.

No. 4, never published.

VOLUME 7

No. 1, Never published.

No. 2, March, 1915. 44th Annual Catalogue, 1914-1915.

No. 3, March, 1915. Description of special courses in oil and gas and allied subjects.

No. 4, September, 1915. Register of graduates, 1874-1915.

VOLUME 8

No. 1, Jan., 1916. Bibliography on concentrating ores by flotation. Jesse Cunningham.

No. 2, March, 1916. 45th Annual Catalogue, 1915-1916.

No. 3, June 1916. The Business of Mining. W. R. Ingalls. (Commencement address, May 26, 1916.)

No. 4, October, 1916. Register of graduates, 1874-1916. Out of print.

VOLUME 9

No. 1, Jan., 1917. Road problems in the Ozarks. E. G. Harris, Bibliography on rural roads. H. L. Wheeler.

No. 2, March, 1917. 46th Annual Catalogue, 1916-1917.

No. 3, June, 1917. What should a present-day metallurgical education comprise? Charles Hermann Fulton. (Commercial address May 25, 1917.)

No. 4, October, 1917. Register of graduates, 1874-1917. M. S. M. men in military service.

VOLUME 10

No. 1, Jan., 1918. Student life; revised edition.

No. 2, March, 1918. 74th Annual Catalogue 1917-18.

No. 3, June, 1918. The Human side of mining engineering. James Furman Kemp. (Commencement address May 24, 1918.)

No. 4, October 1918. List of publications wanted by the Library, and of duplicates available for exchange: April 1, 1920.

VOLUME 11

No. 1, January, 1919. Never published.

No. 2, March, 1919. 48th Annual Catalogue 1918-1919.

No. 3, June, 1919. Road problems in the Ozarks; 2nd edition, revised and extended. F. G. Harris. Bibliography on rural roads. H. L. Wheeler.

No. 4, October, 1919. Register of graduates, 1874-1919.

VOLUME 12

No. 1, Jan., 1920. War service records of the Missouri School of Mines. Compiled by G. E. Elbmeyer.

No. 2, March 1920. 49th Annual Catalogue, 1919-1920.

No. 3, June, 1920 (Delayed.) Contemporary novels and novelists: a list of references. H. L. Wheeler.

No. 4, Oct., 1920. Department of Vocational Education.

VOLUME 13

No. 1, Jan., 1921.

No. 2, March, 1922. 50th Annual Catalogue, 1920-21.

No. 3, June, 1921. Training for Exploration. H. Foster Bain, (Commencement address, April 29, 1921.)

No. 4, Oct., 1921. Department of Vocational Education.

VOLUME 14

No. 1, Jan., 1922. A Symposium of Mining and Metallurgical Education. C. H. Fulton.

No. 2, March 1922. 51st Annual Catalogue, 1921-1922.

No. 3, June, 1922. Sportsmanship in Business and Public Life. A. T. Perkins.

No. 4, Nov., 1922. Register of Graduates, 1874-1922.

VOLUME 15

No. 1, Jan., 1923. Schedule of Classes. Fall of 1923.

No. 2, March, 1923. Annual Catalogue, 1922-1923.

No. 3, June, 1923. Schedule of Classes. Spring, 1924.

No. 4, Oct., 1923. Register of Graduates, 1874-1923.

VOLUME 16

No. 1, Jan., 1924. Student Life.

No. 2, March, 1924. 53rd Annual Catalogue, 1923-24.

No. 3, June, 1924. Schedule of classes. Fall term, 1924.

No. 4, Oct., 1924. Shifting responsibility. F. A. Hall. (Commencement address, May 9, 1924.)

VOLUME 17

No. 1. Jan., 1925. Register of graduates, 1874-1924.

No. 1-A, Jan., 1925. Schedule of classes. Spring semester, 1925.

No. 2, March, 1925. 54th Annual Catalogue, 1924-1925.

No. 3, June, 1925. The Engineer. P. N. Moore, Personality, opportunity and the mining engineer. J. A. Garcia.

No. 3-A, June, 1925. Schedule of classes for the fall semester, 1925.

No. 4, Oct., 1925. Student life.

No. 4-A, Oct., 1925. Broadcast pamphlet.

VOLUME 18

No. 1, Jan. 1926. Schedule of Classes, Spring Semester 1926.

TECHNICAL SERIES

VOLUME 1

No. 1, November, 1911. Friction in air pipes. E. G. Harris. (Continuation of General Series, Vol. 2, No. 4.)

No. 2, February, 1912. Metallurgy and ore dressing laboratories of the Missouri school of Mines and Metallurgy. D. Copeland, H. T. Mann, H. A. Roesler. Out of print.

No. 3, May, 1912. Some apparatus and methods for demonstrating rock drilling and the loading of drill holes in tunneling. L. E. Young.

No. 4, August, 1912. Friction in air pipes. E. G. Harris. Continuation of Vol. 1, No. 1, November, 1911.)

VOLUME 2

No. 1, August, 1915. Comparative tests of piston drill bits. C. R. Forbes and L. M. Cummings.

No. 2, November, 1915. Orifice measurements of air in large quantities. Elmo G. Harris.

No. 3, February, 1916. Cupellation losses in assaying. Horace T. Mann and Charles Y. Clayton.

No. 4, May, 1916. Geologic criteria for determining the structural position of sedimentary beds. G. H. Cox and C. L. Dake. Out of print.

VOLUME 3

No. 1, August, 1916. Experiments from the flotation laboratory. C. Y. Clayton. Out of print.

No. 2, November, 1916. Studies on the origin of Missouri cherts and zinc ores. G. H. Cox, R. S. Dean, and V. H. Gottschalk.

No. 3, February, 1917. Preliminary report on blended Portland cement. E. S. McCandliss.

No. 4, May, 1917. Studies in the production of oils and tars from bituminous materials. J. C. Ingram.

VOLUME 4

No. 1, August, 1917. The hydrometallurgy and electrolytic precipitation of zinc. F. D. James.

No. 2, November 1917. The effect of addition agents in flotation; Part I. M. H. Thornberry and H. T. Mann.

No. 3, February, 1918 Bibliography on the roasting, leaching, smelting and electrometallurgy of zinc. H. L. Wheeler.

No. 4, May, 1918. An investigation of blended Portland cements. E. S. McCandliss and H. H. Armsby.

VOLUME 5

No. 1, August, 1919. The carbonization of Missouri cannel coals. H. L. Dunlap, K. K. Kershner and V. X. Smiley.

No. 2, Nov., 1919. The effect of addition agents in flotation; Part II. M. H. Thornberry and H. T. Mann.

No. 3, Feb., 1921. Coal mining methods in Missouri. W. W. Weigel.

No. 4, May, 1921. Coal Mining Methods in Missouri. W. W. Weigel

VOLUME 6

No. 1, Aug., 1921. The Problem of the St. Peter Sandstone. C. L. Dake.

No. 2, March, 1922. Bibliography on the Electrothermic Metallurgy of Zinc. B. M. O'Harra.

No. 3, May, 1923. Our National Defense. W. W. Wanamaker.

No. 4, Aug., 1923. Experiments on the Distillation of Zinc from Complex Zinc-Lead-Silver Ores. B. M. O'Harra and E. S. Wheeler.

VOLUME 7

No. 1, Nov., 1923. I. Subterranean stream piracy in the Ozarks. C. L. Dake and Josiah Bridge. II. Ebb and flow springs in the Ozarks. Josiah Bridge.

No. 2, Feb., 1924. Meridian determination. C. E. Bardsley.

No. 3, May, 1924. Underground loading devices. C. E. van Barneveld.

No. 4, Aug., 1924. Briquetting of zinc ores. B. M. O'Harra.

VOLUME 8

No. 1, Nov., 1924. Reduction of zinc oxide by carbon. G. A. Zeller and B. M. O'Harra.

No. 2, Feb., 1925. A treatise on Missouri clays. M. H. Thornberry.

No. 3, May, 1925. A study on reinforced concrete dams. Elmo G. Harris.

No. 4, Aug., 1925. Bibliography on Zinc retorts and condensers. B. M. O'Harra.

VOLUME 9

No. 1, Nov., 1925. Engineering and research. M. S. Ketchum.

GENERAL INDEX OF PUBLICATIONS

Abbreviations used in the index to indicate the series of publications.

Extension service leaflets, Boys' and Girls' Club Circulars, Project announcements and School of Mines bulletins are not indexed.

Studies

S = Stud.
Sm = Stud. Mathematics series
Ss = Stud. Science series
Sos = Stud. Social science series
Sl = Stud. Lit and linguistic series
Sp = Stud. Phil. and edu. series

Bulletins

General Series of the bulletin not indexed.

THE UNIVERSITY OF MISSOURI

The University of Missouri stands at the head of the educational system of the state. It was founded at Columbia in 1839, and instruction in academic work was begun in 1841.

The work of the University is now carried on in the following colleges and schools: College of Arts and Science, College of Agriculture, School of Education, School of Law, School of Medicine, College of Engineering, School of Mines and Metallurgy, School of Journalism, School of Business and Public Administration, School of Fine Arts, Graduate School, Extension Division.

All divisions are at Columbia except the School of Mines and Metallurgy, which is at Rolla. Emphasis has been given particular lines of work by the establishment of minor divisions, the chief of which are the Agricultural Experiment Station, the Engineering Experiment Station and the Missouri State Military School.

The fundamental aim of the University is the development of the highest and most efficient type of citizen. The school is supported by the state and endeavors to return to the state practical service. Of late years extension courses, experiment farms, and free literature on practical subjects have widely extended the University's influence.

The University grounds at Columbia cover more than 800 acres. The main divisions are the Francis Quadrangle, the East Campus, Rollins Field for athletics, and the University Farm.

Full information regarding the University is given in the catalog, a copy of which will be sent on request without charge. For this or special bulletins of the Graduate School, College of Arts and Science, College of Agriculture, School of Education, School of Law, School of Medicine, College of Engineering, School of Journalism, School of Business and Public Administration, School of Fine Arts, or Extension Division, write to

THE REGISTRAR,
UNIVERSITY OF MISSOURI,
COLUMBIA, MISSOURI.

LIBRARY SERIES NO. 13

Facilities and Resources of the University Library for Graduate Work

by

HENRY O. SEVERANCE

Librarian, University of Missouri

Facilities and Resources of the University Library for Graduate Work

FACILITIES

The University has placed its best equipment and space at the service of graduate students. Additional seminar rooms will be provided when a new wing is added to the present central portion of the library. The circulation of "reserved" books to the underclassmen will be transferred to a room in the wing so that our present large reading room may be used for serious study.

The library already provides a limited number of seminar rooms where students may have the necessary quietness for study, concentration, books in easy reach, and accessible writing materials. Other books needed for research may be placed in the rooms within easy access of the students. For instance, if a student is investigating some phase or period of English history, he may be assigned to the Historical seminar where he will find a complete collection of the Hansard's Parliamentary debates, the English historical review and other works of a historical nature. The library grants stack permits to graduate students so that they may consult books in the stacks and decide on those which they may desire to have in the seminar. The stacks are provided with carrels on every floor where students and faculty may either consult books or study them.

The library furnished the students investigating botanical or zoological subjects a special reading room where they will find the best sets of journals and monographs and collected works on these subjects. The Medical library offers an attractive reading room, a part of which is occupied by the Medical book stacks. The Agricultural library reading room is spacious, attractive, well-lighted, and adjacent to the stacks on one side and to a research room on the other. When the law library is moved into the new Tate law building there will be nothing to be desired in library facilities on the part of graduate students in law and the social sciences. As the graduate school increases its enrollment, larger space and facilities will have to be provided for the library so that every inducement for study may be given the research student.

RESOURCES

However much adequate working conditions help the student, he cannot get anywhere without his books. Even the laboratory investigator must have his tools—the books. He may experiment on the effect of violet rays on the growth of plants, but he must know what records have been made and the results reached, the methods, if any, previously used. These he can find only in books.

The source material of the library is adequate in some lines of study but deficient in others. Large additions in all lines would make the collection more valuable. Students who may wish to study the history of music or missions in the Philippine Islands would find the library inadequate to their needs, but the student who may investigate political conditions in France during the

Middle Ages would have sufficient material. Our best university libraries such as libraries of Harvard and Yale are deficient in some line of research. They must borrow books from other libraries. No library is sufficient unto itself. Libraries are beginning to specialize in certain lines. They are not trying to cover the whole field of knowledge but are cooperating with other libraries in the same region in the purchase of expensive sets of books. For instance, Washington University, St. Louis, has purchased a complete set of Migne's *Patrologia*. The University of Missouri library will not buy this set but will borrow it from the Washington University library in case it is needed. Likewise the University of Missouri library has and will continue to purchase sets it can loan to Washington University library. The Union list of Serials in the libraries of the United States and Canada will facilitate the inter-library loans and decrease the necessity of the purchase of expensive sets by two libraries in the same district. Through this system of loans, the vast resources of eastern libraries are available to investigators in the University of Missouri.

The University library has a collection of more than 235,000 volumes. It has been enriched recently by the purchase of two private libraries—one on comparative law and history of mediaeval France, the other devoted to the classics. The former was the collection of Professor G. Jacques Flach, a French jurist, historian and professor of comparative legislation in the *Collège de France* from 1884 and of comparative law in the *École des Sciences politiques* from 1877 until his death in 1919. He was a research student concentrating on the history of ancient French law. His main work was *Les Origines de l'ancienne France* in four volumes. He was a native of Strassbourg and had a keen interest in collecting books and pamphlets which dealt with Alsace-Lorraine and Strassbourg. His library was therefore rich in the literature of this country, in the antiquities of France including such departments as Languedoc and of Germany, Austria-Hungary and other European countries. The collection consists of 6000 volumes of which 1300 deal with legal antiquities, comparative law, the ordinances of France, 500 volumes of French antiquities and history and 150 volumes of cartularies and diplomatics and 400 volumes on the history and antiquities of Alsace-Lorraine.

The second library was the private collection of Professor Paul Lejay, a French scholar and professor of classical literature and language in the Catholic Institute of France and editor for many years of the *Revue Critique*. He accumulated a library of 6000 volumes of which 3000 were in the field of the classical language and literature. He had 200 volumes on and by Cicero, 100 each on Horace and Virgil and from 25 to 90 volumes each on Livy, Lucretius, Lucan, Ovid, Plautus and Pliny. Edouard Champion writing about the Lejay library stated: "There are all the best editions of Horace and Virgil published by our old France, so fond of classics. There are many works published by the learned men of the XIX century in either French or German, such as dissertations on general and particular subjects, syntax, and grammar from the classics of even the *Poetae Minores*. In short there are all the classic collections from France, Germany, England and America that could be put together in the 30 years' life of a constant collaborator of the *Revue Critique*, (who became a member of the Institute, and was always fond of books, periodicals, pamphlets, several of them annotated with his own handwriting".

Bibliographical Aids.—No library is sufficiently equipped for research work which does not contain the standard and many special bibliographical works. The University library has the national bibliographies of France,

Great Britain, Germany, Italy, and of the United States. The Publications of the Bibliographical Society of America and of the Oxford Bibliographical Society are here complete many publications of the Bibliographical Society of Great Britain also are here. It possesses the Evans Bibliography 1639-1794 of early printing in the United States, and the *Bibliotheca Britannica* by Watts, and the Bibliographies of special subjects such as *Bibliotheca Chemica-Mathematica*, Bradley's Bibliography for botanists, Rothschilds' *Bibliographica Lactaria* for the dairy student, Avery's Architectural library, Gallard's, *Biblioteca Espaniola* for the Spanish student, Fabricius, *Bibliotheca Graeca* for the classicist, and for the historians, Chauvin's *Bibliographie des ouvrages Arabes*, Potthast, *Bibliotheca historica medii aevi* and many others. Another enterprise of great service is the catalog of the books, periodicals, pamphlets, and music in the Library of Congress. The catalog printed on cards may be found in regional libraries, of which the University of Missouri library is one. This catalog makes available for research the vast collection of books in the Congressional library, although the books may be borrowed for Faculty members only. Another bibliographical tool which will be invaluable for the student in locating material is the Union List of Serials in the libraries of the United States and Canada. The provisional edition has been distributed. The work in its final form will appear in 1927. This shows the holdings of the larger libraries throughout the United States and Canada. It will facilitate the location of material and the loan of it to scholars.

Philosophy and Psychology.—The field of philosophy and psychology is well covered. The library has more than four thousand volumes on these subjects of which a thousand volumes are devoted to psychology and one thousand volumes to modern philosophy. The ancient and modern philosophers and psychologists are represented by their published works and by works written about them. The current literature in the field of philosophy will be found in journals, transactions, and proceedings of learned societies. The library receives currently forty-six periodicals in this field, representing the contributions of France, Germany, Great Britain and the United States. Psychology is becoming an experimental science and requires a laboratory as well as a library. Twenty-three of our journals are devoted to various phases of psychology. The library has recently added three hundred volumes on philosophy from the private library of Dr. William Benjamin Smith, formerly professor of Philosophy in Tulane University.

Religion.—In the field of religious literature the library is strong in church history, Bible school and missionary work, and in editions of the Bible, parts of the Bible, and works about the Bible. The library purchases few books in this field as there is no chair of religion in the University. The collection has been accumulated largely through gifts. However, nearly eight hundred volumes on theology and religious history were added through the purchase of the private library of Professor Lejay. This makes a total of 4500 volumes in the field of religious literature. The library possesses the standard dictionaries and encyclopaedias including the Catholic encyclopaedia, the Jewish encyclopaedia, Hastings Encyclopaedia of religion and ethics, his dictionaries of the Gospels and of the Apostolic church, and the *Real encyklopaedie für praktische theologie*. The library has also the *Acta Sanctorum ordines s. Benedicti 1668-1701*, the *Acta Sanctorum* ed. Bollandus 1863-1897; Dugdales' *Monasticon Anglicarum*, Mueller's Sacred books of the East, and the Babylonian Talmud. It has the works of the church Fathers and of such men as John Owen, John

Knox, Thomas Smyth, Joseph Bingham, Richard Hooker, John Huss, John Calvin, John Wycliffe, Bishop Cranmer and Martin Luther and of such modern divines as Phillips Brooks, Cardinal Newman, Augustus H. Strong and Adolph Harnack. The collection has recently been enriched by the gift of the William Benjamin Smith library in which there were nine hundred volumes of religious literature. In this collection were several translations of the Bible and reproductions of several celebrated codices of the Old and the New Testament such as: The Senaitic Codex discovered and edited by Tischendorf, Codex Ephraemi Syri Rescriptus, Codex Claromontanus, Beza Codex Cantabrigiensis, Codex Amiatinus. There is the Curetonian version of the Four Gospels, The Testament of the Twelve Patriarchs, the sons of Jacob; the works of Philo Judaeus; of Clement of Alexandria; Specilegium S. S. Patrum ut et Haereticarum; and the very rare work—Novum Testamentum Graecum edited by J. J. Eestiniun in two volumes, and many works on the life, letters and theology of St. Paul. The library is therefore better equipped in religious literature than many theological seminaries are.

Sociology.—Sociology is a comparatively recent science. Since the subject was introduced into the curriculum of the universities about twenty-five years ago, the literature of the subject has accumulated rapidly. The sociologist considers his field to cover ancient and modern civilization, philosophy and psychology, history, ethnology, anthropology, biology, eugenics, labor and the laboring classes, philanthropy, criminology and many other subjects. In short, his field covers the origin and the development of society from primitive times to our very complex organization of the present. In the restricted fields of rural and urban society, socialism, ethnology, anthropology in the study and care of the unfortunate, crime, prisons and the like, the library is well equipped, having more than 4000 volumes including the standard works and source material. It has a special collection of books on ciminology including the greater and the lesser trials in courts, presented by the Late J. D. Lawson, for many years dean of the Law School, University of Missouri. The collection is known as the Lawson library. There are several thousand pamphlets and books dealing particularly with criminal trials. It was the Judge's working collection for the compilation of his great work: *American State Trials*. The riches of this collection containing many rare brochures and books have not been exploited. It awaits the arrival of a research student who may be interested in this important subject. Thirty-six periodicals on sociological subjects currently received in the library, cover the modern movements in the field of sociology.

Education.—Seventy-five hundred volumes on Education not including allied subjects, furnish a working library for the educator and the teacher but it cannot be so comprehensive as the special collections on education as the Penniman Library University of Pennsylvania or the educational collection of the Teachers College of Columbia University. However, the various fields of education, and the modern movements in education are sufficiently well covered as to make it possible for students to pursue their investigations. The collection is rather full of material on the history and philosophy of education, school organization, administration and supervision, on secondary and university education and on the methods of instruction. There are more than 2500 volumes on public education including the public education in the several states and in foreign countries. There are one thousand on methods, study, and teaching. Current educational thought covers a wide range. The essen-

tials of it may be found in some of the forty-four educational journals currently received in the library.

History and Political Science.—A student pursuing a line of research in political science will find that his investigations will take him into the field of history, economics, and sociology. The same statement is true in regard to a research problem in history. The material in the fields of history and political science overlaps. For example, the Parliamentary papers of Great Britain and those of Poland and France are used by students in history, political science, and economics, although they are classed with political science material.

The University library is undoubtedly better equipped in the field of history and political science than in any other broad field of investigation, except that of the sciences.

History of Missouri.—The research student working in the field of Missouri history, government, education, natural resources, will find in the State Historical Society, a collection of material second to none in the state. This collection is located in the University library building and is available to university students.

United States History.—The library contains 4000 volumes on United States history but is inadequate for research work. The works of American statesmen as well as the standard historical periodicals and the publications of historical society may be found on its shelves.

European History.—The library has a large collection of historical literature on Europe, especially on Great Britain and France. A considerable amount of research has been carried on in Contemporary Europe and world politics. The Flach library previously mentioned added many volumes to our large collection on the history and description of France. The library has the following titles of source material of the middle ages, listed in Potthast's *Bibliotheca historica medii aevi*:

Acta Sanctorum (Benedict)

Acta Sanctorum (Bollandus)

Baluzius *Histoire des capitulaires des rois français*

Bibliothek des litterarischen verein in Stuttgart

Camden Society. Publications

Chroniken des deutschen städte. (partial set)

Corpus Scriptorum ecclesiasticorum Latinorum

Goldast. *Collectio constitutionum imperialis*

Michaud. *Nouvelle collection des mémoires pour servir a l'histoire de France*

Migne. *Patrologiae Latinae* (partial set)

Monumenta Germaniae historica

Recueil des historiens des croisades

Scriptores rerum Germanicarum

Great Britain.—For twenty years courses in English history have been given in the University. The collection of books has grown according to the requirements of the courses of study and now contains works of great importance. The library has complete sets of Hansard's parliamentary debates, the *Chronicles and Memorials of Great Britain*, the "Blue books" or British Parliamentary papers from 1921 to date, the *English historical review*, *Journal of the Parliaments of the Empire*; *Round Table*, *Scottish historical review*, *Camden's Britannica*, *Historical Mss. reports*, *Harleian Miscellany*, *Domesday book*, *Camden society* and others.

France.—The library is well equipped with literature on the history of France, especially the early history and the history of the provinces such as Lanquedoc. Some titles of important source material are:

Recueil des historiens des Gaules et de la France
 Société de l'histoire de Paris. Bulletin and memoirs
 Société de l'histoire de France. Publications.
 Mémoires relatifs à l'histoire de France
 Archives parlementaires 1787-1866
 Michelet. Histoire de la révolution Française
 Michelet. Histoire de France
 Collection de documents inédits sur l'histoire de France
 Histoire littéraire de la France

It has four hundred volumes on the history and antiquities of Alsace-Lorraine; 1300 volumes on the legal antiquities, comparative law and ordinances of the kings of France; and 150 volumes of cartularies.

Political Science.—The library is especially rich in the field of public law and comparative legislation, as indicated in the description of the Flach library. In addition to the material in the Flach library, the library has secured a complete collection of the publications of the League of Nations and the World Court, a complete set of Marten's *Recueil des traités d'alliances de Paix de trêve*, 94 volumes, Marten's *Recueil des traités et conventions conclus par la Russie avec les puissances étrangères*, 12 volumes, complete set of Hansard's parliamentary debates, the Parliamentary history of England from the earliest period to 1803, Parliamentary papers of Great Britain from 1921 to date, Archives parlementaires (France) 1787-1860, and *Journal officiel de la République Française* 1919 to date. A few titles of periodicals will indicate the strength of the library in history and political science. Practically all the sets are complete.

American historical review
 American journal of international law
 American journal of political science
 Annals of the American academy

 Zeitschrift fuer geschichtliche rechtswissenschaft
 Zeitschrift fuer internationales recht (niemeyer)
 Zeitschrift für vergleichende rechtswissenschaft

The library receives 70 periodicals currently in this field.

Commerce and Economics.—The library is well equipped with literature in the important subject of capital and labor. The library has been receiving for twenty years the official publications of labor organizations such as the Bridgemen's magazine, the Carpenter, the Typographical journal and many others. It has the reports on labor conditions published by the several states, the Federal government, by foreign governments, and all the important labor journals. It contains the insurance reports of all the states and reports, the railways reports of the several states, and the publications of Interstate Commerce Commission and the controversial pamphlets and books on the mooted railway questions. The literature covers also the subjects, money, credit, banking, public finance, protection and free trade, production, manufacturing, prices, corporations, and others. There are 10,000 volumes, hundreds of pamphlets and all the important economic journals in the collection. The research student in economic subjects will find a large collection of material awaiting him.

Literature

1. *American Literature.*—Very little graduate work has been done in this University in American literature. The collection is not large but it contains complete works of the main writers such as Hawthorne, Irving, Henry James, Longfellow, Lowell, Poe, Riley, Thoreau, Whitman. The State Historical Society library, housed in the same building with the University, has a rather complete collection of the writings of Eugene Field and Mark Twain. The Twain collection was recently enriched by the addition of the library collected (over a period of years) by Purd B. Wright, Librarian of the K. C. Public Library. Cambridge history of American literature and the histories by Richardson and Moses Coit Tyler, and Wendell; Library of American literature by Stedman and Hutchinson, Library of the world's best literature by Warner, and the Library of literary criticism by Moulton are a few of the books of a general nature. The language and literature journals cover several languages and are listed under English language and literature.

2. *English Language and Literature*.—English literature is a large field and has numerous subjects worthy of the consideration of research students. In many divisions the material is adequate but not so large as desired. The journals and publications of societies fairly represent the philology and literature of this field. The material in the journals, such as the *American Journal of Philology* and *Modern philology*, covers not only the English language but also the romance and classical languages. The library has the publications of the several universities in philology and literature and the majority of the philological journals published, including such titles as the *Modern language association publications*, *American philological Association*, *proceedings*, *Poet lore*, *Poetry*, *Drama*, *Anglia*, *Bonner beiträge*, *Wiener beiträge*, *Yale studies in English and Early English text society*, publication. The library possesses the complete works of all the standard authors and in many cases the books of criticism, and lives of the authors, various editions, translations and the like. The library is equipped to furnish material for research work on Browning, Chaucer, Defoe, DeQuincy, Dickens, Dryden, George Eliot, Fielding, Bulwer Lytton, W. H. Hudson, Ruskin, Scott, Stevenson, Swift, Tennyson, Milton, Spenser and Wordsworth. The library has several choice editions of Milton such as poetical works, edited by Brydges, 1862.

Poetical works	ed. by Mitford 1851	8 volumes
Poetical works	ed. by Hayley, 1794-97	3 volumes
Poetical works	ed. Montgomery 1843	2 volumes
Poetical works	ed. by Todd 1801	6 volumes
Poetical works	ed. by Gilfillan 1853	2 volumes
Paradise regained	ed. by Dunster 1795	
Prose works	ed. by Symmons 1806	

There are several good editions of Edmund Spenser and a concordance to his works.

Poetical works	First Am. ed.	1839	5 volumes
Poetical works		1866	5 volumes
Poetical works	ed. Gilfillan	1859	5 volumes
Poetical works	Grosart	1882-4	9 volumes
Works		1715	6 volumes
Works	ed. by Todd	1805	8 volumes
Works	ed. by Collier	1873	3 volumes

The editions of Wordsworth are not so numerous as those of Spenser but in addition to his works the library has a complete set of the transactions of the Wordsworth Society. Some of the important editions are:

Poems	ed. by N. C. Smith	1908	3 volumes
Poetical works	New ed.	1849-50	6 volumes
Poetical works	(British poets)	1854	7 volumes
Poetical works	ed. Dowden	1892-3	7 volumes
Poetical works	ed. Knight	1896	8 volumes
Prose works	ed. by Wm. Knight	1896	2 volumes

Shakespeare.—The library has more than 500 volumes on Shakespeare and Early English drama, including the *Materialen zur kunde des älterer Englische drama*. The publication of the Shakespearean Society, the new Shakespeare Society, the Shakespeare Jahrbuch, Dodsley's old English plays,

lexicons and concordances, are helpful to the research student in this field. Some of the editions of Shakespeare important for research study are:

Works	Ed. by R. G. White 1901	6 volumes
Works	Ed. by Porter & Clarke 1903	12 volumes
Works	Ed. by Halliwell 1850-53	2 volumes
Works	The Leopold Shakespeare	
Works	New variorum ed. by Furness 1871-1913	18v.
Works	Ed. by J. P. Collier 1853	8 volumes
Works	Ed. by Dyce	7 volumes
First folio facsimile	ed. by Halliwell-Phillipps 1887	
Works	Ed. by Knight. Illustrated	2 volumes
Works	ed. by W. A. Wright 1891-93	9 volumes
Boydell's Illustrations of Shakespeare's plays. Am. ed.		2 volumes.

The library has also a creditable collection of ballads and folk songs including Publications of the Ballad Society, 38 vols.; Child's English and Scottish ballads; Percy, Ballads and Romances; Scott, Minstrelsy of the Scottish border; and publications of the Folk song society.

Romance Language and Literature.—The library is well equipped with material for the study of the history of French literature and for the literature of the early period. There is sufficient material for a study of Dumas, Hugo, Molière, Sainte Beuve, George Sand, Sue, and Voltaire. For the study of the language the Atlas linguistique recently acquired is indispensable. The library has a complete set of the publications of the Société des anciens textes, Bibliothèque du 15 siècle, Gesellschaft für romanische literatur and others. All the important journals devoted to the languages and literatures of France, Italy a Spain may be found on the library shelves.

Germanic Language and literature.—The collection of German literature is not large but it is well selected. All the important writers are represented by one or more editions of their complete works. One would find Fontane, Freytag, Grillparzer, Hauptmann, Hebbel, Heine, Herder, Heyse, Keller, Lessing, Rosegger, Schlegel, Tieck, and others on the shelves. Goethe is represented by six complete editions of his works—165 volumes. There are two extended lives of Goethe—Bieschowsky in 3 volumes. Dünster in two; the Jahrbuch and Schriften of the Goethe Gesellschaft and many editions of separate works, books of criticism etc. Schiller too is represented by six editions of his works, besides many separate works, lives and criticisms. Then there is Kürschner, Deutsche national litteratur, a collection of the works of German authors. The important journals dealing with the German language and literature are also here: thirty-three of them are currently received.

Classical Literature.—The library's collection of books on classical languages is quite complete and is one of the best. The collection was enriched in 1921 by the purchase of the private library of Paul Lejay, a well known French Scholar, and professor of the Classica in the Catholic Institute of Paris. It was his working collection in classical literature. Nearly 3000 volumes on this subject was added to the library's good collection. He had 200 volumes on and by Cicero, 100 each on Horace and Virgil—and from 25 to 90 volumes each on Livy, Lucretius, Lucan, Ovid, Plautus and Pliny. Edouard Champion writing about this Lejay library said: There are all the best editions of Horace and Virgil published by our old France, so fond of classics. There are here all works published by the learned men of the XIX century either French or German, such as dissertations on general and particular subjects, syntax,

grammar from the classics of even the *poetae minores*. In short the student may consult all the classic collections from France, Germany, England, and America that could be put together in 30 years' life of a constant collaborator of the *Revue Critique*, who became later a member of the Institute, but always fond of books, periodicals, and pamphlets, several of them annotated with his own handwriting."

In addition to the books and pamphlets the library has practically all the classical Journals, 37 being received currently. The research student therefore has at hand the resources for many lines of research in the literature and language of the ancient Greeks and Romans, and in ancient history as well.

Science.—The research work in the sciences is conducted in the laboratories supplemented by the information in books. The scientific research worker, therefore, doesn't use so many books as the researcher in the humanities makes use of. In the field of literature and history, the library is the laboratory. Research students have been more active in science than in literature, hence, we find that the library contains more books in science than it does in literature. The purchases have been made according to the demands for both graduate and undergraduate work.

The important sets of works such as the *Comptes rendus* of the *Academie des sciences*, the American, Australian and British associations for the advancement of science, the Philosophical Society of Glasgow, Royal societies of Canada and London, the Philosophical magazine, and the New Zealand institute may be found on the shelves of the library.

The library is well equipped in the several subdivisions of science. Mathematics is represented by 2500 books and 30 current magazines published in France, Germany, Italy, Great Britain, Japan, the United States, and several other countries. The collected works of such mathematicians as Cayley, Euler, Hill, Brahé, Darwin and Galileo, are in the collection.

In astronomy the working collection is in the observatory. The collection includes the publications of all the medium and large observatories in the world. The records and the results of observations throughout the world and the important works of astronomers are available for research work.

In Physics, too, the books supplement the experimental work, Poggen-dorf's *Annalen* and the publications of the English and German physical societies are available. So also are the works of Chwolson, Clerk Maxwell, Sir William Thompson, Lord Rayleigh, C. G. Stokes, P. G. Tait, and Winkleman.

In Chemistry, another field of experimental work, the results of research are available in the back files and current numbers of the 25 journals currently received and those which have ceased publication. The proceedings, transactions, and journals of the English, French, German, and American Chemical societies are available in the Library. There are 4500 books in the Chemical section of the library, awaiting-exploitation by the research student. Students in Geology will find the publications of the United States geological survey and those of the several states available. They will find also nearly 4000 books and 27 current magazines dealing with the geology of the various countries, with physical and economic geology, with oil and gas productions, with mineralogy and paleontology. The field of biology has been worked for 25 years back. There has been a gradual accumulation of books and sets of journals so that now the Biological laboratory is one of the best equipped on the campus. All the leading journals are on file in the laboratory which for the most part are complete from the beginning. The total number of books available for re-

search work in botany and zoology is 5000 special and 5000 general works of science. The private library of the late Dr. Lefevre and his collection of several thousand reprints were purchased by the University and placed in the Biology library. The list of journals devoted to botany and zoology follows. There are others in general science not included which have articles on these subjects.

BIOLOGY ZOOLOGY BOTANY

Acta zoologica
American journal of botany
American microscopical society. Trans.
Annales des sciences naturelles botanique

THE AGRICULTURAL LIBRARY

The facilities for research in Agricultural subjects are second to none on the campus. The library occupies a commodious reading room, well lighted and well ventilated on the second floor, south side of the new Agricultural Building. Opening out of the reading room to the east is a large stack room containing 17000 volumes and room for tables for private study. On the west of the reading room is a seminar where the library's large collection of 9000 volumes of Herd books is shelved.

The collection of the publication of the U. S. Department of Agriculture of the several state boards of Agriculture and of the Agricultural Experiment Stations of the various states and of foreign countries is quite complete. If the research student wishes information on any phase of agriculture in Italy, France, Germany, Hawaii, South Africa, India, Japan Brazil, and other countries he will find it in the Agricultural Library. The library is well supplied, with books, periodicals, reports and the like on fruit growing, on soil fertilization, on insects and insect pests, on dairying, on poultry raising, on horses, on cooperative marketing, on questions of rural life, on landscape architecture. It has a complete file of the publications of the International Institute of Agriculture, a complete set of Sargent, Silva of North America, and of Wytsman, Genera insectorum, Nearly 200 periodicals are currently received, exclusive of government and Experiment Stations publications.

LAW LIBRARY

When the Law Library is housed, in the new Law building, it will offer adequate facilities for research work. Many text books have been written from its source material. It has 25,000 volumes now and is supplemented by several thousand volumes in the General Library on comparative law and on legal antiquities described above.

The library contains the complete series of the reports of the Supreme Court of the United States and of the Federal, District, Circuit, and Appellate courts and the reports of circuit and supreme courts of all the states, also the American decisions, the American reports, Lawyers reports, a complete file of the Reporter system, all of the Shepard citations of the national reporter system which are procurable, a collection of English ruling cases and a large collection of English reports, also complete sets of nearly all of the legal journals, both American and English, and a large collection of the latest and best text books.

MEDICAL LIBRARY

Medical library was recently moved into the new addition to the Medical building where there is ample room for study and for books. There are nearly 10,000 volumes in the collection supplemented by 5,000 in the General library. Special attention has been given to the securing of all the important medical journals and to the completion of our journal files. Purchases have been limited practically to departments of Medicine: Anatomy, Physiology and Pathology and Public Health. These fields are well covered in the periodical literature. It receives currently 138 medical journals for which subscriptions are paid annually. With few exceptions the library has complete files of its journals, many of which are rare. Virchow's *Archiv für path. anatomie* and Pflüger's *Archiv für die gesamte physiologie* are two of the most valuable periodical sets in the collection. In the field of physiology, there are twenty-one primary journals and as many more devoted to other fields which have articles in some phase of physiology. Professors in the medical school have found the resources of the library quite adequate to their needs. Sources not in possession of the library may be borrowed from other libraries for the research student.

ENGINEERING LIBRARY

The Engineering library is equipped for graduate work in chemical, civil, electrical, and mechanical engineering. The library receives currently 112 professional journals, many of which are either complete from the beginning or have long runs.

JOURNALISM LIBRARY

Considerable graduate work has already been done in the field of Journalism. The library possesses about 2,000 volumes and receives currently nearly five hundred magazines and newspapers. The library subscribes to one hundred and thirty periodicals and one hundred and three newspapers. The literature of Journalism is not yet very extensive. This library has much of the best. With a generous amount of money for annual purchases, the library may become in a few years the best of its kind.

.

THE UNIVERSITY OF MISSOURI

The University of Missouri stands at the head of the educational system of the state. It was founded at Columbia in 1839, and instruction in academic work was begun in 1841.

The work of the University is now carried on in the following colleges and schools: College of Arts and Science, College of Agriculture, School of Education, School of Law, School of Medicine, College of Engineering, School of Mines and Metallurgy, School of Journalism, School of Business and Public Administration, School of Fine Arts, Graduate School, Extension Division.

All divisions are at Columbia except the School of Mines and Metallurgy, which is at Rolla. Emphasis has been given particular lines of work by the establishment of minor divisions, the chief of which are the Agricultural Experiment Station, the Engineering Experiment Station and the Missouri State Military School.

The fundamental aim of the University is the development of the highest and most efficient type of citizen. The school is supported by the state and endeavors to return to the state practical service. Of late years extension courses, experiment farms, and free literature on practical subjects have widely extended the University's influence.

The University grounds at Columbia cover more than 800 acres. The main divisions are the Francis Quadrangle, the East Campus, Rollins Field for athletics, and the University Farm.

Full information regarding the University is given in the catalog, a copy of which will be sent on request without charge. For this or special bulletins of the Graduate School, College of Arts and Science, College of Agriculture, School of Education, School of Law, School of Medicine, College of Engineering, School of Journalism, School of Business and Public Administration, School of Fine Arts, or Extension Division, write to

Check List of Student Serial Publications

by

JOHN H. DOUGHERTY

Assistant Librarian, University of Missouri

PREFACE

This list includes periodicals currently received in the University Library in 1926. The numbers following the titles indicate the holdings of the library. For instance, the entry "Atlantic Monthly 1+" indicates that the file is complete from volume one to date. Titles of publications appearing annually are not included. The purpose of the list is to facilitate the location of periodicals and to answer the question, what volumes or what years of the periodical are available in the University Library? Faculty, students and non-resident readers will find the list useful. The alphabetical list is followed by the list of periodicals currently received in the branches. The second part of the bulletin contains a check list of the student serial publications. The holdings of the University library and of the State Historical Society library are indicated by M and H respectively. If any of the alumni have copies of these titles lacking in the Library files and would present them to the Library, complete files could be preserved.

The following abbreviations are used to denote locations of the periodicals. All titles are in the main library except those indicated by an abbreviation.

- Ag.—Agricultural library
- B—Biological library
- E—Engineering library
- H. E.—Home economics office
- J—Journalism library
- L—Law library
- M—Medical library
- O—Observatory
- V—Veterinary
- #—Indicates the title has not been bound.
